# **Management Letter**

# **Management Letter**

2020 has been a year unlike any other, and the employees of Omaha Public Power District have risen to the challenge of serving their communities amid the coronavirus pandemic. At the same time, the utility continued its work on innovative projects and initiatives that will position OPPD well to continue to lead the way we power the future.

Our 2021 Corporate Operating Plan maintains our commitment to no general rate increase, as well as no increase to the Fuel and Purchased Power Adjustment.

The plan shows OPPD's commitment to its mission of serving our customers with affordable, reliable and environmentally sensitive energy services. In 2020, OPPD continued to pursue five key strategic initiatives that will shape the utility for decades to come while maintaining a strong focus on its mission.

These initiatives include:

- Pathways to Decarbonization, which will examine the long-term balance of load generation along with decarbonization efforts to help OPPD meet its goal of being a net-zero carbon emitter by 2050;
- Customer Engagement initiative aimed at helping the utility meet customers' needs and expectations now and into the future;
- Electric System Evaluation and Modernization, which will study a number of grid-related areas including maintenance, inspections, smart technology and worker mobility, among other areas;
- Technology Platform, an initiative that will develop a scalable and secure digital ecosystem to enable OPPD to extend technology to customers and employees in new ways;
- The Transforming the Workplace initiative will allow OPPD to determine how its workplace will evolve amid a rapidly changing utility industry, including new skill sets and support for employees to ensure meaningful work.

In addition to these initiatives, a cross-functional team continues to move forward with the utility's Power with Purpose project, approved by the Board of Directors in November 2019. This project will add utility-scale solar and back-up natural gas generation to support load growth in the area and capacity requirements, while maintaining reliability and resiliency of the system. Throughout the end of 2020, OPPD determined future sites for the two, back-up natural gas facilities and held virtual meetings with the public to gather feedback and answer questions around the project.

Lastly, OPPD has joined other business leaders in the Omaha area in standing up for diversity and inclusion. This commitment recognizes the changing workforce in the city and state and acknowledges the social responsibility the utility has to represent the communities we serve.

Friothy Bunke

President & Chief Executive Officer

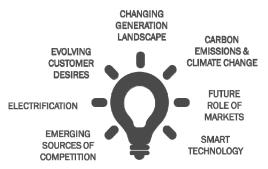

# Strategic Planning and Enterprise Risk Management

# **Strategic Planning**

Industry trends are accelerating transformational change, creating significant pressures on the traditional strategies and business models of electric utilities. Dynamic trends compel us to navigate through significant ambiguity and make courageous decisions for our future. While leveraging the legacy of traditional energy services, we must also embrace innovation, and continuously explore new and better ways to deliver affordable, reliable and environmentally sensitive energy services to our customers.

# **Strategic Direction**

To provide clear and transparent direction on behalf of OPPD's customer owners OPPD's publicly elected Board of Directors established fifteen strategic direction (SD) policies to which OPPD is accountable. The policies guide OPPD's strategic and operational planning efforts to address current and future trends, mitigate risks, pursue strategic opportunities, and prioritize resources to efficiently and effectively provide energy services to the District. In November of 2019, the Board of Directors revised SD-7 (Environmental Stewardship) and established the goal to conduct all of its operations in a manner that strives for the goal of net zero carbon production by 2050. In consideration of this revision, other SDs, and transformational changes within and outside the industry, the Senior Management Team (SMT) is in the process of developing a comprehensive 30-year vision known as Powering the Future to 2050 (PFT 2050). The SDs in concert with PFT 2050 will align the organization to clear performance expectations to serve OPPD's customer-owners.

Mission: To provide affordable, reliable and environmentally sensitive energy services to our customers.

Vision: "Leading the Way We Power the Future"

In implementing this vision, OPPD shall adhere to these principles:

- Strengthen the public power advantage of affordable and reliable electricity;
- Exemplify fiscal, social and environmental responsibility to optimize value to our customer-owners;
- Proactively engage and communicate with our stakeholders;
- Act transparently and with accountability for the best interest of our customer-owners;
- Collaborate, when appropriate, with partners; and
- Leverage OPPD's leadership to achieve these goals.

