

Omaha Public Power District Commercial Paper Memorandum

The posting of this Commercial Paper Memorandum is for informational purposes only and does not constitute an offer to sell nor a solicitation of an offer to buy any security. Such offers can only be made through a licensed broker-dealer where lawful under applicable law. This Memorandum has been published in the United States for residents of the United States and is not intended for use by, or to provide any information to, investors outside of the United States.

TERMS OF THE DISTRICT'S COMMERCIAL PAPER

This Memorandum is issued by Omaha Public Power District ("OPPD" or the "District") in connection with the issuance from time to time of its Commercial Paper. The District has a Commercial Paper Program (the "CP Program"), which is comprised of subordinate notes of the District (the "Notes") with maturities ranging from 1 to 270 days. Liquidity support for the CP Program is provided primarily by the District's internal resources. However, the District has entered into two Credit Agreements (collectively, the "Credit Agreements", individually, each a "Credit Agreement") described below. The Credit Agreements are not dedicated lines of credit for the exclusive support of the CP Program, but are intended, in part, to provide additional liquidity resources to the District. The commitments of the banks under the terms of the Credit Agreements are not dedicated to the payments due and payable on the Notes from time to time. Further, the commitment to make advances pursuant to the Credit Agreements, may be terminated by the banks upon notice to the District at any time without notice or payment to investors upon the occurrence of an Event of Default thereunder. **Prospective investors should base their investment decision primarily on the credit quality of the District, rather than on that of the banks.**

The Notes, together with Subordinated Bonds, and the Credit Agreements, will be payable from and secured pari passu by a pledge of and lien upon the revenues, income, receipts and profits of the Electric System ("Revenues"), subject to the prior lien thereon and pledge thereof for payment of the District's Electric System Revenue Bonds ("Senior Bonds") issued pursuant to the District's Resolution No. 1788 (as amended and supplemented from time to time, "Resolution No. 1788") and subject also to the prior payment from the Revenues of the operations and maintenance expenses of the Electric System. As of October 31, 2022, the Senior Bonds were outstanding in the principal amount of \$1,935,320,000. The District may, under certain circumstances, issue additional debt which is superior to, on a parity with or subordinate to the Notes. The District's Board of Directors may, from time to time, authorize increases or decreases in the size of the CP Program. The commitment under the first Credit Agreement with Bank of America ("BoFA") is \$250 million, and there were no amounts outstanding as of October 31, 2022. The commitment under the second Credit Agreement with Wells Fargo Bank is \$200 million and there were no amounts outstanding as of October 31, 2022. The current authorized amount of the Notes is \$350 million, of which \$250 million is outstanding as of the date hereof. The Notes are issued for valid corporate purposes, in denominations of not less than \$100,000 and maturing no more than 270 days from the date of issuance, but in no event shall Notes in a principal amount in excess of the available commitments under the Credit Agreements be scheduled to mature after the date of termination of a Credit Agreement. Interest on the Notes is calculated on the basis of a 365-day year.

The Notes are issued in book-entry form through the facilities of The Depository Trust Company ("DTC"), in the form of a single Note registered in the name of Cede & Co. as nominee of DTC. Payment of the principal of and interest on the Notes shall be made in accordance with the provisions of the resolution authorizing the CP Program (the "Note Resolution") to the account of Cede & Co. on the maturity date of such obligation.

On September 21, 2010, the District and BofA entered into the first Credit Agreement (the “BofA Credit Agreement”). On October 30, 2022, the BofA Credit Agreement was amended and restated, extending the BofA Credit Agreement through January 1, 2026. On June 1, 2021, the District and Wells Fargo Bank entered into a Credit Agreement for \$200 million that extends through May 31, 2024. (the “Wells Credit Agreement”). The Wells Credit Agreement provides that funds may be drawn thereunder for valid corporate purposes including, but not limited to, repaying maturing commercial paper of the District. See Appendix A for disclosure information relating to BofA and Wells Fargo Bank. Amounts available under the Credit Agreements in excess of the aggregate outstanding principal amount of the Notes may be drawn by the District for other purposes of the District as permitted by the Credit Agreements. As indicated above, the Credit Agreements are not, by their terms, dedicated for use in support of the CP Program. Each Credit Agreement provides that funds may be drawn thereunder for valid corporate purposes of the District including, but not limited to, repaying maturing commercial paper of the District. The District has covenanted in the Note Resolution to maintain the available commitment under the Credit Agreements, collectively, in an amount equal to or greater than the aggregate outstanding principal amount of the Notes from time to time.

Under the terms of the Credit Agreements, the banks may terminate their commitment to make loans (without notice or payment to investors) to the District following an “Event of Default” under the Credit Agreements. Events of Default under the Credit Agreements include, generally: (a) non-payment; (b) failure to perform Credit Agreement covenants after applicable notice and cure periods, if any; (c) events of default under related documents after applicable notice and cure periods, if any; (d) making materially misleading or incorrect representation or warranties; (e) certain cross-defaults; (f) insolvency proceedings; (g) inability to pay debts; (h) judgments exceeding \$10 million; (i) invalidity of certain related documents; (j) limitation of statutory power which materially and adversely affects the ability of the District to meet its obligations; (k) downgrades of the District’s unenhanced credit ratings below “Baa3” by Moody’s Investors Service or “BBB-” by Standard & Poor’s Ratings Services or suspension or withdrawal of the District’s ratings by any rating agency for credit-related reasons; (l) imposition of a debt moratorium; and (m) occurrence of an “Event of Default” under the District’s senior bond resolution.

The commitment of the banks under the terms of the Credit Agreements are not dedicated to the payments due and payable on the Notes from time to time. Further, the commitments may be terminated by the banks upon notice to the District at any time without notice or payment to investors upon the occurrence of an Event of Default thereunder. Prospective investors should base their investment decision primarily on the credit quality of the District, rather than on that of the banks.

The Note Resolution contains a covenant that, “so long as any of the Notes are Outstanding the District shall maintain, and revise from time to time when necessary, and collect such rates, rentals, fees and charges for the use and services of the Electric System as shall be sufficient . . . to pay interest on . . . the Notes when due . . . and . . . together with such moneys . . . which may be and are lawfully applied thereto, to pay the principal of the Notes as the same mature . . .” Reference is made to the Note Resolution for complete details of the covenants. The Notes have not been registered under the Securities Act of 1933, as amended (the “Act”) in reliance upon an exemption from registration under the Act. Copies of the Note Resolution may be obtained from the District by sending a written request to: Omaha Public Power District, Treasury and Financial Operations, 444 South 16th Street Mall, Omaha, Nebraska 68102-2247 or info@oppd.com.

THE DISTRICT

Nature of the District

The District was created in August 1945 under the authority of the Enabling Act as a public corporation and political subdivision of the State of Nebraska. The laws of the State provide that the District, either alone or jointly with other entities lawfully empowered to do so, may acquire, by purchase, lease or otherwise, and may operate, improve and extend electric properties and facilities and otherwise carry on the business of generating, transmitting, and distributing electric power and energy within or beyond the boundaries of the District, and may also do such other things as are necessary for carrying on a fully integrated electric power business.

The District provides electric service in the City of Omaha, Nebraska, and adjacent territory comprising all of Douglas, Sarpy and Washington counties. It also serves a portion of Cass, Saunders, Dodge, Otoe, Nemaha, Johnson, Pawnee, Richardson, Burt and Colfax counties. The area also includes the community of Carter Lake, Iowa, which is served directly from the District's Omaha distribution system. The service area is approximately 5,000 square miles with an estimated population of 853,000 as of December 31, 2021. Omaha, with an estimated population of 478,000, is the largest city in the State. The District serves 47 cities and villages at retail and four municipalities at wholesale.

For the twelve months ended December 31, 2021, the average number of customers served by the District included 346,503 residential, 48,780 commercial, 141 industrial and 13 off-system customers. For the twelve months ended December 31, 2021, the District's retail revenue (i.e., excluding off-system sales and other revenues) was derived 42% from sales to residential customers, 31% from sales to commercial customers and 27% from sales to industrial customers. The District's top ten customers represented 13% of 2021 operating revenues.

Powers of the District

The District is specifically authorized by the Enabling Act to borrow money and incur indebtedness for any corporate use or purpose, provided the moneys so borrowed shall be payable solely from the revenues, income, receipts and profits derived by the District from its ownership, operation and management of electric generating stations and systems, or from proceeds of sales of property. The District is specifically authorized to pledge all or any part of the revenues which the District may derive from the sale of electric energy as security for the payment of the principal and interest of its obligations.

Pursuant to the aforesaid authority, the resolution of the District authorizing any obligation may specify the particular revenues that are pledged, the terms and conditions to be performed by the District and the rights of the holders of such obligations. Refunding of outstanding obligations is also specifically authorized, as is the provision that all or part of the revenues may be paid into a special fund to be collected, held or disposed of, as provided in the resolution, and the resolution may provide for special depositaries for such funds. The District is prohibited by the Enabling Act from mortgaging its physical properties, except to secure loans from certain specified federal agencies. There is no mortgage on any of the physical properties of the District.

The District has no power of taxation, and no governmental authority has the power to levy or collect taxes to pay, in whole or in part, any indebtedness or obligation of or incurred by the District or upon which the District may be liable.

The District and other electric utilities are subject to numerous federal and state statutory and regulatory mandates. The Nebraska Legislature has enacted the Public Entities Mandated Project Charges

Act, which authorizes public entities in the State of Nebraska to finance mandated projects related to electrical power generation, transmission or distribution, through the use of bonds secured exclusively by revenues from a separate customer charge. If issued by the District, such mandated project bonds would be secured solely by a separate customer charge, and such charge would not be available to pay and would not secure any other debt of the District, including the Notes.

Government of the District

All corporate powers of the District are vested in a Board of Directors consisting of eight members. Each of the eight electoral subdivisions is required to be composed of substantially equal population and to be a compact and contiguous territory.

The present membership and officers of the Board of Directors are:

	Number of Years Completed on Board	Term Expires in January	Occupation or Profession
Amanda E. Bogner – <i>Chair of the Board</i>	3	2027	Business Owner
Eric H. Williams – <i>Vice Chair of the Board</i>	3	2025	Natural Resources Planner
Rick M. Yoder – Treasurer	5	2023 ¹	Consultant (Retired)
Janece M. Mollhoff – Secretary	3	2025	U.S. Army Nurse Corps Colonel (Retired)
Michael J. Cavanaugh	27	2025	Police Lieutenant, City of Omaha (Retired), – Security Contractor
Sara E. Howard	1	2027	Policy Advisor
Craig C. Moody	5	2023 ¹	Business Owner
Mary G. Spurgeon	1	2027	Educator (Retired)

President and Vice Presidents

The management of the District is under the direction of its President and Chief Executive Officer (“CEO”). The District is organized under separate operating divisions that are assigned to the CEO or a Vice President. The District’s CEO and Vice Presidents are as follows:

L. JAVIER FERNANDEZ, President and Chief Executive Officer. Mr. Fernandez joined the District in June 2017 as Vice President of Financial Services and Chief Financial Officer. He was selected by the OPPD Board of Directors to serve as President and Chief Executive Officer effective July 1, 2021. Mr. Fernandez came to the District from the Bonneville Power Administration, U.S. Department of Energy, in Portland, Oregon. He had been with the federal power marketing organization since 2012, most recently serving as Executive Vice President and Chief Financial Officer. Mr. Fernandez holds a bachelor’s degree in Economics from Instituto Tecnológico Autónomo de México in Mexico City, Mexico, and a master’s

¹ Rick M. Yoder’s and Craig C. Moody’s terms on the Board will expire on January 4, 2023. Based on uncertified results, Craig C. Moody was re-elected to serve another term and Matt Core was elected to replace Rick M. Yoder, with terms of office commencing on January 5, 2023.

degree in Business Administration from Yale University, a Utility Management Certificate from Willamette University, and a Utility Executive Certificate from the University of Idaho.

JEFFREY M. BISHOP, Vice President and Chief Financial Officer. Mr. Bishop joined the District in November 2021 as Vice President – Financial Services and Chief Financial Officer. He has over 20 years of experience in energy and consulting. Prior to joining the District, Mr. Bishop served as Chief Financial Officer for the Grant County Public Utility District in Washington state. He previously served as Chief Financial Officer of GridLiance and Seattle City Light. His utility experience also includes service at PacifiCorp, an investor-owned utility headquartered in Portland, Oregon. Mr. Bishop began his career in audit and assurance with Deloitte Touche LLP. Mr. Bishop holds a bachelor's degree in Business Administration from Washington State University, as well as a bachelor's degree in Zoology from the University of Washington. He is a licensed certified public accountant.

KATHLEEN W. BROWN, Vice President, Chief Information Officer. Ms. Brown joined the District in January 2016 as Vice President of Business Technology and Building Services (business unit name subsequently changed to Technology & Security). Ms. Brown has over 20 years of prior business technology experience in the retail and manufacturing industries including Best Buy, Oriental Trading Company and most recently at Warren Distribution where she was Vice President of Human Capital and Business Systems. Ms. Brown holds a bachelor's degree in Zoology from the University of Wisconsin, Madison and masters' degrees in Management Information Systems and Business Administration with an emphasis in Human Capital Management from Bellevue University.

SCOTT M. FOCHT, Vice President - Corporate Strategy and Governance. Mr. Focht joined the District in September 2013 to lead business strategy and deployment. In January 2017, he was promoted to senior director, accountable for strategic planning, enterprise risk management, corporate audit, continuous improvement, and innovation. In December 2020, Mr. Focht was promoted to Vice President of Corporate Strategy and Governance. Mr. Focht has more than 20 years of prior strategic management and consulting experience in hospitality, financial services, healthcare, and federal services industries including Best Western International, Inc., First National Bank of Omaha, Creighton University, and Constellation West. Additionally, he has worked independently as a strategic consultant for a variety of businesses and non-profit organizations. Mr. Focht holds bachelors' degrees in French and Business Administration from Creighton University and a master's degree in Business Administration from Thunderbird School of Global Management.

TIMOTHY D. MCAREAVEY, Vice President - Customer Service. Mr. McAreavey joined the District in 2016 as the Director of Supply Chain Management and was promoted to Vice President of Customer Service in March 2022. Mr. McAreavey is responsible for leading customer sales and service, energy product development and marketing, customer experience and customer operations. Prior to the customer service role, he led the supply chain management disciplines at the District, including sourcing and supply chain solutions, transportation and construction equipment and warehousing. Before joining the District, Mr. McAreavey spent 13 years with Cabela's, leading business and customer service, marketing transformation, strategic planning, process improvement, change management, supply chain management and logistics. Mr. McAreavey has a bachelor's degree in Marketing from Regis University.

