Information for electrical contractors, architects and consulting engineers

June 2013

Builder Installed Service Duct

Effective October 1, 2013 OPPD will require the customer to provide duct from the meter assembly to our pedestal for residential applications. Please see the attached meter specification.

This will allow more flexibility for the customer to plan and install sod and landscaping on their time schedule. OPPD will also be able to install the service cables in a timelier manner and not be dependent on yard conditions and weather.

The customer's builder/contractor will be required to install duct into OPPD's pedestal as shown on the attached drawing. Effective immediately, all new subdivisions will have larger pedestals installed to allow for easier conduit installation.

For the most current copy of the metering manual, go to www.oppd.com. Click on the Contractor & Developer tab then go to the Reference Library and click on Meter Manual. OPPD Service Center contact information is also available by clicking on Electrical Service Designers.

We value your partnership in providing electrical service to our customer owners. We also welcome your feedback. Email us at Contactactor@oppd.com or call Pat Carnazzo 402-552-4905 or Connie Biddle 402-552-4904.