#### **Core Values**

- We have a PASSION to serve
- We HONOR our community
- We CARE about each other

The SD policies leverage industry benchmarks to drive performance as a top utility, and provide the basis for a scorecard to which the organization manages its performance.

Policy	Measure Definition		2021 Target	Strategic Goal
Rates (SD-2)	% Below Regional Retail Average	Retail rate target of West North Central Regional average published rates on a system average basis. No general rate increase for a 5-year period starting January 1, 2017 and ending December 31, 2021.	No general rate increase	20%
Access to Credit Markets (SD-3)	Debt Coverage Ratio	Revenues less expenses divided by total annual senior and subordinate lien debt interest and principal payments.	2.0	2.0
	SAIDI	System Average Interruption Duration Index	< 90	< 90
Reliability (SD-4)	Equivalent Availability	% of actual generation potential to a unit's maximum rated output over a period of time (12 months)	86%*	90%
Customer Satisfaction (SD-5)	Absolute Satisfaction Score	JD Power's annual Electric Utility Residential Customer Satisfaction Study	Top quartile	Top quartile
	DART	Days Away, Restricted or Transferred	< 0.50	< 0.50
Safety (SD-6)	PVIR	Preventable Vehicle Incident Rate	< 4.00	< 4.00
Environmental Stewardship (SD-7)	Net Zero Carbon	Definition and goals to be determined upon review of the Pathways to Decarbonization study (scheduled for December 2021)	TBD	TBD
Employee Relations (SD-8)	Employee Engagement	Composite score of employee engagement	Top quartile	Top quartile

\*This goal is an initial estimate, the goal will be updated with October through December 2020 operations data.

# **Strategic Guiding Principles**

Five principles – trusted energy partner, operational excellence, technology solutions, powered through people and financial stewardship – help guide our actions to achieve the direction provided by OPPD's SDs, lead the way we power the future and fulfill our mission of providing affordable, reliable and environmentally sensitive energy services to our customers.

#### FINANCIAL STEWARDSHIP

We are stewards of financial resources, creating strength and flexibility benefitting our customers and communities.

#### **POWERED THROUGH PEOPLE**

We know our workforce drives our success. We provide a safe, healthy environment where our diverse and highly-skilled employees can do their best work

#### **TECHNOLOGY SOLUTIONS**

Through partnerships, we provide innovative and value-added **TECHNOLOGY SOLUTIONS** in a secure and reliable manner to achieve strategic initiatives and operational goals.

#### TRUSTED ENERGY PARTNER

We are a trusted energy partner committed to giving our customers and communities value, caring, and excellence.

#### **OPERATIONAL EXCELLENCE**

We drive operational excellence by focusing on safety, reliability, cost, environmental stewardship and innovation.

# **Strategic Initiatives**

The 2020 Strategic Planning efforts resulted in five strategic initiatives critical to help achieve OPPD's strategic direction policies, address changing industry dynamics, and support mitigation of enterprise risks. The 10-year horizon of these five strategic initiatives will become the foundation to OPPD's 30-year vision.

Pathways to De-carbonization: To establish actionable pathways in generation, internal operations, customer, and community that strive to meet SD-7's goal of net zero carbon production by 2050.

**Customer Engagement:** To better connect and engage with current and prospective customers in order to truly learn and understand what is important to and desired by them, and use that information to define, plan, and prioritize initiatives that help meet customers' changing expectations from their energy services provider.

**Electric System Evaluation & Modernization:** To leverage technology, systems and data to enhance customer experience, modernize our grid, manage asset lifecycles, and optimize operational processes.

**Technology Platform:** To build a sustainable foundation with a focus on mobility, asset management, and business intelligence; improve the way customers and employees interact with OPPD; and ensure that needed data is reliable and available.

**Workplace Transformation:** To develop a framework ensuring workforce readiness for changes related to the developing operations model, supports OPPD's evolution as a utility of the future, and promotes OPPD's position as an employer of choice in the region.

