Safety Focus for November

1. Fall & Winter Weather Hazards

Temperatures around the metro area in November average highs in the upper 40's and lows in the upper 20's; the freeze/thaw cycle will be here soon.

2. Line of Fire

A simple definition of "line of fire" is being in harm's way. Line of fire injuries occur when the path of a moving object or the release of hazardous energy intersects with an individual's body.

3. Warm Up to Avoid Sprain, Strain, or Tear Injuries

Regardless of what your job entails, or what you do when at home, warming up and stretching can reduce stress, increase energy, and reduce the risk of a sprain, strain, or tear injury.

Pre-Committee Agenda

GOVERNANCE PRE-COMMITTEE MEETING
 WEBEX VIDEOCONFERENCE
 November 12, 2024, 8:00 – 9:00 A.M.

1. Safety Briefing (Purnell – 2 min)
2. Prior Month Pre-Committee Action Items (DeSeure – 1 min)
 - a. Objective: Review and confirm prior pre-committee action items have been completed.
3. CEO Growth & Effectiveness Update (Purnell – 10 min)
 - a. Objective: Answer any committee member questions in preparation for All Committee closed session.
4. SD-12 Security & Information Mgmt. Monitoring Report (Brown – 10 min)
 - a. Objective: Answer Committee’s clarification-focused questions, affirm report includes the necessary information desired by the Committee, and confirm recommendation.
5. LB-1300: Board Compensation Adjustment (Focht – 10 min)
 - a. Objective: Review and confirm recommendation for Board consideration.
6. 2025 Board Work Plan (Focht – 10 min)
 - a. Objective: Refine and confirm proposed work plan from 2024 Board Workshop action items for Board consideration.
7. Governance Committee Planning Calendar (Focht/Purnell – 2 min)
 - a. Objective: Review and confirm items on the Planning Calendar.
8. Board Work Plan – Governance Committee Items
 - a. Objective: No Committee Items for review.
9. Summary of Meeting (2 min)
 - a. Objective: Summarize action items from committee discussion.

ITEM

SD-12: Security and Information Management Monitoring Report

PURPOSE

To ensure full board review, discussion and acceptance of SD-12: Security and Information Management Monitoring Report.

FACTS

- a. The first set of Board policies was approved by the Board on July 16, 2015. A second set of Board policies was approved by the Board on October 15, 2015.
- b. Each policy was evaluated and assigned to the appropriate Board Committee for oversight of the monitoring process.
- c. The Governance Committee is responsible for evaluating Board Policy SD-12: Security and Information Management.
- d. The Governance Committee has reviewed and accepted the SD-12: Security and Information Management Monitoring Report and finds that OPPD is taking reasonable and appropriate measures to comply with the policy.

ACTION

The Governance Committee recommends Board approval of the 2024 SD-12: Security and Information Management Monitoring Report.

SD-12: Security and Information Management

Robust security and information management practices are critical to effective risk management and to ensure regulatory compliance, business resiliency and customer-owner satisfaction, and the safeguarding of people and facilities.

Ensuring Compliance to SD-12

Information Security

Objective

- Processes and methodologies protect print, electronic, or any other form of information or data from unauthorized access, misuse, disclosure, destruction or modification.

Ongoing Controls

- Advancing our capabilities to identify and respond to cybersecurity events
- Identifying and mitigating new and aging known vulnerabilities based on risk to the organization
- Conducting regular cybersecurity incident response exercises to test and improve our processes and updating the incident response plan
- Leveraging partnerships to collect and analyze cybersecurity information, including threats and vulnerabilities, to reduce risks and to increase operational resilience
- Maturing our security awareness services with a focus on enhanced training and email phishing prevention
- Increasing security awareness to all employees through ongoing communications
- Leading and participating in security organizational roles and exercises

Physical Security

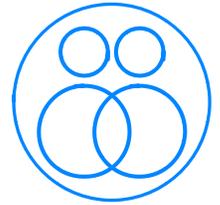

Objective

- A safe and secure environment for all OPPD personnel, contractors, visitors, operations and properties.
- Security processes support emergency management, vulnerability and behavioral threat management programs, and utilize applicable national, industrial and communications security best practices.

Ongoing Controls

- Implementing Critical Infrastructure Protection 014 (CIP-014) compliance and Enterprise Security Improvement Program (ESIP) projects, including auditing of processes and standards
- Collaborating with Nebraska Information & Analysis Center and law enforcement agencies
- Documenting remediation and compensatory measures for deviations of security practices allowing for operational flexibility
- Performing threat and vulnerability assessments of assets
- Conducting security awareness education and training campaign for employees, contractors and visitors
- Collaborating with Utility Operations, Customer Service and Emergency Management

Customer Privacy

Objective

- Customer privacy and protection of customer-owner information, preventing any dissemination of customer-owner information to a third party for non-OPPD business purposes without customer-owner consent or except as provided by law or for a business purpose.

Ongoing Controls

- Ensuring customer privacy through OPPD's Identity Theft Prevention Program
 - Reviewing this program annually for effectiveness and compliance with state and federal regulations
 - Reviewing an annual report of this program by OPPD management to ensure its effectiveness
 - Training all employees with access to customer information on this program, including annual training and regular assessments in relation to data sharing and security
- Providing customer communications regarding fraud-related trends and events in partnership with Customer Service and Public Affairs

Records Management

Objective

- Efficient and systematic control of OPPD records inclusive of, identification, classification, storage, security, retrieval, tracking and destruction or permanent preservation of records.

Ongoing Controls

- Strengthening records management collaboration across OPPD to become an enterprise function
- Ensuring records management staff are trained on practices and have procedures for maintaining, archiving and destruction of required business records
- Leveraging industry and external partnerships, including outside utilities and government entities
- Improving processes and services in consideration of efficiency, effectiveness and security
- Supporting records management efforts associated with Fort Calhoun Station nuclear decommissioning and other Utility Operations activities

Compliance

Objective

- Technology compliance with contractual and legal requirements through the use of technical controls, system audits and legal review.

Ongoing Controls

- Strengthening governance, risk and compliance capabilities through formal enterprise management, identification and attestations of control compliance
- Engaging employees, legal counsel and external entities to stay abreast of the changing landscape from a legal/compliance perspective
- Confirming that security and privacy measures are included in contracting processes for the protection of OPPD data and systems, and are supported by our engaged third parties
- Performing annual external audits and internal reviews, with findings provided to management

2024 Accomplishments

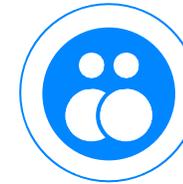

Information Security

- ✓ Rewrote and published OPPD Cybersecurity Incident Response Plan
- ✓ Deployed new email and file system security technological tools
- ✓ Processed and reviewed security incidents & threat intelligence reports

Physical Security

- ✓ Completed majority of CIP 014 required assets
- ✓ Continued security enhancement and upgrades
- ✓ Resolved audit remediations
- ✓ Performed physical security vulnerability assessments
- ✓ Expanded security camera views

Customer Privacy

- ✓ Completed Data Governance Charter and formed Steering Committee
- ✓ Created Data Governance roadmap, policy, framework and operating model
- ✓ Implemented access controls to data

2024 Accomplishments

Records Management

- ✓ Implemented process improvement to clear multi-year record archival backlog
- ✓ Transmitted 364 records of more than 190,000 pages required for nuclear compliance
- ✓ Digitized Master Facility Plan

Compliance

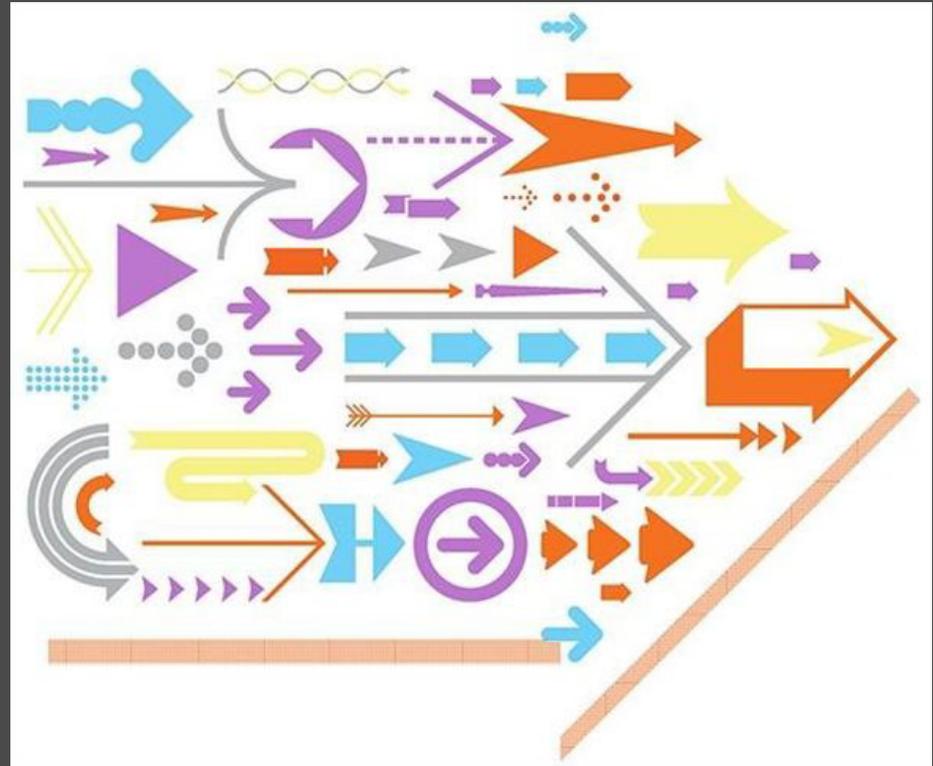

- ✓ Participated in an industry peer review
- ✓ Validated federal compliance with HIPAA
- ✓ Researched requirements for compliance with two new Nebraska laws

Recommendation

The Governance Committee has reviewed and accepted this Monitoring Report for SD-12: Security and Information Management and recommends that the Board finds OPPD to be sufficiently in compliance with Board Policy SD-12: Security and Information Management.

Any reflections on

what has been accomplished, challenges and/or strategic implications?

Bogner/Brown

RESOLUTION NO. 6XXX

WHEREAS, the Board of Directors has determined it is in the best interest of the District, its employees, and its customer-owners to establish written policies that describe and document OPPD's corporate governance principles and procedures; and

WHEREAS, each policy was evaluated and assigned to the appropriate Board Committee for oversight of the monitoring process; and

WHEREAS, the Board's Governance Committee (the "Committee") is responsible for evaluating Board Policy SD-12: Security and Information Management on an annual basis. The Committee has reviewed the 2024 SD-12: Security and Information Management Monitoring Report and finds OPPD to be sufficiently in compliance with the policy as stated.

NOW, THEREFORE, BE IT RESOLVED that the Board of Directors of Omaha Public Power District hereby accepts the 2024 SD-12: Security and Information Management Monitoring Report, in the form as set forth on Exhibit A attached hereto and made a part hereof, and finds OPPD to be sufficiently in compliance with the policy as stated.

ITEM

LB1300: Compensation Adjustments for the Board of Directors

PURPOSE

To adjust the compensation of Board members to the levels provided in the most recent session of the Nebraska Legislature with the passage of LB1300.

FACTS

- a. The 108th Legislature of the State of Nebraska has enacted Legislative Bill 1300, amending Section 70-624.02 of the Nebraska Revised Statutes to increase the statutory compensation limits for members of the boards of directors for public power districts, and the bill has been signed into law by the Governor.
- b. No increase in the compensation of the Board of Directors of this District has been made since January 5, 2005, pursuant to Resolution No. 5003, adopted July 13, 2000.
- c. Compensation adjustments are recommended for the Board members and the Board chairperson as outlined in the attached Exhibit A.
- d. The adjustments are to be implemented effective January 1, 2025.

ACTION

Board approval of the compensation adjustments at the November 21, 2024, Board of Directors' Meeting.

DRAFT RESOLUTION NO. 66xx

WHEREAS, the 108th Legislature of the State of Nebraska enacted Legislative Bill 1300, amending Section 70-624.02 of the Nebraska Revised Statutes to increase the compensation limits for members of the board of directors for public power districts; and

WHEREAS, the effective governance of the Omaha Public Power District is vital for the well-being of our community; and

WHEREAS, it is important for effective governance that the compensation for publicly elected board members of the Omaha Public Power District is fair and reflective of the responsibilities associated with their role; and

WHEREAS, no increase in the compensation of the Board of Directors of this District has been made since January 5, 2005, pursuant to Resolution No. 5003, adopted July 13, 2000; and

WHEREAS, after careful review and consideration, it has been determined that an adjustment to the compensation for the OPPD Board of Directors is prudent to attract and retain qualified individuals and to maintain the effective governance of the Omaha Public Power District.

NOW, THEREFORE, BE IT RESOLVED that the compensation for members of the Board of Directors of the Omaha Public Power District shall increase to the levels provided for in Nebraska Revised Statutes, Section 70-624.02, as amended by LB1300 (2024), as set forth in Exhibit A attached hereto.

Resolution

SD-11: Economic Development Customer & Public Engagement Committee Report November 2024

Lisa Olson

Vice President, Public Affairs

SD-11: Economic Development

Economic prosperity is foundational to cultivating vibrant and thriving communities we serve.

OPPD's strategic leadership and active participation in regional economic development initiatives will create a favorable environment to attract new business and help existing business customers to

expand and support workforce and community needs. OPPD's economic development strategy will adapt and change to maximize value for the region as the utility and the region's advantages and opportunities evolve.

Therefore, OPPD shall exercise leadership and participates in economic development to:

Attract, retain & expand businesses

Serve as a community leader and trusted partner

to organizations and leaders on local, regional and statewide initiatives and activities in economic development, including workforce and community needs

Offer and promote effective tools, resources, programs, products, services and rates

to educate our business customer owners and support economic growth, sustainability, cost savings and/or vitality

Assist with site development and marketing

to plan or best optimize our energy system for businesses and industrial customer-owners

Economic development is the intentional practice of improving a community's economic well-being and quality of life.

Source: International Economic Development Council

**Economic
Developers are
stewards of the
ecosystem.**

As stewards, they play
many roles:

Our focus is driven by our communities' needs and our long-term vision.

Businesses need:

- Access to land, skilled labor, utilities and capital
- Networks and connections that increase competitiveness

Workers need:

- Quality jobs
- Education and training
- Opportunities for advancement

Communities need:

- Funding for basic services
- Quality of life amenities
- Economic diversification and resilience

Attract, retain & expand businesses

Key takeaway:

We serve as a catalyst to bring economic growth to our region and anticipate \$3.25 million in annual revenue from announced projects since last monitoring report

Serving as partner of Entrepreneurship Education Collaborative with more than 500 participants across 7 training events statewide as well as on Nebraska's New Venture Competition

Serving as key stakeholder of 6 Regions, One Nebraska initiative in metropolitan and southeast regions and other regional economic development focuses, including as partner of Bio Innovations Midwest event with State, BioNebraska and Omaha Chamber

Working closely with elected officials and community leaders on growth and strategic/comprehensive planning, including Metropolitan Area Planning Agency, Southeast Nebraska Development District, City of Bellevue, City of Omaha and more

Serve as a community leader and trusted partner

to organizations and leaders on local, regional and statewide initiatives and activities in economic development, including workforce and community needs

Leading, advocating and partnering on workforce and community needs

A Year of Firsts and Enhancing Partnerships

OPPD community focus

- **Education**
(STEM, mentoring, workforce development)
- **Basic Needs**
- **Sustainability & Community Betterment**
- **Diversity, Equity & Inclusion**
- **Leading partnership of Metropolitan Community College Sustainability Boot Camp**
 - Second year of 4-week camp (OPPD driven) where 16 students participated to learn about sustainability through hydroponic gardening, composting and solar energy
- **Supporting supplier diversity programs and events**
 - Featured at Nebraska's 1st Annual Supplier Diversity Trade Conference and more
- **Continuing Connect the Dots partnership with University of Nebraska-Lincoln**
 - 600+ students attending 5 career focused events across southeast region
- **Actively leading and supporting on regional and statewide workforce efforts and initiatives**
 - Nebraska Chamber of Commerce Foundation, Heartland Workforce Solutions, Nebraska Energy Workforce Development and more

Serve as a community leader and trusted partner

to organizations and leaders on local, regional and statewide initiatives and activities in economic development, including workforce and community needs

Leading, advocating and partnering on workforce and community needs

- **Launch of first Youth Power Summit**

More than 100 OPS high school students attended in partnership with six high schools

- **Partner of 5 Habitat for Humanity Rock the Block events**

Supported 3 in North Omaha, 1 in South Omaha and 1 in La Vista

- **Launch of two new Community Resource Fair pilots in North and South Omaha**

North Omaha

- 15 agencies, focused on all customers within six area zip codes
- Served more than 300 customers from 120 households
- Provided \$29,924 in energy assistance that was distributed to 82 customers
- Enrolled 39 customers in the Customer Assistance Program (CAP) Pilot Program

South Omaha

- 25 agencies, focusing on our most vulnerable customers
- Over 100 attended from South Omaha and surrounding areas
- There were 36 Payment Installment Plan enrollments, totaling \$26,119, and 35 households were served with energy assistance totaling \$12,367
- OPPD also provided 10 SMART Thermostats to eligible households

Offer and promote effective tools, resources, programs, products, services and rates

to educate our business customer owners and support economic growth, sustainability, cost savings and/or vitality

Promoting tools and resources to support economic growth and vitality

SizeUp Leader

Objective:

Provide tools and resources to educate small business customers

Outcomes:

- Provided 23,766 reports for business owners and entrepreneurs with 1,264 unique visits
- Entrepreneurial ecosystem leaders support tool and looking at more partnerships to amplify exposure

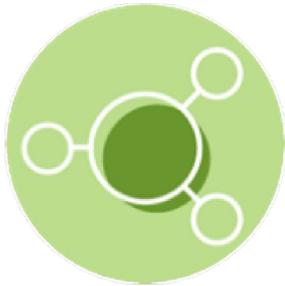

SourceLink

Objective:

Connect businesses and entrepreneurs with resources to support economic growth

Outcomes:

- Served 1,167 entrepreneurs and business owners (increase by 53% compared to previous year)
- 389 businesses received direct assistance with development of action plans; 6,046 direct referrals to resource partners
- Total users: 10,790; Year-over-year increase: 53% (from 7,047 in the previous reporting year)

Offer and promote effective tools, resources, programs, products, services and rates

to educate our business customer owners and support economic growth, sustainability, cost savings and/or vitality

Providing offerings to support cost savings & sustainability

Renewable Energy Credit program established

Objective:

Help customers offset their carbon emissions associated with energy purchased from OPPD by assigning them the rights to renewable energy

Outcomes:

- 5 customer enrollments resulting in an estimated offset of nearly 10,000 metric tons of CO2

Greener Together Program projects awarded

Objective:

Support sustainability and cost savings by promoting and funding community-focused projects to customers

Outcomes:

- Urban Bird & Nature Alliance
 - Replenish, restore and maintain a healthy shade tree canopy throughout the North Omaha area
- Free Farm Syndicate
 - Establish permanent infrastructure to increase yields and more sustainably provide free, nutrient dense, local produce to residents in North and South Omaha

Assist with site development and marketing

to plan or best optimize our energy system for businesses and industrial customer-owners

Supporting site development partnerships

NEBRASKA
Good Life. Great Opportunity.
DEPT. OF ECONOMIC DEVELOPMENT

Municipal Inland Port Authority Planning

Objective:

Support implementation of inland port legislation passed in 2021 to further growth and development of the region

Outcomes:

- Partnering with City of Bellevue, Greater Fremont Development Council and City of Omaha on inland port authority focus involving policy, planning and growth opportunities for the region and state

South Omaha Planning

Objective:

Partner with Canopy South to assess opportunities in south Omaha for development

Outcomes:

- Serving on the advisory committee to identify properties strategically to develop and redevelop areas for residential, commercial and industrial projects in South Omaha
- Top priorities include redevelopment of mixed-use commercial and infill residential throughout impact area

Economic Engine Fueling the State

Leader and stakeholder of supporting policy and planning today to further drive the economic growth of the region in the next decade plus to come

- Nuclear siting study
- Nebraska Chamber Energy Study
- Local regulations education and advocacy
- Siting and development
- Economic development programming

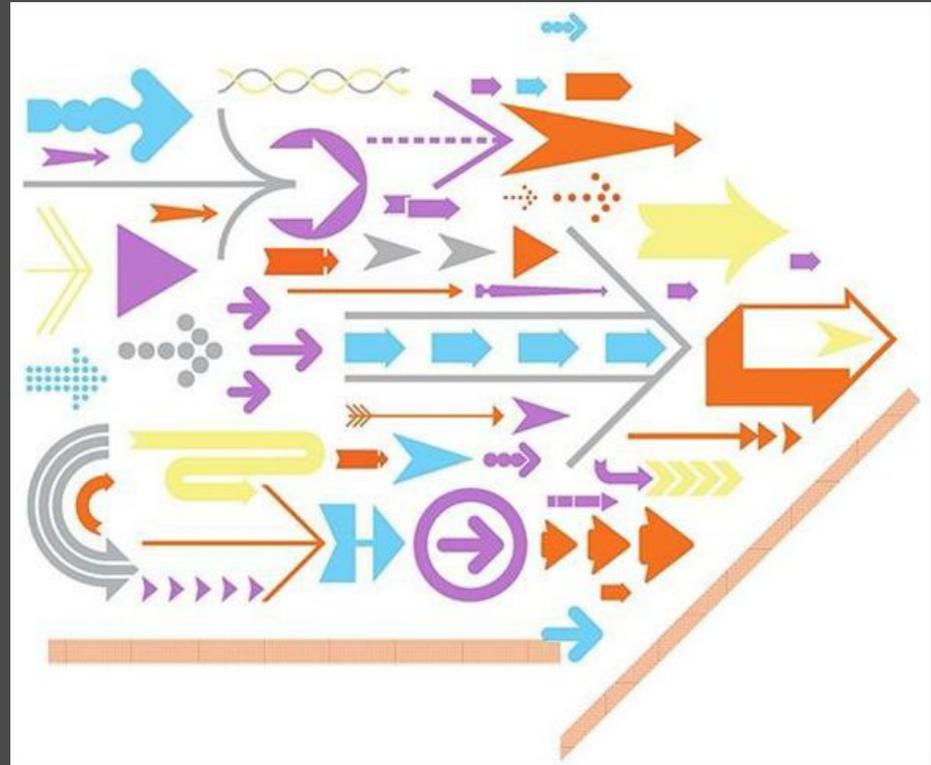

Recommendation

The Customer and Public Engagement Committee has reviewed and accepted this Monitoring Report for SD-11: Economic Development and recommends that the Board finds OPPD to be sufficiently in compliance with Board Policy SD-11: Economic Development.

Any reflections on

what has been accomplished, challenges and/or strategic implications?

Government Relations Strategy Update - State and Federal

November 19, 2024

Board Committee Meeting

Agenda

- Election update
- State legislative update
 - Interim studies
 - 109th Legislature, First Session will convene on January 8, 2025
- Federal legislative update
- Upcoming and next steps

Election Results Update

State Legislature

- 17 new Senators
 - 33 GOP – 16 DEM
 - District 13 race remains too close to call but will be new Senator
 - New committee chairs and members for the 2025 Legislative session
 - Legislature will be more moderate than last session

Federal

- New Administration
- Senate – 53 GOP/47 DEM
- The House election has yet to be called
 - 218 votes needed for majority
 - Currently 214 GOP/205 DEM (as of 11/12/24)
- New Congressional and Committee Leadership

State Interim Studies

- LR 409 – Interim study to carry out the provisions of 13-2402, which requires the Nebraska Retirement Systems to monitor underfunded defined benefit plans administered by political subdivisions – Hearing on November 21
- LR 432 – Interim study to examine the impact of digital asset data mining on Nebraska public power districts, electric ratepayers and communities
- LR 469 – Interim study to examine existing, new and emerging technologies in the nuclear energy industry – Hearing on October 17

State Potential Upcoming Legislative Topics

- Not unduly discriminatory rates
- Chapter 70 modernization
- Address Pacific Stress Test Act
- PRB items
- Addressing private transmission
- Energy Storage
- Private property protection
- Comply with local/county zoning
- Nameplate capacity tax increase
- Shot clock for zoning permits
- NEMA changes to address ice jams/uncommon incidents
- EV infrastructure
- Energy efficiency program expansion
- Capping President & CEO salaries
- Property tax relief 2.0
- Dark fiber 2.0
- COLA for retirees
- Net metering
- EMP funding
- Funding for EAP programs
- Funding for weatherization – NDEE to ask

Federal Legislation

- **IRA/IIJA issues**
(SD 2, 4, 7, 9)
- **Appropriations**
(SD 2, 4, 9, 15)
- **Transmission**

(SD 2, 3, 15)

Federal Issues for 2024 and beyond

- Water Resources Development Act language to address ice jams on the Missouri River
- Tax issues/Inflation Reduction Act/Infrastructure Investment and Jobs Action
- Reconciliation
- Permitting reform
- Interactions with American Public Power Association, Large Public Power Council, Nuclear Energy Institute, American Clean Power Association

Upcoming and Next Steps

- Continue execution of state and federal legislative strategy
- OPPD Board communication process
 - Weekly recaps
 - Directors Updates
 - Legislative bill status updates
 - Monthly Customer and Public Engagement (CPE) updates at pre-committee meetings
 - Board committee meeting updates

Pre-Committee Agenda

FINANCE PRE-COMMITTEE MEETING
VIDEOCONFERENCE
November 8, 2024 8:00 – 9:30 AM

- 1) Safety Briefing (de la Torre – 3 min)
 - a) Promote awareness of current safety focus.
- 2) Prior Month Pre-Committee Action Items (de la Torre – 2 min)
 - a) Objective: Review and confirm prior pre-committee action items have been completed.
- 3) Third Quarter Retirement Fund Report (Bishop – 5 min)
 - a) Objective: Report on OPPD's retirement fund results for the three quarters ended September 30, 2024.
- 4) Third Quarter Financial Report (Bishop –15 min)
 - a) Objective: Briefly present and answer questions on the report of OPPD's financial results for the three quarters ended September 30, 2024.
- 5) 2025 Preliminary Corporate Operating Plan (Bishop – 60 min)
 - a) Objective: Preview the 2025 Preliminary Corporate Operating Plan that will be reviewed at the All Committee meeting.
- 6) Board Work Plan – Finance Committee Items (5 min)
 - a) Objective: Committee members to review and confirm items on the Board Work Plan.
- 7) Summary of Meeting (de la Torre - 2 min)
 - a) Objective: Summarize action items from committee discussion.

Retirement Plan – Third Quarter 2024

PURPOSE

To Report the Retirement Plan Fund’s Third Quarter 2024 Performance Results

FACTS

- a. The Retirement Plan Fund market value at the end of the third quarter was \$1.28 billion. This compares to the market value at the beginning of the quarter of \$1.23 billion. During the quarter, employee contributions were \$5.81 million and OPPD contributions totaled \$15.66 million. Benefit payments totaled \$28.68 million, and the investment market value (net of expenses) was \$57.21 million.
- b. As of September 30, 2024, the Retirement Fund asset allocation was 55.0% Equity, 31.5% Fixed Income and 13.5% Alternative Assets, which is within the Investment Policy Guidelines approved by the Board.
- c. The Retirement Plan Fund sector performance (net of fees) was:

| Sector | Market Value | Quarterly Return | Index |
|-------------------------------|------------------------|------------------|-------------|
| Domestic Equity | \$408,419,778 | 6.0% | 6.9% |
| International Equity | \$297,477,584 | 7.4% | 8.5% |
| Domestic Fixed Income | \$349,179,003 | 4.6% | 5.2% |
| Global Fixed Income | \$55,728,973 | 6.7% | 6.1% |
| Private Real Estate | \$85,198,098 | 0.4% | 0.1% |
| Private Credit ⁽¹⁾ | \$88,501,946 | 3.1% | — |
| Total | \$1,284,505,382 | 5.1% | 6.1% |

(1) Quarterly internal rate of return as of 6-30-2024 (return data not available for most recent quarter)

- d. The Domestic Equity Composite returned 6.0%. Small cap stocks rallied and led the U.S. market over mid cap and large cap stocks. Value outperformed growth in both large caps and small caps. The International Equity Composite returned 7.4%. The U.K. posted the strongest returns while Japan posted the weakest returns. The yen has strengthened against the U.S. dollar, which impacted sector performance.

The Domestic Fixed Income Composite returned 4.6%. The Fed lowered interest rates by 50 basis points, marking the first cut in four years. The U.S. Aggregate Index was positive during the quarter with all sectors generating positive returns. The Global Fixed Income Composite returned 6.7%. The U.S. dollar depreciated relative to the Yen, Euro, and British Pound.

The Real Estate Composite returned 0.4%. Private real estate's performance for the quarter finally turned positive after seven quarters of negative returns.

Third Quarter 2024 Financial Report

PURPOSE

Report the quarterly financial results to the Board of Directors

FACTS

- a. The third quarter 2024 financial results are attached for review.
- b. Retail Revenue for the third quarter 2024 was \$372.9 million, which was \$8.5 million under budget. Off-system Revenue was \$47.9 million, which was \$5.5 million over budget. Other Income was \$56.9 million, which was \$23.7 million over budget.
- c. Operations and Maintenance Expense (less Fuel and Purchased Power) for the third quarter 2024 was \$159.9 million, which was \$33.2 million over budget. Fuel and Purchased Power Expense was \$154.5 million, which was \$10.8 million over budget. Other Expense was \$90.8 million, which was \$1.8 million over budget.
- d. Operating Income for the third quarter 2024 was \$61.6 million, which was \$50.1 million under budget.
- e. Net Income for the third quarter 2024 was \$72.5 million, which was \$25.0 million under budget.

Q3 2024 Results (\$ Millions)

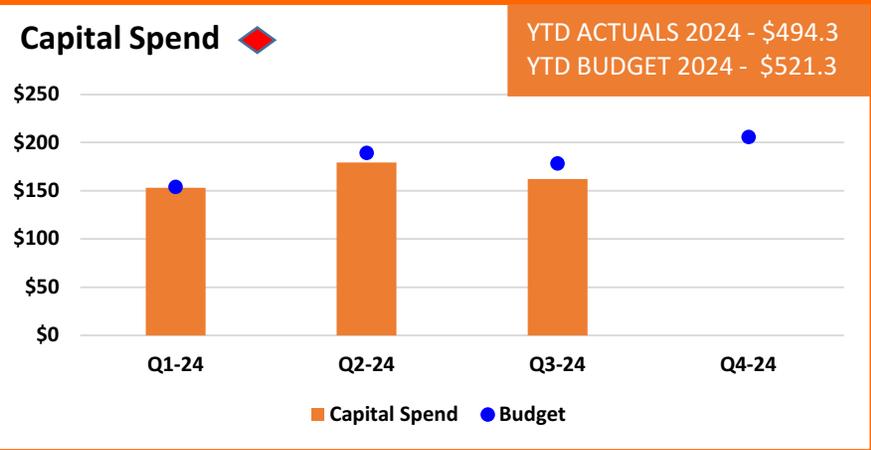

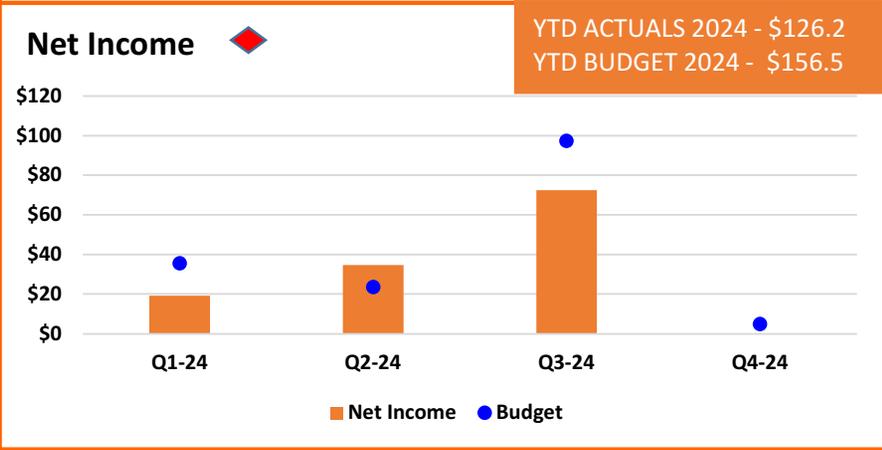

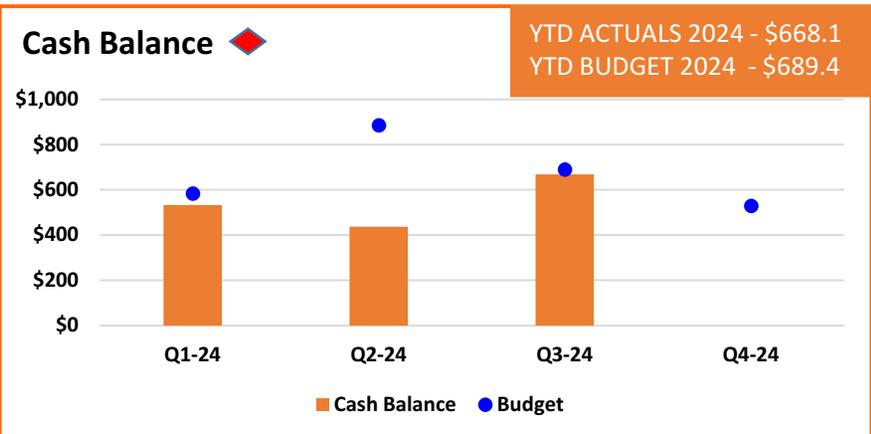

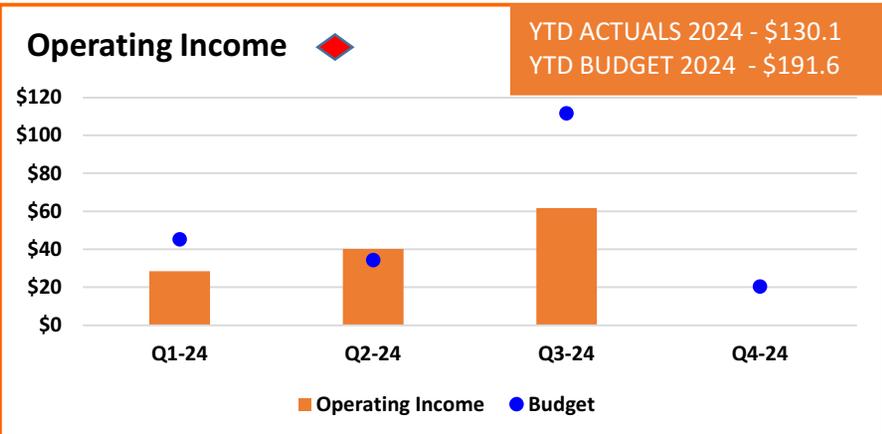

◇ - Favorable ◆ - Unfavorable

Unaudited results.