KEVIN S. MCCORMICK, Vice President - Safety and Facilities Management. Mr. McCormick was promoted to Vice President of Safety and Facilities Management in May 2022. Mr. McCormick joined the District in 1987 in the General Maintenance Department at the Fort Calhoun Station. He has served in various roles throughout the District for the past 35 years, including most recently as Senior Director of Safety and Technical Training. Mr. McCormick is accountable for the oversight of the District's facilities and the overall safety program for the District's employees. Mr. McCormick earned a bachelor's degree in

Business Administration and Technical Studies from Bellevue University. He also holds a certificate for the Reactor Technology Course for Utility Executives from Massachusetts Institute of Technology (MIT).

LISA A. OLSON, Vice President - Public Affairs. Ms. Olson joined the District in April 2011 as Division Manager of Corporate Marketing and Communications. In June 2015, Ms. Olson was named Vice President of Public Affairs. Ms. Olson is responsible for overseeing the District's corporate brand, as well as corporate communications, social media, customer marketing and education, market research, economic development, legislative and regulatory affairs, environmental affairs and energy regulatory affairs. Prior to joining the District, Ms. Olson was in leadership positions at Infogroup and First Data, and served as Public Information Officer for Nebraska's Department of Economic Development. Ms. Olson has a bachelor's degree in Journalism from the University of Nebraska-Lincoln.

MCKELL V. PINDER, Vice President - Human Capital. Ms. Pinder joined the District in March 2018 as Director of Human Capital and became VP of Human Capital in May 2022. She is accountable for the development of a long-term vision, as well as strategic leadership and direction in all facets of human resources management at the District, including the administration and negotiation of bargaining unit contracts that define the conditions of employment for union-represented employees. Ms. Pinder has more than 20 years of prior human resources and consulting experience in manufacturing, healthcare, and the consumer products industries through her work with global accounting firms and a Fortune 100 company. Ms. Pinder earned her bachelor's degree in Mathematics and a master's degree in Actuarial Science from Georgia State University.

BRADLEY R. UNDERWOOD, Vice President - Systems Transformation. Mr. Underwood joined the District in 2013 as manager of Nuclear Business Operations. He has served as treasury manager, director of Corporate Planning and director of Financial Planning. He was promoted to Vice President of Systems Transformation in May 2022. Mr. Underwood oversees load forecasting, distribution and transmission planning as well as integrated resource planning. Prior to his service at the District, Mr. Underwood served in various roles and locations within North America for the Kiewit Companies, including commercial and financial oversight for teams constructing large energy infrastructure projects. Mr. Underwood holds a bachelor's degree in Business Administration from the University of Nebraska-Lincoln, as well as a master's degree in Business Administration from Creighton University.

TROY R. VIA, Vice President – Chief Operating Officer. Mr. Via joined the District in September 2013, as Director of Energy Marketing and Trading. In September 2018, Mr. Via was named Vice President of Energy Delivery. In October 2021, Mr. Via was appointed Vice President – Utility Operations and Chief Operating Officer. Mr. Via provides overall leadership, strategic planning and long-term objectives for the District's energy production and energy delivery groups. He also is responsible for oversight of the ongoing decommissioning of Fort Calhoun Station, as well as the utility's main energy operational capabilities to ensure the District's continued commitment to affordable, reliable, and environmentally sensitive energy services. Mr. Via's career includes over 20 years of experience in the utility industry, holding leadership positions at Dominion Resources and Aquila Energy, and working for the Kansas City Board of Trade in the Audits and Investigation division. Mr. Via has a bachelor's degree in Business Administration with a focus in Finance from the University of Central Missouri.

Employees and Human Resources

The District employed 1,812 employees in its 13 county service area as of December 31, 2021. The District's clerical, professional, craft and administrative employees are represented by two local unions of the International Brotherhood of Electrical Workers ("IBEW") and one local union from the International Association of Machinists and Aerospace Workers ("IAM & AW"). Under Nebraska law, unions and their members are not permitted to strike or otherwise hinder, delay, limit or suspend the continuity or efficiency

of any public utility service. The District has a long-standing cooperative working relationship with the three labor unions representing their respective bargaining units. In 2022, the District executed three-year agreements with IBEW Local 1483, IBEW Local 763 and IAM & AW Local 31, which expire May 31, 2025.

Defined Benefit Retirement Plan

The District provides a defined benefit retirement plan for its employees financed by the District and employee contributions. Employees hired prior to January 1, 2013 (prior to June 1, 2013, for Local 763 members), were eligible to elect either a traditional monthly benefit or a cash balance benefit from the retirement plan. Those hired on or after January 1, 2013 (on or after June 1, 2013, for Local 763 members), are eligible for a cash balance benefit only. To ensure funds will be available to pay future benefits, an actuarial report is completed each year to project retirement plan assets and the liability for future benefits. According to the January 1, 2022 actuarial valuation review, the plan's funded status was 75.5% based on the ratio of the actuarial value of assets of the plan to the actuarial accrued liability of the plan. The District funded the actuarially determined contribution ("ADC") of \$56.5 million and \$59.1 million as of December 31, 2021 and December 31, 2020, respectively. In addition, the District contributed an additional \$95.0 million to the Defined Benefit Retirement Plan in December 2021 from the Decommissioning and Benefits Reserve ("DBRA"). The DBRA is an additional reserve that can be used to support the Defined Benefit Retirement Plan. For additional information see "THE ELECTRIC SYSTEM—Decommissioning and Benefits Reserve." The market value of the plan investments was \$1.30 billion and \$1.16 billion as of December 31, 2021 and December 31, 2020, respectively.

Other Postemployment Benefits ("OPEB")

The District has two separate plans for post-employment health care benefits. OPEB Plan A provides post-employment health care and life insurance benefits for all qualified members. OPEB Plan B provides post-employment health care premium coverage for the District's share of the premiums for employees hired on or after December 31, 2007. To ensure funds will be available to pay future benefits, an actuarial report is completed each year to project the OPEB plans' assets and the liabilities for future benefits. According to the January 1, 2022 actuarial valuation review, OPEB Plan A's funded status was 52.4% based on the ratio of the actuarial value of assets of the plan to the actuarial accrued liability of the plan. The District funded the OPEB Plan A ADC of \$13.4 million and \$14.8 million as of December 31, 2021 and December 31, 2020, respectively. The market value of the plan investments was \$197.2 million and \$183.6 million as of December 31, 2021 and December 31, 2020, respectively. According to the January 1, 2022 valuation review, OPEB Plan B's funded status was 93.8% based on the ratio of the actuarial value of assets of the plan to the actuarial accrued liability of the plan. The District funded the OPEB Plan B ADC of \$1.0 million and \$0.7 million as of December 31, 2021 and December 31, 2020, respectively. The market value of the plan investments was \$7.5 million and \$6.1 million as of December 31, 2021 and December 31, 2020, respectively.

Defined Contribution Plans

The District sponsors two Defined Contribution Retirement Savings Plans, a 401(k) ("401(k) Plan") and a 457 ("457 Plan"). Both the 401(k) Plan and 457 Plan are open to all full time employees and allow contributions by employees that are partially matched by the District. The 401(k) Plan's and 457 Plan's assets and income are held in an external trust account in the employee's name. The matching share of contributions was \$5.9 million and \$5.9 million for the years ended December 31, 2021 and 2020, respectively. The employer maximum annual match on employee contributions was \$4,000 per employee for the years ended December 31, 2021 and December 31, 2020, respectively.

Funds of the District

All of the District's funds are under the control of the Board of Directors, subject to the requirements of the authorizing debt resolutions of the District and State statutes. Each Director is a public officer, with an oath filed with the Secretary of State. The Treasurer has control of the District's funds and is required to maintain a surety bond, in an amount as required by statute, which is filed with the Secretary of State. The District is required by law to have its accounts audited annually by independent, certified public accountants, in accordance with generally accepted government auditing standards, and to file a copy of such audit with the Auditor of Public Accounts of the State and the Nebraska Power Review Board ("NPRB"). The District follows, on a voluntary basis, insofar as possible for a governmental subdivision, the Uniform System of Accounts prescribed by the Federal Energy Regulatory Commission ("FERC"). The District's accounts for calendar year 2021 have been audited by FORVIS LLP, formerly known as BKD LLP.

Taxes Applicable to the District

In the opinion of Fraser Stryker PC LLO, General Counsel to the District ("General Counsel"), the District is not liable for federal or State income or ad valorem taxes. However, as required by State law, the District makes payments in lieu of taxes annually to the County Treasurer of each county in which it sells electricity at retail equal to 5.0% of its gross revenues derived from sales within the incorporated cities and villages in such county.

The District is subject to State Sales and Use Tax on certain labor charges and nearly all material purchases. Under current State law, purchases of coal, oil, gas, nuclear fuel and water, when used for generating purposes, are exempt from State Sales and Use Tax. The State Sales and Use Tax rate is 5.5%. Various municipalities within the District's service area have also imposed a local sales and use tax.

Nebraska Power Review Board

In 1963, the Nebraska Legislature passed Chapter 70, Article 10, Reissue Revised Statutes of 1943 of Nebraska, as amended, establishing the NPRB. The NPRB consists of five members appointed by the Governor subject to approval by the Legislature. The statute declares that it is the policy of the State to avoid and eliminate conflict and competition between retail suppliers of electricity and to facilitate the settlement of rate disputes between suppliers of electricity at wholesale. Subject to approval of the NPRB, retail suppliers of electricity in adjoining areas are authorized to enter into written agreements with each other specifying either the service area or customers which each shall serve. Where agreements cannot be reached, the NPRB will determine the matter after a hearing. With NPRB approval, the District has entered into service area agreements with all other suppliers whose territories adjoin that of the District. The construction of any transmission lines or related facilities outside the District's service territory generally carrying more than 700 volts or the construction of most electric generation facilities is subject to the approval of the NPRB. Since the establishment of the NPRB, the District has received NPRB approval for the construction of all facilities requiring such approval.

Certain Rights of Municipalities Served by the District

Nebraska law contains provisions pertaining to the acquisition by a city or village ("Municipality") through negotiation or condemnation of a public power district's electric distribution system, or any part or parts thereof, situated within or partly within such Municipality. To date, no Municipality has exercised such rights with respect to the District.

THE AREA SERVED

The District provides electric service to retail and wholesale electric consumers in the City of Omaha and within a 5,000 square mile area (including all or parts of 13 counties) paralleling the eastern border of the State along the Missouri River. The area includes the community of Carter Lake, Iowa (population: 3,783¹), which is served directly from the District’s Omaha distribution system. The District operates a fully integrated generation, transmission and distribution system having strong interconnections with all of its neighboring utilities.

The District and Omaha are located in the central part of the continental United States. As such, the Omaha metropolitan area is a principal rail center, a key terminal on the Missouri River, a major Midwest air center and is served by two interstate highway systems, I-80 and I-29. Omaha is a major health care, food processing, transportation, data processing, marketing, insurance, and industrial center in the Midwest. In 2021, the District’s retail revenues from energy sales within the City of Omaha were 70% of total retail revenues from all incorporated cities served. The following tables summarizes several key economic statistics from 2017 to 2021.

Year	Estimated Population District Service Area ²	Net Taxable Sales City of Omaha (billions) ³	<u>Total Building Permits</u>		
			Douglas County ⁴	Omaha Combined Statistical Area (CSA) ^{4,5}	Omaha-Council Bluffs Median Household Income ⁶
2021	853,000	\$10.849	1,891	3,803	N/A*
2020	849,000	\$9.602	1,916	3,504	\$69,439
2019	855,000	\$9.978	1,397	2,823	\$70,373
2018	846,000	\$9.854	1,562	3,104	\$66,241
2017	833,000	\$9.175	1,751	3,400	\$65,619

The greater Omaha area is home to the headquarters of four Fortune 500 companies: Berkshire Hathaway Inc., Union Pacific Railroad, Kiewit Corporation, and Mutual of Omaha. In addition, a number of companies from various industry sectors are also headquartered in the Omaha area, including Werner Enterprises, Inc., HDR, Inc., Data Axle, Omaha Steaks International, Inc., and Valmont Industries, Inc.

Omaha’s unemployment rate is consistently lower than the national unemployment rate as shown in the table below.

Year	City of Omaha Employment¹	City of Omaha Unemployment Rate²	Nebraska Unemployment Rate³	United States Unemployment Rate⁴
2021	241,398	3.1%	2.5%	5.3%
2020	234,860	5.2%	4.2%	8.1%
2019	235,830	3.3%	3.0%	3.7%
2018	233,340	3.1%	2.8%	3.9%
2017	222,160	3.2%	2.9%	4.4%

Large Customer Load Growth

Facebook and Google continue the expansion of their respective facilities within the District’s service territory in Papillion, Nebraska. This growth is expected to continue to contribute to the District’s overall electric load growth. The District is currently evaluating various means to serve the additional system demand including transmission and distribution improvements, capacity purchases and new generation resources, see “THE ELECTRIC SYSTEM—Future Generating Facilities”. Through the normal course of business with large customers, the District utilizes various financial security strategies to limit its exposure to loss of power sales and stranded asset concerns.

CAPITAL EXPENDITURES

The District continually analyzes Electric System requirements and makes long-range recommendations and estimates of capital expenditures necessary to serve the growing loads with a reliable and economic power supply. The following table lists the District’s actual capital expenditures for the years 2021 and 2020 and budgeted expenditures for 2022. The District has seen an increase in capital expenditures primarily due to customer driven economic development projects, infrastructure expansion (new generation to support load growth), technology transformation and investment, and continued investments in the District’s existing infrastructure. The District finances its Capital Program with revenues from operations, investment income, financing proceeds, and cash on hand. A significant portion of the 2022 Capital Program will be funded by Senior Bond proceeds. For additional information regarding future generating facilities, see “THE ELECTRIC SYSTEM—Future Generating Facilities.”

	2022	2021	2020
CAPITAL PROGRAM:		(millions)	
Total Transmission and Distribution Plant	\$178.5	\$139.5	\$106.9
Total General Plant	73.3	34.9	41.2
Total Production Plant	<u>418.1</u>	<u>139.2</u>	<u>49.1</u>
TOTAL CAPITAL PROGRAM	\$670.0	\$313.6	\$197.1

ELECTRIC RATES AND RATE REGULATION

The District’s Board of Directors has the sole authority to establish and adjust electric service rates. It is the opinion of General Counsel to the District that District rates for electric service are not subject to regulation by any federal or State regulatory body under existing laws, except, (i) in the event of a dispute between retail electric suppliers concerning rates for service between such suppliers, the NPRB is given jurisdiction to hold hearings and make recommendations which shall be advisory only (see “THE DISTRICT—Nebraska Power Review Board”) and (ii) FERC has jurisdiction to resolve disputes regarding rates for wholesale transmission services.

