

19-EA-040

Memorandum

Date: February 14, 2019

Omaha Public Power District, North Omaha Power NOS Ash Disposal Area, NDEQ Permit No NE005439, Facility ID No. IWM 59763

On behalf of the Omaha Public Power District (OPPD) and in accordance with the U.S. Code of Federal Regulations, Title 40, Part 257.95(g), this letter serves as notification that one or more constituents in Appendix IV is identified at a Statistical Significant Level exceeding the Groundwater Protection Standard. The constituent for the North Omaha Station Ash Disposal Area that exceeds the Groundwater Protection Standard is Arsenic, Selenium, Cobalt, Lithium, and Molybdenum. OPPD is identifying if an alternate source demonstration will determine if Assessment of Corrective Measures is required. OPPD is planning to clean up releases from CCR pursuant to Title 40, Part 257.96, Assessment of Corrective Measures.

Pursuant to Title 40, Part 257.105(h)(8), "Within 30 days of detecting one or more constituents in appendix IV to this part at statistically significant levels about the groundwater protection standard, the notification as required by 257.95(g)." This documents hereby satisfies this requirement.

Pursuant to Title 40 Part 257.106(h)(6), "Provide notification that one or more constituents in appendix IV to this part have been detected at a statistically significant levels about the groundwater protection standard and notifications to land owners specified under 257.105(h)(8)." OPPD owns the land in and around the affected area and is hereby notified.

Pursuant to Title 40 Part 257.107(h)(6), "The notification that one or more constituents in appendix IV to this part have been detected at statistically significant levels above the groundwater protection standard and notifications to land owners specified under 257.105(h)(8)." This document will be available on the OPPD CCR internet site on March 16<sup>th</sup>, 2019.
