</tbody>
</table>

*This is an average increase at the customer class level. Rates within each customer class will have varying increases. Customers within each rate will have varying increases.

### Other Rate Items:
- All of the other rate actions and rate change details are as presented in the red-lined version of the Service Regulations and Schedules.
Fuel and Purchased Power Adjustment

• By formula, OPPD recovers the costs incurred for fuel and purchased power by its Fuel and Purchased Power Adjustment (FPPA)- Rider Schedule No. 461.

• The FPPA recovers costs via two mechanisms, the Base Rate which is included in the general rate and the FPPA Factor, which is an adjustment that recovers fluctuations in fuel and purchased power outside of the utility's control. The FPPA Factor is a charge based on customer usage (kWh) and billed separately relative to the general rate.

• Due to rising commodity prices, increased purchased power costs, and an overall increase in the operation of our balancing generation resources to meet our energy needs, OPPD is adjusting the FPPA Factor to recover the increased power costs.

• The FPPA Factor will increase from 0.186 cents per kilowatt hour to 0.480 cents per kilowatt hour effective January 1, 2023. This change results in an average 2.9% increase across all customer classes.
Independent Reviews

Summary

• Corporate Operating Plan:
  - “The expenditures anticipated by the District are reasonable and of the type that a utility following prudent utility practices would expect.”

• Rate Action:
  - “We find the proposed rate changes to be fair, reasonable, and nondiscriminatory.”
Corporate Operating Plan

Summary

• Advances OPPD’s Mission: “Provide affordable, reliable and environmentally sensitive energy services to our customer-owners.” (SD-1)