Q3 2024 Results (\$ Millions)

SD Impact:

- * **SD-2 Rates** - OPPD's 2022 average retail rate was 16.2% below the defined regional average based on 2023 data from the Energy Information Administration (EIA).
- * **SD-3 Access to Credit Markets** - The 12-month rolling debt service coverage ratio is 1.62 times through September 2024, and is forecasted at 2.0 times at year end. The District's days of cash on hand is 233 days as of September 30, 2024.

HIGHLIGHTS:

- * Retail revenues were under budget YTD by \$10.8 million. Residential and commercial revenues were under budget due to lower usage from milder weather, which was partially offset by higher industrial revenues from increased load growth. Off-system sales were over budget YTD by \$44.2 million, or 34.7%, primarily due to higher than expected congestion hedging revenues. Other income was over budget by \$33.3 million, or 34.1%, primarily due to higher revenues from allowances for funds used during construction and positive investment income.
- * O&M expense (less fuel and purchased power) was over budget YTD by \$43.3 million, or 11.0%, primarily due to higher distribution expense from storm restoration efforts and higher administrative and general expense from increased payroll accrual costs. Fuel and purchased power expense was over budget YTD by \$53.2 million, or 14.2%, due to generation outages and the impacts of winter storm Gerri.
- * Net income of \$126.2 million YTD was under budget by \$30.3 million, primarily due to the operating results addressed above.
- * Capital expenditures YTD were under plan by \$27.0 million, or 5.2%, primarily due to timing on multiple Enterprise Priority projects.

ITEM

Preliminary 2025 Corporate Operating Plan

PURPOSE

The Preliminary 2025 Corporate Operating Plan, incorporating elements of the District’s budgeted operations, capital expenditures, and fuel needs for the year, has been completed and is ready for discussion with the Board of Directors.

FACTS

- a. The Preliminary Corporate Operating Plan includes a total average rate impact across all customers classes of 6.3%.
 - The Fuel and Purchased Power Adjustment (FPPA) accounts for 0.4% of the rate impact. The current FPPA factor is 0.413 cents per kWh. Due to an under-collection in 2024 mainly from winter storm Gerri, management will propose to increase the Fuel and Purchase Power factor to 0.457 cents per kWh.
 - A 1.0% rate impact for replenishment of the Rate Stabilization Reserve is included in the average general rate increase across all customer classes of 5.9%. The Rate Stabilization Reserve will be used in 2024 to meet 2.0 debt service coverage, whose usage is currently projected at \$13.3 million and will be updated with actual results through December 2024. Usage of the Rate Stabilization Reserve was primarily driven by generation outages and storm restoration costs.
- b. A Cost-of-Service Study was performed to determine the cost of providing electric service to each rate class. The study was used as a baseline to determine the appropriate rate increase for each class.

| Customer Class | FPPA Rate | General Rate | Total |
|-----------------------|------------------|---------------------|--------------|
| Residential | 0.4% | 8.0% | 8.4% |
| Commercial | 0.5% | 4.0% | 4.5% |
| Industrial | 0.3% | 5.1% | 5.4% |
| Lighting | 0.1% | 8.0% | 8.1% |
| Wholesale Towns | 0.6% | 8.0% | 8.6% |
| Total | 0.4% | 5.9% | 6.3% |

The proposed increases are detailed on Exhibit A (attached).

- c. Miscellaneous wording and rate changes to various rate schedules are also proposed. These proposed changes are detailed in Exhibit B (attached).
- d. Total energy sales are budgeted to be 18,879 GWh which represents an 8.5% increase from the budgeted 2024 sales amount.

- Retail sales are budgeted to be 15,355 GWh which represents a 12.5% increase from the budgeted 2024 amount.
 - Wholesale revenues, excluding Nebraska City Station Unit 2 (NC2) participation sales, are budgeted to be 1,629 GWh which represents a 1.5% decrease from the budgeted 2024 amount.
 - NC2 participation sales for 2025 are budgeted to be 1,895 GWh, a 9.6% decrease from the budgeted 2024 amount.
- e. Total operating revenues are budgeted to be \$1,671.2 million. Total budgeted operating revenues are 16.7% higher than the 2024 budget.
- Retail revenues are budgeted to be \$1,434.4 million, which is an increase of \$208.7 million or 17.0% above the 2024 budget.
 - Wholesale revenues, excluding NC2 participation revenues, are budgeted to be \$119.6 million, which is 18.5% higher than 2024 budgeted revenues.
 - NC2 participation revenues for 2025 are budgeted to be \$70.5 million, a 10.9% increase from the budgeted 2024 amount.
- f. Total operations and maintenance expenditures are budgeted to be \$1,149.9 million. Total operations and maintenance expenditures are \$128.8 million or 12.6% higher than the 2024 budgeted amount.
- Operations and maintenance expenditures (excluding fuel and purchased power) are budgeted to be \$582.7 million, which is \$54.4 million or 10.3% higher than the amount budgeted for 2024.
 - Fuel expenses are budgeted to be \$187.4 million which is \$7.3 million or 4.0% higher than the amount budgeted for 2024.
 - Purchased power expenses are budgeted to be \$379.7 million which is \$67.2 million or 21.5% higher than the amount budgeted for 2024. The purchased power expenses include 1,272 megawatts of wind capability and 86 megawatts of solar capability, to support the District’s renewable energy goal.
- g. Capital expenditures are budgeted at \$788.0 million for 2025 compared to \$727.0 million budgeted for 2024.

The 2025 capital expenditure plan provides for expansion and improvements to the existing production, transmission and distribution systems. Expenditures by classification include both approved and pending capital projects. Actual expenditures by classification will vary based on final project designs, corporate priorities, and pending project approvals.

| | |
|-------------------------------|----------------------|
| Production | \$ 330.6 million |
| Transmission and Distribution | 338.6 million |
| General | <u>118.8 million</u> |
| TOTAL | \$788.0 million |

- h. In 2025, funding for Nuclear Decommissioning is budgeted at \$10.7 million, consisting of investment earnings on trust balances.
- i. Net income for 2025 is budgeted to be \$203.1 million compared to \$161.4 million budgeted for 2024.
- j. The 2025 Corporate Operating Plan total expenditure amount equals \$2,323.6 million.
- k. Total debt service coverage is anticipated to be 2.0 times for 2025.

ACTION

The Preliminary 2025 Corporate Operating Plan is scheduled for review during the November 2024 Board of Directors' Committee meeting prior to being submitted for Board approval during the December 2024 regular Board Meeting.

 - Final COP at the Board of Directors Committee meeting on December 17th
 - Proposed Board approval at December Board meeting on December 19th

Executive Summary

Strategic Directive 2: Rates

SD-2: Rates states OPPD shall:

- Maintain fair, reasonable and non-discriminatory rates
- Equitably assign costs across and within all customer classes
- Monitor affordability indicators
- Pursue rate process and structure changes to reflect the cost of energy when it is used
- Offer flexibility and options
- Be simple and easy to understand
- Pursue a directional rate target of 10% below the North Central regional average

- As of final 2023 Energy Information Agency (EIA) data, OPPD is 15.8% below regional average and 27.4% below national average
 - Preliminary 2024 EIA data indicates 32.5% below the national average, inclusive of 2024 rate increase of 2.5%

Executive Summary

Assumptions

- **OPPD's Mission:**
 - Provide affordable, reliable and environmentally sensitive energy services to our customer-owners (SD-1)
- **Powering the Future to 2050 (PF2050)**
 - **Perfect Power, Customer Freedom, and a Cleaner World** enabled through a **Digitally Driven, Purpose-Driven Culture, and Future-Ready Posture** mindset
- **2025-2030 Enterprise Priorities** (listed in priority) were established to provide this life essential energy service to our customer-owners
 1. Resource Adequacy
 2. Technology Transformation
 3. Next Generation Grid
 4. Master Facilities Plan

Executive Summary

Strategic Directives

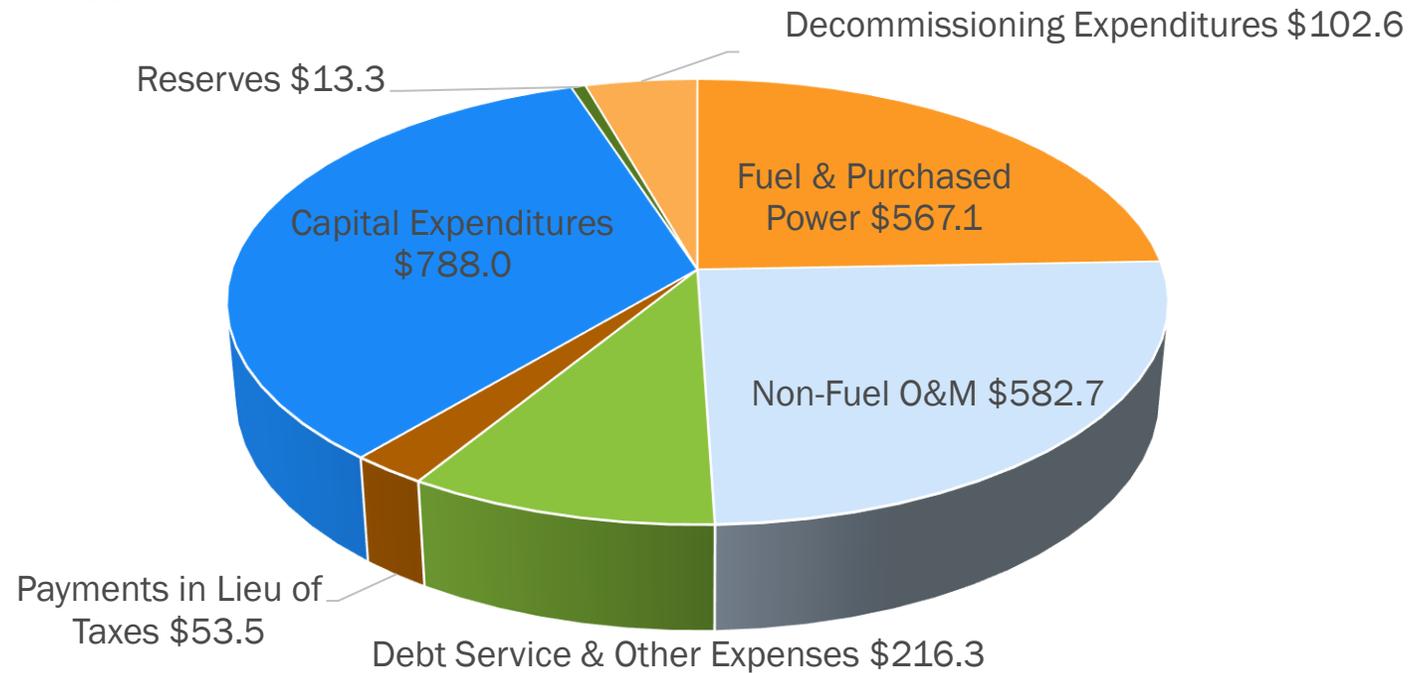

Board Strategic Direction Policies & Strategic Goals

| Policy | Measure | Definition | Strategic Goal |
|----------------------------------|---------------------------------|---|-------------------------------|
| Rates (SD-2) | % Below Regional Retail Average | Retail rate target of North Central Regional average published rates on a system average basis. | 10% |
| Access to Credit Markets (SD-3) | Debt Coverage Ratio | Revenues less expenses divided by total annual senior and subordinate lien debt interest and principal payments. | 2.0 |
| Reliability (SD-4) | SAIDI | System Average Interruption Duration Index | < 90 mins |
| | SAIFI | System Average interruption Frequency Index | < 0.9 incidents |
| | EFOR | Equivalent Forced Outage Rate | < or = 8.0% |
| Customer Satisfaction (SD-5) | Absolute Satisfaction Score | Customer satisfaction for similar-sized utilities in the region across residential and business customers. | Top quartile |
| Safety (SD-6) | DART | Days Away, Restricted or Transferred | < or = 0.50 |
| | PVIR | Preventable Vehicle Incident Rate | < or = 4.00 |
| Environmental Stewardship (SD-7) | % Net reduction in CO2e | Strive to achieve net zero carbon equivalent (CO2e) emissions by 2050 relative to OPPD's 2013 benchmark with the following interim targets, 2027-41-51% net reduction. Future interim targets to be informed by and determined following the completion of the 2026 integrated resource plan. | Achieve net zero CO2e by 2050 |
| Employee Relations (SD-8) | Employee Engagement | Composite score of employee engagement | Top quartile |

For a full listing of the 15 Strategic Directives, which includes Integrated System Planning (SD-9), Ethics (SD-10), Economic Development (SD-11), Information Management & Security (SD-12), Stakeholder Outreach & Engagement (SD-13), Retirement Plan Funding (SD-14), Enterprise Risk Management (SD-15), please access the following link to the OPPD Board Policy document <https://www.oppd.com/media/317205/oppd-board-policy-binder.pdf>

Executive Summary

- Request for approval of a \$2.3B operating budget for 2025
- 2025 total average rate impact of 6.3%
 - 4.9% general rate increase
 - 1.4% impact from Fuel and Purchased Power Adjustment (FPPA) factor and replenishment of Rate Stabilization Account (RSA) for costs incurred in 2024

2024 Year End – Impact to 2025

Fuel & Purchased Power Adjustment – Rate Stabilization Account

| | \$ Millions | % Increase | Primary Driver |
|--|---------------|-------------|---|
| Fuel and Purchased Power Adjustment | \$4.8 | 0.4% | 2024 FPPA undercollection, driven by winter storm Gerri, unplanned outages, offset by increased off-system sales |
| Unanticipated Items | | | |
| Winter Storm Gerri | 1.6 | | Payroll and Materials/Supplies |
| Distribution Expenses | 6.5 | | Storm expenses not reimbursed by FEMA and cable locating |
| Retail Revenue | 5.2 | | Residential and Commercial under budget due to mild weather, partially offset by Industrial |
| Replenishment of RSA | \$13.3 | 1.0% | To meet 2.0 Debt Service Coverage |
| Total 2025 Rate Impact | | 1.4% | |

Investments to Support Our Mission

Sustain Existing Assets

- Existing infrastructure is aging and will essentially need to rebuild the entire grid
- Focus on system reliability in extreme weather (Gerri)
- Updating Outage Management System, Field Management System and Customer Platform
- Increase in vegetation management

Expand and Transform

- New generation to support additional load growth and increased planning reserve margin:
 - Standing Bear, Turtle Creek and new combustion turbines
- New transmission and distribution for new customers and additional reliability
- ***2025 General Rate Increase 4.9% across all customers***

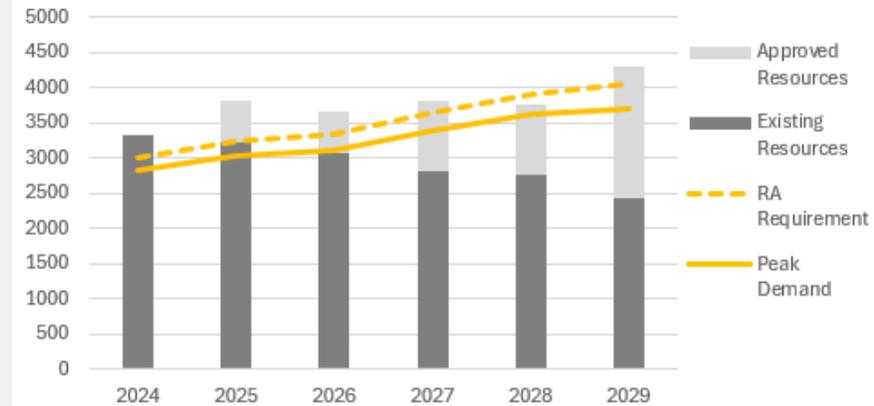

Planning Reserve Margin

- Anticipated increases in regional planning reserve margin requirements are significant and impact existing load as well as future load growth.
 - Summer PRM- 30MW needed to meet PRM in 2026
 - Winter PRM- 500MW needed to meet PRM in 2026
- Successfully meeting future requirements will depend on the timely execution of current resource plans

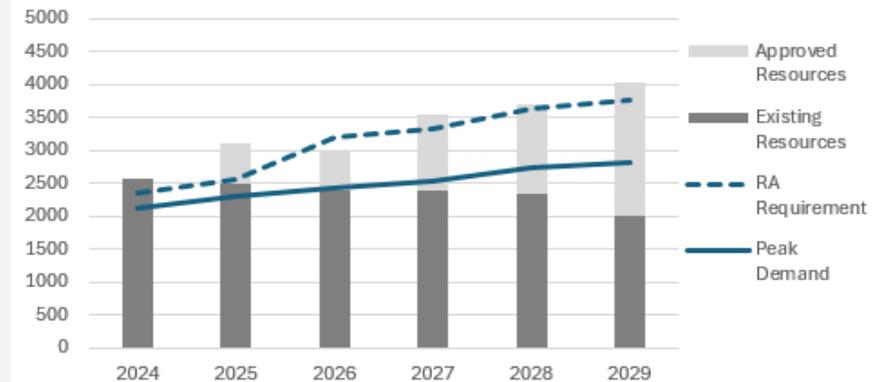

• Summer PRM is increasing **from 15% to 16%** starting in 2026

• Winter PRM is increasing **from 15% to 36%** starting in 2026/27

Summer Resource Adequacy Requirement (MW)

Winter Resource Adequacy Requirement (MW)

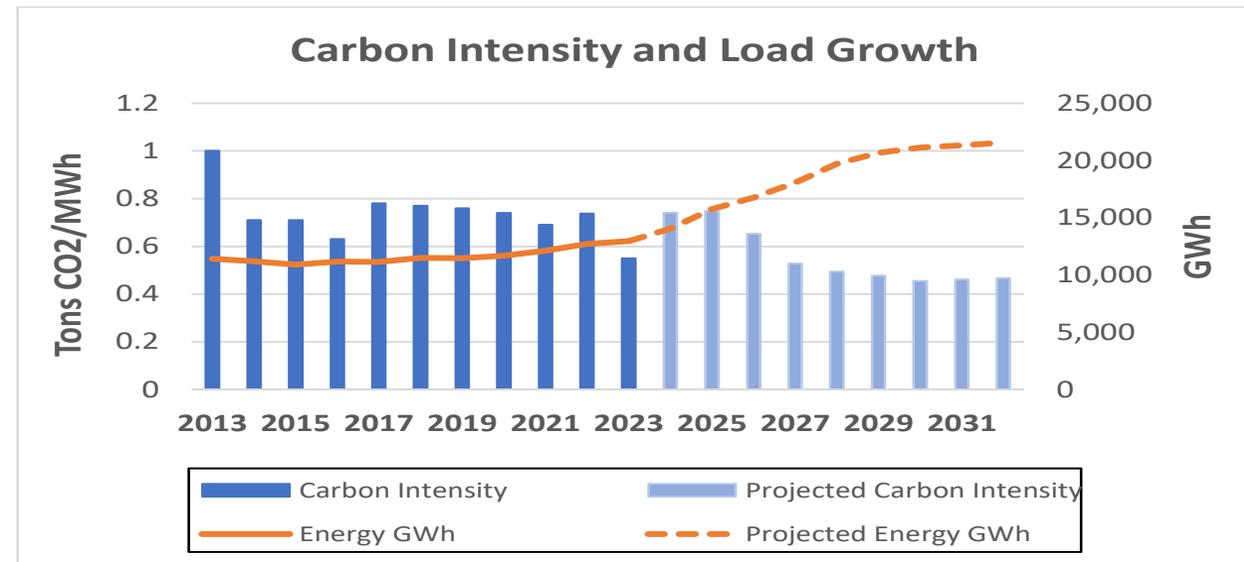

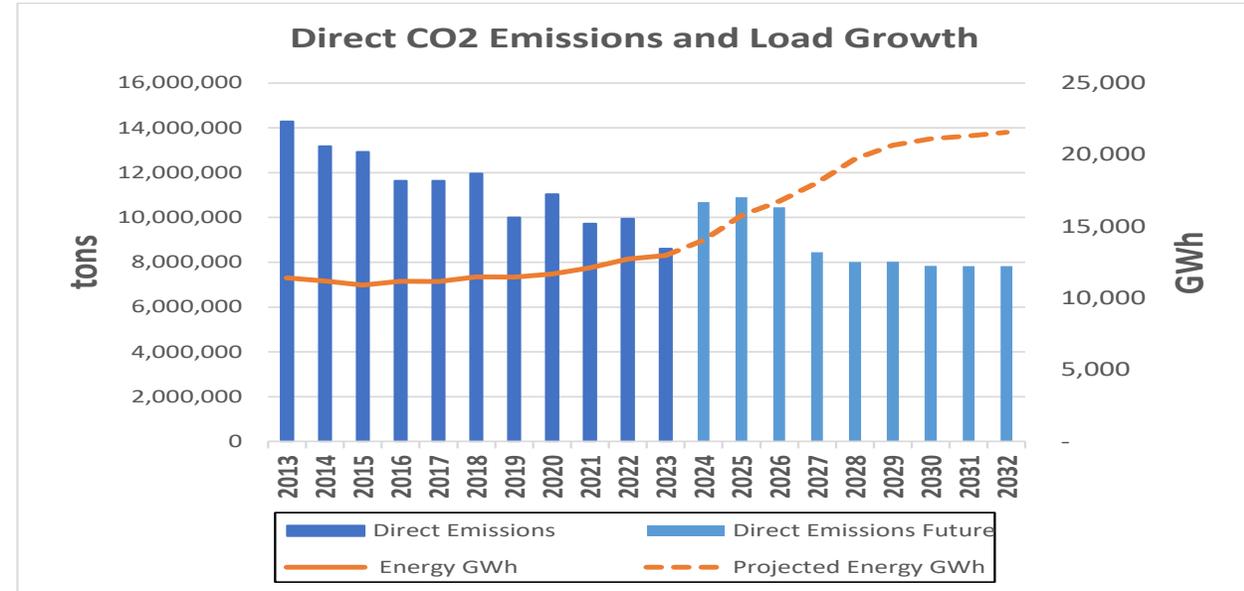

Progress on New Generation Goals

- Complete
- On Track
- Challenged
- Delayed

| Resources | Capacity | Status | |
|-------------------------------|---------------|---|--|
| Renewable Generation | 600MW | ● | Complete: Executed High Banks Wind Farm capacity contract |

Environmentally Sensitive

- Projections indicate declining trajectory for direct emissions and carbon intensity while retail load continues to grow.
- **New Renewable Generation:**
 - Platteview Solar (2024)
 - Milligan Wind Facility (2024)
 - High Banks Wind Facility (2024)
 - Pierce County (2027)
- **North Omaha Station**
 - Retirement of units 1, 2, 3
 - Conversion of 4 and 5 from coal to natural gas

Rate Increase Drivers

- **2024 Cost Recovery**
- **Growth in capital portfolio:**
 - Capital portfolio for 2025 requires debt financing
 - Investing \$595 million in projects that grow the asset base as well as transform and modernize the electrical grid
 - Investment in our existing assets, budgeting \$193 million to ensure reliable performance
- **Operations & Maintenance costs increasing:**
 - Increased headcount supporting growth at the utility
 - Investment in vegetation management
 - Historic July storm highlighting need for quicker tree trimming cycles
 - Enterprise priorities, such as Advanced Metering Infrastructure, driving additional O&M expense
 - Cost to serve existing and new load is increasing
 - Partially offset by the pass-through impact of market rate industrial customers
 - In addition to load growth, Southwest Power Pool increasing planning reserve margin adding to need for additional capacity

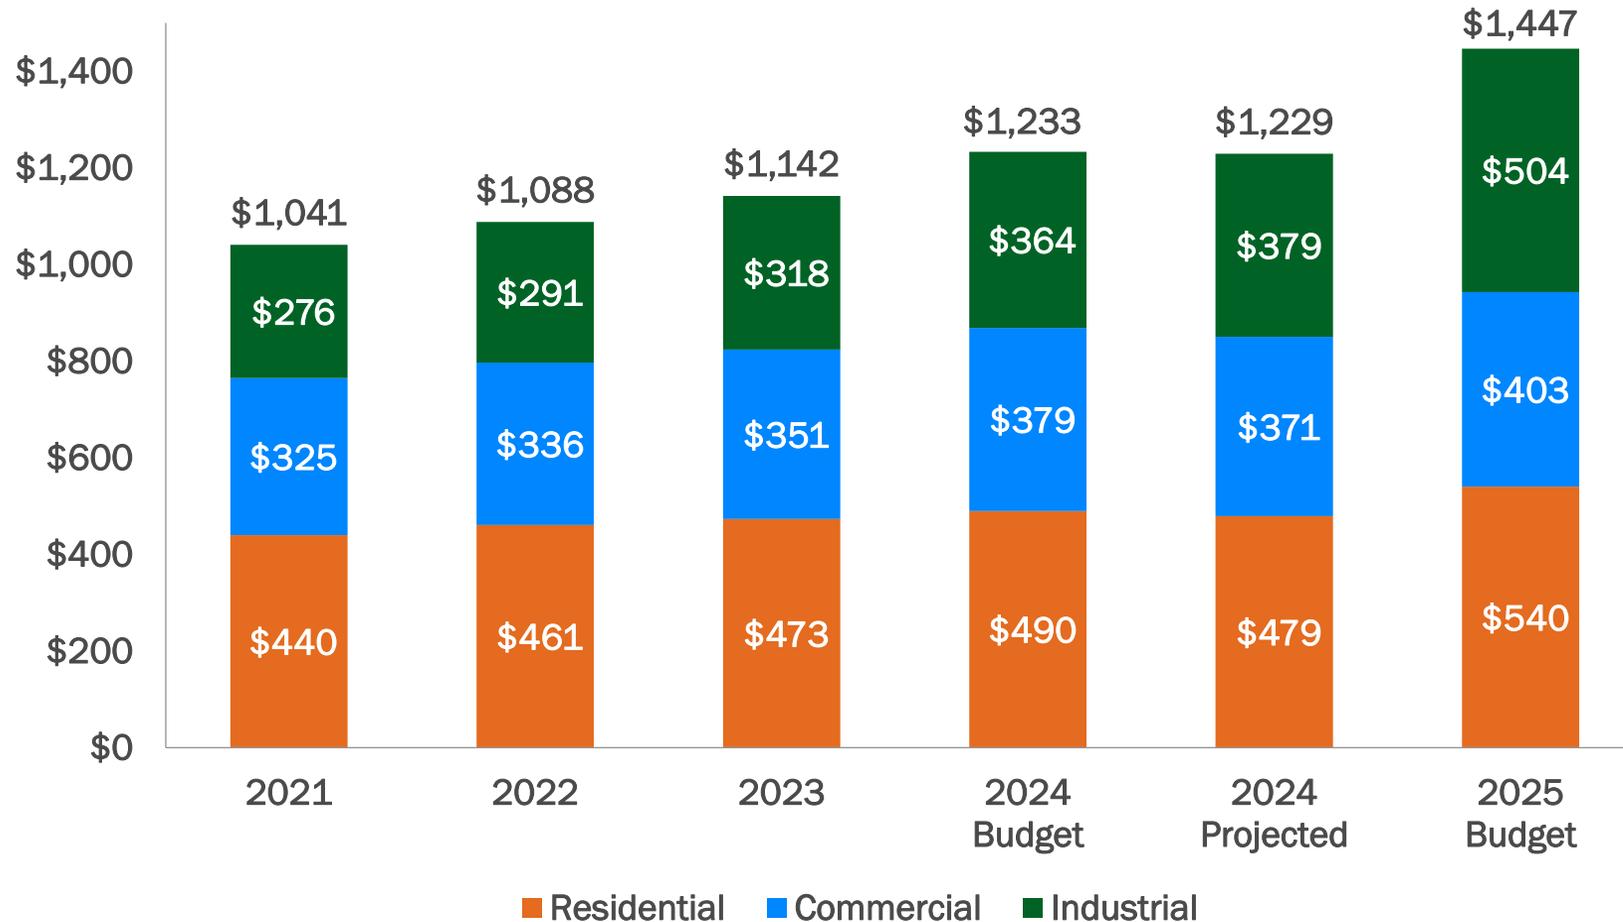

2025 Corporate Operating Plan

Retail Revenue excluding Wholesale Revenues

Customer Class Level - \$ in millions

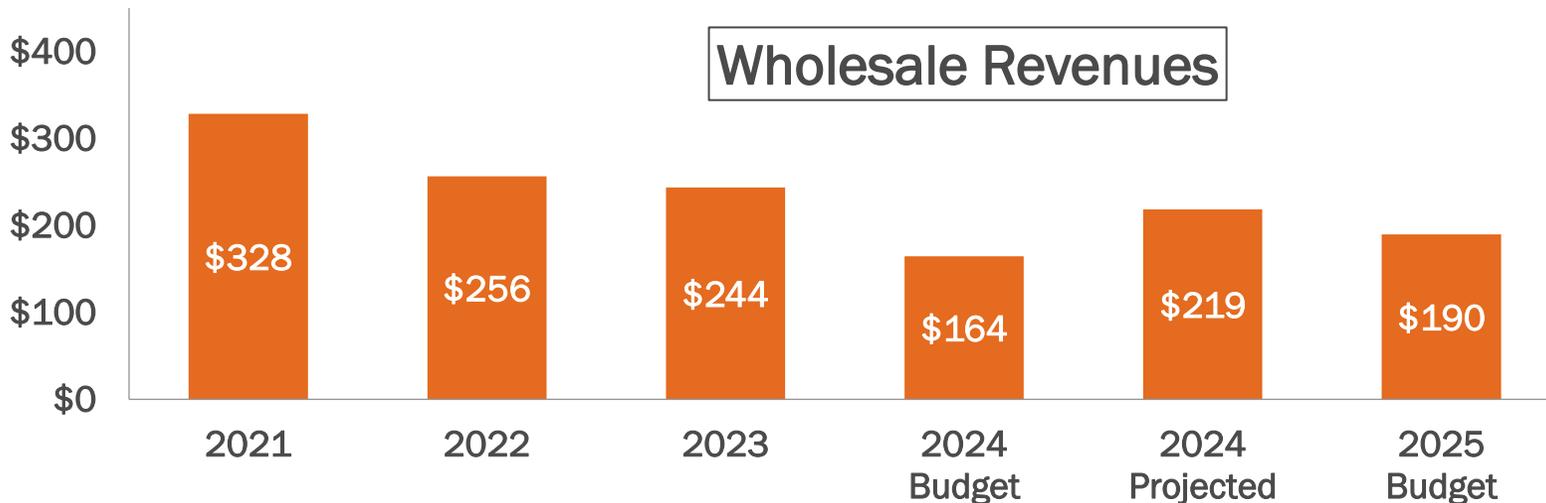

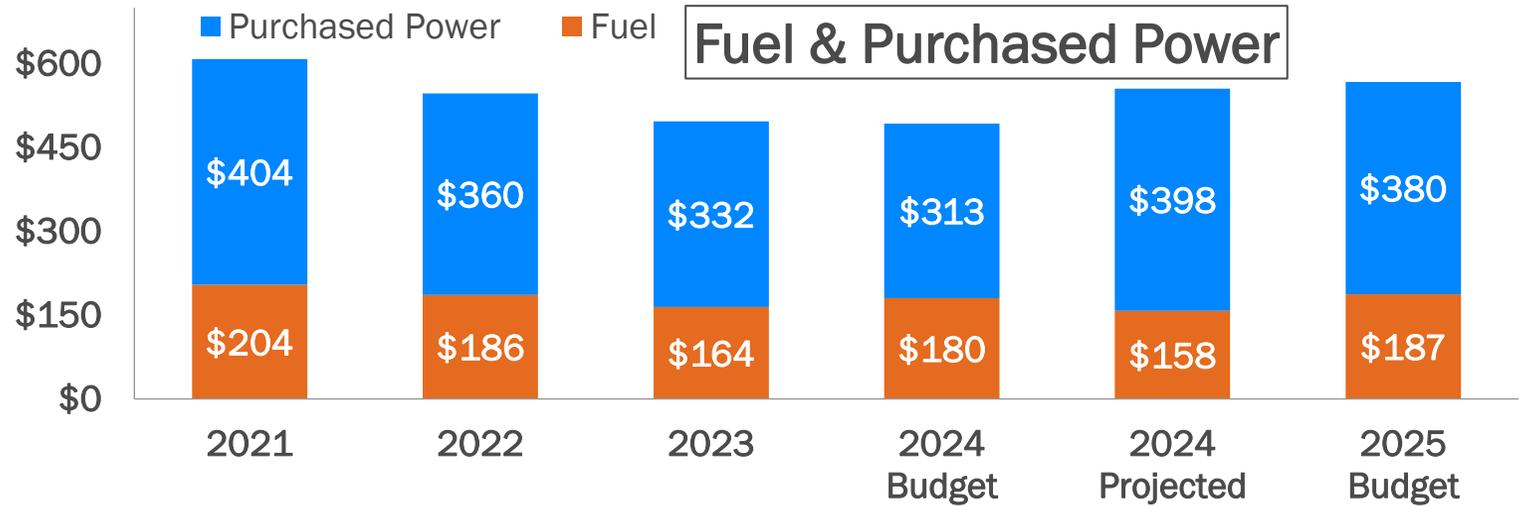

- District is experiencing revenue growth across all customer classes
- Annual revenue growth compared to 2024 budget by class:
 - Industrial = 38.7%
 - Commercial = 6.3%
 - Residential = 10.1%
- Retail revenue growth primarily due to load growth of 12.5% compared to 2024 budget