Under the Enabling Act, the District’s Board of Directors has the power to and is:

“. . . required to fix, establish and collect adequate rates, tolls, rents and other charges, for electrical energy . . . and for any and all other commodities, including ethanol, services, or facilities sold, furnished, or supplied by the district, which rates, tolls, rents and charges shall be fair, reasonable, nondiscriminatory and so adjusted as in a fair and equitable manner to confer upon and distribute among the users and consumers of commodities and services furnished or sold by the district the benefits of a successful and profitable operation and conduct of the business of the district.”

The District serves customers within three major rate classes: Residential, Commercial, and Industrial. The information presented in the following table represents varying usage levels, monthly electric service bills and the average charge per kWh, as of December 31, 2021, for each of these classes under approved basic rate schedules including a Fuel and Purchased Power Adjustment (“FPPA”) and exclusive of sales tax:

	Billing Demand (kilowatt “kW”)	Monthly Consumption (kWh)	Rate Schedule	Winter		Summer	
				Monthly Electric Service Bill	Average Charge Per kWh (cents)	Monthly Electric Service Bill	Average Charge Per kWh (cents)
Residential							
		250	110	\$50.29	20.11	\$51.80	20.72
		500	110	69.40	13.88	77.73	15.55
		750	110	88.52	11.80	101.60	13.55
		1,000	110	107.63	10.76	125.46	12.55
		2,500	110	189.47	7.58	268.65	10.75
Commercial							
	12	1,500	230	154.14	10.28	168.89	11.26
	30	6,000	230	438.06	7.30	555.26	9.25
	50	12,500	231	1,074.61	8.60	1,234.61	9.88
	100	30,000	231	2,443.66	8.15	2,827.66	9.43
	500	200,000	231	14,106.86	7.05	16,651.89	8.33
Industrial							
	1,000	400,000	232	26,989.31	6.75	32,719.31	8.18
	2,000	950,000	232	59,542.31	6.27	73,162.31	7.70
	5,000	2,500,000	240	172,815.28	6.91	172,815.28	6.91

Residential customers of the District paid an average of 11.38 and 11.40 cents per kilowatt-hour (“kWh”) during the twelve months ended December 31, 2021 and 2020, respectively. The 2021 national residential average was 13.66 cents per kWh as reported by the Energy Information Administration (“EIA”). The District’s average annual use per residential customer was 11,164 kWh and 11,066 kWh for the twelve months ended December 31, 2021 and 2020, respectively.

General Rate Adjustment. In 2021, the District concluded its 5-year commitment of no general rate increases. The Board of Directors approved an overall average 2.5% increase across customer classes beginning January 1, 2022. The drivers of the increase in the revenue requirement include:

- Strategic transformation investment (operations and maintenance costs)
- Capital funding for infrastructure expansion to serve growing communities
- Sustainability of debt issuance

These investments directly benefit customers by improving the reliability, resiliency, and transformation of the energy services that the District provides.

Fuel and Purchased Power Adjustment. The District has a FPPA charge that is automatically adjusted annually effective January 1 of each year. This charge reflects forecasted changes in the cost of fuel, purchased power and consumable material costs from those included in the general base rates. The FPPA rate is designed to recover the actual costs associated with serving retail customers and municipal service consumers. It is set in advance of the calendar year based on expected costs, although the District reserves the right to modify the FPPA at any time, with Board of Director approval, to reflect unusual variances from budgeted expenses. The FPPA rate also includes the under (or over) recovered balance from prior years so that ultimately customers are assured of paying the actual cost of fuel, purchased power and consumable materials. The District updated the FPPA formula to include off-system sales, beginning on January 1, 2022. Including off-system sales provides more stability to the over and under collected amounts on an annual basis when the market experiences high volatility in fuel and energy prices. The aggregate 2022 FPPA was \$0.01792 per kWh. The District is projecting an average increase in the FPPA of 2.9% beginning on January 1, 2023.

THE ELECTRIC SYSTEM

Summary of Generating Facilities

The District's power requirements are provided from its generating facilities, leased generation and purchases of power. The District set an all-time peak load of 2,545.8 MW on August 2, 2022. The following table reflects the District's generation facilities displayed by energy source.

	Initial Date in Service	Capability ⁽¹⁾ (MW)	% of Total	Net Production ⁽²⁾		Availability Factor ⁽²⁾
				Amount (MWh)	% of Total	
Coal:

Generating Facilities – Nebraska City Station

Nebraska City Station (“NCS”), located approximately five miles southeast of Nebraska City, Nebraska, consists of two steam generator units, NCS Unit No. 1 (“NC1”), and NCS Unit No. 2 (“NC2”), equipped for coal firing.

The District owns, operates, and maintains NC2. Fifty percent of the station’s output is used by the District to meet customer load requirements. The District has executed long term PPAs with seven public power and municipal utilities located in Nebraska, Missouri and Minnesota (“Participants”) for the remaining 50% of the unit’s output. The Participants’ rights to receive, and obligations to pay costs related to, this remaining 50% of the output of NC2 is herein referred to as the Separate System. The District has issued Separate System Bonds to finance the costs of NC2 allocable to the Separate System. Such Separate System Bonds are payable solely from the revenues or other income derived from the ownership or operation of such Separate System, which revenue and other income do not and will not secure any other debt of the District, including the Notes. Under the terms of each PPA, a Participant agrees to purchase its share of the output on a “take or pay” basis even if the power is not available, delivered to or taken by the Participant. Each Participant is subject to a step up provision which requires, in the event of a default by another Participant, that the Participant shall pay a share of any deficit in funds resulting from the default. The District is obligated to take the first 50 MW of any power not taken by a defaulting Participant prior to any other Participant having to step-up and purchase additional power.

The Participants and their percentage share of NC2’s output are as follows:

Participants	Percentage Share
Central Minnesota Municipal Power Agency	2.17
City of Grand Island, Nebraska, Utilities Department	5.00
City of Independence, Missouri, Power & Light Department	8.33
Falls City, Nebraska, Utilities	0.83
Missouri Joint Municipal Electric Utility Commission	8.33
Nebraska City, Nebraska, Utilities	1.67
Nebraska Public Power District	<u>23.67</u>
Participants’ Total	50.00
Omaha Public Power District	<u>50.00</u>
NC2 Total	100.00

Recent Developments. In April 2021, a planned maintenance and inspection outage was completed at NC2. Routine maintenance activities included replacement of one catalyst layer of the Selective Catalytic Reduction (“SCR”) system to maintain SCR efficiency, boiler inspections and repairs, turbine valve inspections, and Mercury and Air Toxics Standard (“MATS”) burner inspections and calibrations. Other completed capital projects included pulverizer primary air inlet duct modifications, partial like for kind replacement of the reheater upper bank tube elements, main steam piping inspection and repairs, turbine/generator controls migration to the distributed control system (“DCS”), upgrading the DCS hardware/software, cooling tower fill replacement, and motor control center upgrades.

In May 2021, a planned maintenance and inspection outage was completed to replace the NC1 turbine low pressure rotors. During this outage routine maintenance activities were also performed.

Routine maintenance activities included chemically cleaning the boiler, retubing two of the condenser water boxes, and replacing the deaerator dome.

On September 5, 2022, NC2 was shut down to perform routine offline repairs to the generator collector rings which were causing brush wear while in operation. On September 9, 2022, it was determined that there was excessive wear on one of the collector rings on the generator rotor. The collector rings were evaluated and repairs were made to return the unit to service. The worn collector rings will be replaced during a future planned outage of sufficient length.

Generating Facilities - North Omaha Station

North Omaha Station (“NOS”), located in the north section of the city of Omaha, consists of five steam generator units equipped for coal and natural gas firing. All five NOS Units originally operated on coal when they went into service. In 2016, the District converted NOS Units 1, 2 and 3 from coal to natural gas. Several maintenance and inspection outages were completed at NOS during the last few years to improve station safety, efficiency, and reliability.

Recent Developments. In August of 2022, the Board of Directors approved the extension of NOS in its current state until the District’s Standing Bear Lake and Turtle Creek Stations, currently under construction, are able to operate in an unconditional, fully accredited capability. Achieving unconditional, fully accredited capability is dependent on satisfying all requirements of SPP for generation interconnection and transmission service. The estimated date to achieve fully accredited capability is 2026. The District had previously planned on converting NOS Units 4 and 5 from coal to natural gas and retiring NOS Units 1, 2 and 3 at the end of 2023. The continued operation of these facilities will mitigate risks associated with the delayed SPP Generation Interconnection study process for the District’s new Turtle Creek and Standing Bear Lake Stations. The District seeks to have certainty on its ability to interconnect and generate from these two new dual fuel facilities prior to implementing any further conversions and retirements at NOS, which demonstrates the District’s commitment to ensuring reliability and resiliency for its system. For additional information regarding planned generation portfolio changes at NOS, see “THE ELECTRIC SYSTEM—Generation Portfolio Changes.”

In 2021, NOS Units 4 and 5 completed maintenance and inspection outages to improve station safety, efficiency, and reliability. Routine maintenance outage work included condenser and air preheater cleaning, pulverizer and boiler inspections and repair.

Generating Facilities - Peaking Stations

In addition to the converted units at NOS, the District owns three peaking stations which provided 2.6% of net generation in 2021. All peaking station units receive routine, typically annual, internal boroscopic inspections to monitor and verify the internal conditions and serviceability of the major components. These inspections are part of the overall asset management strategy for the units and reduce the risk of catastrophic failure and loss of use of the units.

Cass County Station. Cass County Station (“CCS”), located near Murray, Nebraska, consists of two combustion turbine units equipped for natural gas firing. The combustion turbine units are tied into two natural gas transportation pipeline systems enhancing competition between fuel suppliers.

Jones Street Station. Jones Street Station (“JSS”), located near downtown Omaha, consists of two combustion turbine units equipped for fuel oil firing. JSS Unit 1 completed a major inspection and maintenance outage in 2021.

Sarpy County Station. Sarpy County Station (“SCS”), located in Bellevue, Nebraska, consists of five combustion turbine units equipped for fuel oil or natural gas firing. The ability to operate SCS on fuel oil provides fuel diversity in situations when natural gas may not be available. SCS Units 4 and 5 are “twin pack” units consisting of two 50% aero-derivative engines (4A, 4B and 5A, 5B) driving one electrical generator. For additional information regarding the above mentioned generating facilities, see “FACTORS AFFECTING THE DISTRICT AND THE ELECTRIC UTILITY INDUSTRY GENERALLY.”

Recent Developments. In 2021, a major inspection and overhaul was completed on JSS Unit 1. Fire suppression systems at SCS were enhanced. CCS Units 1 and 2 generator excitation systems were replaced and updated. In the fall of 2022, CCS Unit 1 will complete a hot gas path and generator refurbishment. CCS Unit 2 completed a similar hot gas path and generator inspection and refurbishment outage during spring of 2022. As of October 31, 2022, CCS Unit 1 is offline for a hot gas path inspection and refurbishment. JSS Unit 1 and 2 took outages during spring of 2022 for replacement of their exhaust stacks. SCS Unit 5 completed an overhaul of the B engine during spring of 2022.

Renewable and Other Power Supply

Renewable Generation. The District’s renewable and other generation resources includes a mix of wind, solar, hydro, and landfill methane gas. As of June 30, 2022, the District had 1,062 MW of renewable generation nameplate capacity primarily through power purchase agreements. In 2021, approximately 35.4% of retail energy sales came from renewable energy. (For additional information regarding Alternative Power Supply, see “THE ELECTRIC SYSTEM—Future Generating Facilities”).

Pathways to Decarbonization. In 2019 the District’s Board of Directors adopted a goal in its Strategic Directives of achieving net-zero carbon production by 2050 while balancing affordability and reliability. As part of developing plans to meet this goal, the District conducted its Pathways to Decarbonization study in 2021. The study focused on identifying potential future resource changes while maintaining reliability and minimizing costs. The District incorporated the information resulting from its Pathways to Decarbonization study into its 2021 Integrated Resource Plan.

The study identified reduced coal generation and a mix of low-carbon natural gas generation (or dispatchable resources), renewable energy, energy storage, and community-wide energy efficiency as key elements of its strategy. The OPPD Pathways to Decarbonization Study results highlight a minimum incremental investment in 1,100 MW of solar, 500 MW of wind, and 150 MW of energy storage resources by 2030 growing to 3,000 MW of solar, 3,800 MW of wind, and 800 MW of energy storage resources by 2050. While resources required by 2030 are more certain than those required by 2050, the District will need to continue to monitor the industry and regularly update its plans to reflect current and emerging technologies.

Wind Generation. The District’s power supply includes 971.7 MW of wind capacity. All of the wind generation is provided through the District’s participation in twenty-year and twenty five-year power purchase agreements to output from the wind projects listed below. As of October 31, 2022, the District has the following commitment amounts for its power purchase agreements:

Wind Farm	Location	Initial Contract Year	Total Size (MW)	District's Share (MW)	Contract Type	Commitment Amount (thousands)	Final Year
Ainsworth ^{1,2}	Ainsworth, NE	2005	59.4	10.0	Take-or-pay ³	\$5,730	2025
Elkhorn Ridge ¹	Bloomfield, NE	2009	80.0	25.0	Take-and-pay ⁴	\$7,354	2029
Flat Water	Humboldt, NE	2010	60.0	60.0	Take-and-pay	0	2030
TPW Petersburg	Petersburg, NE	2011	40.5	40.5	Take-and-pay	0	2031
Crofton Bluffs ¹	Crofton, NE	2012	42.0	13.65	Take-and-pay	0	2032
Broken Bow I ¹	Broken Bow, NE	2012	80.0	18.0	Take-and-pay	0	2032
Broken Bow II ¹	Broken Bow, NE	2014	73.1	43.9	Take-and-pay	0	2039
Prairie Breeze	Petersburg, NE	2014	200.6	200.6	Take-and-pay	0	2039
Grande Prairie	O'Neill, NE	2017	400.0	400.0	Take-and-pay	0	2037
Sholes	Sholes, NE	2019	160.0	160.0	Take-and-pay	0	2039

Solar Generation. The District entered into a twenty-year power purchase agreement with a subsidiary of NextEra Energy in June 2018 to purchase 5 MW of solar generated energy for a community solar project. The community solar facility became operable on January 1, 2020 and is located in Washington County, Nebraska. District customers are allowed to purchase shares in the solar facility, representing a fixed monthly volume of kWh generated from the solar facility. A participating District customer's community solar charge is equal to the market-based rate multiplied by their subscription level. Each participating customer must also pay a deposit, which is refundable after participation for a minimum number of years, as set forth in the applicable rate schedule. All available shares have been purchased by the District's residential customers. In 2021, the District executed its first utility-scale solar PPA for the Platteview Solar facility in Saunders County, Nebraska. This 81 MW facility is part of the Power with Purpose project and is anticipated to begin construction in early 2023.