## **Enterprise Risk Management**

Fundamental to effective planning is an understanding of the District's enterprise level risks and the development and implementation of initiatives and mitigation plans to respond to those risks. The District's Enterprise Risk Management ("ERM") program specifies risk management standards, management responsibilities, and controls to help ensure risk exposures are properly identified and managed within agreed upon risk tolerance levels. Specific risk mitigation plans and procedures are maintained and reviewed periodically to provide focused and consistent efforts to mitigate various risk exposures. In support of its 2021 corporate planning efforts, OPPD leveraged risk assessments and mitigation plans to help prioritize resource allocation. Within the next year, the SMT will explore expanding this effort by incorporating those critical trends identified and associated with PFT 2050.

Theme	OPPD's Risk Management Focus
Retail revenues & off- system sales	Persistently pursue customer and economic development to achieve economies of scale and strengthen the affordability of our rates. Optimize off-system sales and purchases to further benefit our customer-owners.
Generation reliability	Maintain a highly available and diverse portfolio of generation sources to provide power whenever our customer-owners need it.
Environmental sensitivity	Ensure the District is compliant with all environmental regulations, well-positioned to respond to new regulations, and able to minimize our environmental impact while maintaining affordability, reliability and resiliency.
Fort Calhoun Station Decommissioning	Realize the economic savings potential from ceasing operations at Fort Calhoun Station and effectively executing the decommissioning project. Ensure decommissioning funds are wholly adequate to return the facility to green field status.
Cyber & physical security	Vigorously defend customer information and District assets from all potential cyber and physical security threats inherent with national critical infrastructure.
Infrastructure investment	Optimally invest in transmission, distribution, substation, and technology assets to ensure reliable and resilient energy services and supporting functions will meet the demands of our customer-owners.
Workplace safety	Continue promoting safety as a top priority to ensure every employee and contractor goes home as healthy as they came into work.
Community partnership	Honor and support the communities in which we operate and fulfill the promise of public power.

# Assumptions

# Assumptions

# 2021 Proposed Rate Action

OPPD's 2021 budget requires no General Rate increase, as well as, no increase in the Fuel and Purchased Power Adjustment (FPPA) effective January 1, 2021.

## General

## 2020 Projected

Revenues, operations and maintenance, capital and deferred expenditures reflect the 2020 actual values and forecast submitted through October 31, 2020.

# Financing/Investing

## Financing

Revenue bonds with net proceeds of \$160 million are included in the 2021 budget. The proceeds of these bonds are expected to be used for reimbursement and construction projects.

#### Average Earnings Rates on Funds

The average earnings rate used for all funds (including special purpose) for 2021 is 1.4% compared to the 1.9% rate from the prior year.

# **Energy Sales/Revenues**

#### Load Forecast

The plan assumes a 4.4% increase in general business energy sales (MWh) and a 1.0% decrease in the number of customers in 2021, as compared to the 2020 projections.

# Assumptions

# Generation, Purchased Power, and Fuel Budget

Outages have been scheduled for the following base-load units in 2021:

- 1. Nebraska City Station Unit Number 1
- 2. Nebraska City Station Unit Number 2
- 3. North Omaha Station Unit Number 5

Additionally there are several shorter outages scheduled for other units. The purchased power budget includes generation supplied from 972 megawatts of wind capability, as well as 5 megawatts of Fort Calhoun Community Solar capability.

## **Department Operation and Maintenance Budget**

Department and division level budgets were proposed in August 2020 during the Resource Optimization Sessions. These plans were reviewed with Senior Management for alignment with the strategic and operational objectives before submitting them for final approval.

## **Capital Budget Expenditures**

The capital portfolio prioritization and allocation process continues to improve capital planning. The process enables better alignment with the strategic directives and provides more transparency of capital spending through improved project review and approval processes.

## Total 2021 Budget

The total 2021 Budget is \$1.4 billion.