Excludes activity for Reserve Contributions/Usage, Unbilled, and Fuel and Purchased Power Adjustment

Fuel, Purchased Power and Wholesale Revenues

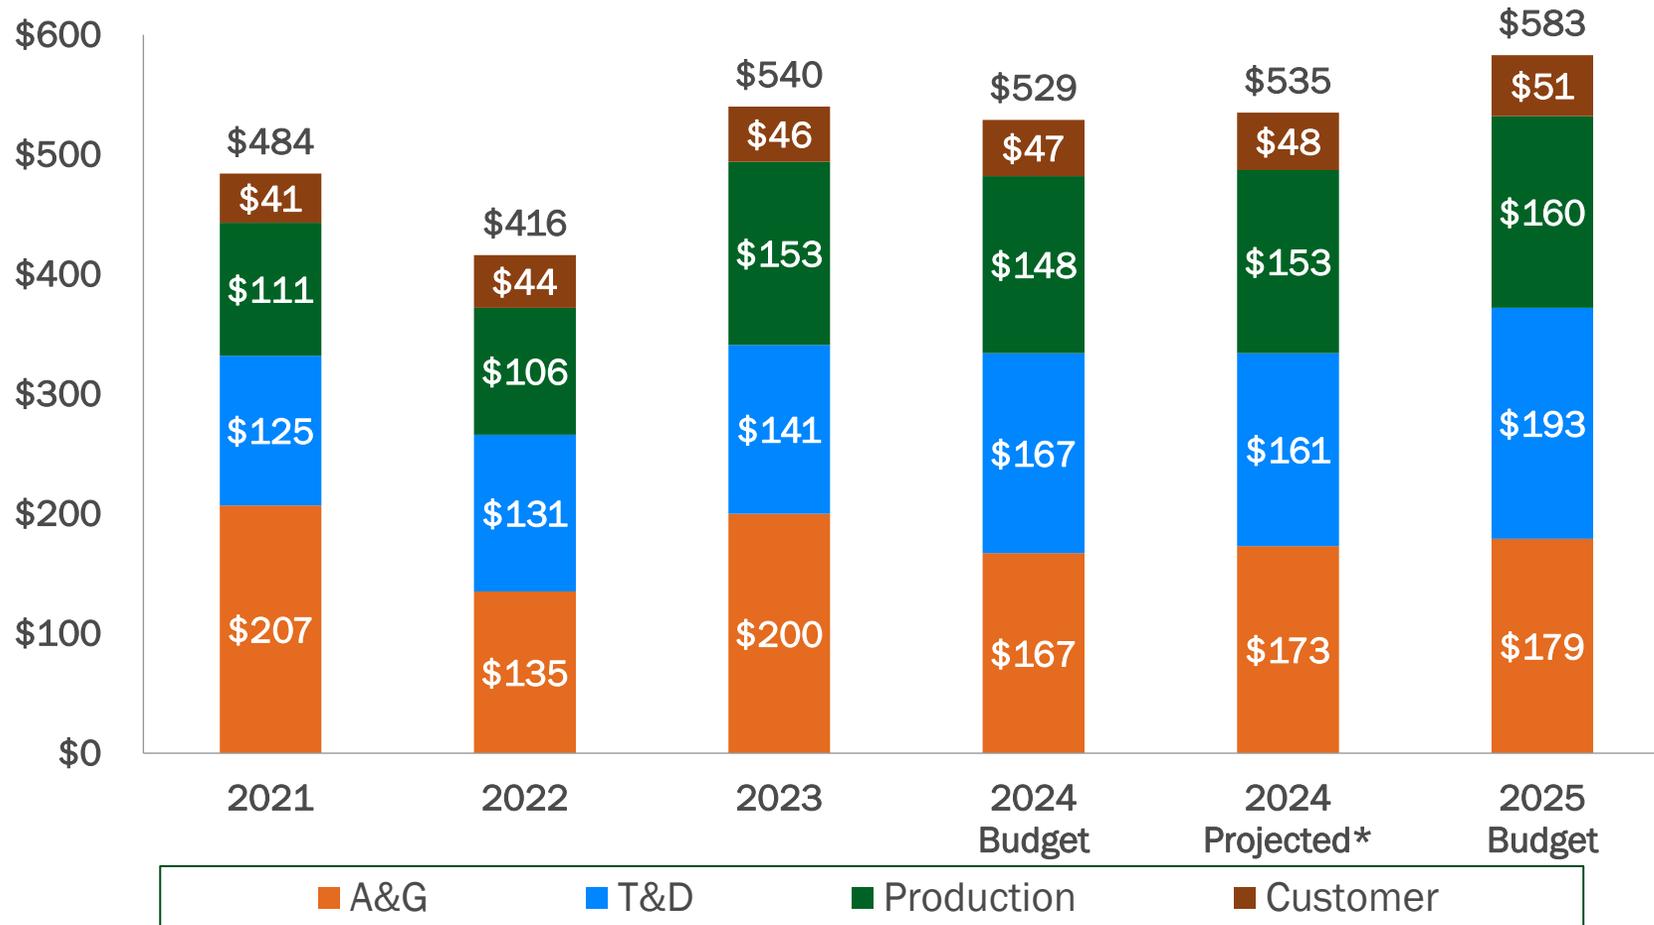

\$ in millions

- Purchased Power volume increasing to meet increasing retail load growth and planning reserve requirements
- Fuel costs increasing driven by a full year of production at Turtle Creek and Standing Bear Lake
- Increased Wholesale Revenue as a result of additional congestion hedging revenue
- As load growth outpaces development of owned generation, the District relies on higher purchased power volumes, driving increased Net Power Costs

Operations & Maintenance Expense (O&M)

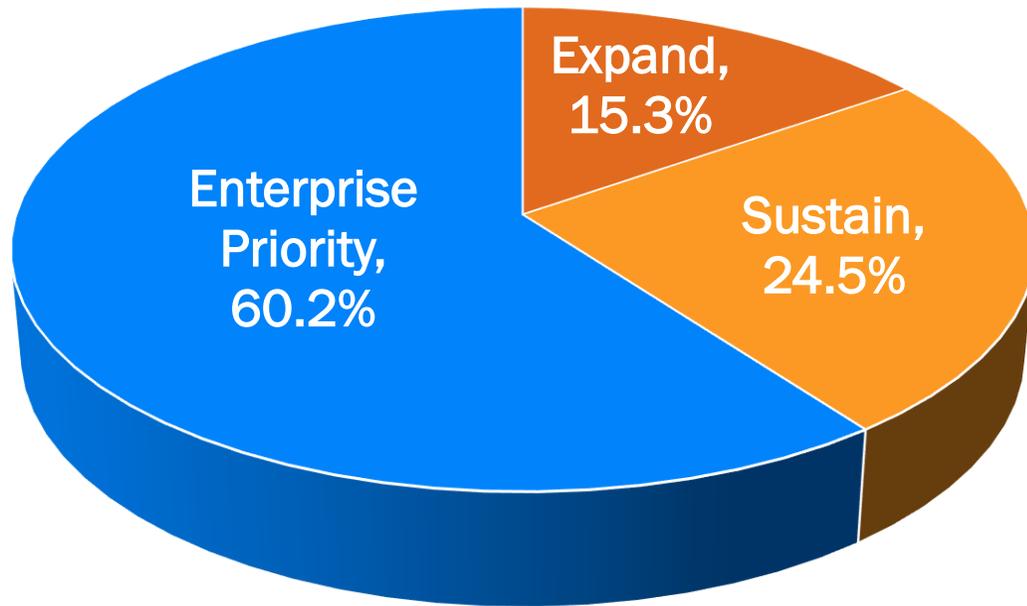

(Excludes Energy Cost and Decommissioning Funding)

- Labor costs and benefits increasing due to increased headcount to support growth at the utility
- Approximately \$10 million invested in transformational priorities such as Resource Adequacy and Advanced Metering Infrastructure
- Additional investment of approximately \$12 million for vegetation management

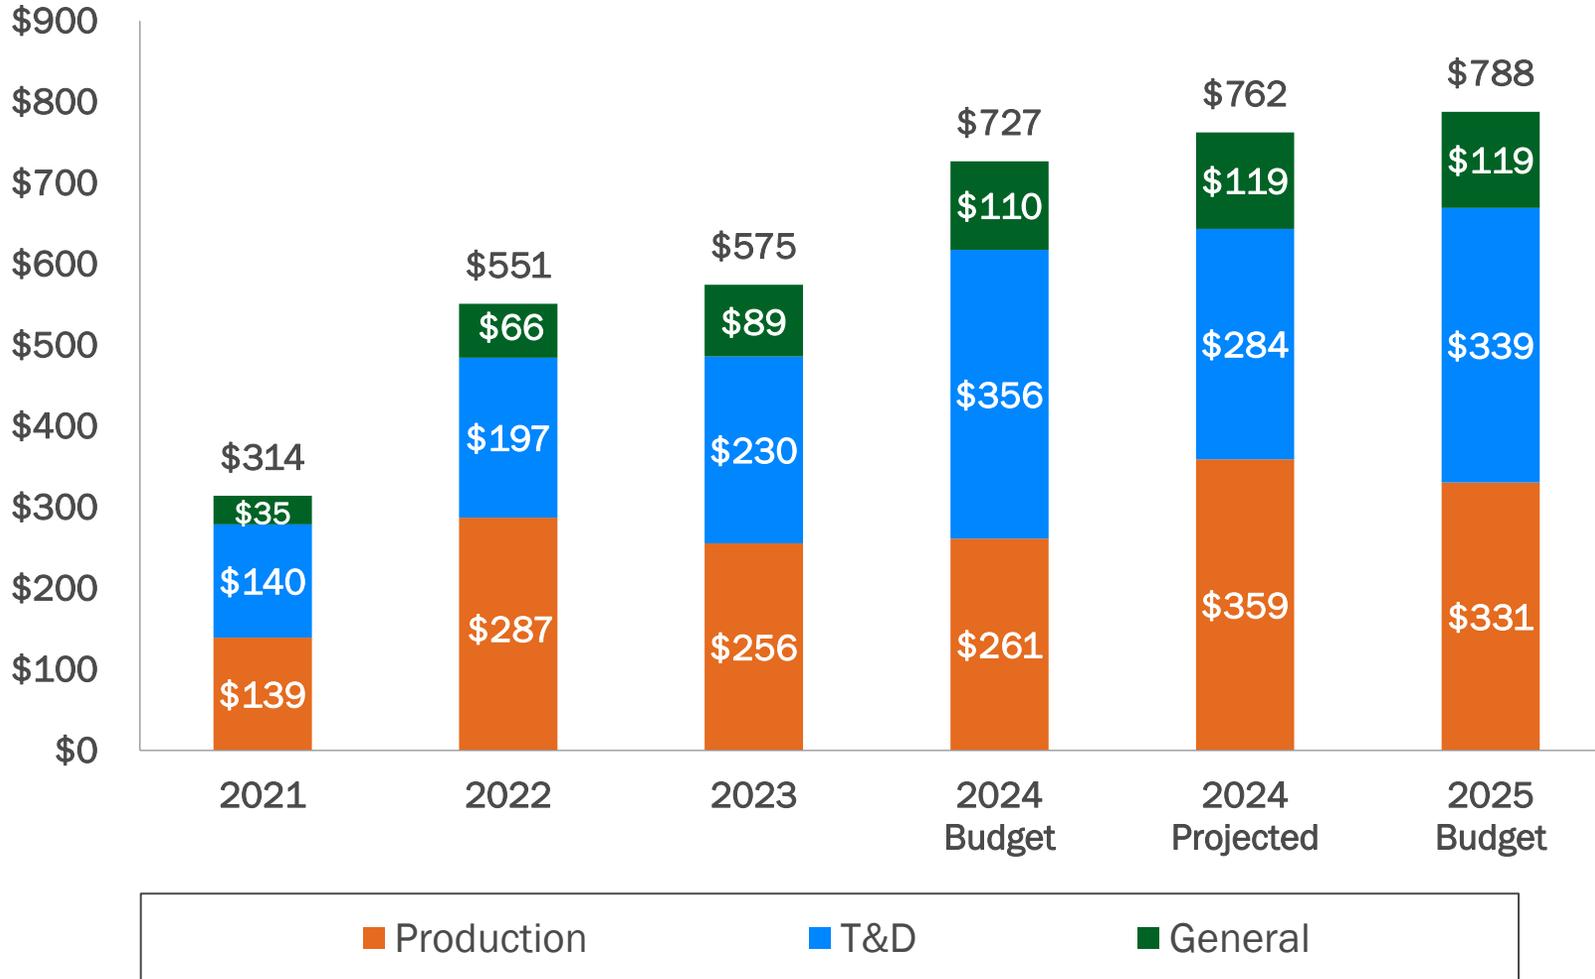

* Excludes storm costs with anticipated reimbursement from federal or local agencies

Capital Expenditures Philosophy

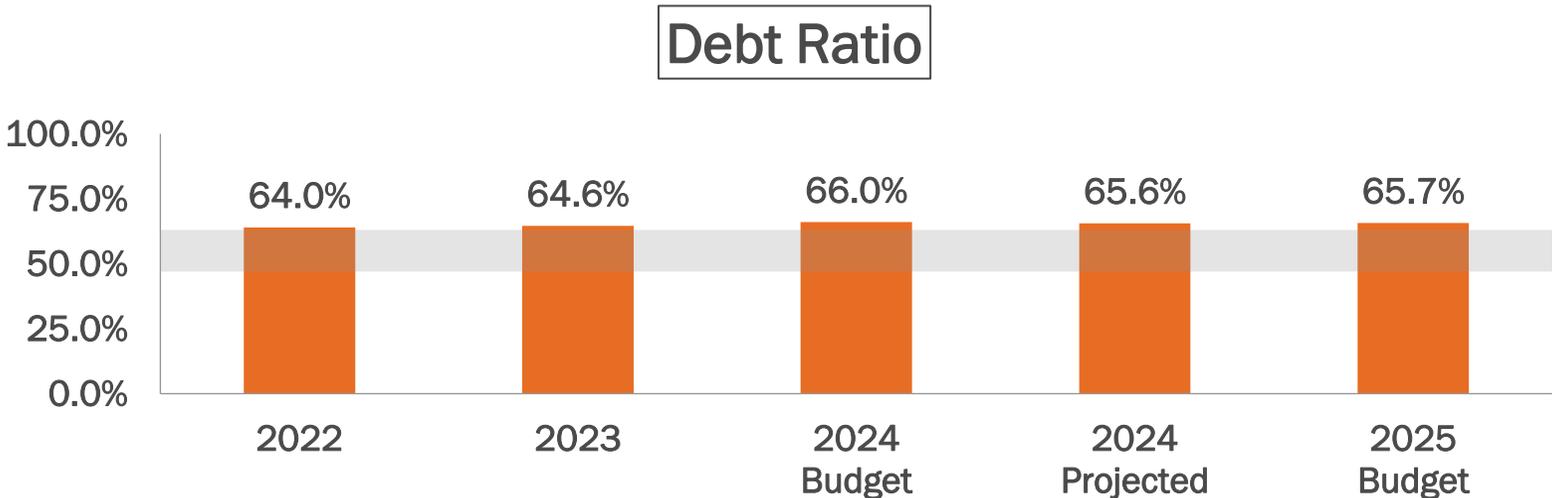

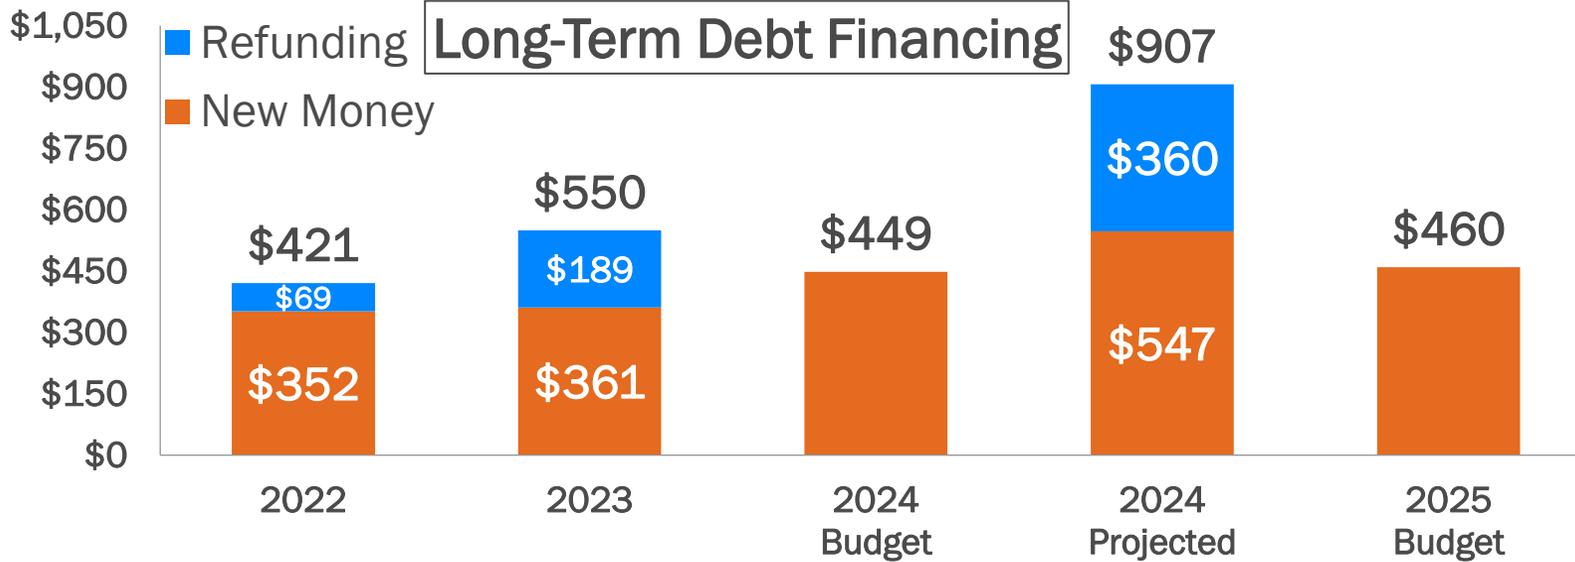

- **Sustain, Expand and Enterprise Priority** investment categories are used to calibrate the 2025 Capital Expenditures budget
- **Sustain** category includes capital projects aimed at maintaining and improving existing assets
 - \$193.3 million or 24.5% of the 2025 total Capital Budget
- **Expand** category is for new assets planned to be added to the District’s asset base
 - \$120.7 million or 15.3% of the 2025 total Capital Budget
- **Enterprise Priority** category includes capital projects that represent investments in the District’s strategic priorities
 - \$474.1 million or 60.2% of the 2025 total Capital Budget
- This philosophy is important to ensure that existing assets are still receiving sufficient investment at a time when the system is undergoing expansion

Capital Expenditures

- Production largely comprised of new generation projects such as the completion of Turtle Creek and Standing Bear Lake as well as four additional combustion turbines at Turtle Creek and Cass County
- T&D consists of investments to support new generation and load growth while continuing to improve and replace aging assets to maintain grid reliability and resiliency
- Investments in Advanced Metering Infrastructure make up over 50% of the General category

Long-Term Debt Financing and Debt Ratio*

- Growing capital portfolio is driving debt issuances
- Proceeds from the debt issuances ensure appropriate liquidity and days cash on hand
- SD-3 metrics partnered with cash management is a determining factor in debt financing. 2024 cash levels maintain the District's position in the AA rated peer group for days cash on hand
- Debt ratio is currently above S&P's range of 50% to 60% for a Very Strong AA rated utility

* Total Debt Outstanding as a percentage of Total Capitalization at year end

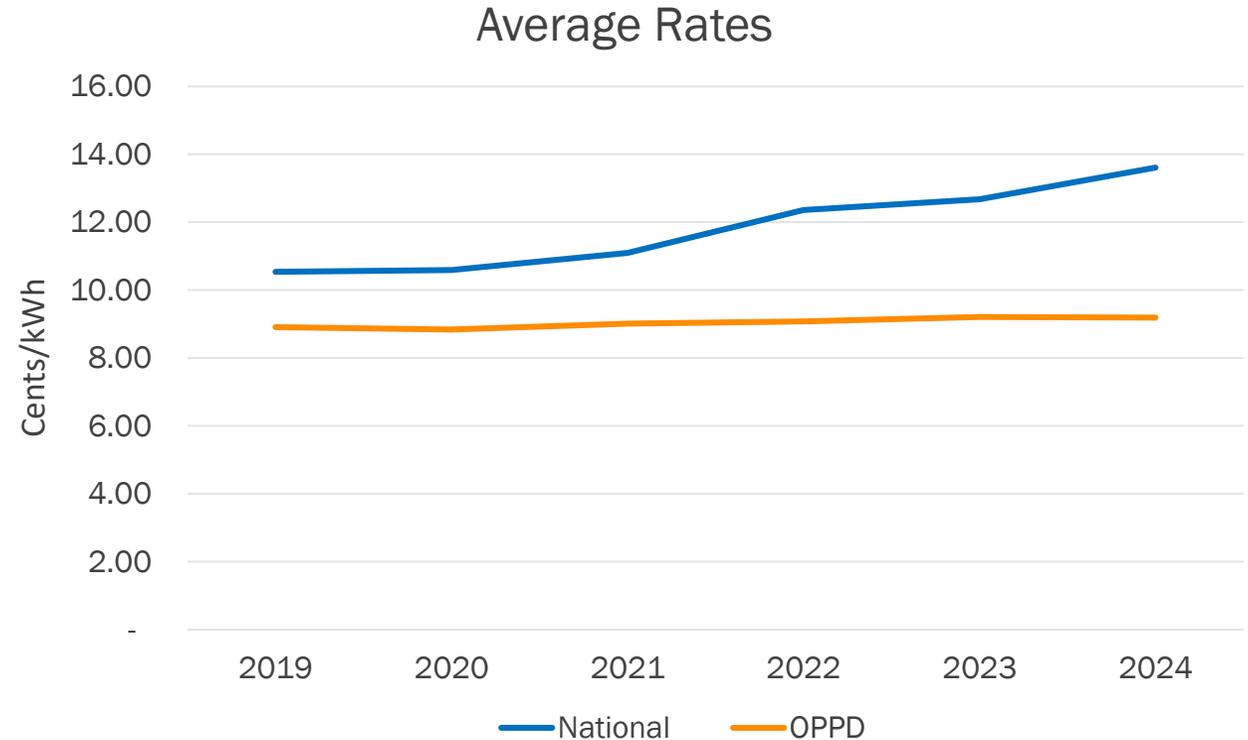

2025 Rate Action

OPPD Competitive Rates

- OPPD rates have been gaining a competitive edge against the national average
- As of 2023, OPPD’s average retail rate was 27.4% below the national average and 2024 preliminary numbers indicate 32.5% below the national average
- OPPD’s rate increase of 6.3% will ensure that we maintain competitive rates while also supporting the overall health of our operations.

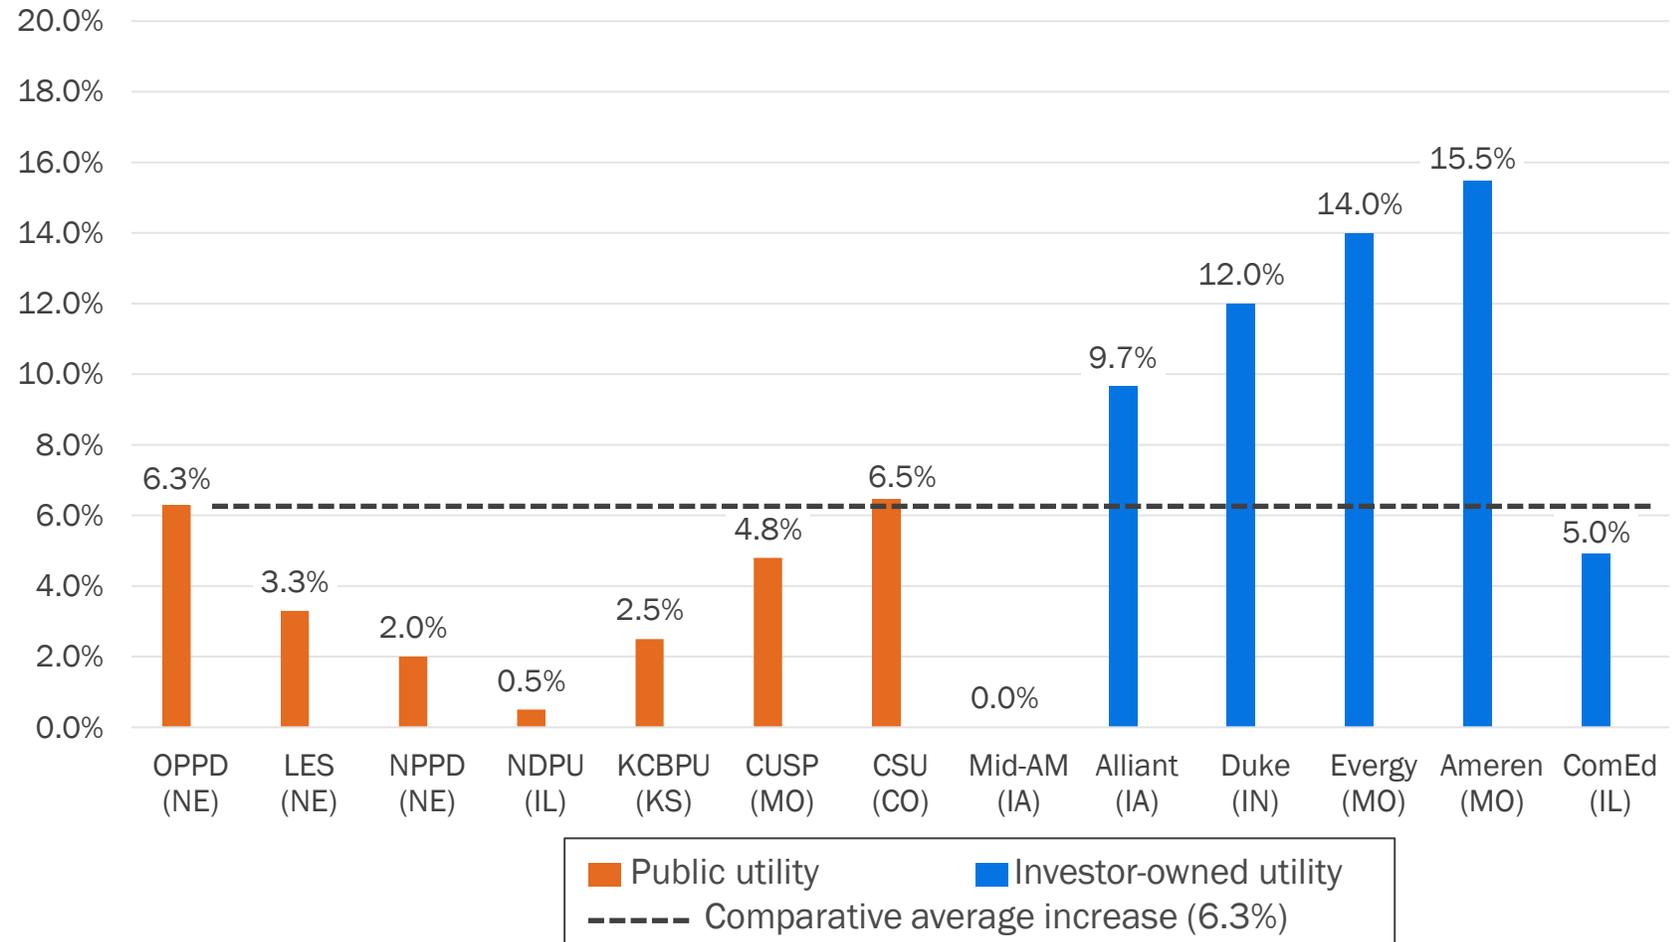

| | 2019 | 2020 | 2021 | 2022 | 2023 | 2024* |
|----------------|---------|---------|---------|---------|---------|---------|
| National | 10.54 | 10.59 | 11.10 | 12.36 | 12.68 | 13.61 |
| OPPD | 8.91 | 8.84 | 9.01 | 9.08 | 9.21 | 9.19 |
| Difference (%) | (15.5%) | (16.5%) | (18.8%) | (26.5%) | (27.4%) | (32.5%) |