Methane Gas Generation. The Elk City Station, located near Elk City, Nebraska, is a renewable energy station that uses methane gas from the Douglas County Landfill to produce electricity. The capacity of the Elk City Station methane gas facility is 6.4 MW and the facility has an accredited net capability of 6.0 MW.

Generation Portfolio Changes

In 2019, the District completed an extensive analysis of the future of its generation portfolio. This analysis included working with customers and communities to find ways to address challenges associated with (1) the changing generation landscape, (2) generation capacity needs, (3) maintaining reliability and

¹ The District is a participant with Nebraska Public Power District.

² In the event another power purchaser defaults, the District is obligated, through a step up provision, to pay a share of any deficit in funds resulting from the default. In the event NPPD receives any financial incentive payments from the United States Department of Energy ("DOE") pursuant to the Renewable Energy Production Incentive ("REPI") program, the District will be entitled to its share of such payments.

³ The District is obligated for the life of the contract, to make payments for purchased power even if the power is not available, delivered to, or taken by the District.

⁴ The District is obligated for the life of the contract, to make payments for purchased power only when the power is made available to the District.

resiliency of the electric system, and (4) carbon output from legacy power plants. In November 2019, the District's Board of Directors approved a recommended "Power with Purpose" generation portfolio option that included:

- Adding 400-600 MW of utility scale solar generation;
- Adding up to 600 MW of modernized natural gas fueled generation, for back-up/peaking to assist with reliability; and
- Allowing the District to retire NOS Units 1, 2, and 3.

The District anticipates completion of the new natural gas fueled generation by 2024.

In 2019 the Board of Directors also adopted a goal to reach net zero carbon production by 2050. While the District is currently studying pathways to meet this goal as part of its Pathways to Decarbonization, it estimates that "Power with Purpose" will reduce its power generation CO2 emissions by 30% compared to 2010 levels.

Future Generating Facilities

As partially described in the "Generation Portfolio Changes" section, the District will be undertaking a number of generation additions described below.

Future Solar Generation. The sourcing for the utility scale solar generation began in November 2019 and is ongoing. In order to meet the 400-600 MW of solar generation goal, the District intends to enter into multiple contracts at multiple sites in eastern Nebraska. In March 2021, the District announced its first utility-scale solar contract with Platteview Solar for an 81 MW facility near Yutan, Nebraska. Construction of the facility is anticipated to begin in early 2023. The District will announce additional projects as they commence.

Future Natural Gas Generation. In September 2020, the District announced the locations and capacity of two natural gas backup generation facilities. These facilities will be owned and operated by the District. In October 2020, the Nebraska Power Review Board unanimously approved the applications for these new natural gas generation facilities finding that they serve public convenience and necessity, are economical and feasible, and are without unnecessary duplication of facilities. The utility awarded an engineer, procure, and construct contract to Zachry Group. The company will be responsible for the design and construction of both of the District's new natural gas generation facilities. The Standing Bear Lake Station will be built on land leased for 50 years with an optional 20 year extension at 120th and Military Road in Douglas County, Nebraska. This facility will be co-located with a Metropolitan Utilities District of Omaha ("MUD") liquid natural gas facility. This site will produce approximately 150 MW using reciprocating internal combustion engine assets. Preliminary grading has been completed with gas pipeline construction in progress by MUD. Primary equipment from the engine supplier has been delivered to the site. The Turtle Creek Station will be located on land owned by the District at 168th and Fairview Road in Sarpy County, Nebraska. This second site will produce approximately 450 MW using two simple-cycle combustion turbine assets. Preliminary grading has been completed with gas pipeline construction in progress by Northern Natural Gas. Equipment delivery for the station began in the third quarter of 2022 and will continue through the first quarter of 2023. The sourcing for these natural gas generation assets began in September 2020 with an estimated cost of approximately \$650 million and an operational date in 2023. Due to various challenges with supply chain, construction and SPP Generation Interconnection study backlogs, the operational date for the natural gas generation assets may be delayed. Current estimates for the operational date range from 2024-2026 depending upon resolution of the aforementioned challenges. The District selected nine Wärtsilä 18V50DF reciprocating internal combustion engines to power the

Standing Bear Lake Station. For the Turtle Creek Station, the District selected Siemens Energy, Inc. to provide two SGT6-5000F combustion turbines.

Future Battery Storage. In June 2020, the District received \$600,000 in grant funding for a battery storage facility through the Nebraska Environmental Trust Air Quality category. The District's BRIGHT (Battery Research Innovation Guided by High-Potential Technology) project will bring the first utility-scale battery on the system. In March 2021, the Board of Directors granted approval for competitive sourcing of the battery storage asset and in July 2021, the Nebraska Power Review Board unanimously approved the application for this electric storage resource. The BRIGHT battery asset will have a power capacity of 1 MW with a 2 MWh energy capacity. A contract for the battery asset was executed in late 2021 and commercial operation is anticipated in 2023.

Prior Generating Facilities – Fort Calhoun Station

Fort Calhoun Station ("FCS") was a nuclear electric generating station with a pressurized water reactor situated along the Missouri River approximately 20 miles north of the City of Omaha in the vicinity of Fort Calhoun, Nebraska. The District ceased operations at FCS on October 24, 2016.

The recommendation to cease operations at FCS resulted from the District's ongoing resource planning process and stemmed from the assessment that continuing to operate FCS would result in costs materially in excess of the cost of obtaining power from other sources. The decision to decommission FCS had several significant favorable financial implications to the District. Ceasing operations resulted in an improved competitive position, stable debt service coverage and increased liquidity, as well as reduced regulatory and financial risks.

Decommissioning Options. Commercial reactors that cease operations in the United States have two primary decommissioning options both of which must be completed within 60 years following cessation of operations (i) safe storage ("SAFSTOR"), which would involve monitoring the de-fueled facility before completion of decontamination and dismantling of the site to a condition no longer requiring nuclear licensing and (ii) immediate dismantling ("DECON"), which would involve the prompt commencement of decontamination and dismantling of the site. At the June 2016 meeting, the Board voted to place FCS in a SAFSTOR condition once commercial operations ceased. At the September 2018 meeting, the Board reviewed the analysis indicating adoption of the DECON option may reduce the District's financial liability and regulatory risk by commencing decontamination activities sooner than anticipated under the SAFSTOR option. The Board made the decision to shift to the DECON decommissioning strategy at the October 2018 Board meeting. During the November 2018 meeting, the Board authorized the District to finalize negotiations and award a contract in support of the DECON strategy, whereby FCS employees perform some of the work, advised and supported by a contractor. Energy Solutions, Incorporated ("Energy Solutions") was awarded this contract in April 2019.

The total estimated cost in 2021 dollars to decommission FCS using the DECON methodology was \$789.7 million as of December 31, 2021. The cost estimate is updated annually, and includes three main categories: License Termination, Spent Fuel Management, and Site Restoration. A Decommissioning Funding Status Report is submitted to the Nuclear Regulatory Commission ("NRC") annually, with the most recent submittal in March 2022. This report includes the current cost estimate along with the current balance in the decommissioning trust funds. With the decision to adopt the DECON decommissioning method, it is anticipated that the facility, with the exception of the area where nuclear fuel will be kept in dry storage, will be released for unrestricted use by the NRC in the next 4 to 5 years.

Decommissioning Costs. The aggregate estimated cost of decommissioning FCS has been estimated by the District based on currently available information and in accordance with NRC

requirements. Based on the updated site specific study and current assumptions, the District's estimate of the accounting-based decommissioning liability for the NRC-required obligations which excludes costs for site restoration activities is \$754.2 million in 2021 dollars. All of the District's cost estimates are based on information currently available to the District, but all of such estimates remain subject to change, and the District can make no guarantee as to the District's ability to decommission FCS for the amounts estimated. As of December 31, 2021, the District has spent \$612.5 million in decommissioning costs.

Decommissioning Trust Funds. As required by the NRC, the District maintains an external trust fund to accumulate moneys for the future decommissioning of FCS. The District began its decommissioning accrual and funding in July 1983, which moved to a NRC required fund in 1990 ("1990 Plan"). The market value of the 1990 Plan's decommissioning fund was \$265.0 million as of December 31, 2021.

In 1992, the District began accumulating funds in a separate decommissioning fund based on the difference between the site specific study's estimated cost to fully decommission FCS and the NRC's regulated formula based cost to decommission the radiated portions of FCS ("1992 Plan"). The District began to add an additional reserve to the 1992 Plan in 2017 and expects to continue through 2024. The District has an additional reserve that could be used to support Decommissioning Trust Funds. For additional information see "THE ELECTRIC SYSTEM—Decommissioning and Benefits Reserve." The District contributed an additional \$121.1 million to the 1992 Plan in 2021, and paid expenses of \$138.9 million from both the 1990 Plan and the 1992 plan. The market value of the 1992 Plan's decommissioning fund was \$254.7 million as of December 31, 2021.

Accounting and Financial Consequences of Decommissioning. As a result of the cessation of FCS operations, the District incurred a one-time, non-cash impairment charge in 2016 of \$959.6 million for its FCS related assets. The FCS regulatory asset for recovery costs incurred in 2012 and 2013 was not included in the impairment but will instead continue to be amortized through 2023 as these costs benefit current and future ratepayers. An additional decommissioning liability and regulatory asset were recorded in 2016 related to the revised estimate of the NRC required decommissioning obligations. The regulatory asset was established to match the recovery of the decommissioning expenses with the decommissioning funding amounts collected through retail rates. As of December 31, 2021, the balance of the regulatory asset was \$231.5 million.

Recent Decommissioning Developments. The District submitted the site specific decommissioning cost estimate and post shutdown activities report to the NRC in the first quarter of 2017, and the required public hearing was conducted by the NRC on May 31, 2017. In March 2019, the District submitted an Annual Decommissioning Funding/Irradiated Fuel Management Status Report and FCS Independent Spent Fuel Storage Installation ("ISFSI") report to the NRC, based upon using the SAFSTOR method of decommissioning. An updated site specific decommissioning cost estimate and post shutdown activities report reflecting the transition to the DECON strategy was submitted to the NRC in late 2019. The project to move spent fuel from wet to dry storage was safely completed in May 2020. The robust concrete and steel structures utilized for dry storage enable the safe and secure storage of spent fuel, monitored by trained staff, as long as the fuel remains on-site. Following completion of this project, the site focus shifted to preparing structures and systems for deconstruction and eventual removal of radioactive waste from the site. Demolition of structures has commenced at FCS with demolition of the first building being completed in April 2021.

Regulatory. The NRC provides oversight of FCS under the provisions of the Decommissioning Power Reactor Inspection Program. The objectives of the decommissioning inspection program are to verify that decommissioning activities are being conducted safely, that spent fuel is being stored safely, and that site operations and license termination activities are in compliance with applicable regulatory

requirements, licensee commitments, and management controls. The NRC will maintain regulatory oversight until a release for unrestricted use of the site is achieved. The license termination plan for the site was submitted for NRC review in August 2021. The plan encompasses the areas that are still under license except for the dry fuel storage area. This smaller area will remain licensed until after fuel is removed, the structures are removed, and the license termination criteria are completed.

Decommissioning Vendor. Following the October 2018 Board meeting, the District issued a Request for Proposal (“RFP”) to vendors for providing services using the DECON strategy. After evaluating the RFP’s, the contract was awarded to Energy Solutions in April 2019. The contract is defined as a collaborative, teamwork approach, blending the decommissioning expertise of Energy Solutions with the site specific knowledge of the District staff. The contract does not include a set value, but has an estimated aggregate project cost of \$621.0 million, which includes the District’s internal expenses, payments to specialty subcontractors and Energy Solutions for License Termination and Site Restoration expenses. Spent Fuel Management activities, and associated costs, are not included in the scope of the contract.

Security & Emergency Preparedness. Updated security and emergency plan programs have been designed and implemented, with approval from the NRC, following the transition to dry fuel storage. For example, the FCS emergency preparedness plan criteria was updated to reflect the significantly reduced risk of an accident impacting off-site areas. In addition to the internal exercises and performance assessments in these areas, the NRC will continue to assess performance throughout the time spent fuel is stored on-site. For additional information regarding the nuclear industry, see “FACTORS AFFECTING THE DISTRICT AND THE ELECTRIC UTILITY INDUSTRY GENERALLY.”

Demand-Side Management and Energy Efficiency

The District continues to evaluate, develop and operate commercial, industrial, and residential demand side management and energy efficiency programs. In September 2019, the District presented a newly analyzed goal of achieving 181 MWs of demand savings and 45.56 GWh of energy savings. As of December 31, 2021, the District had realized approximately 169.9 MW of demand savings since the program goals were established in 2014. These programs will continue to provide demand reductions and energy savings over the measures’ useful lives.

The District has several residential programs designed to help customers lower their electric bills and provide the District with savings. These programs include air conditioning management programs designed to curtail energy usage during peak events, and rebates towards the purchase of new energy efficient HVAC technology or when building/renovating a home certified with a home energy rating score. For commercial and industrial customers, the District, in addition to providing relationship management services, offers various programs and turnkey projects ranging from facility commissioning, energy efficiency equipment upgrades, ground loop heat pump systems, onsite generation, power quality, and related technical support. In addition, the District has several load curtailment and customer owned generation rates. These load curtailment rates offer customers credits to curtail their capacity and energy use when called upon by the District during peak events.

Fuel Supply

Coal. The District currently has a term contract with Peabody Coal Sales through 2024, Buckskin Mining Company through 2024, and Bluegrass Commodities LP (“Bluegrass”) through 2023. Rail transportation services are provided under a multiyear contract with BNSF Railway (“BNSF”) beginning in January 2021. The District owns approximately 57 miles of rail line extending from NCS to Lincoln, Nebraska (“Arbor Line”). The Arbor Line provides competitive access to NCS from Union Pacific Railroad

Company and BNSF Railway, as well as rail access to other third-party shippers. In order to maintain the Arbor Line, the District has a multiyear rail maintenance contract with Kelly Hill Company.

