

ECO24/7SM

ENERGY • COMMISSIONING • OPTIMIZATION

engineers, and whenever possible, customer-selected contractors and preferred vendors.

ECO 24/7 services have been available to OPPD customers since 2002. Since that time, projects have resulted in substantial energy savings of up to 50 percent. Many buildings have attained ENERGY STAR® status after project completion and have sustained that status

Cut whole building energy 20-50%. Improve comfort. Reduce maintenance.

ECO 24/7 optimizes energy use and identifies cost-effective retrofits. It is a combined effort between Bes-Tech Inc. and OPPD, your energy partner.

Features

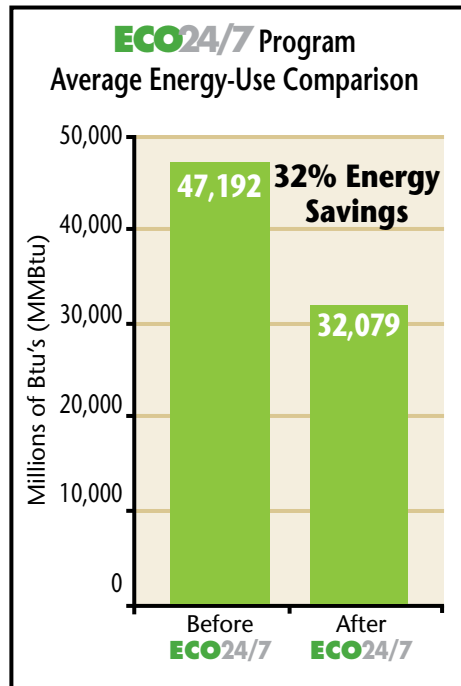

- » Implementation of specialized HVAC control technologies
- » Use of existing building systems whenever possible
- » Extensive experience and credentials
- » Project-specific training and support
- » Direct access to world-renowned commissioning experts

Who implements these projects?

The ECO 24/7 team consists of commissioning experts from Bes-Tech Inc. and OPPD project

due to the training provided during the process.

Similar results can be achieved by implementing an ECO 24/7 project in your facility.

Benefits

- » Resolves operating problems
- » Improves comfort
- » Optimizes energy use
- » Reduces upgrade costs
- » Identifies optimal retrofits
- » Proven results