OPPD Preview of Rate Action vs Industry Trends

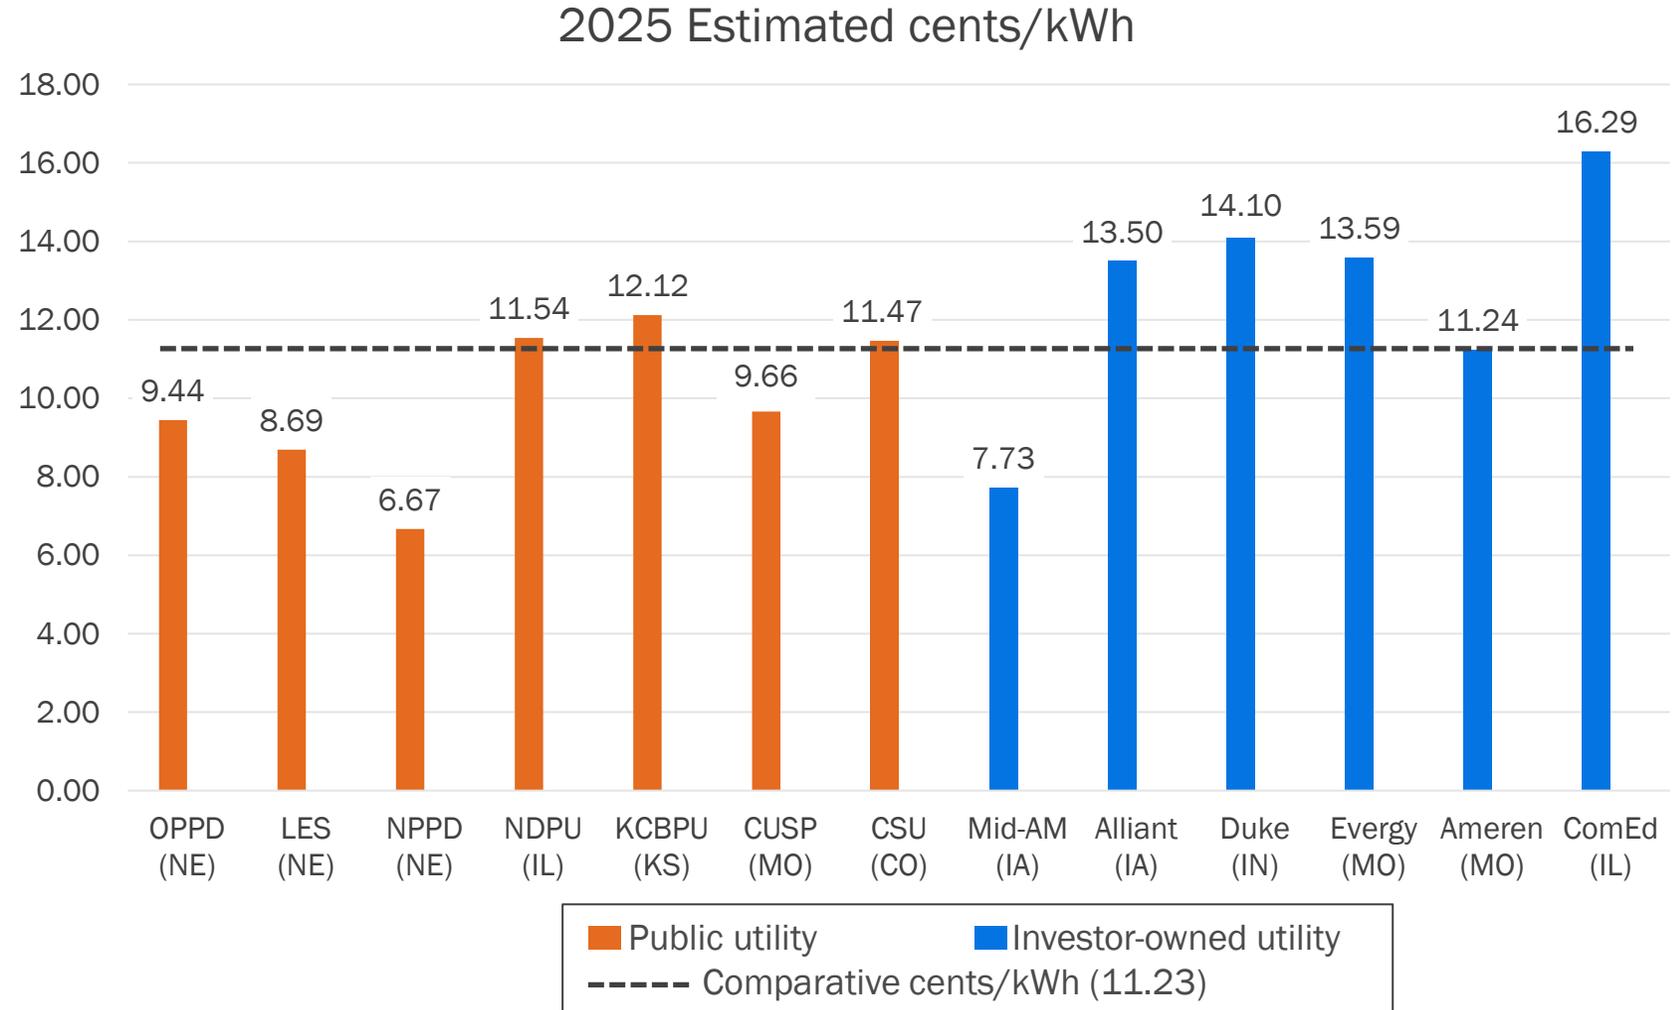

- For 2025, total average rate impact is 6.3% across all customers classes
- Rate Increase Factors:
 - Grid Modernization
 - Grid Strengthening
 - Generation Capacity Increases
 - Renewable Energy Investments
 - Environmental Compliance
 - Interest Rate Increases
 - Customer Increases
 - Purchased Power Cost Increases

2025 Proposed Retail Rate Increases Among Utilities

OPPD Preview of Rate Action vs Industry Trends

- For 2025, OPPD's estimated cents/kwh is 9.44
- Even with large investments in our current and new assets, while digitally transforming, we expect our rates will remain competitive from a cents/kWh basis

Information obtained from publicly available sources

2025 Rate Action

Summary

| Rate Component | Change |
|--|-------------|
| General Rate | 4.9% |
| 2024 FPPA Under-Collection | 0.4% |
| 2024 Usage of Rate Stabilization Account * | 1.0% |
| Total 2025 Increase | 6.3% |

* Amount needed through September to meet 2.0 at year end. To be replenished in 2025

- Rate Action Summary:
 - General Rate Increase driven by growing capital portfolio and O&M to improve reliability, customer focused technologies and meet growing customer base
 - 2024 FPPA undercollected amount to be collected in 2025
 - FPPA factor increase from \$0.00413 to \$0.00457 per kwh
 - Due to winter storm Gerri and unplanned outages partially off-set by increased Off-System Sales due to congestion hedging
 - Usage of Rate Stabilization Account needed to meet 2.0 Debt Service Coverage in 2024 driven by outages and unrecoverable storm costs

COSTS TO SERVE OPPD CUSTOMERS

Energy Generation Costs

Costs related to energy usage including fuel for generation, plus any power purchased from the market.

Demand Generation Costs

Costs related to construction, operation and maintenance of energy generating resources like wind, solar, natural gas, hydro- and coal-fueled plants.

Transmission Costs

Costs related to construction, operation and maintenance of assets for electricity delivery from generation resources to the transmission system (high-voltage transmission lines, poles, transformers, substations and communication sites).

Distribution Costs

Costs related to construction, operation and maintenance of assets that convert high-voltage electricity to 220 volts for direct distribution to OPPD customers (power lines, poles, transformers, substations and other assets).

Customer Costs

Costs related to customer service, billing, collections, metering, and data management that do not vary with energy or demand needs.

Investments allocated to **All Customers** based on their utilization of the system

- Investments in New and Existing Generation and Transmission
- Additional headcount within the organization to support the new assets and increased core work

Investments primarily allocated to **Residential and Small Commercial Customers**

- Outage Management System
- Field Management System
- Customer Platform
- Vegetation Management (tree trimming)

2025 Rate Changes

Proposed Percent Increase by Customer Class

| Proposed Percent Increase by Customer Class | | | | | | |
|---|-------------|-------------|-------------|-------------|-------------|-------------|
| | Residential | Commercial | Industrial | Lighting | Wholesale | Total |
| Proposed General Increase | 8.0% | 4.1% | 5.1% | 8.0% | 8.0% | 5.9% |
| Proposed FPPA Increase | 0.4% | 0.5% | 0.3% | 0.1% | 0.6% | 0.4% |
| Total Rate Action | 8.4% | 4.6% | 5.4% | 8.1% | 8.6% | 6.3% |

*The percentages represent class averages. Rate codes within a class will have difference from the average increase. Individual customer impacts will vary.

- All the details regarding rate changes are presented in the red-lined version of the Service Regulations and Schedules

2025 Rate Changes

Other Rate Items

- New Rates for LED Private Outdoor Lighting (Rate 236)
- Changes to General – Customer Service Charges, Schedule No. 470
 - Increase in Tenant Attachment Fee, 470I
- Retirement of Riders due to Shift to Product Programs:
 - Rider 480 – Residential Surge Guard
 - Rider 481 – Commercial Surge Guard
- Retirement of Riders due to Lack of Customer Use:
 - Rider 490 – Economic Development
 - Rider 499 – Green Sponsorship
- Preparation of Retirement of Riders:
 - Riders 467 & 467H, 467E & 467V, and 467L
 - Unavailable to New Customers

Board Consultant Rate Review Process

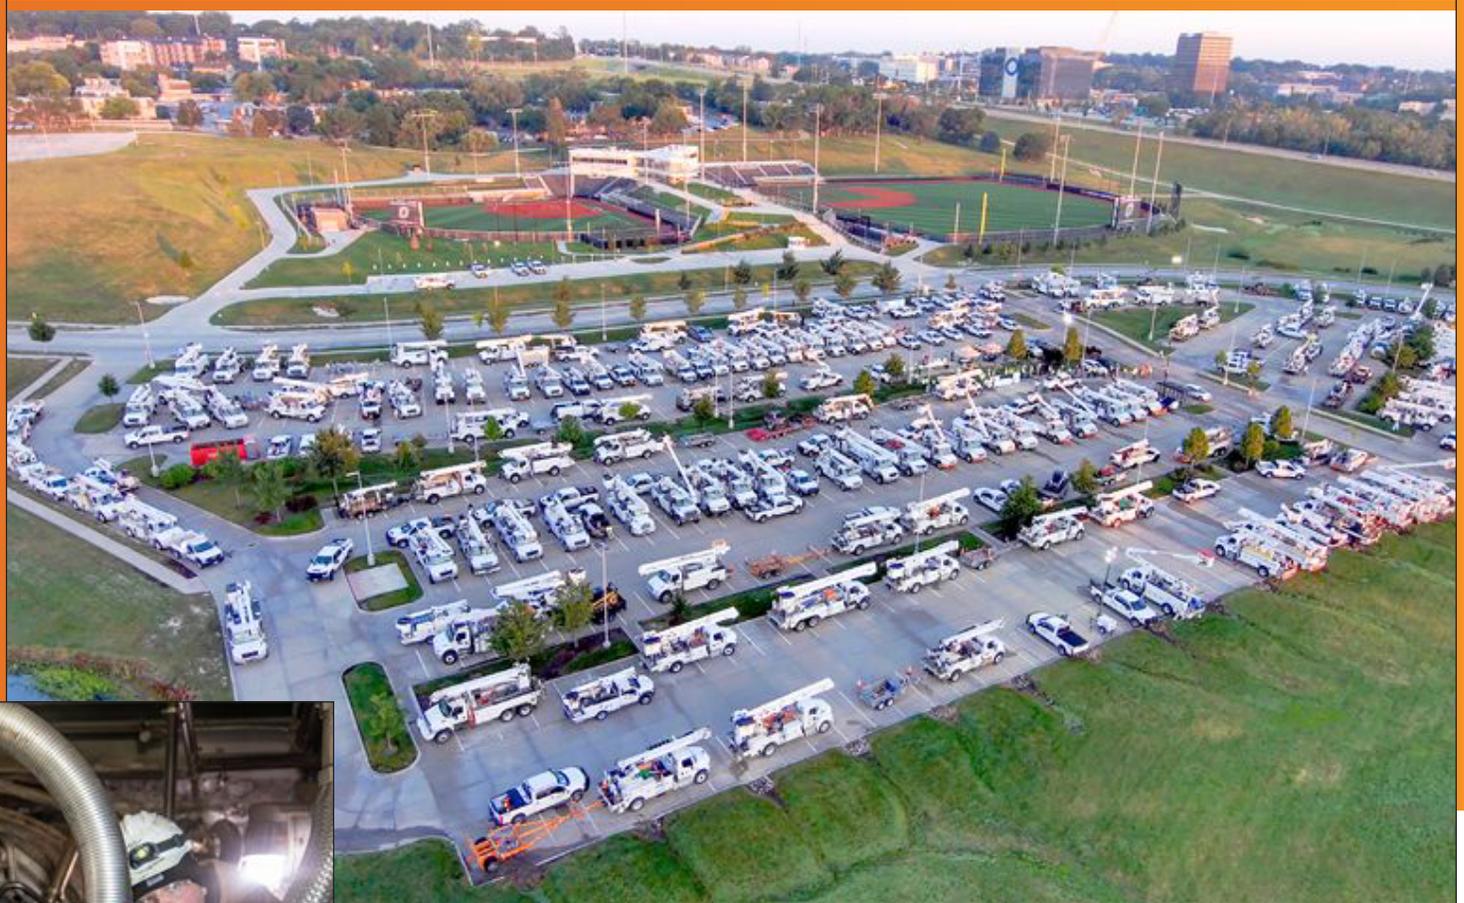

- Three review sessions around the Cost-of-Service Study (COSS) for 2025
 - Supportive of overall approach in proposal of rate increases
 - Supportive that proposed changes are fair, reasonable and non-discriminatory
 - Supportive of methods utilized to ensure rate stability and mitigation of impacts on customers
- Continuous year-round partnership around COSS modeling best practices include:
 - Ensuring precision of method relating to planning and facility operation
 - Ensuring the accuracy of the method related to cost causation
 - Assessing the ability of the method to recognize customer class distinctions
 - Assessing the accuracy of the method in producing consistent results
 - Reviewing the modernity of the method to reflect best practices across the industry

Board Consultant Budget Review Process

- Virtual Half Day Reviews held September 27th, October 7th & 8th
- AMI Initiative Presentation held on October 15th
- Customer Usage Forecasts / Methodology
 - Revenue Forecasts
 - Resource Planning
 - Generation Plan / Scheduling
 - Fuel Budget
 - Operations & Maintenance Expense Budget
 - Fort Calhoun Station Decommissioning
 - Capital Expenditure Plan
 - Preliminary review complete, final report expected in December

**MANAGEMENT
LETTER**

Management Letter

Every day in 2024, Omaha Public Power District (OPPD) worked tirelessly to overcome challenges and prepare for a bright future.

We diversified our portfolio with energy sources that will enhance our reliability during extreme weather, reduce our carbon output and help us meet fast-growing customer demand for electricity.

We're forging ahead with plans for advanced metering infrastructure (AMI) technology, which will help us assess and restore outages with greater speed and precision.

We also powered through major challenges this year, including extreme cold and low river levels in January that affected generation plants on the Missouri River, an April tornado that devastated Elkhorn and Bennington, major flooding near our Fort Calhoun Station site and a July 31 storm with hurricane-force winds that caused the biggest outage in OPPD history.

Above all, our public power mission kept us focused on reliability, affordability and environmental sustainability. Our locally elected Board of Directors continued to guide us with forward-looking directives to serve the community.

Our 2025 Corporate Operating Plan recommends a 6.3% rate increase, composed of a 4.9% average general rate increase and a 1.4% increase from the Fuel and Purchased Power Adjustment (FPPA) factor and replenishment of the Rate Stabilization Account (RSA). The general rate increase is driven by rising net power costs from increasing load and a growing capital portfolio, leading to additional debt issuances. The FPPA and RSA impact is driven by outages and storm restoration costs. FPPA is the mechanism OPPD uses to collect price fluctuations from year to year.

For context, OPPD's rates are still far lower, on average, than other utilities. Residential rates are 25.2% below the national average, according to the U.S. Energy Information Administration's final 2023 report, the most recent data available.

As the energy landscape changes, OPPD is working on multiple fronts to adapt and thrive – and our future is bright.

A handwritten signature in black ink, appearing to read 'L. Fernandez'.

L. Javier Fernandez
President and Chief Executive Officer

STRATEGIC PLANNING AND ENTERPRISE RISK

Strategic Direction

To provide clear and transparent direction on behalf of OPPD's customer owners OPPD's publicly elected Board of Directors established fifteen strategic direction (SD) policies in 2015 to which OPPD is accountable. The policies guide OPPD's planning efforts to address current and future trends, mitigate risks, pursue strategic opportunities, and prioritize resources to efficiently and effectively provide energy services to our customer owners. The SD policies leverage industry benchmarks to drive performance as a top utility and provide the basis for a scorecard to which the organization manages its performance. The Board monitors OPPD's compliance with these policies and updates the policies, when determined appropriate, to clarify strategic direction.

Our Strategic Foundation (SD-1)

Mission: To provide affordable, reliable and environmentally sensitive energy services to our customers.

Vision: "Leading the Way We Power the Future"

In implementing this vision, OPPD shall adhere to these principles:

- Strengthen the public power advantage of affordable and reliable electricity;
- Exemplify fiscal, social and environmental responsibility to optimize value to our customer-owners;
- Proactively engage and communicate with our stakeholders;
- Act transparently and with accountability for the best interest of our customer-owners;
- Collaborate, when appropriate, with partners; and
- Leverage OPPD's leadership to achieve these goals

Core Values

- We have a **PASSION** to serve
- We **HONOR** our community
- We **CARE** about each other

Board Strategic Direction Policies & Strategic Goals

| Policy | Measure | Definition | Strategic Goal |
|--|---------------------------------|---|-------------------------------|
| Rates (SD-2) | % Below Regional Retail Average | Retail rate target of North Central Regional average published rates on a system average basis. | 10% |
| Access to Credit Markets (SD-3) | Debt Coverage Ratio | Revenues less expenses divided by total annual senior and subordinate lien debt interest and principal payments. | 2.0 |
| Reliability (SD-4) | SAIDI | System Average Interruption Duration Index | < 90 mins |
| | SAIFI | System Average interruption Frequency Index | < 0.9 incidents |
| | EFOR | Equivalent Forced Outage Rate | < or = 8.0% |
| Customer Satisfaction (SD-5) | Absolute Satisfaction Score | Customer satisfaction for similar-sized utilities in the region across residential and business customers. | Top quartile |
| Safety (SD-6) | DART | Days Away, Restricted or Transferred | < or = 0.50 |
| | PVIR | Preventable Vehicle Incident Rate | < or = 4.00 |
| Environmental Stewardship (SD-7) | % Net reduction in CO2e | Strive to achieve net zero carbon equivalent (CO2e) emissions by 2050 relative to OPPD's 2013 benchmark with the following interim targets, 2027-41-51% net reduction. Future interim targets to be informed by and determined following the completion of the 2026 integrated resource plan. | Achieve net zero CO2e by 2050 |
| Employee Relations (SD-8) | Employee Engagement | Composite score of employee engagement | Top quartile |
| <p><i>For a full listing of the 15 Strategic Directives, which includes Integrated System Planning (SD-9), Ethics (SD-10), Economic Development (SD-11), Information Management & Security (SD-12), Stakeholder Outreach & Engagement (SD-13), Retirement Plan Funding (SD-14), Enterprise Risk Management (SD-15), please access the following link to the OPPD Board Policy document https://www.oppd.com/media/317205/oppd-board-policy-binder.pdf</i></p> | | | |

Powering the Future to 2050

At OPPD, we've imagined the future. Powering the Future to 2050 (PF2050) is a strategic vision to make OPPD cleaner, more sustainable, and more innovative than you can believe. While others have been wondering about what's next, we've been hard at work, nights and weekends, planning out what the future of power looks like and how to bring it to life. The vision is clear – Perfect Power, Customer Freedom, and a Cleaner World enabled through a Digitally Driven, Purpose-Driven Culture, and Future-Ready Posture mindset.

In November of 2019, the Board of Directors revised SD-7 (Environmental Stewardship) and established the goal to conduct all operations in a manner that strives for the goal of net-zero-carbon production by 2050. In consideration of this revision, other SD policies, and transformational changes within and outside the industry, the Executive Leadership Team (ELT) created PF2050, which provides a strategic vision for the organization through the year 2050. PF2050 outlines a transformational journey and was developed with the expressed intent to meet or exceed the fifteen SD policies. This vision will transform OPPD to a digital utility with two-way and multi-directional power and communication flows, build a proactive grid, give customer-owners multiple options, minimize environmental impact, and reduce carbon emissions. The future is coming, and we want to make sure it is illuminated.

Acknowledging the rapidly evolving and increasingly complex environment we operate in, OPPD adopted a future-ready posture mindset. This means we are taking a thoughtful approach to investing in both core work ('keeping the lights on today') and in the efforts to power our next generation. This deliberate and agile approach resulted in the establishment of the enterprise-level resourcing priorities. These enterprise priorities are aligned under PF2050 and influence the current year's budget. The process ensures OPPD's finite resources are being used to facilitate the right work to get us closer to our objectives of Perfect Power, Customer Freedom, and a Cleaner World by 2050.

The 2025-2030 enterprise priorities (listed in priority order below) were established to provide this life essential energy service to our customer-owners and employees. Their requirements and aspirational futures are woven into the very DNA of these priorities and are the underpinnings of everything we do.

The 2025-2030 enterprise priorities (listed in priority order below) were established to provide this life essential energy service to our customer-owners and employees. Their requirements and aspirational futures are woven into the very DNA of these priorities and are the underpinnings of everything we do.

1. Resource Adequacy
2. Technology Transformation
3. Next Generation Grid
4. Master Facilities Plan

Powering the Future to 2050

OPPD leveraged PF2050 and the enterprise priorities to guide planning, prioritization, and resourcing decisions for this Corporate Operating Plan. The vision to meet the growing demands of the service territory is becoming a reality as we transition from strategic planning to resourcing the execution in service of our customer-owner requirements in 2030 and beyond. We will continue to build upon our resource prioritization & capacity management framework and strategic STEER trends and risk scanning capabilities that will result in new and better ways to deliver affordable, reliable, and environmentally sensitive energy services to our customers. Additional information regarding PF2050 can be found on <https://www.oppdcommunityconnect.com/pf2050>.

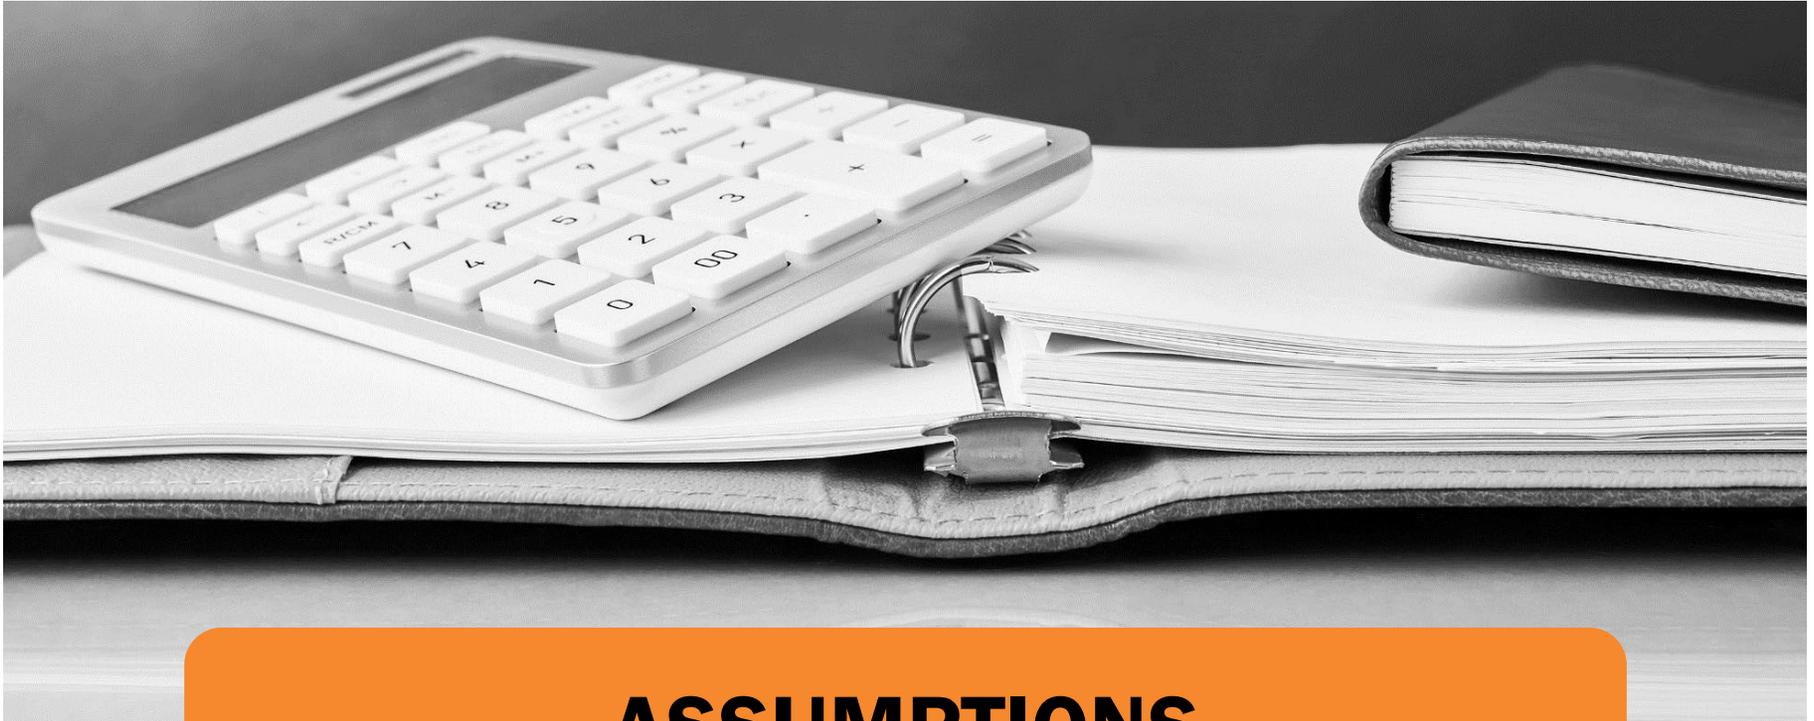

Enterprise Risk Management (SD-15)

Fundamental to effective planning is an understanding of the District's enterprise level risks and the development and implementation of initiatives and mitigation plans to respond to those risks. The District's Enterprise Risk Management (ERM) program specifies risk management standards, management responsibilities, and controls to help ensure risk exposures are properly identified and managed within agreed upon risk tolerance levels. Specific risk mitigation plans and procedures are maintained and reviewed periodically to provide focused and consistent efforts to mitigate various risk exposures. An increased focus on emerging risks, such as disruptive technology, was launched in 2023. This process will continue to strengthen executive leadership's understanding of these risks to ensure an optimal future-ready posture for the organization. In support of its 2025 corporate planning efforts, OPPD leveraged risk assessments and mitigation plans to help prioritize resource allocation. The ELT will continue to expand this effort by incorporating those critical trends identified and associated with PF 2050.

OMAHA PUBLIC POWER DISTRICT
2025 CORPORATE OPERATING PLAN

| Theme | OPPD's Risk Management Focus |
|--------------------------------------|--|
| Retail Revenues & Wholesale Revenues | Persistently pursue customer and economic development to achieve economies of scale and strengthen the affordability of our rates. Optimize wholesale revenues and purchases to further benefit our customer-owners. |
| Resource Adequacy and Reliability | Acquire and maintain a high availability and diverse generation portfolio to serve a significantly growing customer demand. |
| Environmental Sensitivity | Ensure the District is compliant with all environmental regulations, well-positioned to respond to new regulations, and able to minimize our environmental impact. |
| Fuel Costs | Effectively manage the District's fuel portfolio through numerous mitigation strategies to continue to ensure low cost and resilient generation. |
| AMI & Tech Transformation Execution | Deliver world-class execution of priority initiatives that will create a future-ready posture to deliver increased value to our customer-owners. |
| Cyber & Physical Security | Vigorously defend customer information and District assets from all potential cyber and physical security threats inherent with national critical infrastructure. |
| Infrastructure Investment | Optimally invest in transmission, distribution, substation, facility, and technology assets to ensure reliable and resilient energy services and supporting functions will meet the demands of our customer-owners. |
| Workplace Safety | Continue promoting safety as a top priority to ensure every employee and contractor goes home as healthy as they came into work. |
| Community Partnership | Honor and support the communities in which we operate and fulfill the promise of public power. |

ASSUMPTIONS

Assumptions

2025 Proposed Rate Action

Effective January 1, 2025, OPPD's 2025 Corporate Operating Plan assumes an average total rate increase of 6.3% across all customer classes, composed of a 4.9% average general rate increase and a 1.4% increase from the FPPA factor and replenishment of the RSA. The general rate increase is largely driven by rising net power costs and a growing capital portfolio which leads to additional debt issuances. The FPPA and replenishment of the RSA is driven by outages and storm restoration costs.

General

2024 Projected

Revenues, operations and maintenance (O&M), capital and deferred expenditures reflect the 2024 actual values and forecast submitted through September 30, 2024.

Financing/Investing

Financing

Revenue bonds with net proceeds of \$460.0 million are included in the 2025 budget. The proceeds of these bonds are expected to be used for capital expenditures.

Average Earnings Rates on Funds

The average earnings rate used for all funds (including special purpose) for 2025 is 3.6% which is a decrease of 0.5% from the prior year's rate of 4.1%.

Energy Sales/Revenues

Load Forecast

The plan assumes a 12.5% increase in retail energy sales (MWh) and a 2.1% increase in the number of customers in 2025, as compared to the 2024 budget.

Assumptions

Generation and Purchased Power

Outages have been scheduled for the following base-load units in 2025:

1. Nebraska City Station Unit Number 2
2. North Omaha Station Units 4 & 5

Additionally, there are several shorter outages scheduled for other units. The purchased power budget includes generation supplied from 1,272 megawatts of wind capability, 80 megawatts of hydropower from the Western Area Power Administration, as well as 86 megawatts of solar capability.

Department Operations and Maintenance Budget

Department and division level budgets were proposed, and these plans were reviewed with the ELT for alignment with the strategic and operational objectives before submitting them in the 2025 Corporate Operating Plan for Board final approval.

Capital Budget Expenditures

The capital portfolio prioritization and allocation process continues to improve capital planning. The process enables better alignment with the strategic directives and provides more transparency of capital spending through improved project review and approval processes. The size of the capital budget continues to grow as the District undergoes system expansion to provide reliable electric service to a growing community.

Total 2025 Budget

The total 2025 Budget is \$2.3 billion.

OMAHA PUBLIC POWER DISTRICT

FINANCIAL STATEMENTS

Financial Statements

Income Statement

The District uses a 2.0 debt service coverage ratio as the basis of annual budgets, which is based on SD-3 Access to Credit Markets. It should be noted that OPPD does not set budgets or other forward-looking plans on the basis of net income. Net income for 2025 is budgeted to be \$203.1 million, which is \$41.7 million or 25.9% higher than the 2024 budget.

Major Factors Contributing to the Change in Budgeted Operating and Net Income:

Operating revenues are \$1,671.2 million, which is \$238.8 million or 16.7% higher than the 2024 budget. As the District anticipates load growth across all customer classes, retail revenues are expected to increase \$208.7 million or 17.0% from the 2024 budget. The increase in operating revenue was also impacted by higher wholesale revenue of \$25.6 million or 15.6%. The wholesale revenue increase is largely driven by higher congestion hedging revenue. The 2024 budget took a very conservative approach to congestion hedging revenues, leading to an increase in 2025 to more closely reflect actual performance.

Operations and maintenance expenses are \$1,149.9 million, which is \$128.8 million or 12.6% higher than the 2024 budget. Fuel and purchased power account for an increase of \$74.4 million, or 15.1%, when compared to 2024 budget. Other O&M increases are driven by costs and headcount growth associated with the District's strategic priorities as well as additional investment in vegetation management.

Other income is \$88.8 million, which is \$2.8 million or 3.2% higher than the 2024 budget amount due to largely offsetting impacts. Allowance for funds used during construction (AFUDC) is budgeted to increase by \$13.1 million due to a growing capital portfolio, offset by decreased interest income of \$11.9 million due to a lower earnings rate for funds on deposit.