The District targets an approximate 42-day coal supply for NCS. The average price per ton for coal delivered and the total amount delivered to the District’s NCS for 2021 and 2020 were as follows:

Year Ended	Average Price ("Per Ton")	Tons
2021	\$18.38	3,973,485
2020	\$23.28	4,901,862

The District also targets an approximate 42-day coal supply for NOS. The average price per ton for coal delivered and the total amount delivered to the District’s NOS for 2021 and 2020 were as follows:

Year Ended	Average Price	Tons
2021	\$21.27	961,651
2020	\$22.55	1,090,678

The coal for both NCS and NOS is delivered to the sites by six District-owned unit-trains totaling 1,000 cars. The current coal supply at NCS is below long-term targets. The coal supply is being impacted by national rail transportation issues. The District is working on mitigation strategies, including prioritizing delivery to NCS, to return the coal supply to targeted levels.

Fuel Oil. The District maintains 1-2 days of fuel oil supply at SCS and JSS at their full load summer capability. The District has access to pipeline terminals in the area for timely replenishment, if needed.

Natural Gas. Natural gas from MUD is available on an interruptible basis for power station fuel at NOS and SCS. Firm natural gas contracts were negotiated for the start-up process at NOS, and to generate electricity at NO1, NO2, and NO3 for the summers of 2019 through 2023, when market or grid conditions warrant. CCS and NCS are located outside of MUD’s service territory and therefore do not receive natural gas services from MUD. CCS is connected to two natural gas transportation pipeline systems, Northern Natural Gas Company and Natural Gas Pipeline Company of America adjacent to the CCS site. These interconnections enhance competitive pricing between the two pipeline systems. The District has firm natural gas transportation for CCS during the summer months, and interruptible transportation available year round. A natural gas pipeline was constructed and placed in operation from Nebraska City Utilities to NCS to provide fuel for start-up in lieu of oil. In addition, the District contracts natural gas storage for hedging purposes.

Nuclear. Due to the decommissioning of FCS, the District has terminated the remaining nuclear fuel contracts and sold the remaining nuclear fuel inventory.

In June 1983, the District and the DOE entered into a contract for the disposal of the District’s spent nuclear fuel. Under the adjusted terms of the contract, the District was subject to a fee of one mill per kWh on net electricity generated and sold from FCS. This one mill (\$0.001) fee was paid on a quarterly basis to the DOE. On November 19, 2013, the United States Court of Appeals for the District of Columbia Circuit entered an order requiring the Secretary of Energy to submit to Congress a proposal to reduce the nuclear waste fund fee levy to zero until such a time as either (1) the Secretary completes a fee adequacy study that complies with the Nuclear Waste Policy Act or (2) Congress enacts an alternative waste management plan. The DOE temporarily ceased collection of the one mill per net kWh fee effective May 16, 2014. The total amount paid to the DOE is \$113,990,000.

The District remains responsible for the safe storage of spent nuclear fuel, and greater than Class C waste, until the federal government takes delivery. It is unclear, at this time, when a DOE spent fuel disposal facility will be operational. The District completed construction of a dry cask storage facility on-site to meet long-term storage needs for the spent fuel bundles. As part of the decommissioning of FCS, an analysis was conducted to determine the best alternative for interim fuel storage. In February 2018, the District entered into a contract with TN Americas, an Orano USA subsidiary in charge of logistics and storage systems, for used nuclear fuel, radioactive waste management and nuclear transportation. The contract with TN Americas is for materials and services to build the necessary structures for dry fuel storage and complete moves of all fuel into the ISFSI. This work was completed in May 2020. Ongoing dry storage fuel costs, subsequent to 2020, will continue to be incurred and the District will submit claims to DOE for reimbursement. For additional information regarding spent nuclear fuel, see “FACTORS AFFECTING THE DISTRICT AND THE ELECTRIC UTILITY INDUSTRY GENERALLY—High-Level Nuclear Waste Repository.”

Transmission and Distribution System

The District maintains a network of transmission lines that interconnect its generating stations and adjacent utilities to the various transmission and distribution substations serving the load of the District. In general, this network provides at least two alternate sources of supply to each load point on the system. A summary of the various transmission lines, as of December 31, 2021 making up this network follows.

Voltage	Number of Circuit Miles
345 kV	422
161 kV	447
69 kV	<u>470</u>
Total	1,339

The District’s distribution system includes approximately 6,753 miles of overhead primary distribution lines, 835 miles of street light overhead circuits, 5,339 miles of underground cable and 2,002 miles of street light underground circuits. The distribution system includes overhead and underground lines, low voltage transformers, meters and service facilities for operating and maintaining the system.

The distribution system support facilities include service centers located in Papillion, Elkhorn, Syracuse and Omaha. These service centers are supported by area offices throughout the District’s service territory and include office, garage, storeroom and service facilities.

The District is subject to oversight by the North American Electric Reliability Corporation (“NERC”) which ensures the reliability and security of the District’s Transmission system. The District’s Regional Entity, the Midwest Reliability Organization (“MRO”), has not conveyed upon the District any enforceable NERC standard violations in the foregoing year.

General Facilities

Among the general property of the District are general office and local office buildings, transportation and special mechanized equipment, furniture, office, computer, laboratory, shop equipment and tools, a communication system, and other items necessary for conduct of the District’s business and operation and maintenance of its system.

Other Power Supply and Interconnections

Purchased Power. As a result of the Board decision to cease operations at FCS (see “GENERATING FACILITIES—Fort Calhoun Station”) and growing customer load, the District executed varying levels of capacity contracts to fulfill its accredited capacity obligations to SPP and to mitigate the risk of potential delays in the interconnection of the District’s new Power with Purpose resources. These contracts currently extend until 2027 and reach a maximum of 335 MW in 2023. The District also plans to continue to pursue additional contracts through at least 2028 to manage uncertainty as the SPP Generation Interconnection study for Turtle Creek Station, Standing Bear Lake and Platteview Solar progresses. In addition to the capacity contracts that have been executed, the District has multiple power purchase agreements for wind generation, see “RENEWABLE & OTHER POWER SUPPLY—Wind Generation” and solar generation, see “RENEWABLE & OTHER POWER SUPPLY—Solar Generation”. The District developed and filed its 2021 Integrated Resource Plan (“IRP”) with WAPA in February of 2022. The IRP included the District’s Power with Purpose initiative as part of its near-term actions in its 2021 IRP. As part of the District’s Power with Purpose project, the District is in the process of procuring an additional 400-600 MW of accredited solar generation.

Western Area Power Administration (“WAPA”). The District has a power supply contract with WAPA through December 31, 2050. The contract obligates WAPA to provide firm power and energy to the District up to defined maximums. This formula currently provides for a maximum of 17.2 MW of capacity and energy for the peak load month during the winter season of November through April and a maximum of 47.8 MW of capacity and energy for the peak load month during the summer season of May through October. The contract also provides for delivery of a maximum of 20.9 MW of capacity and energy for the peak load month to Offutt Air Force Base during the winter season of November through April and a maximum of 29.5 MW of capacity and energy for the peak load month during the summer season of May through October. The District has the option to purchase other types of energy from WAPA, when available. WAPA may also, at its discretion, reduce summer amounts of power by up to 5% by giving a minimum of five years written notice in advance of such action.

Southwest Power Pool. The District is a member of the SPP which provides the District with multiple services which include: Reliability Coordination, Tariff Administration, Regional Scheduling, Transmission Expansion Planning, Market Operations, Training, and Generation Reserves Sharing. SPP is the Balancing Authority of the Integrated Marketplace (“IM”), which incorporates the Real Time Energy Imbalance Market with Day Ahead Energy and Ancillary Services and Transmission Congestion Rights Markets.

Enabling Agreements. The District is a party to three enabling agreements: the Western Systems Power Pool (“WSPP”) enabling agreement which has more than 300 participants; the North American Energy Markets Association (“NAEMA”) enabling agreement with more than 100 participants; and the Omaha Public Power District Power Purchase and Sale Agreement (“PPSA”) for entities that are not WSPP or NAEMA members. More than 20 entities have executed the District’s PPSA.

Transmission Facilities

Open Access Transmission Tariff. On April 1, 2009, the District became a transmission owning member of SPP and all of the District’s networked transmission facilities were placed under the SPP Open Access Transmission Tariff. The District no longer grants new transmission service requests under its own transmission tariff. Transmission services granted prior to becoming a member of SPP remain on the District’s tariff as ‘Grandfathered Agreements’ for the original term of service. Any extension of service will be under the SPP Tariff. New generation interconnection requests to connect to the District’s transmission facilities must be submitted to SPP for approval.

Interconnection Agreements. The District is part of a network of transmission lines known as the Eastern Interconnection. The District's transmission facilities are physically interconnected to the transmission facilities of the neighboring utilities. These connections are managed under interconnection agreements with each utility. These interconnections are capable of supplying capacity under emergency conditions in excess of the capacity of District generation. In addition to emergency energy service, the District can utilize these interconnections to provide for firm and participation power purchases and sales, short term power and interchange of energy, and transmission and ancillary services. These services can be purchased under an Open Access Transmission Tariff or under an enabling agreement. The tariff or enabling agreement specifies the terms and conditions of purchases or sales and allows transactions to take place at market based prices.

SPP Transmission Planning. The SPP transmission planning process identifies transmission projects across the SPP footprint that are expected to relieve congestion on the region's transmission system and improve reliability on the electrical grid. This process identified the need for the construction by the District of a new 345/161kV double circuit transmission line between two substations in the Papillion, Nebraska area which was energized in early 2020. This six mile transmission line was titled the Sarpy Transmission Project and was required to provide the necessary capacity and reliability to support new and expanding businesses and residential growth in the area including multiple large data centers. An additional supporting project included the 2.5 mile rebuild of an existing 161kV transmission line to higher capacity. The District will receive reimbursement for a portion of these projects over a 32-year period under the FERC approved SPP tariff.

Other Transmission Projects. The District has completed a four-year project to upgrade communications circuits now leased from local telecommunications providers. The project involved replacing leased telecommunications lines used mostly to ensure reliability and the ability to monitor and control energy delivery facilities with fiber optic facilities added to transmission lines in combination with underground installations across District territory. The telecommunications providers plan to discontinue support of these leased facilities provided to the District. The facilities, used mostly to ensure reliability and the ability to monitor and control energy delivery facilities, will be replaced primarily with fiber optic facilities added to transmission lines in combination with underground installations across District territory. Transmission related work was completed in early 2021 and followed by commissioning of the new network in June of 2021. The team's efforts are now focused on the release of the telecommunications leases, which are planned to be terminated by the year's end.

Three new transmission lines will be constructed in Sarpy County to support increasing load growth in the region, connect the new Turtle Creek Station to the existing transmission grid, and enhance the reliability of the region. These new 161kV and 345kV transmission lines, each approximately 3.5 miles in length, are collectively known as the Sarpy Southwest Transmission Project (SSWTP) and are expected to be energized in 2023. Additional transmission projects associated with Power with Purpose include a cut-in of an existing 161kV transmission line to serve the new Standing Bear Lake Station as well as the uprate of three additional 161kV lines in Douglas and Sarpy County to higher capacity.

In October 2022, the SPP Board approved issuing OPPD a notice to construct a new 345kV transmission line that will run from OPPD's Cass County Power Station to Substation 3454 near 180th & Giles in Sarpy County and will be integrated into OPPD's SSWTP, which is currently under construction. This new line is intended to address transmission reliability issues and will help bolster the grid for future load growth and new generation expansion. The cost estimate for the project is approximately \$68 million where OPPD will pay for the upfront capital costs, however these costs will be allocated regionally to the SPP footprint through reimbursements to OPPD over the life of the facility. Engineering and right-of-way acquisition processes will take place in 2024 and 2025, respectively, with an estimated in-service date of late 2026.

Insurance

The District maintains an insurance program designed to furnish protection against losses having an adverse effect on its financial position or operational capabilities. The District continually reviews its risks of loss and modifies the insurance program as warranted.

A \$750 million property insurance policy is maintained by the District insuring physical damage on real and personal property (with the exception of FCS which is covered under a separate policy) subject to varying deductibles with a minimum deductible of \$250,000 and a maximum deductible of \$5 million. The District self-insures transmission and distribution lines and District owned vehicles.

The District has primary nuclear liability insurance satisfying the NRC's financial protection requirements under the Price Anderson Act for any third party personal injury or property damage claims resulting from a nuclear incident. Effective August 3, 2022, each reactor licensee may be assessed up to \$137.6 million per reactor for claims and legal costs (but not more than \$20.5 million per year) for a nuclear incident at any commercial power reactor facility in the United States when the primary commercial insurance has been exhausted.

On April 7, 2018, the District also received an exemption from the NRC to reduce nuclear property damage and decontamination insurance limits below the previously required \$1.06 billion. The District currently maintains \$120 million nuclear property damage and decontamination insurance covering FCS, subject to a deductible of \$250,000 per occurrence. However, the deductible increases to \$10 million if damages are a result of a water, wind or earth movement event. Under the Nebraska Political Subdivisions Tort Claims Act, the total amount recoverable for claims is \$1 million for any one person and \$5 million for all claims arising out of a single occurrence. The District maintains a \$65 million excess liability policy providing coverage beyond the District's self-insured retained limits for occurrences arising outside the parameters of the Nebraska Political Subdivisions Tort Claims Act or for situations subject to federal jurisdiction.

The District maintains a cyber-insurance policy with limits of \$30 million. The policy indemnifies the District for all damages and claim expenses the District is legally obligated to pay as a result of any cyber incident. In addition, the District maintains a \$35 million fiduciary and employee benefit policy which protects District employees having fiduciary responsibilities in connection with the defined benefit retirement plan or the defined contribution plans. The policy is subject to a \$250,000 deductible. Other types of insurance in force include excess workers' compensation, directors and officers, faithful performance, crime, and a bond on the District's Treasurer.

Enterprise Risk Management

The District maintains an Enterprise Risk Management ("ERM") program to help ensure strategic objectives are achieved. The program specifies risk management standards, management responsibilities, and controls to help ensure risk exposures are properly identified and managed within agreed upon risk tolerance levels. Specific risk mitigation plans and procedures are maintained and reviewed periodically to provide focused and consistent efforts to mitigate various risk exposures.

Several cross-functional risk committees and an Executive ERM Committee, which includes the executive leadership team and legal counsel, are utilized to discuss and analyze the potential risks that could hinder the achievement of the District's strategic objectives. Additionally, the District has established criteria for risk escalation and oversight. The District's risks are evaluated periodically and will be escalated to the appropriate oversight levels, up to and including the Board of Directors, when applicable. An overview of the ERM program is provided to the Board of Directors annually.