#### BUDGET SUMMARY 2021 BUDGET COMPARED TO 2020 BUDGET (Dollars in Thousands)

Total Budget	BUDGET 2020	BUDGET 2021	INCREASE / (DECREASE)	% CHANGE
Fuel Costs and Purchased Power	\$379,645	\$365,021	(\$14,624)	(3.9)
Non-Fuel Operations & Maintenance	370,741	403,293	32,552	8.8
Total Debt Service and Other Expenses	124,931	131,145	6,214	5.0

	BUDGET 2020	BUDGET 2021	INCREASE / (DECREASE)	% CHANGE
Bonds (excludes Minibonds)	\$153,400	\$103,372	(\$50,029)	(32.6)
Commercial Paper	3,228	625	(2,603)	(80.6)
Other (includes Minibonds)	(31,697)	27,148	58,846	(185.6)
TOTAL BUDGET	\$124,931	\$131,145	\$6,214	5.0

# **Financial Statements**

# **Financial Statements**

# **Income Statement**

Projected net income for 2020 is \$65.6 million, which is \$0.5 million over budget. Operating income is projected to be \$26.7 million under budget.

Net income for 2021 is budgeted to be \$42.6 million, which is \$23.0 million or 35.1% lower than the 2020 projected net income. When compared to the 2020 budget, net income for 2021 is \$22.6 million or 34.7% lower.

Major factors contributing to the change in 2021 operating and net income are:

1. Operating revenue is budgeted to be \$93.9 million higher than 2020 projections and \$21.1 million higher than the 2020 budget. The budget increase is primarily due to higher retail revenue, specifically related to industrial customer load growth. Retail revenues less adjustments (Fuel and Purchased Power Adjustment (FPPA), Decommissioning and Benefit Reserve (DABR), and Unbilled Revenues) are projected to increase \$27.8 million from 2020 projections and increase \$12.9 million when compared to the 2020 budget.

2. Operations and maintenance expense is budgeted to be \$68.8 million higher than the 2020 projected amount and \$17.9 million higher than the 2020 budget amount. These increases reflect savings in fuel costs and are primarily due to higher purchased power, outage costs, and a focus on strategic initiatives.

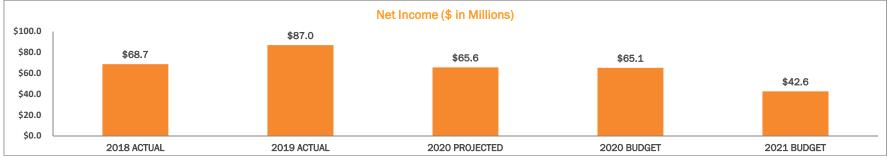

3. Other income for 2021 is \$27.6 million lower than the 2020 projected amount primarily due to the change in the fair value of the investments in 2020. Other income budgeted for 2021 is \$2.4 million lower than the 2020 budget amount primarily due to lower investment earnings as a result of lower interest rates.

4. Total decommissioning funding, which is recognized as an expense of \$129.4 million in 2021, is \$4.6 million higher than 2020 projected.

# **Financial Statements**

# **Coverage Ratios**

The total debt service coverage ratio, which is the main metric viewed by credit rating agencies, is budgeted to be 2.00 times in 2021.

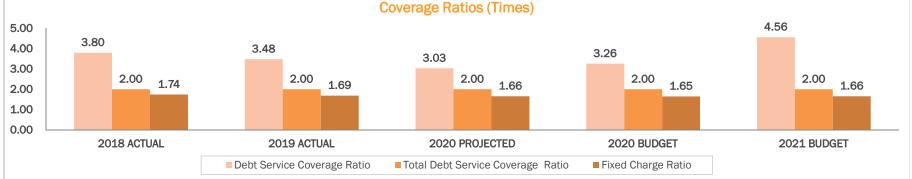

The fixed charge ratio is budgeted to be 1.66 times in 2021.

The Senior Lien debt service coverage ratio is projected to be 3.03 times in 2020 and 4.56 times in 2021. The significant increase is driven both by an increase in net receipts and a decrease in Senior Lien debt service requirements. Net receipts for 2021 are expected to increase by \$27.0 million or 8.3% from 2020 projected levels primarily due to increasing industrial revenue. Senior Lien debt service requirements for 2021 are scheduled to decrease by approximately \$30.3 million over 2020 projections as a result of lowering Senior Lien principal payments in order to cover the payoff of the Minibonds.