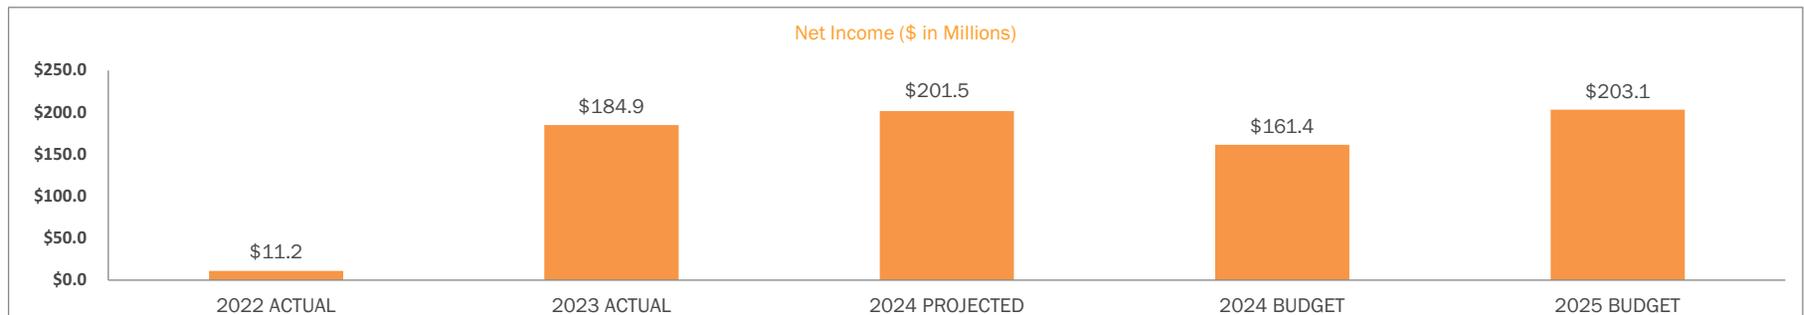

Interest expense is \$174.3 million in 2025 which is \$22.6 million or 14.9% higher than the 2024 budget due to additional planned debt issuances required to execute a large capital portfolio.

Coverage Ratios

The Total Debt Service Coverage ratio, which is the key metric viewed by credit rating agencies, is budgeted to be 2.00 times in 2025, as directed by SD-3 Access to Credit Markets.

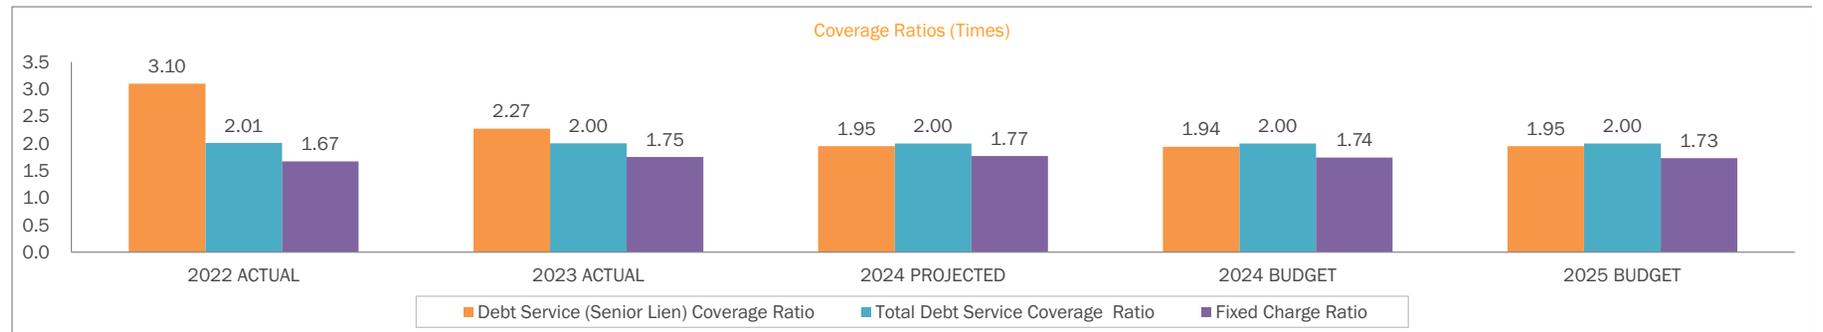

The Fixed Charge ratio is budgeted at 1.73 times in 2025, as compared to the budgeted 2024 value of 1.74 times.

The Senior Lien Debt Service Coverage ratio is budgeted to slightly increase to 1.95 compared to the 2024 metric of 1.94 times as increases in net receipts are offset by additional debt service requirements from additional borrowings. The additional debt issuances for senior lien revenue bonds are expected to be used to support a growing capital portfolio. Senior lien debt service requirements are expected to increase by \$36.2 million or 19.6% from the 2024 budget amount.

Financial Statements

Debt and Financing Data

Total senior lien revenue bonds outstanding at year-end 2025 are budgeted to equal \$3,480 million. The 2025 budget anticipates the issuance of approximately \$460.0 million of new senior lien revenue bonds and also includes senior lien revenue bond maturities and retirements of \$52.5 million.

The 2025 budget does not anticipate the issuance of new subordinated bonds as all will mature or be retired during 2024.

Total commercial paper outstanding at year-end 2025 is budgeted to remain at the 2024 level of \$250.0 million. The 2025 budget does anticipate the net impact of both an issuance and retirement of \$100.0 million in new commercial paper.

Total separate system (Nebraska City Unit 2 (NC2)) revenue bonds outstanding at year-end 2025 are budgeted to equal \$185.1 million. The 2025 budget does not anticipate the issuance of new NC2 revenue bonds but does have NC2 revenue bond maturities and retirements of \$4.4 million.

The total average interest rate on existing debt is budgeted at 4.45% at the end of 2025 and the debt to capitalization ratio is budgeted to be 65.6% for 2025.

Cash Flow Analysis

2025 Budget Compared to 2024 Budget

Cash Receipts

2025 cash receipts are budgeted to increase by \$221.5 million to \$1,714.3 million, a 14.8% change. This increase is primarily due to increased retail revenue from projected load growth and the general rate increase to customers.

Cash Disbursements

2025 cash disbursements are budgeted to increase by \$221.5 million to \$2,251.4 million, a 10.9% shift. Increases in cash disbursements relate to capital expenditures from a growing capital portfolio that also impacts increased debt service to support the capital portfolio. In addition, purchased power is expected to increase by \$66.6 million due to higher purchase volumes to support customer load growth.

The budgeted values of cash receipts and disbursements result in a year-end cash balance of \$688.3 million in 2025, a 30.1% or \$159.4 million increase over 2024 budget.

ENERGY SALES

Energy Sales

Electric Energy Sales & Electric Customers

Total electric energy sales are budgeted to be 18,878,664 MWh, which is 8.5% or 1,479,981 MWh more than the 2024 budget. Retail energy sales are budgeted to be 15,355,048 MWh, or 12.5%, greater when compared to 2024 budget. This increase is driven by load growth across all customer classes. Wholesale energy sales (including NC2 participation sales) are budgeted to decrease by 226,624 MWh or 6.0% from 2024 budget as volumes are expected to decrease due to load growth consuming owned generation and leaving less energy available to sell into the marketplace.

In 2025, the average number of retail customers is budgeted to increase by 8,762, a 2.1% increase from 2024 budget.

2025 CORPORATE OPERATING PLAN

Energy Sales

Operating Revenues

Total electric operating revenues for 2025 are budgeted to be \$1,671.2 million, which is \$238.8 million or 16.7% above the 2024 budgeted operating revenues. Retail revenues are \$208.7 million or 17.0% greater than 2024 budget due to load growth across all customer classes. Wholesale revenues are \$25.6 million or 15.6% higher when compared to the 2024 budget primarily due to increased congestion hedging revenue.

Energy Sales

Average Cents/kWh

The 2025 average price per kWh for retail customers is budgeted to be 9.46 cents. This is 0.39 cents, or a 4.3% increase, from the 2024 budget. A Cost-of-Service Study was performed to determine the cost of providing electric service to each rate class. The study was used as a baseline to determine the appropriate rate increase for each class. Individual customer impacts will vary based on their specific rate class and usage patterns.

AVERAGE CENTS/kWh

NET SYSTEM REQUIREMENTS

Net System Requirements

Net system requirements (total retail sales as shown on the next page) for 2025 are budgeted to be 16,096,875 MWh, an increase of 1,731,308 MWh or 12.1% from the 2024 budget. The major components of net system requirements are below by sales and supply components.

Total sales are budgeted to increase 1,479,981 MWh or 8.5% from the 2024 budget, an increase largely driven by retail sales with an increase of 1,706,605 or 12.5% when compared to the 2024 budget.

For supply components, firm/participation purchases are the largest change with a budgeted increase of 1,143,962 MWh or 27.5% from the 2024 budget due to Platteview Solar and Milligan Wind being in service for the entirety of 2025.

**OPERATIONS AND
MAINTENANCE
EXPENSE**

Operations and Maintenance Expense

The District's 2025 total budgeted O&M expense is \$1,149.9 million, which is \$128.8 million or 12.6% higher than the 2024 budget.

2025 Budget Compared to 2024 Budget

Purchased power, including wind purchases, represents 33.0% of total O&M expense and is budgeted at \$379.7 million. This represents an increase of \$67.2 million or 21.5% above the 2024 budget amount. The increase from the 2024 budget is primarily due to higher purchase volumes to serve anticipated customer load growth. As load growth outpaces owned generation, purchased power volumes are expected to increase.

Fuel expense is budgeted at \$187.4 million, an increase of \$7.3 million or 4.0% more than the 2024 budgeted amount primarily due to a full year of generation from Standing Bear Lake and Turtle Creek stations.

Transmission and distribution expense is budgeted at \$192.7 million, which is \$26.2 million or 15.7% more than the 2024 budgeted amount. The increase over the budget amount is attributable to additional external services, including tree trimming and cable locating, as well as increased headcount supporting growth at the utility.

Administrative and general expense is budgeted at \$178.9 million. This category reflects an increase of \$12.0 million or 7.2% more than the 2024 budget. The increase in 2025 is primarily related to rising costs associated with salary and benefits driven by both higher rates and an increase in the number of covered employees.

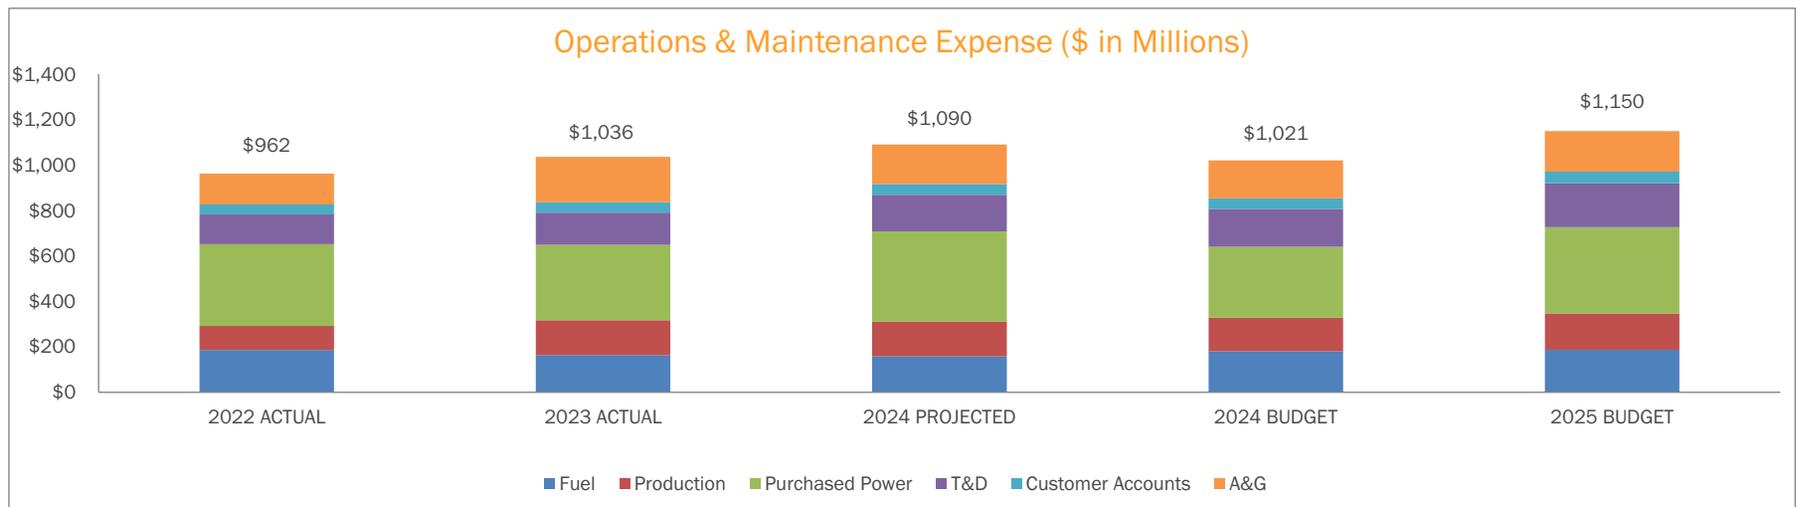

Production expense is budgeted to be \$159.7 million, which is \$12.0 million or 8.1% above the 2024 budgeted amount and is also impacted by a full year of operation at two new generating facilities, Standing Bear Lake and Turtle Creek as well as headcount growth.

Decommissioning expense represents the annual funding of the decommissioning liability. Decommissioning funding for 2025 is budgeted to be \$10.7 million, which is \$4.6 million or 30.1% less than the 2024 budget. Contributions to decommissioning represent investment earnings on balances in the decommissioning trust.

**CAPITAL
EXPENDITURE
PLAN**

Capital Expenditure Plan

Capital Expenditures

The 2025 capital budget was derived by breaking investments into three categories, sustain, enterprise priority and expand. This categorization ensures the District invests at appropriate levels to maintain existing assets but also invests in the continuing expansion of the utility.

Sustain - capital projects aimed at maintaining and improving existing assets

Expand - new assets, increasing the District's asset base

Enterprise Priority - projects directly related to Resource Adequacy, Technology Transformation, Next Generation Grid and the Master Facilities Plan

Capital expenditures represent 33.9% of the total 2025 budget. Capital expenditures are budgeted at \$788.0 million, which is \$61.0 million or 8.4% more than the 2024 budget.

The year over year growth is primarily related to investments in District expansion and enterprise priorities. Enterprise priority projects are budgeted at \$474.1 million, which is a \$70.6 million increase over the 2024 budget of \$403.5 million, primarily related to investments in new generation. Expand, which includes projects related to load growth and economic development, are budgeted at \$120.7 million, an increase of \$15.4 million from the 2024 budget. Partially offsetting the budget growth in expand and enterprise priority is a decrease in sustain assets, which have a 2025 budget of \$193.3 million, a decrease of \$24.9 million from the 2024 budget of \$218.2 million. While the District invests a larger percentage of the capital portfolio on enterprise priority and expand projects, the level of investment in sustain assets is decreasing but is still approximately \$7.4 million greater than the historical investment rate.

Transmission and Distribution is budgeted at \$338.6 million, a decrease of \$17.6 million or 4.9% from the 2024 budget. The decrease is largely due to 2024 budgeted investments in owned solar generation that did not materialize, partially offset by additional investment in enterprise priorities, particularly Resource Adequacy and Master Facilities Plan as the District builds out transmission and distribution infrastructure to support new generation and invests in improved facilities.

Production increased to \$330.6 million from the 2024 budget spend of \$261.3 million. The change of \$69.3 million or 26.5% is primarily related to the net impact of decreased spending on Power with Purpose projects as those units are expected to come online in 2024, offset by investments in new combustion turbines that is ramping up in 2025.

General for 2024 is budgeted to be \$118.8 million, which is \$9.2 million or 8.4% higher than the 2024 budget. The increase is the result of investment in Next Generation Grid as the District prepares to implement advanced metering infrastructure technology.

Board of Directors
Omaha Public Power District
444 South 16th Street Mall
Omaha, Nebraska 68102-2247

Ladies and Gentlemen:

As requested by the Board of Directors and Management of the Omaha Public Power District (the District), **The Brattle Group (Brattle)** is to review the *Preliminary 2025* Corporate Operating Plan prepared by the District for the upcoming year. This preliminary letter updates the Board members on our review status.

We have completed an initial review of the information available, including the Preliminary 2025 Corporate Operating Plan (2025 Corporate Operating Plan) prepared by the District and associated presentations. The District made those presentations over seven meetings, allowing Brattle to ask questions and have follow-up discussions in certain areas. The data and information we reviewed seem reasonable, and we have not encountered any issues or areas of concern.

As of the date of this letter, we have not completed our review of the *Final 2025* Corporate Operating Plan. When Brattle has completed its review of the *Final 2025* Corporate Operating Plan, we will forward our completed letter report to the Members of the Board.

We appreciate the opportunity to serve the District. If you have any questions concerning this preliminary review, we will gladly discuss them with you at your convenience.

Respectfully yours,

A handwritten signature in black ink, appearing to read "Philip Q Hanser".

Philip Q Hanser
The Brattle Group
Principal Emeritus

A handwritten signature in black ink, appearing to read "Sanem Sergici".

Sanem Sergici, Ph.D.
The Brattle Group
Principal

Board of Directors
Omaha Public Power District
444 South 16th Street Mall
Omaha, Nebraska 68102-2247

November 14, 2024

Ladies and Gentlemen:

I. Background

The Omaha Public Power District (“the District”) proposes an average general rate increase of 5.9 percent effective January 1, 2025. Consistent with its policy of aligning rates with costs, the proposed percentage increase in base rates varies among customer classes. In addition, the District proposes updating the fuel and purchase power adjustment (“FPPA”) factor, resulting in an increase from those revenues of 0.4 percent. The combination of the general rate increase and the increase of the FPPA factor results in an overall impact of increasing average rates by 6.3 percent.

II. Discussion

OPPD’s proposed increase of 6.3 percent is based on the District’s cost of service study (“COSS”). The primary purpose of a COSS is to allocate the costs of providing service to different customer classes based upon cost causation principles and the costs that each customer class imposes on the system. It aims to determine the portion attributable to each Rate Class under the principle of cost-causation. We have worked closely with the District on its COSS, including reviewing the methodology and associated spreadsheets.

The district is also proposing to increase the FPPA factor from the current \$0.00413/kWh to \$0.00457/kWh. This rate factor will be applicable to all rate classes except Rates 239 and 261M.

In addition to the rate increase, the proposed rates reduce the energy rate gap between each of the block rates, where applicable, in the non-summer months. For example, the difference in energy rates between the last and penultimate block for Rate 110 today is ¢0.56/kWh. The proposed rate reduces this gap to ¢0.11/kWh. This will allow a smoother transition to completely flattening of the block rates that is planned for in 2025.

III. Findings

We have reviewed the District’s proposed rate increase and the accompanying calculations. The District’s proposal ensures that the revenue requirement for each rate class is as close to cost-based as possible while ensuring that no class faces a rate shock, resulting in an acceptable balance between cost-reflectivity and bill stability for customers.

Furthermore, the proposal to shrink the gap between the non-summer block rates for 110, 115 and 230 is also reasonable. This decision to reduce the gaps between the different blocks also promotes gradualism in anticipation of the eventual elimination of block rates, scheduled to take place in the Fall of 2025. It will provide customers enough time to alter their usage in response to the modified block rates beginning January 2025 before the blocks are eliminated altogether following Summer 2025. The District has also confirmed that bill impacts at various usage levels as a result of the change in rate design are reasonable relative to the overall rate increase for the customer class. In summary, we find the proposed rate changes to be fair, reasonable and non-discriminatory.

IV. Recommendation

We recommend the Board adopt the proposed rate increases based on the COSS results, proposed rate adjustment methodology and the FPPA factor resetting.

Sincerely,

Dr. Sanem Sergici

OVERVIEW

INTRODUCTION AND DEFINITIONS

Introduction

Omaha Public Power District (OPPD) proudly provides affordable, reliable and environmentally sensitive energy services to Customers across a 13 county, 5,000 square mile service territory. Formed in 1946, OPPD is a public power utility and is governed by a publicly elected Board of Directors. The costs of providing service determines the Rates and Riders in this document.

These Service Regulations will guide both you and OPPD throughout your experience as a Customer, including the requirements of both OPPD to deliver and you to receive Electric Service. The OPPD Board of Directors has officially adopted these Service Regulations, and they may be revised, amended, superseded, or repealed at any time by the Board. Where applicable within these Service Regulations, reference will be made to additional OPPD documentation that provides more detailed requirements.

As a public power district in the State of Nebraska, OPPD has a defined Service Area and operates under applicable state laws, including the following:

Statutory Authority

Section 70-655, Revised Statutes of Nebraska, as amended, states that the Board of Directors of the Omaha Public Power District shall have the power and be required to fix, establish, and collect adequate rates, tolls, rents, and other charges for electrical energy and for any and all other commodities supplied by OPPD, which rates, tolls, rents, and charges shall be fair, reasonable, nondiscriminatory, and so adjusted as in a fair and equitable manner to confer upon and distribute among the users and Customers of commodities and services furnished or sold by OPPD for the benefits of successful and profitable operation and conduct of OPPD's business.

Section 70-1017, Reissue Revised Statutes of Nebraska, 1943, as amended, states any supplier of electricity at retail shall furnish service, upon application, to any applicant within the Service Area of such supplier if it is economically feasible to service and supply the applicant. This "obligation to serve" requires OPPD to make substantial investments in generation, transmission, distribution, and other property, facilities, and equipment, and the economic feasibility of such investments are based on the principle that the rates and other charges for Customers requesting such service will recover the cost of such investments and confer on OPPD and its customers the "benefits of a successful and profitable operation and conduct" of OPPD's business, as provided in Section 70-655. This "obligation to serve" also means that the Customer has an obligation to purchase and pay for service from OPPD, during the operation of the Customer's facilities within OPPD's service territory, so that OPPD may recover the cost of the investments made to provide Electric Service.

Using This Document

Customers have differing Electric Service requirements based on their usage. OPPD has several rate offerings varying in structure, price, and complexity available to Customers to meet their needs. This document provides the specific Board of Directors approved language for each of these Rates, Service Regulations, and Riders. Please note that capitalized terms used in the Service Regulations are defined in the Definitions section.

To make it easier to find information within this document, the three main sections of this document are described below.

- **SERVICE REGULATIONS**
This section informs the Customer of rules and regulations required to receive Electric Service from OPPD.
- **RATE SCHEDULES**
This section outlines the available rates that Customers may select for receiving service from OPPD based on their usage characteristics and equipment requirements. These Rate Schedules include the billing components that describe the rates, fees, and/or charges for Electric service received from OPPD. All Customers must be covered by one of these Rate Schedules per Point of Delivery.
- **RIDER SCHEDULES**
This section outlines all Rider Schedules applicable to Customers who receive service on an OPPD Rate Schedule. Riders can be elective or required based on Customer's Electric Service requirements and usage characteristics. Riders are additional fees, credits, or other charges where applicable to Customers based on the outlined criterion.

Understanding Billing Components

While there are multiple billing components, most rates have three primary billing components: Monthly Service Charge, Energy Charge, and Demand Charge. These components reflect the type of Electric Service provided to the Customer and are used to calculate a total electric bill. Not all rates have all three of these components and some rates have additional components based on their particular structure.

- **MONTHLY SERVICE CHARGE**
This charge is a fixed amount required for a Customer to receive Electric Service. This amount does not vary with the amount of energy used. As an example, the Monthly Service Charge includes items such as Customer service, metering, and the infrastructure that connects a Customer to the electric grid.
- **ENERGY CHARGE**
This charge varies based on the total amount of energy, measured in kilowatt-hours (kWh), used by a Customer over a particular time interval. As an example, this pays for items such as the fuel required to produce electricity and renewable energy purchases.
- **DEMAND CHARGE**
This charge is based on the highest amount of power, measured in kilowatts (kW), required by a Customer at any particular moment in time. This charge covers costs to maintain infrastructure, such as power plants and transmission lines, whose sizing must meet all of OPPD's Customers' maximum usage year-round. For rates without Demand Charges, the Energy Charge covers these costs.

Table of OPPD Rate Schedules and Applicable Rider Schedules

| Customer Categories | Rate Schedules (subject to applicability) | | Billing Components | | | | Rider Schedules (subject to applicability, requirements, or other charges) |
|---|--|---|--------------------|---------------|---------------|-------|---|
| | | | Service Charge | Energy Charge | Demand Charge | Other | |
| Residential Service | 110 | Residential Service | ● | ● | | | 355, 461, 480 , 483, 500 |
| | 115 | Residential Conservation Service | ● | ● | | | 355, 461, 480 , 483, 500 |
| Small General Service (Less Than 1,000 kW) | 226 | Irrigation Service | | ● | | ● | 355, 461, 483 |
| | 230 | General Service Non-Demand | ● | ● | | | 355, 461, 481 , 483, 500 |
| | 231 | General Service – Small Demand | ● | ● | ● | | 355, 461, 462, 464, 467 (E, H, L, V), 469, 469S, 481 , 483, 500 |
| Large General Service (More than 1,000 kW) | 232 | General Service – Large Demand | ● | ● | ● | | 355, 461, 462, 464, 467 (E, H, L, V), 469, 481 , 483, 484, 490 , 499 , 500 |
| | 245 | Large Power -- Contract | ● | ● | ● | | 355, 461, 464, 467 (E, H, L, V), 469, 483, 484, 490 , 499 , 500 |
| | 250 | Large Power | ● | ● | ● | | 355, 461, 464, 467 (E, H, L, V), 469, 483, 484, 490 , 499 , 500 |
| Very Large General Service (Transmission Interconnected) | 261M | Large Power – High Voltage Transmission Level market Energy | ● | ● | ● | ● | 355, 464, 467 (E, H, L, V), 483, 500 |
| Lighting Service | 236 | Private Outdoor Lighting | | | | ● | 461 |
| | 350 | Municipal Service – Street Lighting | | | | ● | 461 |
| | 351 | Municipal Service – Traffic Signals and signs | | ● | | ● | 461 |
| Municipal Service | 357 | Municipal Service | ● | ● | ● | | 355, 461, 484 |

Other relates to specific charges related to specific applications such as irrigation and lighting.

DEFINITIONS

| | |
|-----------------------------------|--|
| Auxiliary Generating Unit | A Customer operated generating unit that is used only to provide standby power to replace power normally supplied by a Primary Generating Unit. |
| Billing Demand | Demand as calculated in the Determination of Demand section and applied to the bill of a Customer who takes service under OPPD's Demand Rate Schedules. |
| Cogeneration | Concurrent production of electric energy and thermal energy used for heating or cooling purposes. |
| Curtailable Load | A Customer's Load contracted to be reduced during periods identified by OPPD. |
| Curtailable Customer | A Customer who has contracted to curtail Load according to the provisions of Rate Schedules 467, 467E, 467H, 467L or 467V. |
| Customer | Any person, partnership, association, firm, corporation (public or private), limited liability company, governmental agency, or other entity taking service from OPPD at a specific location, whether the service at that address is in their name or some other name. |
| Customer Owned Generation (COG) | Distributed Generation (DG) not owned and operated by a Nebraska electric utility, but typically owned and operated by a Customer of the utility. |
| Demand | The instantaneous rate at which energy is delivered to an electrical Load and measured in either kilowatts (kW) or kilovolts-amperes (kVA). |
| Demand Meter | The device(s) and any auxiliary equipment, including Demand registers, required to measure the Electric Service or to measure the 15-minute period of highest electrical energy consumption supplied by OPPD to a Customer at a Point of Delivery. |
| Demand Response (DR) | Customer adjustment or control of their electrical Load in response to a signal from the electric utility. Customers with DR capability are typically voluntary participants in special utility DR rate programs. |
| Demand Side Management (DSM) | See Load Management. |
| Distributed Energy Resource (DER) | Includes Distributed Generation (DG) and may generally include Load Management and Demand Response technologies. |
| Distributed Generation (DG) | Electric generation and/or Energy Storage technologies, generally characterized as 'distributed' in nature and interconnected to a utility distribution system at or near Customer Loads. DG may consist of one or more generators or resources. Energy sources used by DG to generate electricity may be from renewable or non-renewable sources. |
| Electric Service | The service by which OPPD supplies power to a Customer's Point of Delivery, either by overhead or underground wires. |

| | |
|---------------------------|--|
| Emergency Generating Unit | A Customer-operated generating unit that is normally only used during an outage of the Electric Service from OPPD, for testing, or during curtailment by a Curtailable Customer. |
| Energy Storage | Technologies, including but not limited to battery storage, capable of controlled charging and discharging of electrical or other forms of energy, which may be applied in a number of ways to interact with an electrical system. |
| Federal Holidays | An authorized holiday recognized by the United States government. |
| NERC Holidays | North American Electric Reliability Corporation (NERC) defined holidays which include New Year's Day, Memorial Day, Independence Day, Labor Day, Thanksgiving Day, and Christmas Day. |
| General Service | Service to any Customer for purposes other than those included in the applicability provisions of the Residential Rate Schedules. |
| Load | Devices or appliances which consume electrical energy to power electronics or to produce light, heat, cooling, sound, motion/mechanical energy or other intended outcomes. Load can also refer to the cumulative electric energy consumed at any given point in time by a group of such devices or appliances. |
| Load Management | The process of adjusting or controlling a Customer's electrical Load to assist a utility in achieving a balance between its Customers' Demands and its electrical energy, as opposed to adjusting power station output to match the varying requirements of Customer Load. Also referred to as Demand Side Management (DSM). |
| Meter | The device(s) and any auxiliary equipment required to measure the Electric Service supplied by OPPD to a Customer at a Point of Delivery. |
| Owner | The person(s) having Ownership of the Premises or acting as an agent for the Owner. |
| Point of Delivery | The physical location at which OPPD supplies Electric Service to a Customer and which, unless otherwise agreed upon between OPPD and the Customer, shall be the point where OPPD's Service Wires are joined to the Customer's service terminals. |
| Power Factor | The ratio obtained by dividing the Customer's maximum kilowatt Demand by the Customer's maximum kilovolt-ampere Demand. |
| Premises | Building or tract of land identified in a deed stating the details of the conveyance of the property. For OPPD, the Premises details the location of building or tract of land at which Electric Service is supplied by OPPD. |
| Primary Generating Unit | A Customer-operated generating unit used to supply electrical Load within the Customer's facility, which operates in parallel to OPPD's system, and is not an Emergency Generating Unit. |

| | |
|---|--|
| Primary Service | Single-Phase or three Three-phase service taken from OPPD's system at a standard available voltage above 11,000 volts, provided there is only one transformation involved from OPPD's transmission voltage (above 60,000 volts) to the service voltage. |
| Qualified Generator | Generators that qualify for net metering as set forth in the Nebraska Revised Statutes. Qualified Generators are interconnected, in accordance with an interconnection agreement, behind a Customer's service Meter located on the Customer's Premise with an aggregate nameplate capacity of 100 kW or less that uses as its energy source: methane, wind, solar, biomass, hydropower, or geothermal and is controlled by the generation owner. |
| Rate Schedule | Outlines the rate(s), fees, and charges for, or in connection with, Electric service received from OPPD. |
| Residential | House, trailer, apartment, flat or unit of a multi-family dwelling that is equipped with cooking facilities. Electric Service for one single-family dwelling may be served on a Residential Service Rate Schedule. |
| Rider Schedule | Outlines the rate(s), fees and charges used in conjunction with the Customer's electrical Rate Schedule. Rider Schedules can be optional or required based on Electric Service requirements. |
| Schedule | Rates, charges and other provisions under which service is supplied. |
| Seasonal Energy Efficiency Ratio (SEER) | The total cooling of a central air conditioner or heat pump in British thermal units (Btu) during its normal annual usage period for cooling divided by the total electric energy input in wathours during the same period as rated by the American Refrigeration Institute (ARI) Guide. |
| Secondary Service | Single-Phase or three Three-pPhase service taken from OPPD's system at a standard available voltage below 11,000 volts, provided the conditions defined under "Primary Service" are not applicable. |
| Service Area | The geographic area in which OPPD provides Electric Service. |
| Service Wires | The wires, owned by OPPD, connecting OPPD's distribution system to a Customer's service terminals. |
| Small Power Production | A facility with less than 80,000 kilowatts of installed capacity that produces electricity from such primary energy sources as biomass, waste, or renewable resources including wind, solar, geothermal, and hydroelectric energy. |
| Standby Service | Service to supply electrical energy to serve a Customer's Load that is usually served by the Customer's generating unit. |

SERVICE REGULATIONS

STARTING SERVICE

Application for Service

An applicant may make a written, verbal, or electronic application to OPPD for service(s) and will be required to provide the following information:

- Social security number, or
- Federal tax identification number

If the social security or federal tax identification numbers are unavailable, a birthdate in combination with verifiable, government-issued identification can be used.