Security

The District's Board of Directors established a strategic directive in 2015 that governs information management and security. This directive states that the District will establish "Robust information management and security practices" critical to effective risk management, regulatory compliance, business resiliency and customer-owner satisfaction. These practices will continue to safeguard and protect data, information and assets from inappropriate use, improper disclosure and unauthorized release by formalizing efforts around information security, customer privacy, records management, and compliance.

The District's Technology & Security Business Unit has built a cyber and physical security program to meet the objectives provided by the directive through the development, implementation and management of security best practices and controls (the "Security Program").

The Security Program addresses security across the organization and its critical operational objectives, assets, functions, personnel, facilities, services and products whether physical, cyber, information, human or financial. The Security Program focusses on alignment with the District's strategic directives and obligations both internal and external, including legal responsibilities. The overall goal of the Security Program is to enhance the security and safety of the District, and support preparedness and response. To accomplish these goals, processes have been implemented to identify and communicate security risks and develop mitigations for risk scenarios that could adversely affect the District's critical operations, functions or safety of employees or visitors.

Cyber Security. The District's Chief Executive Officer, Vice President - Chief Information Officer, Director, Corporate Security and Director, Information Security actively participate in industry groups and work with government representatives to address best practices to protect cyber and physical infrastructure and ensure reliability of the electric system. These affiliations support continually improving information sharing, expanded tools, and cooperation in developing solutions to achieve higher levels of resilience. The District is also an active participant in several governmental information sharing programs designed to enhance the energy sector's commitment to collective defense. There have been no known material breaches against the District's Security Program that have resulted in a material financial cost.

To enhance cyber security awareness efforts, the District trains employees to recognize and report suspicious cyber activities and to adopt best practices for computer use and information protection and privacy.

The Safety & Facilities Business Unit includes an Emergency Preparedness team responsible for readying the District for the response, business continuity and recovery missions to significant incidents. The District, through its Emergency Preparedness programs, disaster recovery and business resiliency functions, focuses on issues pertaining to cooperative planning, preparedness, resilience, and recovery related to events of regional and national significance that may affect the delivery of electricity.

Emergency Preparedness utilizes an emergency management model that incorporates the Incident Command System and National Incident Management System as part of the Federal Emergency Management Agency's emergency response structure.

Rate Stabilization Fund

This fund is used to stabilize rates through the transfer of funds to operations as necessary. Since there is no funding requirement, this fund also may be used to provide additional liquidity for operations as necessary. The fund balance as of October 31, 2022 was \$50 million.

Decommissioning and Benefits Reserve

This reserve (which is a Deferred Inflow of Resources on the Statement of Net Position) is intended to be utilized to assist in funding future decommissioning expenses beyond what was established in the current decommissioning funding plan in any given year and future Retirement Plan liabilities above the ADC. Since there is no funding requirement, the District has decided not to fund the reserve in a separate account with cash. In December 2021, the District made an additional \$95 million contribution above the ADC to the Retirement Plan utilizing \$95 million of the reserve. Any reserve changes are funded through the Revenue Fund. Therefore, the additional \$95 million contribution resulted in a decrease in the reserve by \$95 million. At the end of 2021, the District contributed an additional \$12 million to the reserve resulting in the current balance of \$32 million. For additional information regarding decommissioning expenses, see “THE ELECTRIC SYSTEM—Generating Facilities—Fort Calhoun Station—*Decommissioning Trust Funds*.” For additional information regarding Retirement Plan liabilities, see “THE DISTRICT—Defined Benefit Retirement Plan.”

Liquidity

The District employs a probabilistic model that assists in determining a minimum level of liquidity to be maintained. The model employs a two-step process. The first step calculates the base level of liquidity needed to meet operational needs. The second step calculates the risk impacted level of liquidity needed based on material risks affecting the District. The sum of the base and risk-impacted liquidity levels determines the minimum total liquidity level. The District’s minimum target level of liquidity is \$260 million, or 100 days cash on hand. As of October 31, 2022, the District had 217 days cash on hand. If the District’s undrawn lines of credit in excess of the outstanding amount of commercial paper are considered, the days cash and liquidity on hand is 282 days.

FACTORS AFFECTING THE DISTRICT AND THE ELECTRIC UTILITY INDUSTRY GENERALLY

General

The electric utility industry in general has been affected by regulatory changes, market developments, and other factors which have impacted, and will continue to impact, the financial condition and competitiveness of electric utilities, such as the District. Such factors discussed in more detail in the following sections, include: (a) effects of compliance with rapidly changing environmental, safety, licensing, regulatory, and legislative requirements; (b) changes resulting from energy efficiency and demand-side management programs on the timing and use of electric energy; and (c) nuclear waste disposal.

Additional factors affecting the utility industry include: (a) other federal and state legislative and regulatory changes; (b) increased competition from independent power producers; (c) “self-generation” by certain industrial and commercial customers; (d) issues relating to the ability to issue tax-exempt obligations; (e) severe restrictions on the ability to sell electricity from generation projects financed with outstanding tax-exempt obligations to nongovernmental entities; (f) changes in projected future load requirements; (g) increases in costs; (h) shifts in the availability and relative costs of different fuels; (i) climate change and the potential contributions made to climate change by coal fired and other fossil-fueled generating units; and (j) issues relating to internet and data security. Any of these general factors and the factors discussed below could have an effect on the financial condition of the District.

General Economic Conditions

The District's costs are affected by numerous factors, many of which are macroeconomic industry variables that are beyond its control. Some of the recent factors include rising inflation, supply chain disruptions and delays, labor shortages and rising labor costs, and rising interest rates. More specifically, the rate of inflation has increased at the fastest rate since the 1980s, increasing the price of fuel and commodities integral to the District's operations. In response to rising inflation, the United States Federal Reserve has increased interest rates, which will result in an increase to the District's future cost of capital. The global economy has faced supply chain shortages and delays. These issues may be further exacerbated by rising labor costs in the United States and global economic crises, including the Russian invasion of Ukraine. The occurrence and impact of these global events and macroeconomic factors are difficult to predict but may have a material adverse effect on the District's results of operations and financial condition.

Climate Risks

In the ordinary course of business, the District can experience weather-related risks. These risks can result in both operational and financial impacts. In response to the operational risks, the District looks for various areas for improvement including hardening the underground and overhead distribution grid, identifying and replacing aging infrastructure and equipment, and continuing its robust investment in tree trimming. In response to financial risks, the District maintains a robust amount of financial liquidity, load curtailment contracts, and employs energy hedging contracts to help to offset the financial risks related to weather-related events. The District experienced two significant weather-related events during 2021 that are summarized below.

February 2021 Winter Weather Event. During February 2021, the SPP service territory experienced extreme cold weather. SPP declared several unprecedented emergency alerts including directing member utilities to implement controlled, temporary interruptions of service to maintain the integrity of the transmission system.

The February 2021 winter weather event combined with plant outages resulted in an approximate negative \$65 million cash impact. The District's strong cash balances and available lines of credit provided support to the District to mitigate the negative cash impact. Due to other positive financial outcomes during 2021, the District was able to mitigate the impact of the weather event on the 2021 year-end financials.

July 2021 Storm Event. During July 2021, a 25-mile wide storm with winds that reached hurricane-force strength of 96 miles per hour, impacted the District's service territory. The wind event resulted in 188,000 customers in the District's service territory being without power. The number of outages caused by the storm was the largest number of outages in the history of the District. All customer outages were fully restored within seven days. The estimated financial outlays from the storm were \$15.5 million. The District expects cost reimbursements from the Federal Emergency Management Agency (FEMA) of approximately \$15 million.

Reliability

The District is a member of MRO and NERC as an owner, an operator, and a user of transmission and generation facilities. Both the MRO and NERC are reliability organizations responsible for the development of and compliance with reliability standards for applicable interconnected utilities. The District is required to follow and adhere to the reliability standards to ensure safe operation of the Bulk Electric System. The District has programs dedicated to maintain reliability of the transmission and distribution facilities including vegetation management, inspections, and identification and proactive replacement of poor condition equipment.

Potential National Rail Strike

In November 2022, one of the country's largest railroad unions voted to reject a proposed contract that could result in a strike beginning in December 2022. The District relies on BNSF for rail transportation for its coal supplies. If the national rail strike occurs and depending on its duration, the District's operations and finances could be affected but the impact cannot be determined at this time.

COVID-19

In March 2020, the World Health Organization and the President of the United States ("President") separately declared the outbreak of a respiratory disease caused by a novel coronavirus ("COVID-19") to be a public health emergency. On March 13, 2020, the President declared a national emergency and the Governor of Nebraska signed a state of emergency declaration to aid in the State's response to COVID-19. Subsequent to the state of emergency, the State of Nebraska as well as various counties and cities in the State established health measures to attempt to limit the spread of COVID-19. These measures included limitations imposed on business operations, social gatherings, and other activities.

The District also implemented several initiatives to limit the spread of COVID-19 and to protect its employees and customers. The impact of COVID-19 on the District has had no material effect on the District's financials to date. The District cannot predict the duration or extent of the COVID-19 pandemic or its future impact on the financials and operations of the District.

LIBOR Transition

The District's Credit Agreements bear interest rates that are determined based on a LIBOR index. On March 5, 2021, the U.K. Financial Conduct Authority (the "FCA"), the body that regulates and supervises the publication of LIBOR, announced that publication of (i) the 1-week and 2-month U.S. Dollar LIBOR settings will permanently cease immediately after December 31, 2021, (ii) the overnight and 12-month U.S. Dollar LIBOR settings will permanently cease immediately after June 30, 2023, and (iii) the 1-month, 3-month and 6-month U.S. Dollar LIBOR settings will, immediately after June 30, 2023, either cease to be provided or, subject to the FCA's consideration, be provided on a synthetic basis and no longer be representative of the underlying market and economic reality that such setting is intended to measure and that representativeness will not be restored.

If future uncertainty surrounding the calculation of LIBOR results in sudden increases in LIBOR rates, the interest payments on the District's LIBOR-based debt, if any, may be affected. Further, the phase out of LIBOR and the uncertainty as to the benchmark rate or mechanism that may succeed LIBOR may increase the costs or reduce the availability of financing or otherwise materially adversely affect the District, depending in part on the market levels of any such replacement rate or mechanism, and the potential vulnerability to manipulation (if any) of any such replacement rate or mechanism. The District may pursue amendments from time to time to its LIBOR-based debt to provide for a transaction mechanism or other reference rate in anticipation of LIBOR's discontinuation, but it may not be able to reach agreements with the counterparts to such transactions regarding any such amendments. The replacement of LIBOR with a successor rate and/or mechanism could cause the amount of the interest payable on the District's LIBOR-based debt to be higher or lower than expected.

Environmental Issues - Air Quality Issues and the Clean Air Act Amendments of 1990

The following includes Environmental Protection Agency rules that recently have been finalized or proposed and their projected impact on the District:

Greenhouse Gas Regulation. There is uncertainty regarding how the federal government will address greenhouse gas regulation in the coming years. The U.S. Environmental Protection Agency (“EPA”) finalized the Clean Power Plan (“CPP”) regulations in 2015 to specifically limit greenhouse gas (“GHG”) emissions from power plants. The CPP was challenged in court and never went into effect. The EPA published a final rule in the Federal Register on July 8, 2019 called the Affordable Clean Energy (“ACE”) Rule and at the same time repealed the CPP. The ACE Rule included emission guidelines for existing electric utility generating units based on reducing GHG emissions by implementing heat rate improvements on the affected coal-fired units. The ACE rule was also challenged in the courts and on January 9, 2021, the District of Columbia Circuit Court vacated the ACE Rule, remanding it back to the EPA. On June 30, 2022 the U.S. Supreme Court ruled in the case of *West Virginia v. The Environmental Protection Agency*. The majority opinion said regulations which would affect larger economic forces beyond the fence lines of individual power plants are not permitted under section 111(d) of the Clean Air Act. It is expected that the EPA will undertake new rulemaking to replace the ACE Rule. It is expected the EPA will issue a proposed new rule on CO2 performance standards for existing power plants in the spring of 2023.

Regional Haze. The District received a Regional Haze information request from the Nebraska Department of Environment and Energy (“NDEE”) on June 5, 2020 with a revision dated August 4, 2020 and a supplement dated September 29, 2020 for use in their preparation of a State Implementation Plan (“SIP”) submittal for the Regional Haze second implementation period. The information request asked for a regional haze analysis for NC1. The District provided NDEE with an initial response to the information request on November 4, 2020 and a second response on February 17, 2021. In November 2022, NDEE distributed the Nebraska Regional Haze SIP to Federal Land Managers (“FLM”) for formal consultation. After addressing comments from the FLM review, the draft SIP will go on 30-day public notice with a possible public meeting included as part of the public notice process. NDEE continues the process of finalizing the Nebraska Regional Haze SIP for submittal to the EPA.

Environmental Issues - Hazardous and Toxic Materials Regulations

Chemical Reporting. The electric utility industry is subject to the Emergency Planning and Community Right to Know Act (“EPCRA”), the Toxic Substances Control Act regulations (“TSCA”) and the Resource Conservation & Recovery Act (“RCRA”), including applicable programs delegated to the NDEE by the EPA. The District conducts environmental audits to monitor compliance with these regulations in conjunction with the proper management and disposal of applicable hazardous, toxic, and low level radioactive wastes.

The four major provisions of the EPCRA are emergency planning, emergency release notification, hazardous chemical storage reporting requirements, and toxic chemical release inventory. The emergency planning section of the law is designed to help communities prepare for and respond to emergencies involving hazardous substances. Specifically, the District annually reports the presence, location, and amount of hazardous substances at its facilities to local emergency responders and to local and state emergency planning committees. The District also annually reports the amounts of EPCRA chemicals that it releases to the environment at its coal fired electric generating facilities to the State Emergency Response Commission and the EPA via the Toxics Release Inventory (“TRI”). The TRI is a publicly available EPA database that contains information on toxic chemical releases and other waste management activities reported annually by certain covered industry groups as well as federal facilities. Accidental or emergency releases of EPCRA chemicals above threshold amounts are reported to local agencies as well as the National Response Center.

The District manages TSCA waste (mainly asbestos and polychlorinated biphenyls from electrical transmission and distribution equipment) through a process involving reporting, sampling and analysis, and

appropriate waste management to ensure compliance. RCRA waste is managed by characterizing, packaging and shipping radioactive and solid wastes to the District's approved waste vendors to ensure compliance and minimize liability associated with waste disposal. In order to ensure compliance, the District remains active in reviewing applicable regulatory changes and modifying facility environmental management plans accordingly. Pollution prevention efforts have been effective in reducing environmental liabilities and reducing operating costs.

