*Information for electrical contractors, architects and consulting engineers*

**NOVEMBER 2016**

## **UNDERGROUND RESIDENTIAL SERVICES (NEW CONSTRUCTION) BUILDER INSTALLED DUCT**

Effective **January 1, 2017**, **all** new underground residential electrical services will be required to be installed in conduit. Lot owners or builders will be responsible for providing and installing a service conduit from the OPPD transformer or pedestal stub-out to the meter socket per the attached OPPD Meter Manual Specification 7.02.2. The Specification is included with this notice and can also be found on OPPD.com at [www.oppd.com/MeterManual](http://www.oppd.com/MeterManual). OPPD will continue to provide the service wire from the meter socket on the dwelling unit to OPPD's nearest point of power supply.

For the most current copy of the metering manual, go to [www.oppd.com/MeterManual](http://www.oppd.com/MeterManual).

OPPD Service Center and Electrical Service Designer contact information is available at [www.oppd.com/ESD](http://www.oppd.com/ESD).

We value your partnership in providing electrical service to our customer owners. We also welcome your feedback. Email us at [Contactor@oppd.com](mailto:Contactor@oppd.com).