OPPD may require proof of occupancy before application of service; additionally, the Customer may be required to pay a billed or unbilled debt, identified by OPPD as the applicant's responsibility, before the establishment of service.

OPPD relies upon the fact that the applicant is authorized to make the application, is acting in good faith, and is providing valid and accurate information. An applicant who fails to comply with this section may be denied service.

Upon application for service at a Premises, the Customer will be charged an activation fee. This fee will be included in the next monthly bill.

Account Security

OPPD may require the Customer to maintain a cash deposit or other form of account security acceptable to OPPD that is deemed adequate by OPPD to secure payment of an account or accounts for Electric Service and related services.

Application for Rate Schedules

When a Customer applies for service, they must indicate the Rate Schedule for which they are applying. A Customer must remain on the same OPPD Rate Schedule for a minimum of twelve (12) consecutive months before service can be received under another OPPD Rate Schedule at a specific Premises. After the twelve (12) consecutive months, the Rate Schedule will remain in effect until the Customer requests service under another Rate Schedule. If the Customer notifies OPPD of a change in their appliances, equipment, or usage, which would permit the application of another Rate Schedule, the Rate Schedule under which service is currently supplied may be changed within the twelve (12) months to meet the Customer's modified conditions.

If a Customer is eligible to take Electric Service from OPPD under one or more applicable Rate Schedules, the Customer is responsible for the selection of their Rate Schedule, and it will not be applied retroactively. Any new Rate Schedule will become effective after the next Meter reading cycle.

OPPD will furnish a Customer, at their request and without charge, all reasonable information and assistance in choosing the most advantageous Rate Schedule. The Customer may opt for a new Rate Schedule, contingent upon OPPD approval, if significant changes in the Customer's Load conditions or equipment occur.

The following Rate and Rider Schedules are subject to the Customer's selection:

- Rate Schedules Nos. 115, 231, 232, 245, 250, and 261M
- Rider Schedules Nos. 355, ~~467, 467E, 467L, 467V~~, 469, 469S, ~~480, 481~~, 483, 484, ~~490, 499~~, and 500

The service supplied under the Rate Schedules is made subject to the provisions and specifications contained in the Service Regulations.

These Service Regulations shall apply to all services supplied by OPPD.

SERVICE CONTRACT

OPPD will supply Electric Service to a Customer under the terms and conditions of the applicable Rate Schedule(s) and Service Regulations. OPPD, at its discretion, may also require an individual service contract for a Customer's Electric Service. By accepting Electric Service from OPPD, the Customer agrees to comply with OPPD's Rate Schedule(s) and Service Regulations.

Unlawful Use of Service

For diversion of service as defined in Nebraska statutes, OPPD may pursue any or all civil or criminal statutory or common law remedies.

Tampering with, bypassing, altering, damaging, misusing or interfering with OPPD's Meter installation or its proper functioning will result in disconnection of service and prosecution under applicable laws. The Customer, at the applicable rate, will be liable for energy not recorded on the Meter, plus all expenses incurred by OPPD as a result of the unauthorized act(s).

Refusal of Service

OPPD may decline to service an applicant or Customer and disconnect services in certain situations such as:

- Failure to comply with these Service Regulations and/or with any applicable governmental regulations
- Installation is known to be hazardous or of such character that satisfactory service cannot be provided
- Refusal to meet account security requirements
- Presented fraudulent documentation or information to establish an account
- OPPD has discovered Meter tampering, theft or diversion of service
- The applicant has applied for service at a Premises where the previous Customer received service and is indebted to OPPD and:
 - The new application for service is made to assist the previous Customer evading or avoiding payment for the indebtedness or
 - The previous Customer no longer occupies the Premises, but the applicant is found to have occupied the Premises and benefitted from service prior to the date of application and has refused to pay charges incurred during such occupancy

CONDITIONS OF SERVICE

Easements and Right Of Way

Customer, without expense to OPPD, will make or procure the necessary easements, satisfactory to OPPD, for OPPD's lines, routes or extensions and all the equipment required to provide service to the Customer.

Tree Trimming

Customers shall permit OPPD to remove or trim trees and other vegetation, including the removal of limbs, to the extent that trimming is reasonably necessary to prevent interference with OPPD's transmission and distribution power lines and other electric equipment or to protect the safety of the Customer, the general public, or OPPD's property. Any trimming of trees and vegetation on the Customer's Premises that interfere with OPPD's Service Wires shall be the responsibility of the Customer and enforceable by OPPD as provided by law.

OPPD and Customer Roles and Responsibilities

OPPD will designate a point on the Customer's Premises where service will be delivered. Customer will provide and maintain adequate support and protection for attachment of OPPD's overhead or underground Service Wires on their Premises and will be responsible for any damages caused by the failure of or defect in such support or protection.

The Customer shall furnish if requested, suitable space on the Customer's Premises for OPPD's transformer equipment, as well as switching and capacitor equipment.

OPPD will furnish metering equipment required to measure the service supplied and will keep said equipment accurate within reasonable limits. The Customer will provide, without cost to OPPD, adequate space in a suitable location for OPPD's metering equipment.

Customer will secure all necessary permits for wiring on the Customer's Premises, will install such wiring in compliance with the National Electrical Code and all applicable laws, regulations, and ordinances, and will pay all inspection fees. OPPD will not be responsible for inspection of wiring on the Customer's Premises but reserves the right to require inspection before connecting service. OPPD may postpone the actual construction of its facilities to a Customer until Customer's wiring has been approved by the proper inspection authorities, has met OPPD's requirements, and is ready for connection to OPPD's system.

Unless otherwise agreed in writing, OPPD will retain title to all property installed or supplied by OPPD on a Customer's Premises and said property may be removed by OPPD at any time. The Customer will safeguard and provide adequate protection for OPPD's property (including poles, transformers and metering equipment) located on Customer's Premises and will maintain clear and safe access at all reasonable times. The Customer must keep the area around OPPD's equipment free of obstacles to facilitate OPPD operations and maintenance. This cleared area is to extend at least three (3) feet from each piece of equipment unless otherwise noted on the individual

component.

Redundant Service

Customers taking Electric Service under any of OPPD's Rate Schedules will not receive redundant Electric Service at the Point of Delivery unless they are applicable and choose to take service under Rider Schedule No. 484 – Supplemental Distribution Capacity Rider.

Power Factor Equipment

OPPD reserves the right to measure the Customer's Power Factor. If the resulting measurement is less than the ratio specified in the Customer's applicable Rate Schedule, OPPD may require the Customer to provide facilities for OPPD to install kilovolt ampere metering. OPPD may increase the Customer's kilowatt Demand for billing purposes under the Customer's applicable Rate Schedule.

Customers with equipment or facilities having inherently low Power Factor characteristics should consider installing additional equipment to improve the Power Factor to avoid an increase in their bills and minimize losses on their electrical system.

Electrical Problems Caused by the Customer

The electricity usage or equipment operations of any Customer shall not cause electrical disturbances or problems for other Customers. Disturbances or problems include but are not limited to: steady-state voltage excursions beyond recognized limits (the latest revision of ANSI C84.1), transient disturbances, magnetic field interference, stray current/voltage, radio frequency interference, and Customer-generated harmonics exceeding recognized limits (the latest revision of IEEE 519). It is the Customer's responsibility to take corrective action to comply with all applicable standards or pay the costs incurred by OPPD to take appropriate corrective action as a result of an electrical disturbance or problem. Failure, inability or refusal to remedy or rectify OPPD's concerns to conform to such limits, within a commercially reasonable amount of time, may result in disconnection of service.

OPPD Responsibility

OPPD will supply Electric Service consistent with prudent utility practice and will endeavor to provide, but does not guarantee, uninterrupted service and is not responsible for any loss or damages sustained by a Customer as a result of outages on the system, including but not limited to service disruptions that are caused, contributed to, or exacerbated by:

- Weather
- Repairs or maintenance
- Alterations
- Unavailability of supply
- Conditions of Customer's Premises are dangerous to persons, property, or service to others
- Nonpayment by the Customer for amounts due
- Customer's failure to provide means of access for obtaining regularly scheduled readings of the Meter or for testing OPPD's equipment
- Customer's failure to protect OPPD's equipment from theft, abuse, or vandalism
- OPPD's actions to prevent fraud or abuse of OPPD property

- Outages caused by third parties or animal interference

[Return to Table of Contents](#)

Customer waives claim for, and hereby releases and discharges OPPD from claims for, and shall indemnify and save harmless OPPD from, any and all loss and damage arising from an interruption of service, including loss or damage caused by the negligence of OPPD. Customer further waives claim for, and hereby releases and discharges OPPD from claims for, and shall indemnify and save harmless OPPD from, any and all loss and damage arising from or on account of injury to persons (including death), or damage to property on the Premises of a Customer or under a Customer's control, unless such loss, damage, or injury is the natural, probable and reasonably foreseeable consequence of OPPD's negligence, and such negligence is the sole and proximate cause thereof.

Charge for Service

When a Customer applies for service which necessitates an extension of OPPD's electric facilities to serve the Customer, OPPD reserves the right to collect from the Customer, in advance, part or all of the cost of such extension when:

- The anticipated revenue to OPPD is not in proportion with the cost of such extension
- The extension is required because of abnormal operating characteristics of the equipment to be operated by the Customer
- The extension is required for emergency or special services
- The extension is not the least cost means of providing such services

A charge will occur for each temporary overhead or underground single-phase service connection, consisting of Service Wires and a Meter. When more than Service Wires and a Meter are required, the Customer will pay for the work done by OPPD on a contract basis.

Charge for Re-Establishing Service

The charge for service and the reconnection charge required by OPPD's Service Regulations will not apply to the re-establishment of service after the destruction of the Customer's Premises resulting from explosion, fire, flood or storm. In such cases, the equivalent service will be re-established at the Customer's option at a temporary or permanent location. If the damaged Premises are repaired within a reasonable time, not to exceed two years, the charges defined will not apply when the Customer moves back to the Customer's original location.

Transfer of Service

Contracts or service with OPPD will not be assignable or transferable by the Customer without the written consent of OPPD.

RESALE, REDISTRIBUTION, OR EXTENSION OF ELECTRIC SERVICE

The resale, redistribution or extension of Electric Service will not be allowed in OPPD's service territory except under conditions identified in these Service Regulations.

The redistribution of electricity by a Customer from electric vehicle charging, truck stop, campground, or other similar plug-in power equipment will not be considered the resale of electricity as long as the charge for the plug-in service is not sold on a metered kilowatt-hour or kilowatt basis. The Customer is not prohibited from recovering the cost of the electric vehicle charging equipment or plug-in power equipment and related infrastructure.

If the Customer is qualified to redistribute electricity to individual tenants, the Customer must ensure that the total electricity revenue recovered is no more than the total cost of electricity as billed by OPPD to the Customer.

This regulation does not apply to municipalities purchasing wholesale energy under power contracts.

TRANSFER OF DEMAND

Historical actual Demand will remain in effect on accounts where a rate change has been executed. All aspects of the new rate will be applied using the historical actual Demand data.

Historical actual Demand will remain in effect on accounts where a name change has been requested, and the Customer's tax identification number remains the same.

COMBINED RESIDENTIAL AND GENERAL SERVICE

A Customer in a single-family dwelling, parts of which are used for business purposes, may purchase service under a Residential Rate Schedule when the floor area of the part used for General Service purposes does not exceed 25% of the combined Residential and General Service floor area.

EXCEPTIONS TO "ALL SERVICE" REQUIREMENTS

Customers with a Rate Schedule that requires one Meter for all the Customer's services may maintain separate Meters in the following situations:

- When a Customer is required by law to provide separate wiring circuits for emergency lighting service, sprinklers or alarm systems, and this separate service cannot feasibly be metered with the remainder of the Customer's service
- When a Customer operates X-ray, welder or other equipment producing abnormal voltage fluctuations or other power quality issues, OPPD may require metering that equipment separately.
- When a Customer occupies two (2) or more spaces within the same building, where these spaces are separated by firewalls or intervening spaces, or are on different floors, and are not interconnected by private doors, passages, or stairways, separate Meters, as allowed by law, may be used for each space.

In each of the above cases, the separately metered special service shall be billed under an

applicable Rate Schedule.

DISTRIBUTED ENERGY RESOURCE (DER) / DISTRIBUTED GENERATION (DG)

To ensure the safety of OPPD personnel and the public, and to protect the service of other Customers, a Customer who operates their own electric generating equipment and/or Energy Storage system is required to comply with all OPPD safety, metering, interconnection, and operation requirements. No connection will be made between generation and/or Energy Storage equipment and the service lines of OPPD without specific inspection and approval by OPPD. Any unapproved installation shall be grounds for immediate disconnection of OPPD's service.

OPPD will make its requirements for DER/DG compliance available upon request. OPPD requirements for compliant DER/DG interconnections are subject to change by OPPD.

Energy Storage systems can be applied and utilized by a Customer in a variety of ways. Depending upon how Energy Storage systems are installed and operated by a Customer, OPPD may interpret and consider Customer Energy Storage systems to be equivalent to generating units, or equivalent to other OPPD regulated equipment or activities, for all purposes in the application of OPPD Service Regulations. OPPD will also consider the operation of Energy Storage and the originating source of energy stored in determining Customer eligibility (or ineligibility) to participate in various OPPD rate programs.

Unless otherwise specified in the applicable Rate Schedule, the Customer will provide or reimburse OPPD for necessary grid or service modifications for the interconnection of generation or Energy Storage.

A Customer's failure to notify OPPD of the operations of units within the Customer's facility that meet the conditions of Rider Schedule No. 464 will result in:

- Application of the Excess Demand Charge as specified in Rider Schedule No. 464 to the combined nameplate rating of the units and,
- Retroactive billing of the Excess Demand Charge for the entire period such units were in operation.

METERING

Metering equipment must be located on the exterior of new and rewired construction. OPPD may grant exceptions under certain circumstances.

Separate Billing for Each Meter

When a Customer requests OPPD to supply service to their Premises at more than one Point of Delivery, the service measured by the Meter at each Point of Delivery will be considered a separate service, and Meter readings will not be combined for billing purposes.

When it is impractical, uneconomical, or undesirable to a Customer to accept the standard OPPD single Point of Delivery service, then at the option of OPPD, multiple service(s) may be allowed. The Customer is required to compensate OPPD for the additional construction cost.

Master Metering

Master metering is one Meter that measures consumption to more than one Premise and meets each of the following criteria:

- The Customer is responsible for the installation and maintenance of all distribution equipment required to serve the facility on the Customer's side of the master Meter
- Premises must be owned by the same person or entity. If commercial or industrial, the business must operate as one integral unit under the same name
- Services must be "single building" or "adjacent buildings"
- Service must feed all buildings at the same voltage

A "single building," as used in this regulation, refers to a freestanding facility. Buildings that are connected by a walkway that includes space used for offices or other retail service facilities are considered a single building. Buildings connected by walkways for pedestrian traffic only are not considered part of a single building.

"Adjacent buildings," as used in this regulation, includes directly adjoining buildings or buildings directly across a street, alley or other public way, but does not include buildings separated from the Customer's places of business by intervening structures. The adjacent buildings must be used to carry on parts of the same commercial or industrial business, and the business must operate as one integral unit under the same name. All such service is to be used by the Customer and served through one Meter.

The Customer will also be billed on the appropriate General Service Rate Schedule.

Totalization of Meters

For Commercial and Industrial Customers who have multiple electrical Points of Delivery serving the Customer's facility, a Meter will be installed at each Point of Delivery. Totalizing across Meters to a Customer's facility to calculate the Customer's service costs will be allowed if the Customer's service design meets the following criteria:

- Customers requesting the totalizing of their Loads at multiple Points of Delivery must have the same Federal Tax ID #
- Service must be three-phase
- Service must serve building(s) at the same voltage
- Service must be a single building, or buildings that are directly next to each other on the same side of the street, with no other structures between them.

"Totalized" metering, as used in this regulation, involves the interconnection of all Customer Point-of-Delivery Meters through wiring, electronic communication, or merging of Meter readings in software to effectively create one metering system and one combined Customer account for billing purposes. The resulting metering system would read consumption, simultaneous peak Demand, and other characteristics for all Points of Delivery as a combined whole.

Customers who totalize their Load will be required to pay for the installed costs of the second service. For additional information regarding the totalization of individual Meters, please contact OPPD's Customer Service Department.

Unmetered Service

Unmetered service is supplied only under the Rate Schedules providing municipal service for street lighting, traffic signals and signs, and private outdoor lighting.

Exceptions:

- *Emergency Sirens:* At OPPD's discretion, unmetered service may be supplied to governmental agencies for emergency sirens. The Customer will be billed monthly for the minimum charge under the applicable General Service Rate Schedules.
- *Other:* At OPPD's discretion, where the installation of metering equipment is impractical or uneconomical, and with the agreement of the Customer, unmetered service may be provided to Customers with fixed, permanently installed Loads. The monthly bills will be computed based on estimated kilowatt-hour use.

BILLING

Billing and Meter Reading

OPPD will normally read the Customer's Meter monthly. Bills will be generated using the applicable Rate Schedule at approximately one-month intervals based on the actual or estimated Meter reading. For all Customer's, the monthly billing period will usually be between 25 and 35 days. First and final bills for a service location or bills with less than 25 days or greater than 35 days will be prorated to reflect the number of days in that billing period.

When OPPD does not read the Meter, OPPD will issue an estimated bill. The Customer may be contacted to arrange a time for OPPD to read their Meter if there have been three (3) consecutive months of estimated Meter readings. All Meters will be read at least once every twelve (12) months.

Taxes

OPPD is required to collect and remit sales tax per applicable law. The total of all charges for service under the Rate Schedules will include applicable existing state and municipal taxes, any new or additional taxes, or increases in the rates of existing taxes.

Billing Terms and Conditions

The Customer's bill payment must be received on or before the due date designated on the bill or a late payment charge will be assessed. The late payment charge will be calculated as 4% of the billing components and any applicable taxes. Failure to receive a bill does not entitle the Customer to have the late payment charge waived. If a Customer's account becomes delinquent, the Customer is subject to OPPD's disconnection of service process, based on Nebraska Revised Statute 70-1605 or its successor, and all applicable fees; outlined in Rate Schedule No. 470 - General - Customer Service Charges.

OPPD has the right to transfer any delinquent bill balance to any other Premises or OPPD account for which the Customer is or becomes responsible in any manner, or any other Premises or OPPD account at or from which the Customer receives Electric Service. If a balance due for service at any previous address of a Customer is not paid within 15 days after ending service at such address, the balance will become delinquent, and service at the current address covered by the account may be disconnected.

Service disconnected for delinquency will not be reconnected until all delinquent charges are paid or, at the discretion of OPPD, acceptable payment or account security arrangements are made.

Customer Disconnect and Reconnect at a given Premises within a 12-Month Period

In the event a Customer's service has been disconnected and has been reconnected within twelve (12) months of the service termination, the Customer will be charged the minimum monthly charge for the preceding twelve (12) months, or any part thereof.

Owner/Landlord Responsibilities

The Owner will be responsible for interim service at Premises when the Owner fails to disconnect utility service between tenancies. OPPD will bill the Owner for any unbilled usage. If the Owner wants the Electric Service disconnected automatically in the event an occupant or tenant terminates the Electric Service, the Owner must complete a Service Disconnection Form or a Landlord Contract Form and file it with OPPD.

Billing and Payment Options

Payment Options: Please see OPPD.com for billing and payment options. OPPD will accept bank card payments for several Rate Schedules. OPPD will not accept bank card payments for Customers on General Service Rate Schedules other than No. 226 and 230.

Level Payment: OPPD's Level Payment Plan will be made available to Customers receiving service on Rate Schedules Nos. 110, 115, 230 and 231 who have an acceptable payment history with the OPPD. The Customer must comply with the conditions of the regular Rate Schedule and any applicable rate riders. Customers served under Rate Schedules Nos. 230 and 231 are required to be an OPPD Customer for at least one year to qualify.

OPPD does not pay interest on Level Payment Plan accounts with credit balances. For Customers on OPPD's Level Payment Plan, the Late Payment Charge will be calculated as 4% of the current month's level payment amount.

Determination of Billing Non-Demand or Demand

OPPD will utilize information provided by the Customer or obtained from the Customer's usage history or Meter to determine whether a Customer will be billed on a non-Demand or a Demand Rate Schedule. If Demand history is available for Customers moving from a non-Demand Rate Schedule to a Demand Rate Schedule, this Demand history will be used in determining the Customer's Billing Demand for future billing periods. If the Customer provides to OPPD, in writing, information that shows permanent changes in the type of electrical service required, at OPPD's discretion, the Customer may be moved to a non-Demand Rate Schedule for future billings.

Billing Adjustments

OPPD makes reasonable efforts to bill all utility accounts accurately. If errors occur, the error may result in over- or under-billing a Customer's account. Upon discovery of such an error, OPPD will begin the process of either billing the Customer for undercharges or crediting the Customer's account for overcharges, without interest. OPPD will back-bill a Customer or credit a Customer's account for no more than a four ~~(4)~~-year period.

OPPD will not adjust inaccurate Customer billing resulting from mislabeled Meter sockets or cross-wiring to a service within the building's electrical system. At OPPD's discretion, administrative costs associated with mislabeled Meter sockets or cross-wiring to a service may be charged to the Premises Owner.

RATE SCHEDULES

RATE SCHEDULE NO. 110

Standard Residential Service

APPLICABILITY

This Rate Schedule is applicable to all Customers throughout OPPD’s Service Area who meet the criteria to be a Residential Customer as defined in the Service Regulations.

Customers taking Electric Service as single-phase alternating current will be supplied at OPPD’s standard voltages of 240 volts or less, for Residential uses, when ~~a~~All-Electric Service furnished under this Schedule is measured by one Meter unless otherwise specified in the Service Regulations. Not applicable to shared or resale service.

BILLING COMPONENTS

Monthly Service Charge: \$30.00 per month

Energy Charge:

| <u>Energy Usage</u> | <u>Summer (June 1 – Sept. 30)</u> | <u>Non-Summer (Oct. 1 – May 31)</u> |
|---------------------|---|---------------------------------------|
| 0 -- 100 kWh | 10.48 <u>10.95</u> cents/kWh | 8.63 <u>9.55</u> cents/kWh |
| 101 -- 1,000 kWh | 10.48 <u>10.95</u> cents/kWh | 7.46 <u>8.85</u> cents/kWh |
| 1,001+ kWh | 10.48 <u>10.95</u> cents/kWh | 6.90 <u>8.74</u> cents/kWh |

A credit of \$2.07 per month will be applied to summer monthly kWh consumption of more than 100 kWh and less than 401 kWh.

Rider Schedule No. 461 – Fuel and Purchased Power Adjustment applies to this Rate Schedule.

Minimum Monthly Bill: \$32.07

The minimum monthly bill is calculated as the monthly service charge and the summer energy credit. Any energy usage by the Customer during a billing period is charged in addition to the minimum bill.

Late Payment Charge:

A Late Payment Charge in the amount of 4% of the Billing Components and applicable taxes will be assessed if the current month’s bill payment is not received by OPPD on or before the due date. For Customers on OPPD’s Level Payment Plan, the Late Payment Charge will be calculated as 4% of the current level payment amount.

ADMINISTRATIVE

Service Regulations

Customers under this Rate Schedule must comply with all OPPD Service Regulations.

RATE SCHEDULE NO. 115

Residential Conservation Service

APPLICABILITY

This Rate Schedule is applicable to all Customers throughout OPPD’s Service Area who meet the criteria to be a Residential Customer as defined in the Service Regulations. To qualify for this Rate Schedule, the Customer must meet each of the following:

- Have an electric heat pump in operation that has a Seasonal Energy Efficiency Rating of 14 or higher, with the heat pump installation passing ~~the~~ OPPD’s size and efficiency tests, and
- Supply at least 50% of the space-conditioning requirements using the electric heat pump.

Customers taking Electric Service as single-phase alternating current will be supplied at OPPD’s standard voltages of 240 volts or less, for Residential uses, when ~~a~~All-Electric Service furnished under this Rate Schedule is measured by one Meter unless otherwise specified in the Service Regulations. Not applicable to shared or resale service.

BILLING COMPONENTS

Monthly Service Charge: \$30.00 per month plus,

Energy Charge:

| <u>Energy Usage</u> | <u>Summer (June 1 – Sept. 30)</u> | <u>Non-Summer (Oct. 1 – May 31)</u> |
|---------------------|-----------------------------------|-------------------------------------|
| 0 - 100 kWh | 9.369.61 cents/kWh | 9.029.50 cents/kWh |
| 101 - 880 kWh | 9.369.61 cents/kWh | 7.858.80 cents/kWh |
| 881+ kWh | 9.369.61 cents/kWh | 5.687.11 cents/kWh |

A credit of \$2.07 per month will be applied to summer monthly kWh consumption of more than 100 kWh and less than 401 kWh.

Rider Schedule No. 461 – Fuel and Purchased Power Adjustment applies to this Rate Schedule.

Minimum Monthly Bill: \$32.07

The minimum monthly bill is calculated as the monthly service charge and the summer energy credit. Any energy usage by the Customer during a billing period is charged in addition to the minimum bill.

Late Payment Charge:

A Late Payment Charge in the amount of 4% of the Billing Components and applicable taxes will be assessed if the current month’s bill payment is not received by OPPD on or before the due date. For Customers on OPPD’s Level Payment Plan, the Late Payment Charge will be calculated as 4% of the current level payment amount.

ADMINISTRATIVE

Schedule Period

This Rate Schedule will be available for a minimum of five (5) years. Availability beyond five (5) years will continue until the termination of the heat pump program and the last Customer to qualify for this Rate Schedule completes the minimum five (5) year availability.

Service Regulations

Customers under this Rate Schedule must comply with all OPPD Service Regulations.

RATE SCHEDULE NO. 226

Irrigation Service

APPLICABILITY

This Rate Schedule is applicable to Owners of farms, or renters with the Owner’s guarantee, in rural areas.

Customers taking Electric Service as single-phase (or three-phase, ~~if available~~) alternating current will be supplied at OPPD’s standard voltages for the operation of pumping equipment and, ~~in conjunction with,~~ any crop-drying or grinding equipment for farm purposes. Not applicable to commercial, domestic, or other farm uses, shared or resale service.

OPPD reserves the right to collect from the Customer in advance, part or all of the cost of the additional investment if OPPD’s estimated additional investment in lines, transformers, Meter and accessory equipment to serve a pumping location exceeds \$75.00 per horsepower of connected Load for single-phase service or \$105.00 per horsepower for three-phase service.

BILLING COMPONENTS

Annual Connected Load Charge:

| | | |
|----------------------|---------------------------------|---------------------------------|
| <u>Annual Charge</u> | <u>Single-Phase</u> | <u>Three-Phase</u> |
| Per horsepower (HP) | \$21.36 <u>23.32</u> | \$27.48 <u>29.44</u> |

Energy Charge:

| | | |
|---------------------|------------------------|------------------------|
| <u>Energy Usage</u> | <u>Single-Phase</u> | <u>Three-Phase</u> |
| Per kWh | <u>11.07 cents/kWh</u> | <u>11.07 cents/kWh</u> |

~~Energy Charge:~~

| | | |
|--------------------------------|-----------------------------------|-----------------------------------|
| <u>Energy Usage</u> | <u>Single-Phase</u> | <u>Three-Phase</u> |
| Per kWh | <u>11.07 cents/kWh</u> | <u>11.07 cents/kWh</u> |

Rider Schedule No. 461 – Fuel and Purchased Power Adjustment applies to this Rate Schedule.

Minimum Annual Connected Load Charge:

~~\$213.60~~233.20 for Single-Phase

~~\$274.80~~294.40 for Three-Phase

Minimum Annual Connected Load Charge is calculated as the 10 HP minimum ~~Annual e~~Connected Load ~~e~~Charge requirement of ~~\$213.60 for single phase, or \$274.80 for three phase.~~

Late Payment Charge:

A Late Payment Charge in the amount of 4% of the Billing Components and applicable taxes will be assessed if the current month’s bill payment is not received by OPPD on or before the due date.

Billing Procedure

The annual billing period for Rate Schedule No. 226 – Irrigation Service, begins in May and ends the following April. Customers will be billed one-third of the annual connected load charge during May, June, and July of each of the contract years, plus any charges for energy. During the remaining months, the Customer will be billed for the energy used each month. If a Customer starts service before or after May 1st, the prorated connected load charge will be billed in May, June, or July depending on the start date for the Customer. When a Customer discontinues service, the prorated connected load charge will be billed or credited the following month.

ADMINISTRATIVE

Definitions

Connected Load: The total full Load continuous ratings in horsepower, as prescribed by the standards of the National Electrical Manufacturers Association in effect at the time of purchase from the manufacturer of motors and other current-consuming equipment, installed by the Customer.

Equivalent Electrical Load: The electrical power required to operate mechanical Load at the nameplate horsepower. One horsepower will be converted to an equivalent electrical Load using an 85% efficiency. (One horsepower mechanical equals 877 watts electrical.)

Contract Period

Five years, or longer, at OPPD's discretion. Each contract, at the expiration date, will automatically be renewed for an additional one-year period, unless cancelled by written notice by either party at least 60 days before the expiration date.

Service Regulations

Customers under this Rate Schedule must comply with all OPPD Service Regulations.

RATE SCHEDULE NO. 230

General Service Non-Demand

APPLICABILITY

This Rate Schedule is applicable to all Customers throughout OPPD’s Service Area that have monthly Billing Demands less than 50 kilowatts during each of the four (4) Summer billing months, June through September.

Customers taking Electric Service as single-phase ~~(or three-phase, if available)~~ alternating current will be supplied at OPPD’s standard voltages, for all uses, when all the Electric Services at one location are measured by one Meter, unless the Customer takes emergency or special service as required by OPPD's Service Regulations. Not applicable to shared or resale service.

This Rate Schedule is not available to those Customers taking service under Rate Schedule No. 226 -- Irrigation Service.

BILLING COMPONENTS

Monthly Service Charge: \$33.00 per month

Energy Charge:

| <u>Energy Usage</u> | <u>Summer (June 1 – Sept. 30)</u> | <u>Non-Summer (Oct. 1 – May 31)</u> |
|---------------------|---------------------------------------|---------------------------------------|
| 0 -- 1,000 kWh | 9.8 <u>10.62</u> cents/kWh | 7.89 <u>8.40</u> cents/kWh |
| 1,001 -- 3,000 kWh | 9.8 <u>10.62</u> cents/kWh | 7.89 <u>8.40</u> cents/kWh |
| 3,001+ kWh | 9.8 <u>10.62</u> cents/kWh | 5.24 <u>7.19</u> cents/kWh |

Rider Schedule No. 461 – Fuel and Purchased Power Adjustment applies to this Rate Schedule.

Minimum Monthly Bill: \$33.00

The minimum monthly bill is the monthly service charge. Any energy used by the Customer during a billing period is charged in addition to a minimum bill.

Late Payment Charge:

A Late Payment Charge in the amount of 4% of the Billing Components and applicable taxes will be assessed if the current month’s bill payment is not received by OPPD on or before the due date. For Customers on OPPD’s Level Payment Plan, the Late Payment Charge will be calculated as 4% of the current level payment amount.

ADMINISTRATIVE

Service Regulations

Customers under this Rate Schedule must comply with all OPPD Service Regulations.

RATE SCHEDULE NO. 231

General Service -- Small Demand

APPLICABILITY

This Rate Schedule is applicable to all non-Residential Customers throughout OPPD's Service Area that meet or exceed a Billing Demand of 50 kilowatts during one of the four (4) ~~summer~~ Summer billing months, June through September.

Customers taking Electric Service as single-phase (or three-phase, ~~if available~~) alternating current will be supplied at OPPD's standard voltages, for all uses, when all Electric Service at one location is measured by one Demand Meter, unless the Customer takes emergency or special service as required by OPPD's Service Regulations. Not applicable to shared or resale service.

This Rate Schedule is not available to those Customers taking service under Rate Schedule No. 226 -- Irrigation Service.

BILLING COMPONENTS

Monthly Service Charge: \$19.86 per month

Demand Charge:

| | |
|-----------------------|---------------------------------|
| <u>Billing Demand</u> | <u>Per kW Month</u> |
| Per kW | \$7.08 <u>\$7.89</u> |

Minimum Billing Demand of 18 kW per month.