Environmental Issues - Clean Water Act

316(b) Fish Protection Regulations. On May 19, 2014, the EPA issued the final rule under Section 316(b) of the Clean Water Act. Facilities are required to choose one of seven options to reduce fish impingement. The District received new National Pollutant Discharge Elimination System ("NPDES") permits effective January 1, 2016 which dictated the compliance schedule and studies necessary to comply with the rule. All required studies were submitted to the NDEE in June 2019 for review. On June 8, 2020, the NDEE responded by stating, "...that the risk to endangered and threatened species and cost to benefit of entrainment reduction do not outweigh the cost of implementing the proposed technologies, including fine-meshed screens. The NDEE agrees that the facility's existing cooling water intake structure ("CWIS") technology is "best technology available ("BTA") for entrainment." The District submitted the proposed BTA determination for impingement in December of 2020. This submittal stated that the District intends to install and operate Coarse Mesh Modified Traveling Screens with a Fish Return at NCS and at those NOS intake structures providing flow for NOS Units 4 and 5. The cost of compliance is expected to be \$18,825,000 for NOS and NCS combined.

The BTA determination for entrainment and the implementation timeline for impingement is included in both the NCS and NOS renewed NPDES permits for those facilities. Following a public comment period, the renewed NPDES permit for NCS was issued with an effective date of July 1, 2022. The District recently provided comments back to NDEE on the NOS draft NPDES permit prior to the public comment period. The NOS draft NPDES permit is expected to be posted for the required 30 day public comment period in Q4 of 2022.

Effluent Limitations Guidelines ("ELGs"). ELGs are national standards developed under the Clean Water Act that apply to industrial wastewater discharges. On August 31, 2020 EPA finalized a rule revising the regulations for the Steam Electric Power Generating category of the ELGs. The 2020 rule eliminates the ability of operators to discharge Bottom Ash Transport Water. The District plans to eliminate these discharges by installing a high efficiency recycle system, to be installed no later than December 31, 2025. Although the 2020 rule was originally not applicable to NOS due to the planned cessation of coal generation at that facility, the extension of coal operations at NOS approved in August 2022 requires the District to develop a compliance plan to meet this regulation. A compliance schedule is included in the draft NOS NPDES permit described above. The cost of compliance at NOS is expected to be \$13,874,000. NCS already meets the requirements of the 2020 rule.

Environmental Issues - Solid Waste

Coal Combustion Residuals ("CCR") Regulations. On April 17, 2015, the EPA promulgated technical requirements for CCR landfills and surface impoundments for the safe disposal of coal combustion residuals under Subtitle D of the RCRA. The regulations provide design criteria, operating criteria, groundwater monitoring requirements, closure requirements, and recordkeeping and notification requirements associated with CCR landfills and surface impoundments. The regulation became effective on October 19, 2015 and the District is in compliance with the requirements.

Landfill-Specific Updates. On May 30, 2019, the District notified the NDEE that it had initiated Assessment of Corrective Measures (“ACM”) for the NOS landfill. Following hydrogeological modeling, groundwater monitoring, and engineering evaluations, the District proposed long-term groundwater monitoring and post-closure capping as a final remedy. After a public meeting and comment period, the District published a final Selection of Remedy report on December 13, 2021 and is in the process of seeking associated permitting for the selected final remedy. The NC1 landfill completed final closure activities in the fall of 2020 and has proceeded to post closure sampling. In December 2020, the District also entered ACM for the NC2 landfill. Following hydrogeological modeling, groundwater monitoring, and engineering evaluations, the District has proposed source control through the application of a surface binder on the ash in the landfill, as well as operational changes in landfill construction (reduce the active area of the landfill to minimize dust) as a final remedy. After a public meeting and comment period, the District published a final Selection of Remedy report on November 15, 2021. The District has recently completed the associated permitting for the selected final remedy and has initiated implementation measures. The cost of compliance with the requirements of the CCR rule at this time are minimal.

Environmental Issues – Natural Resources

On March 22, 2022 the U.S. Fish and Wildlife Service issued a proposal to reclassify the northern long-eared bat (NLEB) from a threatened species to an endangered species under the Endangered Species Act of 1973, as amended. The final rule is expected by December 2022. Reclassifying the NLEB will have implications for development projects throughout the U.S. The District will evaluate the impact of this reclassification when the final rule is published.

Coal Supply in National Emergency

The District closely monitors national events and trends in order to plan for adequate coal inventories and continued reliable generating capacity in the event of a national emergency. Should such a national emergency occur without warning, normal operations and inventories of the District have built in contingencies to provide electric service for extended periods of time. Such contingencies include targeting a 42-day supply of coal inventories and maintaining electrical grid interconnections with other utilities. Additionally, the District utilizes Powder River Basin coal, where reserves are extensive.

Nuclear Regulation

The District is subject to continuing regulation by the NRC in connection with the decommissioning of FCS. NRC regulations require extensive review of both the radiological and environmental aspects of this facility. The District has incurred and expects to continue to incur expenditures as a result of these requirements. For additional information regarding the nuclear industry, see “THE ELECTRIC SYSTEM—Generating Facilities—*Fort Calhoun Station.*”

Low-Level Nuclear Waste

FCS generated three classes of low level radioactive waste. Waste classified as Class A is the least radioactive and Classes B and C have successively higher levels of radioactivity. The District utilizes Energy Solutions near Clive, Utah for the disposal of Class A waste. The District’s previous low level radioactive waste storage facility discontinued accepting Class B and Class C waste in July 2008. The District retains the capacity to store Class B and Class C waste on site at FCS, however the District is beginning to ship this waste as part of decommissioning. An increase in radioactive waste shipments is expected as FCS continues decommissioning activities. The District will continue to evaluate potential off site storage and disposal options as they become available.

High-Level Nuclear Waste Repository

Under the federal Nuclear Waste Disposal Act of 1982, the federal government assumed responsibility for the permanent disposal of spent nuclear fuel and greater than Class C waste. Under the terms of a contract with the District, whereby the District was to pay a fee of one mill per net kWh on net electricity generated and sold, the DOE was to begin accepting spent nuclear fuel and greater than Class C waste by January 1998. The U.S. Court of Appeals for the D.C. Circuit ruled in November 2013 that the DOE could not continue to collect the one mill per net kWh fee in light of the DOE's termination of the Yucca Mountain repository program. The DOE temporarily ceased collection of the fee effective May 16, 2014 until the DOE complies with the Nuclear Waste Policy Act of 1982 or Congress enacts an alternative used fuel management plan. At this time, it is unclear when a DOE facility will be operational.

The District remains responsible for the safe storage of spent nuclear fuel and greater than Class C waste until the federal government takes delivery. The District previously completed construction of a dry cask storage facility ("ISFSI") on site to meet long term storage needs for the spent fuel bundles. The total cost of the construction and the initial loading of ten storage casks was approximately \$23 million. As part of the decommissioning of FCS, an analysis was conducted to determine the best alternative for interim fuel storage. The District entered into a contract with TN Americas in February 2018 for materials and services to build the necessary structures for dry fuel storage and complete moves of all fuel into the ISFSI. Transfer of spent fuel to the ISFSI was completed in May 2020. For additional information regarding nuclear fuel, see "THE ELECTRIC SYSTEM—Fuel Supply—*Nuclear*."

In June 2006, the District entered into a settlement agreement with the DOE under which the DOE is to reimburse the District for expenses associated with the storage of spent fuel at the District's nuclear power station pending the DOE fulfilling its contractual obligation to accept such fuel for permanent storage. The settlement agreement provides for a defined procedure for determining future reimbursable costs. From 1998 through 2010, the District received \$28 million in reimbursements which covered allowed costs incurred for cask loading and transfer as well as necessary facility upgrades. In 2022, after completing the prescribed process for claim years 2017-2019, DOE reimbursed the District \$45 million for allowable and reasonable spent fuel storage related costs. The District submitted additional requests for reimbursement for 2020 and 2021 spent fuel storage related costs. In July 2022, the DOE issued a finding awarding the District approximately \$31.8 million for allowable and reasonable spent fuel storage related costs incurred in 2020. In November 2022, the DOE issued a finding awarding the District approximately \$5.5 million for allowable and reasonable spent fuel storage related costs incurred in 2021. Additional claims by the District, thereafter, are expected to be submitted under the settlement agreement annually.

[Remainder of Page Intentionally Left Blank]

LEGAL PROCEEDINGS

There is not now pending or threatened litigation of any nature seeking to restrain or enjoin, or in any manner questioning, the issuance and delivery of the Notes, the proceedings and authority under which the Notes are issued or affecting the validity of the Notes thereunder, the power and authority of the District to fix and establish and collect adequate rates, tolls, rents or other charges for electric energy and all other commodities, services and facilities sold, furnished or supplied by the District, the proceedings and authority under which the District's present rates, tolls and other charges are made and the right and authority of the District to conduct its electrical business or operate any of its properties now constructed or contemplated to be constructed; and neither the corporate existence nor the boundaries of the District nor the title of its present officers to their respective offices is being contested.

RATINGS

Moody's Investors Service and Standard & Poor's Ratings Services have given the ratings of "P-1" and "A-1+" respectively, to the Notes. Such ratings reflect only the views of such organizations, and explanations of the significance of such ratings may be obtained only from the credit rating agencies. There is no assurance that such ratings will continue for any given period of time or that they will not be revised downward or withdrawn entirely by such credit rating agencies if in their judgment circumstances so warrant. Any such downward revision or withdrawal of such ratings may have an adverse effect on the market price of the Notes.

[Remainder of Page Intentionally Left Blank]

THE DEPOSITORY TRUST COMPANY, NEW YORK, NEW YORK

The information in this section concerning DTC and DTC's book-entry system has been obtained from sources believed to be reliable, but the District takes no responsibility for the accuracy of such information.

DTC, the world's largest securities depository, is a limited purpose trust company organized under the New York Banking Law, a "banking organization" within the meaning of the New York Banking Law, a member of the Federal Reserve System, a "clearing corporation" within the meaning of the New York Uniform Commercial Code, and a "clearing agency" registered pursuant to the provisions of Section 17A of the Securities Exchange Act of 1934. DTC holds and provides asset servicing for over 3.5 million issues of U.S. and non-U.S. equity issues, corporate and municipal debt issues, and money market instruments (from over 100 countries) that DTC's participants ("Direct Participants") deposit with DTC. DTC also facilitates the post-trade settlement among Direct Participants of sales and other securities transactions in deposited securities, through electronic computerized book-entry transfers and pledges between Direct Participants' accounts. This eliminates the need for physical movement of securities certificates. Direct Participants include both U.S. and non-U.S. securities brokers and dealers, banks, trust companies, clearing corporations, and certain other organizations. DTC is a wholly-owned subsidiary of The Depository Trust & Clearing Corporation ("DTCC"). DTCC is the holding company for DTC, National Securities Clearing Corporation, and Fixed Income Clearing Corporation, all of which are registered clearing agencies. DTCC is owned by the users of its regulated subsidiaries. Access to the DTC system is also available to others such as both U.S. and non-U.S. securities brokers and dealers, banks, trust companies, and clearing corporations that clear through or maintain a custodial relationship with a Direct Participant, either directly or indirectly ("Indirect Participants"). DTC has a Standard & Poor's rating of AA+. The DTC Rules applicable to its Participants are on file with the Securities and Exchange Commission. More information about DTC can be found at www.dtcc.com.

Purchases of Notes under the DTC system must be made by or through Direct Participants, which will receive a credit for the Notes on DTC's records. The ownership interest of each actual purchaser of each Note ("Beneficial Owner") is in turn to be recorded on the Direct and Indirect Participants' records. Beneficial Owners will not receive written confirmation from DTC of their purchase. Beneficial Owners are, however, expected to receive written confirmation providing details of the transaction, as well as periodic statements of their holdings, from the Direct or Indirect Participant through which the Beneficial Owner entered into the transaction. Transfers of ownership interests in the Notes are to be accomplished by entries made on the books of Direct and Indirect Participants acting on behalf of Beneficial Owners. Beneficial Owners will not receive certificates representing their ownership interests in Notes, except in the event that use of the book-entry system for the Notes is discontinued.

To facilitate subsequent transfers, all Notes deposited by Direct Participants with DTC are registered in the name of DTC's partnership nominee, Cede & Co., or such other name as may be requested by an authorized representative of DTC. The deposit of Notes with DTC and their registration in the name of Cede & Co. or such other DTC nominee does not affect any change in beneficial ownership. DTC has no knowledge of the actual Beneficial Owners of the Notes; DTC's records reflect only the identity of the Direct Participants to whose accounts such Notes are credited, which may or may not be the Beneficial Owners. The Direct and Indirect Participants will remain responsible for keeping account of their holdings on behalf of their customers.

Conveyance of notices and other communications by DTC to Direct Participants, by Direct Participants to Indirect Participants, and by Direct Participants and Indirect Participants to Beneficial Owners will be governed by arrangements among them, subject to any statutory or regulatory requirements as may be in effect from time to time. Neither DTC nor Cede & Co. (nor any other DTC nominee) will

consent or vote with respect to Notes unless authorized by a Direct Participant in accordance with DTC's MMI Procedures. Under its usual procedures, DTC mails an Omnibus Proxy to the District as soon as possible after the record date. The Omnibus Proxy assigns Cede & Co.'s consenting or voting rights to those Direct Participants to whose accounts Notes are credited on the record date (identified in a listing attached to the Omnibus Proxy).

Principal and interest payments on the Notes will be made to Cede & Co., or such other nominee as may be requested by an authorized representative of DTC. DTC's practice is to credit Direct Participants' accounts upon DTC's receipt of funds and corresponding detail information from the District in accordance with their respective holdings shown on DTC's records. Payments by Participants on the payable date to Beneficial Owners will be governed by standing instructions and customary practices, as is the case with securities held for the accounts of customers in bearer form or registered in "street name," and will be the responsibility of such Participant and not of DTC or the District, subject to any statutory or regulatory requirements as may be in effect from time to time. Payment of principal and interest to Cede & Co. (or such other nominee as may be requested by an authorized representative of DTC) is the responsibility of the District, disbursement of such payments to Direct Participants will be the responsibility of DTC, and disbursement of such payments to Beneficial Owners is the responsibility of Direct and Indirect Participants.

DTC may discontinue providing its services as depository with respect to the Notes at any time by giving reasonable notice to the District. Under such circumstances, in the event that a successor depository is not obtained, Note certificates are required to be printed and delivered.

The District may decide to discontinue use of the system of book-entry transfers through DTC (or a successor securities depository). In that event, Note certificates will be printed and delivered to DTC.