# **Debt and Financing Data**

Total Senior Lien revenue bonds outstanding at year-end 2021 are budgeted to equal \$1,283.0 million. The 2021 budget anticipates the issuance of approximately \$125 million of new Senior Lien revenue bonds and also includes Senior Lien revenue bond maturities and retirements of \$50.4 million.

Total subordinated bonds outstanding at year-end 2021 are budgeted to equal \$229.8 million. The 2021 budget does not anticipate the issuance of new subordinated bonds nor bond maturities or retirements.

All minibonds will be redeemed in 2021 with an outstanding year-end balance of \$0.0.

The District issued an additional \$19.9 million of commercial paper during February 2020 bringing its total commercial paper outstanding to \$250.0 million. The District does not anticipate issuance of additional commercial paper in 2021.

Total Separate System (NC2) revenue bonds outstanding at year-end 2021 are budgeted to equal \$201.5 million. The 2021 budget does not anticipate the issuance of new NC2 revenue bonds but does have NC2 revenue bond maturities and retirements of \$3.7 million.

The total average interest rate and weighted average maturity on existing debt will be 4.24% and 13.58 years at the end of 2020 and 4.55% and 13.45 years at the end of 2021. The debt to capitalization ratio is budgeted to be 56% for 2021.

# **Cash Flow Analysis**

Projected cash receipts for 2020 are \$1,178.0 million, which is \$44.1 million under budget. Cash disbursements are projected to be \$1,191.1 million in 2020 or \$85.7 million under the budget amount.

In 2021, cash receipts are budgeted to increase by \$19.0 million to \$1,197.0 million as compared to the 2020 projection. This increase is commensurate with the budgeted increase of operating revenues.

Cash disbursements in 2021 are budgeted to increase by \$271.8 million to \$1,462.9 million as compared to the 2020 projection. Increases in cash disbursements for 2021 include capital investments of \$171.3 million related to Power with Purpose infrastructure upgrade, operation and maintenance expense of \$66.8 million and purchased power of \$33.3 million.

The budget values of cash receipts and disbursements result in a projected year-end cash balance of \$258.0 million in 2021.

# **Energy Sales**

# **Energy Sales**

# **Electric Energy Sales & Electric Customers**

Electric energy sales for 2021 are budgeted to be 16,740,432 MWh or 2.9% higher than the 2020 projected energy sales, which is driven by increasing general business sales (retail sales) and is partially offset by lower wholesale sales (off-system sales). General business sales are budgeted to increase 486,129 MWh in 2021 compared to the 2020 projection, which is mainly a result of industrial sales. Wholesale sales (including NC2 participation sales) are budgeted to decrease 20,765 MWh or 0.4% from 2020 projected levels. The decrease in wholesale sales is primarily due to NC2 Participant Wholesale sales decreasing as a result of a 30 day planned outage for NC2.

In 2021, the average number of general business customers is budgeted to decrease by 3,876 or 1.0% below 2020 projections.

# **Energy Sales**

# **Operating Revenues**

Total electric operating revenues for 2020 are projected to be \$1,088.6 million, which is \$72.8 million or 6.3% below budget. The variance is primarily due to retail revenues of \$29.2 million, Decommissioning and Benefits Reserve contribution of \$22.5 million, and wholesale revenues that are \$22.4 million below budget for 2020. The variance also includes the decrease in Late Payment Charges of \$1.5 million and Miscellaneous Service Revenues of \$0.3 million (which includes field collection/reconnect fees), as a part of OPPD's Customer First COVID-19 response.

Total electric operating revenues for 2021 are budgeted to be \$1,182.5 million, which is \$93.9 million or 8.6% over the 2020 projected operating revenues. The increase is primarily due to higher 2021 retail revenue, which is related to increased load growth from industrial customers.

# **Energy Sales**

# Average Cents/kWh

The average price per kWh for retail customers is budgeted to be 8.74 cents for 2021. This is 0.09 cents or a 1.0% decrease from the 8.83 cents that is projected for 2020. This price per kWh variance is the result of actual billings relative to energy sold as opposed to a rate change.