Energy Charge:

| <u>Energy Usage</u> | <u>Summer</u> (June 1 – Sept. 30) | <u>Non-Summer</u> (Oct. 1 – May 31) |
|--------------------------------|--------------------------------------|--|
| First 300 kWh per kW of demand | 7.38 cents/kWh | 5.92 cents/kWh |
| All additional kWh | 5.81 cents/kWh | 4.56 cents/kWh |

Rider Schedule No. 461 – Fuel and Purchased Power Adjustment applies to this Rate Schedule.

Minimum Monthly Bill: ~~\$147.30~~ \$161.88

The minimum monthly bill is calculated as the 18-kilowatt minimum Demand requirements of ~~\$127.44~~ \$142.02, plus the monthly service charge of \$19.86. Any energy used by the Customer during a billing period is charged in addition to a minimum bill.

Late Payment Charge:

A Late Payment Charge in the amount of 4% of the Billing Components and applicable taxes will be assessed if the current month's bill payment is not received by OPPD on or before the due date. For Customers on OPPD's Level Payment Plan, the Late Payment Charge will be calculated as 4% of the current level payment amount.

Determination of Demand

Demand, for any billing period, will be the kilowatts computed from the readings of OPPD's Meter for the 15-minute interval of the Customer's highest use during the same billing period.

If the Demand is less than 85% of the Customer's highest 15-minute kilovolt-ampere Demand, the kilowatt Demand will be increased under this Schedule by 50% of the difference between 85% of the kilovolt-ampere Demand and the Demand as determined above.

The Customer's Demand must be equal to or greater than the larger of the following:

- 85% of the highest 15-minute Power Factor-adjusted Demand during the Summer billing months of the preceding eleven (11) months, or
- 60% for the highest 15-minute Power Factor-adjusted Demand during the Non-Summer billing months of the preceding eleven (11) months, or
- 18 kilowatts

ADMINISTRATIVE

Service Regulations

Customers under this Rate Schedule must comply with all OPPD Service Regulations.

RATE SCHEDULE NO. 232

General Service -- Large Demand

APPLICABILITY

This Rate Schedule is applicable to all non-Residential Customers throughout OPPD’s Service Area.

Customers taking Electric Service as single-phase (or three-phase, if available) alternating current will be supplied at OPPD’s standard voltages, for all uses, when all the Electric Services at one location are measured by one Demand Meter, unless the Customer takes emergency or special service as required by OPPD's Service Regulations. Not applicable to shared or resale service.

BILLING COMPONENTS

Monthly Service Charge: \$115.31 per month plus,

Demand Charge:

| | |
|-----------------------|--------------------------|
| <u>Billing Demand</u> | <u>Per kW Month</u> |
| Per kW | \$13.35 14.36 |

Minimum Billing Demand of 1,000 kW per month.

Energy Charge:

| | |
|---------------------|-------------------------------------|
| <u>Energy Usage</u> | <u>All Months (Jan. 1 – Dec.31)</u> |
| kWh | 4.49 4.83 cents/kWh |

Rider Schedule No. 461 – Fuel and Purchased Power Adjustment applies to this Rate Schedule.

Minimum Monthly Bill: ~~\$13,465.31~~14,475.31

The minimum monthly bill is calculated as the 1,000-kilowatt minimum Demand requirements of ~~\$13,350~~14,360, plus the monthly service charge of \$115.31. Any energy used by the Customer during a billing period is charged in addition to a minimum bill.

Late Payment Charge:

A Late Payment Charge in the amount of 4% of the Billing Components and applicable taxes will be assessed if the current month’s bill payment is not received by OPPD on or before the due date.

Determination of Demand

Demand, for any billing period, will be the kilowatts computed from the readings of OPPD’s Meter for the 15-minute interval of the Customer’s highest use during the same billing period.

If the Demand is less than 85% of the Customer’s highest 15-minute kilovolt-ampere Demand, the kilowatt Demand will be increased under this Schedule by 50% of the difference between

85% of the kilovolt-ampere Demand and the Demand as determined above.

The Customer's Demand must be equal to or greater than the larger of the following:

- 85% of the highest 15-minute Power Factor-adjusted Demand during the Summer billing months of the preceding eleven (11) months, or
- 60% for the highest 15-minute Power Factor-adjusted Demand during the Non-Summer billing months of the preceding eleven (11) months, or
- 1,000 kilowatts

ADMINISTRATIVE

Service Regulations

Customers under this Rate Schedule must comply with all OPPD Service Regulations.

RATE SCHEDULE NO. 245

Large Power -- Contract

APPLICABILITY

This Rate Schedule is applicable to all non-Residential Customers throughout OPPD’s Service Area.

Customers taking Electric Service as three-phase alternating current will be supplied at an OPPD standard voltage above 11,000 volts provided there is only one transformation involved from an OPPD transmission voltage (above 60,000 volts) to the service voltage. Also, all the Electric Services at one location are measured by one Demand Meter, unless the Customer takes emergency or special service as required by OPPD's Service Regulations. Not applicable to shared or resale service.

BILLING COMPONENTS

Monthly Service Charge: \$465.28 per month plus,

Demand Charge:

| | |
|-----------------------|---------------------------------|
| <u>Billing Demand</u> | <u>Per kW Month</u> |
| Per kW | \$15.17 <u>16.49</u> |

Minimum Billing Demand of 10,000 kW per month.

Energy Charge:

| | |
|---------------------|--|
| <u>Energy Usage</u> | <u>All Months (Jan. 1 – Dec.31)</u> |
| kWh | 3.974 <u>3.32</u> cents/kWh |

Rider Schedule No. 461 – Fuel and Purchased Power Adjustment applies to this Rate Schedule.

Rider Schedule No. 462 – Primary Service Discount does not apply to this Rate Schedule.

Minimum Monthly Bill: ~~\$152,165.28~~ 165,365.28

The minimum monthly bill is calculated as the 10,000-kilowatt minimum Demand requirements of ~~\$151,700~~ 164,900 plus the monthly service charge of \$465.28. Any energy used by the Customer during a billing period is charged in addition to a minimum bill.

Late Payment Charge:

A Late Payment Charge in the amount of 4% of the Billing Components and applicable taxes will be assessed if the current month’s bill payment is not received by OPPD on or before the due date.

Determination of Demand

Demand, for any billing period, will be the kilowatts computed from the readings of OPPD’s Meter for the 15-minute interval of the Customer’s highest use during the same billing period.

If the Demand is less than 85% of the Customer's highest 15-minute kilovolt-ampere Demand, the kilowatt Demand will be increased under this Schedule by 50% of the difference between 85% of the kilovolt-ampere Demand and the Demand as determined above.

The Customer's Demand must be equal to or greater than the larger of the following:

- 85% of the highest 15-minute Power Factor-adjusted Demand during the Summer billing months of the preceding eleven (11) months, or
- 60% for the highest 15-minute Power Factor-adjusted Demand during the Non-Summer billing months of the preceding eleven (11) months, or
- 10,000 kilowatts

ADMINISTRATIVE

Contract Period

A minimum of five (5) years, with automatic renewal for additional five-year periods, unless cancelled by written notice by either party at least one (1) year prior to the expiration date.

Service Regulations

Customers under this Rate Schedule must comply with all OPPD Service Regulations.

RATE SCHEDULE NO. 250

Large Power

APPLICABILITY

This Rate Schedule is applicable to all non-Residential Customers throughout OPPD's Service Area.

Customers taking Electric Service as three-phase alternating current will be supplied at an OPPD standard voltage above 11,000 volts provided there is only one transformation involved from an OPPD transmission voltage (above 60,000 volts) to the service voltage. Also, all the Electric Services at one location are measured by one Demand Meter, unless the Customer takes emergency or special service as required by OPPD's Service Regulations. Not applicable to shared or resale service.

BILLING COMPONENTS

Monthly Service Charge: \$511.73 per month plus,

Demand Charge:

| <u>Billing Demand</u> | <u>Per kW Month</u> |
|-----------------------|--------------------------|
| Per kW | \$15.17 16.49 |

Minimum Billing Demand of 20,000 kW per month.

Energy Charge:

| <u>Energy Usage</u> | <u>All Months (Jan. 1 – Dec.31)</u> |
|---------------------|-------------------------------------|
| kWh | 3.914.14 cents/kWh |

Rider Schedule No. 461 – Fuel and Purchased Power Adjustment applies to this Rate Schedule.

Rider Schedule No. 462 – Primary Service Discount does not apply to this Rate Schedule.

Minimum Monthly Bill: ~~\$303,911.73~~330,311.73

The minimum monthly bill is calculated as the 20,000-kilowatt minimum Demand requirements of ~~\$303,400~~329,800, plus the monthly service charge of \$511.73. Any energy used by the Customer during a billing period is charged in addition to a minimum bill.

Late Payment Charge:

A Late Payment Charge in the amount of 4% of the Billing Components and applicable taxes will be assessed if the current month's bill payment is not received by OPPD on or before the due date.

Determination of Demand

Demand, for any billing period, will be the kilowatts computed from the readings of OPPD's Meter for the 15-minute interval of the Customer's highest use during the same billing period.

If the Demand is less than 85% of the Customer's highest 15-minute kilovolt-ampere Demand, the kilowatt Demand will be increased under this Schedule by 50% of the difference between 85% of the kilovolt-ampere Demand and the Demand as determined above.

The Customer's Demand must be equal to or greater than the larger of the following:

- 90% of the highest 15-minute Power Factor-adjusted Demand during the Summer billing months of the preceding eleven (11) months, or
- 75% for the highest 15-minute Power Factor-adjusted Demand during the Non-Summer billing months of the preceding eleven (11) months, or
- 20,000 kilowatts

ADMINISTRATIVE

Service Regulations

Customers under this Rate Schedule must comply with all OPPD Service Regulations.

RATE SCHEDULE NO. 261M

Large Power – High-Voltage Transmission Level – Market Energy

APPLICABILITY

This Rate Schedule is applicable to all non-Residential Customers throughout OPPD’s Service Area.

Customers taking Electric Service as three-phase service will be supplied radially from OPPD’s system at a nominal standard voltage of 161,000 volts or 345,000 volts, where the Customer owns its electric substation for the delivery of the service.

The minimum Demand for service under this Rate Schedule is 20,000 kilowatts for service at 161,000 volts or a minimum Demand of 200,000 kilowatts for service at 345,000 volts each month.

Customers must substantiate to OPPD’s satisfaction that their Demand requirements will meet the minimum Demand requirements of this Rate Schedule within 18 months of establishing service under this Rate Schedule.

The Customer’s high voltage Electric Service will be measured by one Demand Meter, unless a Customer takes emergency or special service as required by OPPD’s Service Regulations.

BILLING COMPONENTS

Monthly Service Charge: \$10,000.00 per month plus,

Demand Charge:

| | |
|-----------------------|---------------------------------|
| <u>Billing Demand</u> | <u>Per kW Month</u> |
| Per kW | \$18.36 <u>19.51</u> |

Minimum Billing Demand of 20,000 kilowatts per month for interconnection at 161,000 volts, or 200,000 kilowatts per month for interconnection at 345,000 volts.

Energy Charge

An Energy Charge will be assessed based on the number of kilowatt-hours consumed in any given hour multiplied by the appropriate cost to purchase energy from the Southwest Power Pool (SPP) for that hour. OPPD will notify the Customer of the SPP node used to price the hourly energy and all applicable SPP charges. The billing notice will be enforceable under this Rate Schedule and OPPD’s Service Regulations.

Rider Schedule No. 462 – Primary Service Discount does not apply to this Rate Schedule.

Minimum Monthly Bill:

~~\$377,200~~400,200 for Customers taking service at 161,000 volts.

-or

~~\$3,682,000~~\$3,912,000 for Customers taking service at 345,000 volts

The minimum monthly bill is calculated as the 20,000-kilowatt minimum Demand requirement of \$367,200 for interconnection at 161,000 volts, or 200,000 kilowatt minimum Demand requirement of \$3,672,000 for interconnection at 345,000 volts, plus the monthly service charge of \$10,000. Any energy used by the Customer during a billing period is charged in addition to a minimum bill.

Late Payment Charge:

A Late Payment Charge in the amount of 4% of the Billing Components and applicable taxes will be assessed if the current month's bill payment is not received by OPPD on or before the due date.

Gross Revenue Charge:

The Charges under this rate shall be subject to the 5% Gross Revenue Charge to recover the payment in lieu of taxes as established in Neb, Const. art. VIII, sec. 11 OPPD will submit this payment to the appropriate political subdivision(s) as provided by the law.

Determination of Demand

Demand, for any billing period during the initial 18 months of service, will be the kilowatts computed from the readings of OPPD's Meter for the 15-minute interval of the Customer's greatest use during the same billing period.

For billing periods of 18 months or after the initial service date, Demand will be the kilowatts computed from the readings of OPPD's Meter for the 15-minute interval of Customer's highest use during the same billing period.

If, after month 17 of the initial service date, the Demand is less than 95% leading or lagging of the Customer's highest 15-minute kilovolt ampere Demand, the kilowatt Demand will be increased under this Schedule by 50% of the difference between 95% of the kilovolt ampere Demand and the Demand as determined above.

The Customer's Demand must be equal to or greater than the larger of the following:

- 90% of the highest 15-minute Power Factor-adjusted Demand during the Summer billing months of the preceding eleven (11) months, or
- 75% of the highest 15-minute Power Factor-adjusted Demand during the Non-Summer billing months of the preceding eleven (11) months, or
- 20,000 kilowatts for Customers receiving service at 161,000 volts, or
- 200,000 kilowatts for Customers receiving service at 345,000 volts

• _____ or

200,000 kilowatts for Customers receiving service at 345,000 volts

ADMINISTRATIVE

Special Conditions

Customers taking service under this Rate Schedule must provide written notice twelve (12)

Effective 01/01/2024

Resolution No. 6621

months before switching between the Market Energy Base Option and the Non-Market Energy Base Option.

Customers taking service under this Rate Schedule will be required to execute and comply with operational policies and any other requirements as determined by OPPD.

OPPD assumes no liability for Customer-Owned facilities.

OPPD will determine the Point(s) of Delivery using the information provided by the Customer regarding the Customer's requirements. The Point of Delivery will be based on the needs and requirements of OPPD's systems and facilities.

Due to the nature of service provided under this Rate Schedule, OPPD and the Customer will jointly agree upon a metering point that adequately and safely meets OPPD's requirements. If OPPD determines it is necessary to place Meters in a location away from the Point of Delivery, OPPD reserves the right to adjust its Meter readings and billings to account for delivery line losses.

Customers receiving service from more than one high voltage transmission source are restricted from tying or paralleling the sources at any time or for any duration. All transfers between sources must be performed as open transition transfers.

For planning purposes, the Customer will notify OPPD of their expected monthly Demand (in kilowatts) at least one week before the start of each month. In the event the Customer's actual monthly Demand varies by five (5) or more megawatts, OPPD reserves the right to request more frequent notifications regarding expected Loading conditions.

Under OPPD's Service Regulations, the resale, redistribution, marketing or extension of Electric Service received by the Customer, including in any wholesale or other markets, is prohibited. Customers are prohibited from taking wholesale transmission services to serve their Demand.

Customers served under this Rate Schedule shall not export power on OPPD's electrical system.

Service Regulations

Customers under this Rate Schedule must comply with all OPPD Service Regulations.

RATE SCHEDULE NO. 236

Dusk-to-Dawn Lighting

APPLICABILITY

This Rate Schedule is applicable to all Customers, for private outdoor lighting service, when such lighting facilities are operated as an extension of OPPD’s distribution system, except for:

- Installations on public or semi-public thoroughfares including public parks, where such installations would conflict with a legally constituted public authority having jurisdiction, and

•

~~(1)~~ Athletic fields covered by other Rate Schedules.

Customers taking Electric Service as single-phase alternating current, 120 volts, will be supplied by OPPD for the operation of outdoor-type light fixtures using mercury vapor or high-pressure sodium lamps mounted on OPPD-owned wood poles on which overhead secondary conductors exist, or to which such secondary conductors can be extended, except where the extension of such secondary conductors is impractical.

This service will be unmetered, and the light fixtures will operate each night automatically from dusk to dawn. All facilities necessary for service under this Rate Schedule will be installed, owned and maintained by OPPD. This service is for the exclusive use of the Customer for private outdoor lighting as specified and cannot be resold to others.

Availability of the 175-watt and the 400-watt mercury vapor light fixture is restricted to existing units. As existing 175-watt and 400-watt mercury vapor units require maintenance, OPPD will replace them with 100-watt and 200-watt high-pressure sodium units, respectively.

BILLING COMPONENTS

Monthly Rate:

For an installation on an existing wood pole and connected to existing overhead secondary conductors on such pole:

| <u>Lamp Size</u> (watts) | <u>Lamp Type</u> | <u>Per Unit</u> <u>Charge</u> |
|-----------------------------|---|-------------------------------------|
| 100 | 7,200 lumen high-pressure sodium light fixture | \$ 13.70 <u>14.06</u> |
| 175 | 7,000 lumen mercury-vapor light fixture* | \$ 13.70 <u>15.48</u> |
| 200 | 22,000 lumen high-pressure sodium light fixture | \$18.69 |
| 400* | 20,000 lumen mercury-vapor light fixture* | \$ 18.69 <u>20.52</u> |
| <u>33</u> | <u>LED</u> | <u>\$13.02</u> |
| <u>108</u> | <u>LED</u> | <u>\$17.76</u> |

Where an extension of overhead secondary facilities is required, and where such extension is acceptable to OPPD, the monthly rate will be increased by:

| <u>Charges as Required</u> | <u>Per Unit Charge</u> |
|---|------------------------|
| Additional transformer installed* | \$ <u>5.026.68</u> |
| Additional pole installed | \$ <u>1.381.67</u> |
| Additional span of secondary conductors installed | \$ <u>0.750.85</u> |

**Restricted to existing Customers.*

Rider Schedule No. 461 – Fuel and Purchased Power Adjustment applies to this Rate Schedule.

Late Payment Charge:

A Late Payment Charge in the amount of 4% of the Billing Components and applicable taxes will be assessed if the current month’s bill payment is not received by OPPD on or before the due date.

ADMINISTRATIVE

Contract Period

On initial installation of a light at a given location, the term of contract for service under this Rate Schedule will be for a period of two (2) years. After the two (2) year period, the service will continue until the customer contacts OPPD to request to have the light removed.

Special Conditions

Resolution No. 5733 states OPPD’s Management has been authorized to add, delete, or restrict lighting rates in Rate Schedule No. 236 – Dusk to Dawn Lighting and Rate Schedule No. 350 – Municipal Service Street Lighting at any time, provided that any changes will be:

- Based on generally accepted cost-of-service ratemaking principles,
- Reviewed by the Board of Directors’ rate consultant, and
- Approved by the Board of Directors during the next meeting at which the Board considers any rate action.

Service Regulations

Customers under this Rate Schedule must comply with all OPPD Service Regulations.

RATE SCHEDULE NO. 350

Municipal Service Street Lighting

APPLICABILITY

This Rate Schedule is applicable to the State of Nebraska, and all Counties, Cities, Villages and Sanitary Improvement District's throughout OPPD's Service Area. The single-phase alternating current Electric Service will be supplied at OPPD's standard voltages for the operation of street lighting systems for public highways, streets, and thoroughfares.

Units of street lighting not priced in Parts 1 or 2 will be priced explicitly in the street lighting contract.

Each Customer shall enter into a contract with OPPD for street lighting service. Such a contract shall be for a period of one year, or longer, at OPPD's option, and shall include a reference to this street lighting Schedule and the Service Regulations of OPPD.

OPPD, at its discretion, may replace decorative units with like decorative units if the original decorative unit is no longer available or is not available at a reasonable cost.

BILLING COMPONENTS

Billing Procedure: Annual rates will be billed in 12 equal monthly installments.

Late Payment Charge:

A Late Payment Charge in the amount of 4% of the Billing Components and applicable taxes will be assessed if the current month's bill payment is not received by OPPD on or before the due date.

Rider Schedule No. 461 – Fuel and Purchased Power Adjustment applies to this Rate Schedule. The adjustment will be applied to the monthly energy usage for each lighting method based on the relevant light source and lamp size for such method.

ADMINISTRATIVE

Definitions

Method: Identifies the specific combination of features (light source, mounting height, lamp size, and the number of lamps) that comprise an individual streetlight.

Customer-Owned Poles and Fixtures: Poles and fixtures, provided by the Customer, to which OPPD adds OPPD-owned streetlight equipment and separate service wiring.

Units: One or more components, including the fixture, lamp, photocell, and pole, ~~that~~ which comprise a streetlight.

Special Conditions

Resolution No. 5733 states OPPD's Management has been authorized to add, delete, or restrict lighting rates in Rate Schedule No. 236 – Dusk to Dawn Lighting and Rate Schedule No. 350 – Municipal Service Street Lighting at any time, provided that any changes will be:

- Based on generally accepted cost-of-service ratemaking principles,
- Reviewed by the Board of Directors' rate consultant, and
- Approved by the Board of Directors during the next meeting at which the Board considers

any rate action.

Service Regulations

Customers under this Rate Schedule must comply with all OPPD Service Regulations.

RATE SCHEDULE NO. 351

Municipal Services Traffic Signals and Signs

APPLICABILITY

This Rate Schedule is applicable to all governmental agencies throughout OPPD’s Service Area where service for such purpose is reasonably available, and the use of service can reasonably be controlled and calculated without metering.

Governmental agencies taking Electric Service as single-phase alternating current will be supplied at OPPD’s standard voltages for the operation of Traffic Signals, Signs, Flashers, Counters or other devices used in the general control of thoroughfare traffic.

BILLING COMPONENTS

Energy Charge:

| | |
|---------------------|-------------------------------------|
| <u>Energy Usage</u> | <u>All Months (Jan. 1 – Dec.31)</u> |
| kWh | 8.889 .63 cents/kWh |

Rider Schedule No. 461 – Fuel and Purchased Power Adjustment applies to this Rate Schedule.

Minimum Monthly Bill: \$3.01 per location.

Late Payment Charge:

A Late Payment Charge in the amount of 4% of the Billing Components and applicable taxes will be assessed if the current month’s bill payment is not received by OPPD on or before the due date.

Determination of Energy

When service at a location is used continuously, day and night, the average watts in use will be multiplied by 730 hours and divided by 1000.

When service at a location is not used during daylight hours and is disconnected by a control device during such hours, the average watts in use from dusk to dawn will be multiplied by 360 hours and divided by 1000.

Gaseous tube lighting or other low Power Factor devices will be corrected to not less than 90 percent Power Factor.

ADMINISTRATIVE

Special Conditions

Customers taking service under this Rate Schedule agree to:

- Furnish OPPD all information necessary to calculate the monthly kilowatt-hour use
- Notify OPPD immediately of any permanent change in their Load that will affect the kilowatt-hours used
- Cooperate with OPPD to periodically verify Load

Service Regulations

Customers under this Rate Schedule must comply with all OPPD Service Regulations.

RATE SCHEDULE NO. 357

Municipal Service

APPLICABILITY

This Rate Schedule is applicable to all Municipal Utilities throughout OPPD’s Service Area.

Municipalities taking Electric Service as three-phase alternating current will be supplied by OPPD at a voltage not less than 2400 volts for use through a ~~municipally-owned~~municipally owned and maintained distribution system.

BILLING COMPONENTS

Monthly Service Charge: \$143.90 per month

plus, Demand Charge:

| | |
|-----------------------|---------------------|
| <u>Billing Demand</u> | <u>Per kW Month</u> |
| Per kW | \$12.03 |

Energy Charge:

| | |
|---------------------|-------------------------------|
| <u>Energy Usage</u> | <u>Three-Phase</u> |
| Per kWh | 4.154.71 cents/kWh |

Rider Schedule No. 461 – Fuel and Purchased Power Adjustment applies to this Rate Schedule.

Minimum Monthly Bill: The minimum monthly bill will be the monthly service charge plus the charge for the currently effective Demand.

Late Payment Charge:

A Late Payment Charge in the amount of 4% of the Billing Components and applicable taxes will be assessed if the current month’s bill payment is not received by OPPD on or before the due date.

Determination of Demand

Demand, for any billing period, will be the kilowatts computed from the readings of OPPD’s kilowatt-hour Meter for the 15-minute interval of the Customer’s highest use during the same billing period.

If the Demand is less than 85% of the Customer’s highest 15-minute kilovolt-ampere Demand, the kilowatt Demand will be increased under this Schedule by 50% of the difference between 85% of the kilovolt-ampere Demand and the Demand as determined above.

The Customer’s Demand must be equal to or greater than the larger of the following:

- 85% of the highest 15-minute Power Factor adjusted-Demand during the Summer billing months of the preceding eleven (11) months, or
- 60% of the highest 15-minute Power Factor adjusted-Demand during the Non-Summer billing months of the preceding eleven (11) months.

ADMINISTRATIVE

Special Conditions

Special Conditions will be included in the contract and will be mutually agreed upon by both parties. This Rate Schedule will be included as part of the contract.

Service Regulations

Customers under this Rate Schedule must comply with all OPPD Service Regulations.

RATE SCHEDULE NO. 230M

General Service Non-Demand – Offutt Housing Adjustment Rider

APPLICABILITY

This Rate Schedule is applicable to all Customers within the designated privatized housing areas at Offutt Air Force Base (Offutt AFB) that have monthly Billing Demands less than 50 kilowatts during each of the four (4) ~~summer~~ summer billing months.

Customers taking Electric Service as single-phase ~~(or three-phase, if available)~~ alternating current will be supplied at OPPD’s standard voltages, for all uses, when all the Electric Services at one location is measured by one Meter, unless the Customer takes emergency or special service as required by OPPD's Service Regulations. Not applicable to shared or resale service.

This rate is not available to those Customers taking service under Rate Schedule No. 226 ~~–~~ Irrigation Service.

The charges as determined under Rate Schedule No. 230 – General Service – Non-Demand will apply to this Rate Schedule.

BILLING COMPONENTS

Monthly Service Charge: \$33.00 per month plus,

Energy Charge:

| <u>Energy Usage</u> | <u>Summer (June 1 – Sept. 30)</u> | <u>Non-Summer (Oct. 1 – May 31)</u> |
|-------------------------------|---|--|
| 0 – 1,000 kWh | 9.84 <u>10.62</u> ¢cents/kWh | 7.89 <u>8.40</u> ¢cents/kWh |
| 1,001- – 3,000 kWh | 9.84 <u>10.62</u> ¢cents/kWh | 7.89 <u>8.40</u> ¢cents/kWh |
| 3,001+ kWh | 10.62 <u>9.84</u> ¢cents/kWh | 5.24 <u>7.19</u> ¢cents/kWh |

Rider Schedule No. 461 – Fuel and Purchased Power Adjustment applies to this Rate Schedule.

Offutt Adjustment

A credit adjustment will be applied per kilowatt-hour to all energy billed during the current billing period. The adjustment will be capped so that Customers will not have a rate higher than Rate Schedule No. 230 ~~–~~ General Service Non-Demand. The adjustment will be based on the production cost differential determined by OPPD as follows:

OPPD Cost of Production less WAPA Cost of Production, determined on a cents per kWh basis, applicable to Rate Schedule No. 230 – General Service- Non Demand.

The minimum Monthly Bill: \$33.00

The minimum monthly bill is the monthly service charge. Any energy used by the Customer during a billing period is charged in addition to a minimum bill.

Late Payment Charge:

A Late Payment Charge in the amount of 4% of the Billing Components and applicable taxes will be assessed if the current month’s bill payment is not received by OPPD on or before

the due date.

ADMINISTRATIVE

Definitions

OPPD's Cost of Production: Costs related to the capacity and amount of electricity produced at each of OPPD's generating plants, purchased power for use by OPPD's Customers, and credits for interchange sales through OPPD's system.

Western Area Power Authority (WAPA) Cost of Production: Actual cost of generation provided by WAPA and assigned to OPPD for delivery to Offutt AFB.

Service Regulations

Customers under this Rate Schedule must comply with all OPPD Service Regulations.

RATE SCHEDULE NO. 231M

General Service – Demand – Offutt Housing Adjustment Rider

APPLICABILITY

This Rate Schedule is applicable to all non-Residential Customers within the designated privatized housing areas at Offutt Air Force Base (Offutt AFB) that meet or exceed a Billing Demand of 50 kilowatts during one of the four (4) ~~Summer~~ billing months, June through September.

Customers taking Electric Service as single-phase (or three-phase, if available) alternating current, will be supplied at OPPD's standard voltages, for all uses, when all the Electric Services at one location is measured by one Meter with a Demand register, unless the Customer takes emergency or special service as required by OPPD's Service Regulations. Not applicable to shared or resale service.

This rate is not available to those Customers taking service under Rate Schedule No. 226 ~~--~~ Irrigation Service.

The charges as determined under Rate Schedule No. 231 – General Service – Demand will apply to this Rate Schedule.

BILLING COMPONENTS

Monthly Service Charge: \$19.86 per ~~month~~ month plus,

Demand Charge:

| | |
|-----------------------|---|
| <u>Billing Demand</u> | <u>Per kW Month</u> |
| Per kW | \$7.08 8.01 <u>7.89</u> |

Minimum Billing Demand of 18 kW per month.

Energy Charge:

| <u>Energy Usage</u> | <u>Summer</u> <u>(June 1 – Sept.30)</u> | <u>Non-Summer</u> <u>(Oct. 1 – May 31)</u> |
|--------------------------------|--|---|
| First 300 kWh per kW of demand | 7.38 cents/kWh | 5.92 cents/kWh |
| All additional kWh | 5.81 cents/kWh | 4.56 cents/kWh |

~~Rider Schedule No. 461 – Fuel and Purchased Power Adjustment applies to this Rate Schedule.~~
~~Rider Schedule No. 461 – Fuel and Purchased Power Adjustment applies to this Rate Schedule.~~

Offutt Adjustment

A credit adjustment will be applied per kilowatt-hour to all energy billed during the current billing period. The adjustment will be capped so that Customers will not have a rate higher than Rate Schedule No. 231 ~~--~~ General Service ~~--~~ Small Demand. The adjustment will be based on the production cost differential determined by OPPD as follows:

OPPD Cost of Production less WAPA Cost of Production, determined on a cents per kWh basis, applicable to Rate Schedule No. 231 – General Service – Small Demand.

Minimum Monthly Bill: \$ ~~147.30~~ 161.88

The minimum monthly bill is calculated as the 18-kilowatt minimum Demand requirements of \$ ~~127.44~~ 142.02, plus the monthly service charge of \$19.86. Any energy used by the Customer during a billing period is charged in addition to a minimum bill.

Late Payment Charge:

A Late Payment Charge in the amount of 4% of the Billing Components and applicable taxes will be assessed if the current month's bill payment is not received by OPPD on or before the due date.

Determination of Demand

Demand, for any billing period, will be the kilowatts computed from the readings of OPPD's Meter for the 15-minute interval of the Customer's highest use during the same billing period.

If the Demand is less than 85% of the Customer's highest 15-minute kilovolt-ampere Demand, the kilowatt Demand will be increased under this Schedule by 50% of the difference between 85% of the kilovolt-ampere Demand and the Demand as determined above.

The Customer's Demand must be equal to or greater than the larger of the following:

- 85% of the highest 15-minute Power Factor-adjusted Demand during the summer billing months of the preceding eleven (11) months, or
- 60% for the highest 15-minute Power Factor-adjusted Demand during the Non-Summer billing months of the preceding eleven (11) months, or
- 18 kilowatts

ADMINISTRATIVE

Definitions

OPPD's Cost of Production: Costs related to the capacity and amount of electricity produced at each of OPPD's generating plants, purchased power for use by OPPD's Customers, and credits for interchange sales through OPPD's system.

Western Area Power Authority (WAPA) Cost of Production: Actual cost of generation provided by WAPA and assigned to OPPD for delivery to Offutt AFB.

Service Regulations

Customers under this Rate Schedule must comply with all OPPD Service Regulations.

RIDER SCHEDULES

RIDER SCHEDULE NO. 355

Electric Energy Purchased from
Cogenerating and Small Power Producing Facilities

APPLICABILITY

This Rider Schedule is applicable to all Customers who have qualified cogenerating or Small Power Producing Facilities that have the appropriate metering to measure the delivery of electric energy to OPPD.