LEGAL OPINION

The form of Legal Opinion of Kutak Rock LLP, Omaha, Nebraska, which is printed on the Master Note, is included in Appendix B.

COMMERCIAL PAPER MEMORANDUM

The information contained in this Commercial Paper Memorandum has been prepared by the District. All references to and explanations and summaries of statutes, resolutions, contracts, and other documents contained herein are qualified in their entirety by reference to said statutes and documents for a full and complete description of their respective provisions. Any statements contained herein involving matters of opinion, whether or not expressly so stated, are intended as such and not as representations of fact.

The Dealers have provided the following sentence for inclusion in this Commercial Paper Memorandum. The Dealers have reviewed the information in the Commercial Paper Memorandum in accordance with, and as part of, its responsibilities to investors under the federal securities laws as applied to the facts and circumstances of the transaction, but the Dealers do not guarantee the accuracy of completeness of such information.

The execution, delivery, and distribution of this Commercial Paper Memorandum have been duly authorized by the Board of Directors of the District.

AVAILABLE FINANCIAL INFORMATION

The District is not required to file reports with the Securities and Exchange Commission; however, in compliance with Rule 15c2-12, additional information regarding the District is available, in conjunction with the issuance of other transactions, pursuant to the terms of other transactions, at the Municipal Securities Rulemaking Board information repository, <http://emma.msrb.org>. The most recently prepared financial statements of the District are contained in the 2021 Annual Report which is incorporated herein by reference. Copies of its most recent Annual Reports and Official Statements are available on the District's website at www.oppd.com or upon request in writing to: Omaha Public Power District, Treasury and Financial Operations, 444 South 16th Street Mall, Omaha, Nebraska 68102-2247 or e-mail to: finfo@oppd.com

The posting of this Commercial Paper Memorandum is for informational purposes only and does not constitute an offer to sell nor a solicitation of an offer to buy any security. Such offers can only be made through a licensed broker-dealer where lawful under applicable law. This Memorandum has been published in the United States for residents of the United States and is not intended for use by, or to provide any information to, investors outside of the United States.

December 2, 2022

APPENDIX A-1

CERTAIN INFORMATION CONCERNING THE BANKS

WELLS FARGO BANK, NATIONAL ASSOCIATION

Wells Fargo Bank, National Association (the “Bank”) is a national banking association organized under the laws of the United States of America with its main office at 101 North Phillips Avenue, Sioux Falls, South Dakota 57104, and engages in retail, commercial and corporate banking, real estate lending and trust and investment services. The Bank is an indirect, wholly-owned subsidiary of Wells Fargo & Company (“Wells Fargo”), a diversified financial services company, a financial holding company and a bank holding company registered under the Bank Holding Company Act of 1956, as amended, with its principal executive offices located in San Francisco, California.

The Bank prepares and files Call Reports on a quarterly basis. Each Call Report consists of a balance sheet as of the report date, an income statement for the year-to-date period to which the report relates and supporting schedules. The Call Reports are prepared in accordance with regulatory instructions issued by the Federal Financial Institutions Examination Council. While the Call Reports are supervisory and regulatory documents, not primarily accounting documents, and do not provide a complete range of financial disclosure about the Bank, the reports nevertheless provide important information concerning the Bank’s financial condition and results of operations. The Bank’s Call Reports are on file with, and are publicly available upon written request to the FDIC, 550 17th Street, N.W., Washington, D.C. 20429, Attention: Division of Insurance and Research. The FDIC also maintains an internet website that contains the Call Reports. The address of the FDIC’s website is <http://www.fdic.gov>. The Bank’s Call Reports are also available upon written request to the Wells Fargo Corporate Secretary’s Office, Wells Fargo Center, MAC N9305-173, 90 South 7th Street, Minneapolis, MN 55479.

THE WELLS CREDIT AGREEMENT WILL BE SOLELY AN OBLIGATION OF THE BANK AND WILL NOT BE AN OBLIGATION OF, OR OTHERWISE GUARANTEED BY, WELLS FARGO, AND NO ASSETS OF WELLS FARGO OR ANY AFFILIATE OF THE BANK OR WELLS FARGO WILL BE PLEDGED TO THE PAYMENT THEREOF. PAYMENT OF THE WELLS CREDIT FACILITY WILL NOT BE INSURED BY THE FDIC.

The information contained in this section, including financial information, relates to and has been obtained from the Bank, and is furnished solely to provide limited introductory information regarding the Bank and does not purport to be comprehensive. Any financial information provided in this section is qualified in its entirety by the detailed information appearing in the Call Reports referenced above. The delivery hereof shall not create any implication that there has been no change in the affairs of the Bank since the date hereof.

APPENDIX A-2

CERTAIN INFORMATION CONCERNING THE BANKS

BANK OF AMERICA, NATIONAL ASSOCIATION

Bank of America, N.A. (the "Bank") is a national banking association organized under the laws of the United States, with its principal executive offices located in Charlotte, North Carolina. The Bank is a wholly-owned indirect subsidiary of Bank of America Corporation (the "Corporation") and is engaged in a general consumer banking, commercial banking and trust business, offering a wide range of commercial, corporate, international, financial market, retail and fiduciary banking services. As of June 30, 2022, the Bank had consolidated assets of \$2.440 trillion, consolidated deposits of \$2.075 trillion and stockholder's equity of \$230.992 billion based on regulatory accounting principles.

The Corporation is a bank holding company and a financial holding company, with its principal executive offices located in Charlotte, North Carolina. Additional information regarding the Corporation is set forth in its Annual Report on Form 10-K for the fiscal year ended December 31, 2021, together with its subsequent periodic and current reports filed with the Securities and Exchange Commission (the "SEC").

The SEC maintains a website at www.sec.gov which contains the filings that the Corporation files with the SEC such as reports, proxy statements and other documentation. The reports, proxy statements and other information the Corporation files with the SEC are also available at its website, www.bankofamerica.com.

The information concerning the Corporation and the Bank is furnished solely to provide limited introductory information and does not purport to be comprehensive. Such information is qualified in its entirety by the detailed information appearing in the referenced documents and financial statements referenced therein.

The Letter of Credit has been issued by the Bank. As of September 1, 2022, the Bank's senior debt ratings were as follows:

AGENCY	LONG-TERM DEBT	SHORT TERM DEBT	OUTLOOK
Moody's Investors Service ("Moody's")	Aa2	P-1	Positive
Standard & Poor's ("S&P")	A+	A-1	Positive
Fitch Ratings ("Fitch")	AA	F1+	Stable

The Bank will provide copies of the most recent Bank of America Corporation Annual Report on Form 10-K, any subsequent reports on Form 10-Q, and any required reports on Form 8-K (in each case, as filed with the SEC pursuant to the Securities Exchange Act of 1934, as amended), and the publicly available portions of the most recent quarterly Call Report of the Bank delivered to the Comptroller of the Currency, without charge, to each person to whom this document is delivered, on the written request of such person. Written requests should be directed to:

Bank of America Corporation
Office of the Corporate Secretary/Shareholder Relations
One Bank of America Center

150 N College St. NC1-028-28-03
Charlotte, NC 28255

PAYMENTS OF PRINCIPAL AND INTEREST ON THE NOTES WILL BE MADE FROM DRAWINGS UNDER THE LETTER OF CREDIT. PAYMENTS OF THE PURCHASE PRICE OF THE NOTES WILL BE MADE FROM DRAWINGS UNDER THE LETTER OF CREDIT IF REMARKETING PROCEEDS ARE NOT AVAILABLE. ALTHOUGH THE LETTER OF CREDIT IS A BINDING OBLIGATION OF THE BANK, THE NOTES ARE NOT DEPOSITS OR OBLIGATIONS OF THE CORPORATION OR ANY OF ITS AFFILIATED BANKS AND ARE NOT GUARANTEED BY ANY OF THESE ENTITIES. THE NOTES ARE NOT INSURED BY THE FEDERAL DEPOSIT INSURANCE CORPORATION OR ANY OTHER GOVERNMENTAL AGENCY AND ARE SUBJECT TO CERTAIN INVESTMENT RISKS, INCLUDING POSSIBLE LOSS OF THE PRINCIPAL AMOUNT INVESTED.

The delivery of this information shall not create any implication that there has been no change in the affairs of the Corporation or the Bank since the date of the most recent filings referenced herein, or that the information contained or referred to in this Appendix A2 is correct as of any time subsequent to the referenced date.

OMAHA PUBLIC POWER DISTRICT Electric Revenue Notes, CP Series A

Ladies and Gentlemen:

We have previously acted as bond counsel to the Omaha Public Power District (the "District") in connection with the issuance and sale by the District of its Electric Revenue Notes, CP Series A (the "Notes"). In that capacity, we have issued to the District our opinion dated October 24, 2006 (the "2006 Opinion") regarding, among other things, the exclusion from gross income for federal income tax purposes of interest on the Notes.

We have, at your request, examined Resolution No. 6424 of the District ("Resolution 6424"), adopted by the District on March 18, 2021, which Resolution 6424 authorizes an increase in the authorized amount of Notes, and the Tax Compliance Certificate of the District relating to certain of the Notes dated the date hereof (the "Tax Certificate"). Based on our review of Resolution 6424, the Tax Certificate and such other resolutions, certificates and opinions as we deem relevant and necessary, we are of the opinion that the adoption and performance of Resolution 6424 will not, in and of itself, adversely affect the conclusions expressed in the 2006 Opinion with respect to the exclusion from gross income for federal income tax purposes of interest on the Notes.

Except as expressly provided herein, we express no opinion as to the Notes and the exclusion from gross income for federal income tax purposes of interest on the Notes.

Very truly yours,

KUTAK ROCK LLP

Omaha Public Power District
Electric Revenue Notes, CP Series A

Ladies and Gentlemen:

We have examined proceedings relating to the issuance by the Omaha Public Power District (the "District") of its Electric Revenue Notes, CP Series A (the "CP Notes"). The CP Notes are issued under the provisions of the hereinafter-described Resolutions. The CP Notes are dated as provided in the Resolutions in denominations of \$100,000 and integral multiples of \$1,000 in excess thereof.

The CP Notes have interest payable and principal maturing at such times as may be stated therein but in no event later than 270 days after the date of issuance thereof or later than the day prior to any date of termination of the commitment of the banks identified in the applicable revolving credit agreement, as amended from time to time. The aggregate principal amount of the CP Notes is limited as provided in the Resolutions.

The CP Notes recite that they are issued for valid corporate purposes of the District under the authority of and in full compliance with the Constitution and laws of the State of Nebraska, including Chapter 70, Article 6 of the Nebraska Reissue Revised Statutes of 1943, as amended, and the Resolutions.

We have examined the Constitution and statutes of the State of Nebraska, a certified transcript of the proceedings of the Board of Directors of the District authorizing or relating to the issuance of the CP Notes, including the Resolutions adopted by the Board of Directors of the District authorizing the issuance of the CP Notes (the "Resolutions"), and such other documents, opinions and certificates which we have deemed necessary in rendering this opinion.

KUTAK ROCK LLP

October 24, 2006

Page 2

Based on such examination, we are of the opinion that:

1. Pursuant to the Constitution and statutes of the State of Nebraska, the District is empowered to issue the CP Notes from time to time. Subject to the provisions of the Resolution, upon due execution and delivery of and payment for the CP Notes and upon compliance by the District with certain conditions and covenants set forth in the Resolutions, the CP Notes (a) will constitute valid and legally binding obligations of the District in accordance with their terms; (b) on a parity with any notes or other obligations of the District which, pursuant to the Resolution, may be hereafter issued on a parity with the CP Notes, will be payable solely from and secured by a pledge of and lien upon the revenues, income, receipts, moneys and profits of the District derived from its ownership, operation and management of the Electric System, as defined in the Resolutions, including, without limiting the generality of the above, all revenues, income, receipts, moneys and profits (i) derived by the District from the sale, furnishing or supplying of electric energy and all other commodities, services and facilities sold, furnished or supplied by the District through said ownership, operation and management, (ii) received by the District in reduction of the acquisition costs of the Electric System and (iii) received by the District directly or indirectly from the sale, lease or other disposition of any properties or facilities constituting the Electric System or any part thereof; subject, however, to the prior payment therefrom and the superior liens, pledges and charges thereon of the Outstanding Bonds as defined in the Resolutions and the terms and provisions of Resolution No. 1788 adopted by the Board of Directors of the District on January 20, 1972 and resolutions and proceedings of the District supplemental thereto, pursuant to which the Outstanding Bonds were or will be issued; and (c) will be entitled to the benefits and security provided by the agreements and covenants contained in the Resolutions, which are valid, legally binding and enforceable upon the District according to their terms.

2. Under existing laws, rules, regulations and judicial decisions, upon due execution and delivery of and payment for the CP Notes, and upon compliance by the District with certain conditions and covenants of the Resolutions, the interest on the CP Notes (a) is excluded from gross income for federal income tax purposes and is exempt from Nebraska state income taxes and (b) is not an item of tax preference for purposes of the federal alternative minimum tax imposed on individuals and corporations. Notwithstanding our opinion that interest on the Bonds is not a specific preference item for purposes of the federal alternative minimum tax, such interest will be included in adjusted current earnings of certain corporations, and such corporations are required to include in the calculation of alternative minimum taxable income 75% of the excess of such corporation's adjusted current earnings over its alternative minimum taxable income (determined without regard to such adjustment and prior to reduction for certain net operating losses).

The opinion set forth in clause (a) above is subject to the condition that the District comply with all requirements of the Internal Revenue Code of 1986 that must be satisfied subsequent to the issuance of the CP Notes in order that interest thereon be (or continue to be)

KUTAK ROCK LLP

Page 3

excluded from gross income for federal income tax purposes. Failure to comply with certain of such requirements could cause the interest on the CP Notes to be included in gross income from the date of issuance of the CP Notes. The District has covenanted to comply with all such requirements. We express no opinion regarding other federal tax consequences arising with respect to the CP Notes. Purchasers of the CP Notes should seek the advice of their tax advisers concerning certain additional federal tax consequences to holders of the CP Notes.

The obligations of the District contained in the CP Notes and the Resolutions, and the enforceability thereof, are subject to general principles of equity which may permit the exercise of judicial discretion, the reasonable exercise in the future by the State of Nebraska and its governmental bodies of the police power inherent in the sovereignty of the State of Nebraska, applicable bankruptcy, insolvency, moratorium or similar laws relating to or affecting creditors' rights generally and the exercise by the United States of America of the powers delegated to it by the Constitution of the United States of America.

Very truly yours,

A handwritten signature in cursive script that reads "KUTAK ROCK LLP".