# Net System Requirements

# **Net System Requirements**

Net system requirements (Total General Business Sales as shown on the next page) for 2021 are budgeted to be 12,111,094 MWh, an increase of 5.2% from the 2020 projected amount. The major components of net system requirements are below by sales and supply components.

Total sales are budgeted to increase 465,364 MWh or 2.9% from the 2020 projected amount. Retail general business sales are budgeted to increase 486,129 MWh from the 2020 projected amount. Wholesale sales, excluding NC2 participation sales, are budgeted to increase by 393,609 MWh or 14.8% from the 2020 projected amount.

Net generation is budgeted to increase 4.3% in 2021 to 10,463,343 MWh and firm/participation purchases are budgeted to decrease 5.9% from the 2020 projected amount. Wholesale purchases are budgeted to increase 395,600 MWh in 2021 from the 2020 projected amount.

# Operation, Maintenance, and Decommissioning Expenses

# **Operation, Maintenance, and Decommissioning Expenses**

The District's 2021 total budgeted operations and maintenance (O&M) expense is \$768.3 million, which is \$68.8 million or 9.8% more than the 2020 projected amount.

Fuel expense represents 18.6% of total 0&M expense. Fuel expense is budgeted at \$142.7 million for 2021, a decrease of \$4.5 million or 3.1% less than the 2020 projected amount. Year over year reduction is due to lower fuel transportation cost.

Production expense represents 13.3% of the total and is budgeted to be \$102.5 million in 2021, which is \$13.4 million or 15.0% greater than the 2020 projected amount. The primary driver is more scheduled outages.

Purchased power, including wind purchases, represents 28.9% of total 0&M expense and is budgeted at \$222.4 million for 2021. This represents an increase of \$26.6 million or 13.6% above the 2020 projected amount. The increase from the 2020 projection is primarily due to more scheduled outages in 2021.

Transmission and distribution expense represents 14.6% of total 0&M expense and is budgeted at \$112.1 million, which is \$13.3 million or 13.4% more than the 2020 projected amount. The increase over the projected amount for 2020 is associated with asset health maintenance and inspection activities, improved cable locates, and the grid modernization strategic initiative.

Customer accounting and services expense represents 5.8% of total 0&M expense and is budgeted at \$44.3 million for 2021. This represents an increase of \$6.1 million or 16.1% more than the 2020 projected amount. Contributors to the increase over the 2020 projection include customer engagement strategic initiative, anticipated customer write offs, and business technology expenses.

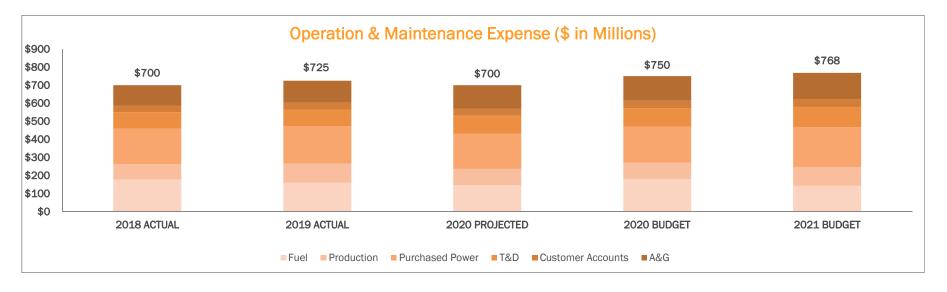

Administrative and general expense represents 18.8% of total 0&M expense and is budgeted at \$144.4 million for 2021. This category reflects an increase of \$13.9 million or 10.7% more than the 2020 projected amount. This year over year change is primarily related to business technology expenses and overall growth in staffing plans.

Decommissioning expenses represent the annual funding of the decommissioning liability. The decommissioning funding for 2021 is budgeted to be \$129.4 million, which is \$4.6 million more than the 2020 projected amount.

# **Capital Expenditure Plan**

# **Capital Expenditure Plan**

# **Capital Expenditures**

Capital expenditures for 2021 are budgeted at \$370.0 million, which is \$171.3 million more than the 2020 projected capital expenditures.

Production Plant expenditures for 2021 are budgeted to be \$192.5 million, which is \$133.1 million or 224.2% more than the 2020 projected expenditures. The year over year increase is primarily related to Power with Purpose projects.

Transmission and Distribution Plant expenditures for 2021 are budgeted to be \$144.0 million, which is \$28.3 million or 24.4% more than the 2020 projected expenditures primarily due to the electric system expansion.

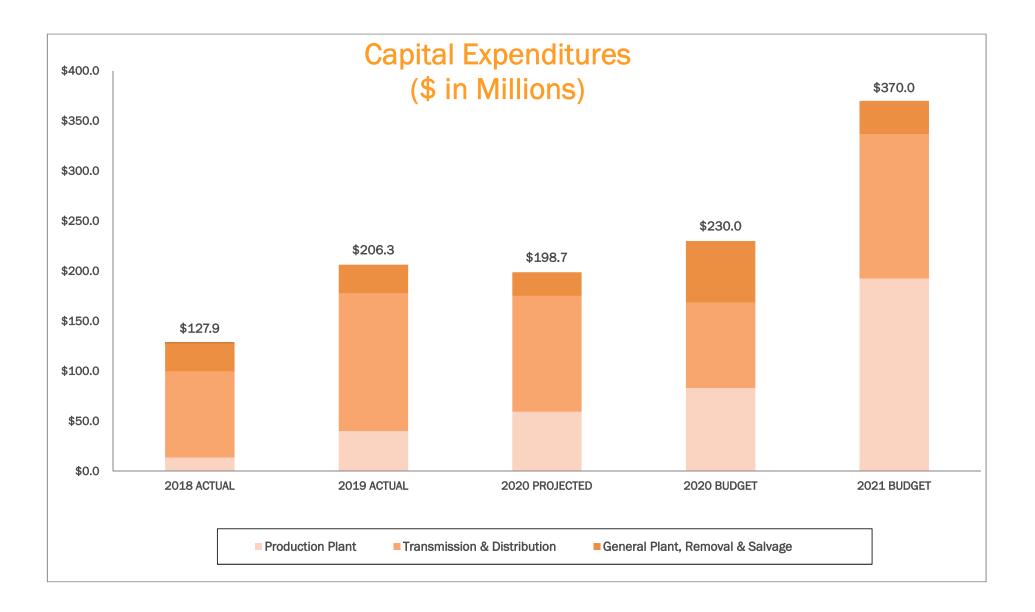

General Plant and Removal and Salvage for 2021 are budgeted to be \$33.5 million, which is \$9.8 million or 41.6% higher than the 2020 projected expenditures.

The 2021 Capital Budget total was derived by breaking investments into two categories, labeled sustain and expand. The sustain category includes routine capital projects that are aimed at maintaining and improving existing assets and is budgeted at a consistent level year over year. The expand category is for new assets planned to be added to the District's asset base, such as the Power with Purpose project. The sustain and expand categorization helps to ensure that existing assets are still being invested in at sufficent levels while new assets are being added. For 2021, the sustain category accounts for 43% or \$160.8 million of the total capital budget and the expand category accounts for 57% or \$209.2 million.

RECOMMENDED PROJECTS:	2014-2019 Expenditures	2020 Projection	2021 Budget	2014-2021 Project Expenditures
<b>Power with Purpose</b> Infrastructure expansion for Board Resolution No. 6351 approved on November 14, 2019.	\$0	\$20,176	\$172,539	\$192,715
<b>Circuit and Substation Upgrades</b> Upgrade and replace multiple circuits and substations to meet customer needs.	\$0	\$42	\$17,483	\$17,525
Fiber Network Expansion Project Expand OPPD Fiber optics connectivity to replace the current analog communications services.	\$18,834	\$16,444	\$10,519	\$45,797
<b>Transmission Distribution Improvement Program-Cable Replacement</b> Replace the worst performing underground distribution cable on a performance driven basis.	\$13,682	\$9,139	\$8,172	\$30,993
Installation of an Autotransformer at a Substation Expansion to accommodate residential growth by installing a new auto transformer at a substation.	\$0	\$636	\$7,530	\$8,166
<b>Customer Service Commercial and Industrial Project</b> Purchase and install underground or overhead infrastructure for new commercial and industrial customers.	\$48,046	\$9,16 <b>2</b>	\$7,004	\$64,212
Customer Service Residential Project Purchase and install underground or overhead infrastructure for new residential developments.	\$40,324	\$9,965	\$6,950	\$57,239
<b>13kv Line and Substation Transformers</b> Overhead and surface mount transformers on the distribution system required due to failure or system expansion.	\$36,129	\$7,519	\$6,086	\$49,734

RECOMMENDED PROJECTS:	2014-2019 Expenditures	2020 Projection	2021 Budget	2014-2021 Project Expenditures
Nebraska City Station Unit 1 Low Pressure Rotor Replacement Replace the low pressure rotors with materials not susceptible to stress corrosion cracking.	\$1,952	\$2,546	\$5,699	\$10,197
<b>Transmission and Distribution Street &amp; Highway Project</b> Relocation of OPPD transmission and distribution facilities that are located in public road right-of-way.	\$41,801	\$10,903	\$5,464	\$58,168
Cass County Turbine Hot Gas Path Refurbishment Required maintenance for turbine reliability.	\$0	\$0	\$5,269	\$5,269
<b>Nebraska City Common Levee Certification</b> Determine what physical improvements, operational requirements and maintenance activities are needed for the levee to be accredited and accepted by FEMA as providing 100 year flood protection and regain active status with the USACE PL84-99 Rehabilitation Program.	\$0	\$1,212	\$4,392	\$5,604
<b>Upgrade Customer Information System</b> Information Technology upgrade to the enterprise customer information software that is used for customer service billing and account management.	\$0	\$1,679	\$4,386	\$6,065

RECOMMENDED PROJECTS:	2014-2019 Expenditures	2020 Projection	2021 Budget	2014-2021 Project Expenditures
Substation Circuit Upgrade Upgrade of two circuits required to maintain reliability due to increased load.	\$66	\$15	\$4,244	\$4,325
Backup Autotransformer Purchase Project Procure a backup autotransformer, which will be available to serve if one of the three autotransformers in service fail.	\$558	\$102	\$4,107	\$4,767
<b>New Distribution Transformer and Circuit Install</b> Procure and install a distribution transformer and circuit to meet load requirements of new customer.	\$0	\$385	\$3,850	\$4,235
Medium/Heavy Truck Replacement Routine replacement of medium and heavy duty trucks.	\$16,012	\$1,884	\$3,757	\$21,653
<b>Transmission Distribution Improvement Program-Distribution Poles</b> Replace distribution poles in conjunction with the ongoing Transmission and Distribution System Improvement Projects.	\$10,388	\$4,630	\$3,700	\$18,718
Ground Line Inspection and Treatment Pole Replacement Replace degraded wood poles and structures used for transmission and distribution.	\$1,487	\$2,151	\$3,379	\$7,017

RECOMMENDED PROJECTS:	2014-2019 Expenditures	2020 Projection	2021 Budget	2014-2021 Project Expenditures
Light Emitting Diode (LED) Streetlight Conversion The conversion of streetlights to a LED standard.	\$6,244	\$5,039	\$3,250	\$14,533
Modernize the Contact Center and Customer Interaction Technologies Modernize the customer service contact systems.	\$0	\$56	\$2,966	\$3,022
<b>Battery Energy Storage System</b> Obtain and test utility-grade battery storage to determine how it will integrate with the District's power grid.	\$0	\$47	\$2,843	\$2,890
Nebraska City Station Unit 1 Waterbox Retube Replace aging turbine condensation tubes with materials not susceptible to corrosion.	\$0	\$1,054	\$2,643	\$3,697
Transmission Distribution Improvement Program-Conductors Replace junk conductors on a performance driven basis.	\$2,376	\$3,684	\$2,419	\$8,479