BILLING COMPONENTS

For facilities with less than 1000 kW of generating capacity:

Service Charge: \$4.00 per Meter per month

Energy Credit:

OPPD will pay the Customer based on the type of metering installed as follows:

No Meter: No Rate

| | Summer <u>(June 1 – Sept. 30)</u> | Non-Summer <u>(Oct. 1 – May 31)</u> |
|--|---|---|
| All Hours | 4.00 cents/kWh | 3.52 cents/kWh |
| <u>Time of Day</u> | <u>Summer</u> <u>(June 1 – Sept. 30)</u> | <u>Non-Summer</u> <u>(Oct. 1 – May 31)</u> |
| On-Peak Hours: 6:00A-M--10:00P-M- M--F | 5.40 cents/kWh | 4.39 cents/kWh |
| Off-Peak Hours: All Other Hours | 2.73 cents/kWh | 2.73 cents/kWh |

For facilities with 1000 kilowatts or more of generating capacity, the rate will be based on OPPD’s avoided costs and will be established for each facility.

ADMINISTRATIVE

Special Conditions

A written agreement between the Customer and OPPD is required. OPPD will not operate in parallel without a contract.

The Customer will pay for the additional equipment required for parallel operation and installation costs, as outlined in the agreement, before the initiation of parallel operation.

The interconnection of this equipment with OPPD's system must meet the standards specified in the OPPD policy for "Parallel Operation of Customer-Owned Generation Equipment." All required policies can be found at <https://www.oppd.com>.

Service Regulations

Customers under this Rider Schedule must comply with all OPPD Service Regulations.

RIDER SCHEDULE NO. 461

Fuel and Purchased Power Adjustment

APPLICABILITY

This Rider Schedule is applicable to all Customers throughout OPPD’s Service Area that take electrical service under OPPD’s Rate Schedule Nos. 110, 115, 226, 230, 231, 232, 236, 245, 250, 350, 351, or 357.

This Schedule applies an adjustment per kilowatt-hour to all retail and municipal service energy sales to reflect changes in fuel and purchased power expenses that are above, or below, the Fuel and Purchased Power Base Rate.

BILLING COMPONENTS

FPPA Charge:

The Customer’s monthly bill will reflect a Fuel and Purchased Power Adjustment (FPPA) applied to the monthly kilowatt-hour usage.

FPPA Annual Calculation

The FPPA is calculated as follows:

$$FPPA = \frac{NEC - O}{S} - F$$

Where:

NEC = Annual Budgeted Net Energy Costs = (FC +C +PP –OSSR)

- FC = Fuel Costs: These are the costs incurred to support the generation of electricity
- C = Consumables: Materials that are used or depleted as part of the generating process and vary with each kilowatt-hour produced
- PP = Purchased Power Costs: Costs from Southwest Power Pool transactions associated with purchase of power
- OSSR = Off-System Sales Revenue: Revenues from Southwest Power Pool transactions associated with off-system sales

O = Over/Under Balance: For any given period, the Over/Under variance is the difference between the actual net energy costs and the revenue generated by the FPPA Base Rate plus the FPPA in effect during the period

S = Actual Budgeted Energy Sales: Budgeted kilowatt-hour sales to retail and municipal service customers

F = Fuel and Purchase Power Base Rate: The portion of the energy charge component of the applicable OPPD Rate Schedules that recovers the net costs of fuel, purchased power, off-system sales and related consumable costs. For all applicable Rate Schedules, the Fuel and Purchased Power Base Rate is 1.951 cents per kilowatt-hour

OPPD will adjust the FPPA annually on January 1st of each year and will calculate the FPPA before that date. To facilitate that calculation, OPPD will establish its fuel and purchased power budget for the year in advance of January 1st of that year. The Over/Under Balance to be included in the FPPA will be the amount approximately three (3) months before January 1 of the upcoming year, plus the projected amounts for the remainder of the calendar year. The amount will be transferred from the Over/Under Balance to the FPPA. Accordingly, the Over/Under Balance will be adjusted by the amount to be included in the FPPA.

ADMINISTRATIVE

Special Conditions

OPPD reserves the right to modify the FPPA at any time, with approval of the Board of Directors.

Service Regulations

Customers under this Rider Schedule must comply with all OPPD Service Regulations.

RIDER SCHEDULE NO. 462

Primary Service Discount

APPLICABILITY

This Rider Schedule is applicable to Customers taking single-phase or three-phase service from OPPD at a standard available voltage above 11,000 volts, provided there is only one transformation involved from an OPPD transmission voltage (above 60,000 volts) to the service voltage.

This Rider Schedule is not available to those Customers taking service under Rate Schedule Nos. 245, 250, and-or 261M.

BILLING COMPONENT

The monthly credit will be calculated as a percent of the monthly bill as determined by the applicable Rate Schedule:

| <u>Delivery Voltage</u> | <u>Discount</u> |
|-------------------------|-----------------|
| 4,000 to 60,000 | 3% |
| 60,001+ | 5% |

ADMINISTRATIVE

Special Conditions

OPPD may change its standard delivery voltage to any affected Customer receiving a discount after advanced written notice. The Customer has the option to change their system to receive service at the new standard delivery voltage or to accept service without the Primary Service Discount after the change in delivery voltage through transformers owned by OPPD.

Service Regulations

Customers under this Rider Schedule must comply with all OPPD Service Regulations.

RIDER SCHEDULE NO. 464

Standby Service

APPLICABILITY

This Rider Schedule is applicable to all Customers normally serving all or a portion of their own electrical or mechanical Load from Customer-Qowned equipment when the sum of the combined nameplate rating of the primary generator(s) and the combined nameplate rating of the mechanical Load converted to Equivalent Electrical Load in excess of 25 kW. (The primary generator(s) and the Equivalent Electrical Load shall be referred to as "Units.")

This Rider Schedule does not apply to Units operated for emergency purposes, to Emergency Generating Unit(s), Auxiliary Generating Unit(s) operated as standby to the Customer's Units, or for Load not requiring Standby Service (Load is permanently isolated from OPPD's System), for shared service, or as leased capacity to OPPD under Rate Schedule No. 467L. This Rider Schedule is not mandatory for Customer-Qowned renewable energy equipment.

BILLING COMPONENTS

Standby Service Option No. 1 -- Standby Service for the Customer's Units

Standby Service Option No. 2 -- Standby Service with separate status (on/off) metering of the primary, auxiliary, and mechanical generating unit(s):

Monthly Service Charge:

| <u>Standby Service Option</u> | <u>Monthly Rate</u> |
|-------------------------------|---------------------|
| <i>Standby Option 1:</i> | No Rate |
| <i>Standby Option 2:</i> | \$45.45 |

Standby Charge:

| <u>Electric Service Level</u> | <u>Standby Option 1:</u> | <u>Standby Option 2:</u> |
|-------------------------------|------------------------------|------------------------------|
| Primary Level | \$5.08/kW of Contract Demand | \$5.08/kW of Contract Demand |
| Secondary Level | \$5.55/kW of Contract Demand | \$5.55/kW of Contract Demand |

Rider Schedule No. 462 – Primary Service Discount does not apply to this Rider Schedule.

Determination of Contract Demand (Applies to Options 1 and 2)

Where OPPD is required to stand ready to supply Standby Service, the Contract Demand shall be equal to:

- (1) the Load normally isolated from OPPD's System by a throw-over switch and normally served by the Customer's equipment, and/or
- (2) the nameplate rating of the Customer's Primary Generating Unit(s) normally operated in parallel with OPPD's System if the nameplate rating of the Primary Generating Unit(s) is less than the maximum 15-minute peak Demand of the Customer's facility, or

(3) the maximum 15-minute peak Demand of the Customer's facility if the nameplate rating of the Primary Generating Unit(s) normally operated in parallel with OPPD's system is greater than the maximum 15-minute peak Demand of the Customer's facility, whichever is applicable.

The Customer may arrange for OPPD to supply Standby Service for a portion of the Load normally isolated from OPPD's System with a throw-over switch and normally served by the Customer's equipment. The Customer will furnish and install suitable switchgear to reduce Demand to the Contract Demand level when the Customer's Demand exceeds the Contract Demand during an outage of the Customer's equipment. The switchgear furnished by the Customer shall be approved by OPPD and will be under exclusive OPPD control.

Demand and Energy Charges (Applies to Options 1 and 2)

The charges, as determined under the regular Rate Schedule, apply to the service rendered.

However, if an increase in Billing Demand occurs in the current billing period as a result of a total outage of one or more of the Customer's primary or mechanical generating unit(s) and the failure of the auxiliary unit(s) to operate as back-up to the primary unit(s) or the Equivalent Electrical Load, the current month's Standby Charge will be reduced. The reduction will be based on the difference between the Billing Demand, as determined from the highest actual Meter reading occurring during such outage interval, and the Billing Demand, as determined from the Reference Demand.

The Reference Demand is the highest Demand resulting from any 15-minute Meter reading occurring during the current billing period being reduced by any portion of the Customer's Contract Demand not served by the Customer's equipment during such 15-minute period. The resulting Reference Demand will not be established higher than the original 15-minute Meter reading.

If, in the current billing period, the actual metered Demand during such outage interval is greater than the maximum metered Demand during any non-outage period, the Reference Demand will be used in the determination of charges for the next 11 months.

Standby Service Option No. 3 ~~---~~ Waiver of Standby Charge by designation of a Firm Demand:

Standby Charge:

Electric Service Level

Standby Option 3:

Excess Demand Charge

Applies

Rate Schedule No. 462 - Primary Service Discount does not apply to this Rate Schedule.

Demand and Energy Charges (Applies to Option 3)

The charges as determined under the regular Rate Schedule applicable to the service rendered with the exception that the Demand used to calculate the monthly bill will be determined as outlined in the "Determination of Billing Demand" clause within this Rate Schedule.

Excess Demand Charge (Applies to Option 3)

The current levelized cost of a combustion turbine peaking unit, including fixed capital and operation and maintenance cost. This charge will be increased by 23% to recover costs associated with the reserve margin and Demand losses on the transmission and distribution system. The resultant charge will be applied to the Customer's Excess Demand.

Designation of Demand (Applies to Option 3)

The Customer must (1) designate a Firm Demand for the facility to be served under this Rate Schedule and (2) declare the nameplate rating of the Customer's Units.

If the maximum potential Demand of a Customer's facility exceeds the supply capability of OPPD's electrical network at that location, the Customer will furnish and install suitable switchgear to limit Demand to a level determined by OPPD. This level will be no less than the Firm Demand level.

Determination of Billing Demand (Applies to Option 3)

The Customer's monthly Billing Demand will be determined by (a) the Power Factor-adjusted Demand, as calculated in the "Determination of Demand" clause in the applicable Rate Schedule subject to Demand minimums, or (b) the Firm Demand, whichever is greater.

Determination of Excess Demand Charges (Applies to Option 3)

If the Customer's Power Factor adjusted Demand exceeds the Firm Demand during the On-Peak Periods of any calendar year, the Customer will be assessed the Excess Demand Charge for the difference between the Firm Demand and the Power Factor adjusted Demand in the current month. The Excess Demand Charge will be assessed only once for each kW for which the Power Factor adjusted-Demand exceeds the Firm Demand during the On-Peak Periods in any calendar year.

Minimum Monthly Bill

The minimum monthly bill from the regular Rate Schedule, applicable to the service rendered, plus the charges for the applicable Standby Service Option.

ADMINISTRATIVE

Schedule Duration:

A minimum of three years, pursuant to a written agreement. Said agreements, at their expiration dates, will automatically be renewed for additional two-year periods unless cancelled by written notice by either party at least six months before the expiration dates.

Customers may elect to take service under a different Standby Service Option only after the current option has been in effect for at least 12 months. The Customer will provide written notice to OPPD of their intention to change options sixty (60) days before the proposed effective date of such change.

For those Customers whose Contract Demand is determined according to Condition No. 1 or Condition No. 3 in the "Determination of Contract Demand" clause within this Rate Schedule, the level of the Contract Demand will be reviewed annually.

For Standby Service Option No. 3, the Firm Demand may be decreased only after the current Firm Demand has been in place for at least 12 months. The Customer will provide written notice to OPPD of their intention to decrease the Firm Demand 30 days before the proposed effective date of such decrease.

The Firm Demand may be increased according to the following conditions:

1. For increases in the Firm Demand that are greater than 20 MW, the Customer will provide written notice to OPPD of their intention to increase the Firm Demand at least six months before the proposed effective date of the increase.
2. For increases in the Firm Demand that are less than or equal to 20 MW, the Customer will provide written notice to OPPD of their intention to increase the Firm Demand at least three months before the proposed effective date of the increase.

Definitions

Contract Demand: The nameplate capacity of the Customer's Primary Generating Unit(s) or the Equivalent Electrical Load normally isolated from OPPD's System and served by a Customer's generating equipment.

Equivalent Electrical Load: The electrical power required to operate mechanical Load at the nameplate horsepower. One horsepower will be converted to Equivalent Electrical Load using an 85% efficiency. (One horsepower mechanical equals 877 watts electrical.)

On-Peak Periods: Monday through Friday between the hours of ~~12:00 P.M. Noon~~ and 10:00 P.M. during the months of June, July, August, and from September 1 through September 15, excluding Federal Holidays.

Firm Demand: The Demand to be served by OPPD that the Customer expects to be served by OPPD in normal operation during the On-Peak Periods.

Excess Demand: The amount of the Customer's Demand served by OPPD that exceeds the Firm Demand during the On-Peak Periods.

Special Conditions

OPPD will not be required to furnish more than one Standby Service Option for a Customer taking service at one location.

OPPD will not be required to furnish duplicate service hereunder.

The Customer shall reimburse OPPD for all metering and switchgear equipment and the maintenance of such equipment necessary to administer this Rate Schedule.

Any metering and switchgear equipment installed, for purposes of this Rate Schedule, on the Customer's side of the Meter by the Customer must be approved by OPPD and must be installed and maintained to provide a safe environment for OPPD's and Customer's personnel.

Any metering and switchgear located on the Customer's side of the Meter must be inspected by OPPD and tested before being energized and tested once a year after that with the results of the tests reviewed and approved by OPPD.

All installations must be in conformance with the National Electrical Safety Code.

OPPD will not be liable for any damage to a Customer's equipment due to the failure of any metering or switchgear installed by the Customer on the Customer's side of the Meter.

Service Regulations

Customers under this Rider Schedule must comply with all OPPD Service Regulations.

RIDER SCHEDULE NO. 467 & 467H

General Service/Large General Service – Curtailable
(Currently Unavailable for New Customers)

APPLICABILITY

This Rider Schedule is applicable to all non-Residential Customers throughout OPPD’s Service Area that are capable and willing to curtail a minimum of 100 kilowatts of Curtailable Demand (consisting of a minimum of 20% of Customer Load) or 500 kilowatts (without restrictions) during Curtailment Periods specified by OPPD, subject to the terms of this Rider Schedule and any applicable Curtailment Agreement.

The Customer must agree to reduce the Load served by OPPD during a Curtailment Period, upon request by OPPD, to the Firm Demand. The Customer must enter into a Curtailment Agreement with OPPD, and the decision to enter into a Curtailment Agreement with any Customer under this Rider Schedule is at the discretion of OPPD and is based on operational and market conditions.

This Rider Schedule is not available to those Customer accounts served under Rider Schedule Nos. ~~355~~, 464, ~~355~~, or 467L.

BILLING COMPONENTS

Monthly Service Charge: \$84.70 per month

Curtailment Credit:

| Option | 467 | 467H |
|---|-------------------|---------------|
| Minimum Demand | 100 kW – 9,999 kW | 10,000+ kW |
| Capacity Curtailment Only (Max. 100 hours per year) | \$4.67 per kW | \$4.96 per kW |

Determination of Firm Demand and Curtailable Demand

For purposes of determining the Firm Demand and Curtailable Demand, before December 1 of each year, OPPD will review the Customer's recent historical Load at the time of OPPD's system peak to determine the Customer's average Load for those hours in which OPPD's Load was within 90% of OPPD's annual system peak. Periods during which the Customer provided a Demand reduction in response to a curtailment request will be excluded from this calculation.

Prior to January 1, the Customer may elect to adjust the Firm Demand amount provided the resulting Curtailable Demand is at least 100 kilowatts (consisting of a minimum of 20% of Customer Load) or 500 kilowatts (without restrictions).

An adjustment will be made to the Curtailable Demand if the annual review of the Customer's historical Load characteristics indicates a smaller amount of Curtailable Load is appropriate. If the annual review indicates that the Customer is unable to provide a minimum of 100 kilowatts of Curtailable Demand (consisting of a minimum of 20% of Customer Load) or 500 kilowatts of Curtailable Demand (without restrictions), the Customer will be notified that service will no longer be provided under this Rider Schedule and any applicable Curtailment Agreement will be terminated.

If Demand history is not available, OPPD will review the operation of the facility with the Customer and determine reasonable Curtailable and Firm Demands.

Non-Compliance Charge for Failure to Reduce Load to the Firm Demand

For a July or August billing period, loss of credit for four (4) times the monthly credit per kilowatt of Curtailable Demand for all Demand exceeding the Firm Demand during any Curtailment Period. For a June or September billing period, loss of credit for two (2) times the monthly credit per kilowatt of Curtailable Demand for all Demand exceeding the Firm Demand during any Curtailment Period.

In the event of multiple failures to reduce Load within the same billing period:

- The loss of credit penalty will be applied once per kilowatt to the Customer's highest Demand recorded for all Demand exceeding the Firm Demand during the billing period; and
- For any monthly billing period, 50 cents per kilowatt-hour for all energy exceeding the Firm Demand level taken during each Curtailment Period.

If a Customer's failure to curtail to the Firm Demand when requested results in an OPPD purchase of capacity, the Customer will also reimburse OPPD for a proportionate share of this capacity cost. This reimbursement will be based on the current levelized cost of a combustion turbine peaking unit, including fixed capital and operation and maintenance costs. This charge will be increased by 23% to recover costs associated with the reserve margin and Demand losses on the transmission and distribution system. The resultant charge will be applied to the Customer's highest Demand recorded for all Demand exceeding the Firm Demand during a Curtailment Period. These charges will be assessed only once during the June 1 through September 15 period.

If the capacity purchase is less than the amount of Load not curtailed by the Customer, a pro-rated share of the capacity charge will be assessed to the Customer.

ADMINISTRATIVE

Definitions

Curtable Demand: The Demand the Customer agrees to have available for curtailment within a four-hour notification period. The Demand is either at least 100 kilowatts consisting of a minimum of 20% of Customer Load or 500 kilowatts without restrictions. This Load can be curtailed and/or served by the Customer's Emergency Generating Units.

Curtailment Period:

Capacity Curtailment: May only occur when OPPD's projected Load is within 95% of the Deficit Load Condition, as determined by OPPD, or as directed by the Southwest Power Pool (SPP) by the Reliability Coordinator or Balancing Coordinator for OPPD, to reduce Load from June 1 through September 15, 12 P.M. to 10 P.M., Monday through Friday, excluding NERC Holidays. There is a maximum of 100 hours of Capacity Curtailment during a contract year.

Firm Demand: The Demand the Customer agrees not to exceed during a Curtailment Period. The Firm Demand is the Customer's Load that is not subject to curtailment.

Deficit Load Condition: The point at which OPPD's Load exceeds available capability, less net reserve capacity obligation, plus firm purchases, less firm sales.

Duration of Curtailment Period: The Curtailment Period will not exceed ten (10) hours.

Curtailment Notification: The Customer will be notified at least four (4) hours in advance of the time the Customer's Load must be curtailed. OPPD will specify that the Customer must not exceed the Firm Demand level during the Curtailment Period. Notification will be given to the Customer by at least 3 P.M. on the day of a curtailment.

Notice of a Curtailment Period will be by email.

OPPD will also follow-up the email with a telephone call to the Customer's designated official contact. The Customer will provide OPPD with the name, telephone number, and email address of the primary and secondary contacts. The inability of OPPD to reach the primary or secondary contacts by telephone will not relieve the Customer of the obligation of curtailing Load when an email notification is sent by OPPD.

Option to Change Curtailment Agreement

Annually, the Customer may make changes to the Curtailment Agreement, if agreed to by OPPD and incorporated into a new or amended Curtailment Agreement. The Customer must notify OPPD before January 1 to make a change for the following calendar year. If the Customer does not notify OPPD by December 31, the Customer will continue to be subject to the same curtailment for the following calendar year.

Rider Schedule Period

~~This Rider Schedule Duration is three (3) years. The terms of any Curtailment Agreements hereunder will expire at their expiration dates. The Rider Schedule Duration, and the term of any Curtailment Agreement hereunder, will be three (3) years. The applicable Curtailment Agreement, at its expiration date, will automatically be renewed for an additional three (3) years, unless cancelled by written notice by either party at least six (6) months before the expiration date.~~

Mandatory Testing

OPPD will, at its discretion, conduct one curtailment test day (maximum 10 hours) per year between June 1 and September 15 for testing and compliance with the Rider Schedule. The curtailment test day can be requested without regard to the Capacity Curtailment provision that the curtailment may only occur when OPPD's projected Load is within 95 percent of the Deficit Load Condition. The hours tested during the curtailment test day will count toward the maximum hours of Capacity Curtailment during a contract year.

Non-Compliance Charge

If a Customer fails to reduce their Load to the Firm Demand level when requested to do so during more than one billing month during the Rider Schedule Duration, including the curtailment test days, the Customer will be subject to the Non-Compliance Charge and:

- Will be removed from this Rider Schedule, or
- The Curtailable and/or Firm Demand level will be adjusted at the discretion of OPPD, provided the resulting Curtailable Demand is not less than 100 kilowatts (consisting of a minimum of 20% of Customer Load) or 500 kilowatts (without restrictions).

Metering

OPPD will provide the necessary Load profile metering equipment and telephone connection to this equipment to administer this Rider Schedule. OPPD will also provide Demand pulses at the metering location for Customer-Owned Demand metering within the Customer's facility.

Special Conditions

OPPD will not be required to accept a level of Curtailable Demand with a Customer greater than OPPD reasonably believes the Customer is capable of providing.

OPPD retains the discretion to limit total participation and total Curtailable Demand under this Rider Schedule.

If OPPD does not require all of the Customers on this Rider Schedule to curtail during a Capacity Curtailment, the Customers that are requested to curtail will be determined at the sole discretion of OPPD. OPPD will rotate these curtailments among all of the Customers on this Rider Schedule.

Customers will not be able to enter into a Curtailment Agreement under this rider for the current calendar year after January 1.

The terms and conditions of the appropriate standard Rate Schedule applicable to the service rendered form a part of this Rider Schedule.

If the Customer elects to operate Emergency Generating Units in parallel with OPPD rather than curtail Load, the interconnection of this equipment with OPPD's system must meet the standards specified in the policy for "Parallel Operation of Customer-Owned Generation Equipment." All required policies can be found at <https://www.oppd.com>.

Service Regulations

Customers under this Rider Schedule must comply with all OPPD Service Regulations.

RIDER SCHEDULE NO. 467E ~~OPTIONS E &~~ 467V

General Service – Emergency/Volunteer Curtailable.
(Currently Unavailable for New Customers)

APPLICABILITY

This Rider Schedule is applicable to all Customers throughout OPPD's Service Area taking service under Rate Schedule Nos. 231, 232, 245, or 250 that may voluntarily curtail a minimum of 100 kilowatts of Demand at one service location when requested by OPPD.

A Customer can only take service under Option E or Option V, not both.

BILLING COMPONENTS

Curtailment Credit Per Event

| <u>Option</u> | <u>Amount</u> |
|---------------|----------------|
| 467E | \$10.25 kW/day |
| 467V | \$5.12 kW/day |

At the end of each billing period, including a Curtailment Period, OPPD will determine the amount of Curtailed Demand during that month.

ADMINISTRATIVE

Curtailment Period

OPPD has the option of declaring a Curtailment Period, whether Emergency or Voluntary, at OPPD's sole discretion during the period of June 1 through September 15.

The duration of any curtailment will not exceed eight (8) hours per day. Curtailment Periods will only occur from 12 P.M. to 10 P.M.

Curtailed Demand

The Demand (a minimum of 100 kilowatts) the Customer agrees to have available for the Curtailment Period when provided with a one-hour notification. This Load can be curtailed and/or served by the Customer's Emergency Generating Units.

OPPD will determine the Customer's Curtailed Demand during each billing period. This will be based on a comparison of the Load that would normally be placed on OPPD's system by the Customer during peak conditions with the Customer's Load observed during the Curtailment Period(s). A review of the Customer's actual Load profiles will be used for this comparison.

Curtailement Notification

Customers will be requested to curtail Demand with not less than one (1) hour notice from OPPD. Curtailement requests are at the sole discretion of OPPD.

OPPD will provide official notification of a curtailment request by email and will follow up on the email notification with a telephone call to the Customer's designated official contact. The Customer will provide OPPD with the name, telephone number, and email address of the Customer's primary and secondary contacts.

The Customer's primary or secondary contacts will indicate acceptance of OPPD's curtailment request by email. This acceptance will be regarded as notification by the Customer of intent to curtail a minimum of 100 kilowatts of Demand for the duration of the Curtailement Period at the price per the applicable Curtailement Credit section of this Rider. The Customer's failure to respond to OPPD's curtailment request before the start of the Curtailement Period will be regarded as an indication by the Customer that they will not curtail.

Schedule Period

This Rider Schedule Duration is one year. The terms of any Curtailement Agreements hereunder will expire at their expiration dates.

~~This Rider Schedule duration is one year. Curtailement Agreements, at their expiration dates, will automatically be renewed for one year unless cancelled by written notice by either party at least sixty (60) days before the expiration dates.~~

Non-Compliance Penalties

Customers failing to curtail a minimum of 100 kilowatts of Demand for the duration of the Curtailement Period after notifying OPPD of their intention to curtail will forfeit any credits and may be removed from the Voluntary Curtaileable Rider at the sole discretion of OPPD. For Emergency Curtaileable Customers, failure to execute a request to curtail will also be considered non-compliance.

Metering

OPPD will provide the necessary Load profile metering equipment to administer this Rider Schedule.

Special Conditions

The terms and conditions of the appropriate standard Rate Schedule apply to the service rendered and form a part of this Rider Schedule.

If the Customer elects to operate Emergency Generating Units in parallel with OPPD rather than curtail Load, the interconnection of this equipment with OPPD's system must meet the standards specified in the policy for "Parallel Operation of Customer-Owned Generation Equipment." All required policies can be found at <https://www.oppd.com>.

Service Regulations

Customers under this Rider Schedule must comply with all OPPD Service Regulations.

RIDER SCHEDULE NO. 467L

General Service -- Curtailable -- Leased Capacity Option
(Currently Unavailable for New Customers)

APPLICABILITY

This Rider Schedule is applicable to all non-Residential Customers throughout OPPD's Service Area that own and operate electric generating facilities that are interconnected with OPPD's distribution facilities, subject to the terms of this Rider Schedule and applicable Leased Capacity Agreement. The Customer's facilities may normally be used to serve part or all of the Customer's electrical Load. The Customer must be capable of providing a minimum of 100 kilowatts to OPPD.

The decision to enter into a Leased Capacity Agreement with any Customer under this Rider Schedule is at the discretion of OPPD based on operational and market conditions. A Customer desiring to provide curtailable capacity to OPPD by utilizing Emergency Generating Units or by reducing Load may be served on Rate Schedule No. 467, but not this Rider Schedule.

This Rider Schedule is not available to those Customer accounts served under Rate Schedule Nos. 355 or 464, ~~355~~.

BILLING COMPONENTS

Monthly Credit:

Capacity Credit:

\$4.60 per kW of Leased Capacity

Energy Credit:

25.00 cents/kWh

Reimbursement for energy generated is applicable only when requested by OPPD during the current billing period or during the performance of test procedures when requested by OPPD.

ADMINISTRATIVE

Definitions

Leased Capacity: Amount of capacity, in kilowatts, of the Customer's generating facilities made available to OPPD, as agreed to under a Leased Capacity Agreement. This amount will be determined through test procedures, as discussed below. This amount will not exceed the Customer's Billing Demand as defined under the regular Rate Schedule, applicable to the service rendered by OPPD, unless the Customer has Nebraska Power Review Board approval for these generating facilities.

Metering

OPPD will determine whether the Customer's generating facility metering is sufficient to monitor energy production. If it is determined that new and/or additional metering is required, OPPD will provide and install this metering at the Customer's cost.

Duration of Generating Facility Operation

The duration of any requested generating facility operation will be for a minimum of four (4) hours and a maximum of ten (10) hours, unless otherwise mutually agreed. These requests will occur year-round from 12 P.M. to 10 P.M., Monday through Friday, excluding NERC Holidays.

Curtailed Notification

The Customer will be notified at least four (4) hours in advance of the time the Customer must operate its generating facility. Notification will be given to the Customer by at least 3 P.M. on the day of a request to operate.

Notice of a request to operate will be by email.

OPPD will also follow-up the email with a telephone call to the Customer's designated telephone contact. The Customer will provide OPPD with the name, telephone number, and email address of the primary and secondary contact. The inability of OPPD to reach the primary or secondary contact by telephone will not relieve the Customer of the obligation of operating the Leased Capacity when an email notification is sent by OPPD.

Rider Schedule Period

~~This Rider Schedule Duration is three (3) years. The terms of any Curtailment Agreements hereunder will expire at their expiration dates. The Rider Schedule Duration, and the term of any Leased Capacity Agreement hereunder, will be three (3) years. The applicable Leased Capacity Agreement, at its expiration date, will automatically be renewed for an additional three (3) year periods unless cancelled by written notice by either party at least six (6) months before the expiration date.~~

Test Procedures

The tests to determine the Leased Capacity will be conducted jointly by OPPD and the Customer. The tests will be performed periodically at the request of either the Customer or OPPD and will be one-hour tests. The Customer will provide the personnel and equipment to perform the tests, and the Customer will record and document the tests. If a change in Leased Capacity is indicated it will be revised accordingly on the first day of the subsequent billing period, and the Customer and OPPD either will enter into a new Leased Capacity Agreement or amend the existing Agreement.

Increase in Leased Capacity

The Customer may install or enlarge its generating facilities, and subject to the approval of OPPD, add to the Leased Capacity made available to OPPD. OPPD will recognize the Leased Capacity as determined by the test procedures specified above, and the Customer and OPPD either will enter into a new Leased Capacity Agreement or amend the existing Agreement.

Non-Compliance Actions

If all, or part, of the Leased Capacity is not available to OPPD during any month, OPPD will have the right to suspend credit for that part of the Leased Capacity which is not available for that month or any subsequent month(s). Upon Customer's demonstration in accordance with the test procedures that all or part of the previously unavailable Leased Capacity is available, OPPD will resume the monthly credit for this capacity during the following month.

Absent this demonstration, OPPD may reduce the amount of Leased Capacity for the remainder of the term of the Leased Capacity Agreement.

In the event all or part of the Leased Capacity, excluding any scheduled maintenance, is not available when OPPD requests that power be generated, OPPD will provide written notice to the Customer of this non-compliance. If two of these notices are sent to the Customer in a two year period, OPPD will have the right to reduce the amount of the Leased Capacity for the remainder of the term of the applicable Leased Capacity Agreement. OPPD will provide the Customer with not less than fifteen (15) days written notice before exercising this right.

Scheduled Maintenance

The Customer will not schedule maintenance of the generating facilities between June 1 and September 15 of any calendar year. The Customer will provide 60-day prior notice of any scheduled maintenance to OPPD. The unavailability of generating facilities for scheduled maintenance will not exceed thirty (30) days.

Special Conditions

OPPD retains the right at its sole discretion to limit participation and the total amount of Leased Capacity it purchases through this Rider Schedule.

The terms and conditions of the appropriate standard Rate Schedule applicable to the service rendered form a part of this Rider Schedule.

Service Regulations

Customers under this Rider Schedule must comply with all OPPD Service Regulations.

RIDER SCHEDULE NO. 469 ~~AND OPTION~~ 469S

General Service – Time-of-Use

APPLICABILITY

This Rider Schedule is applicable to all Customers throughout OPPD's Service Area taking service under Rate Schedule Nos. 231, 232, 245, or 250.

This Rider Schedule cannot be combined with Rider Schedule Nos. 464, 467, or 467L.

Option 469S is not available to Customers with a Billing Demand exceeding 150 kilowatts.

BILLING COMPONENTS

Monthly Rate: \$56.40

Determination of Billing Demand

The Billing Demand for the applicable Rate Schedule will be adjusted as specified by the Determination of Billing Demand section of this Rider Schedule.

For the summer months, defined as the billing months of June through September 15, will be the greater of:

- The highest On-Peak Demand during the current month or the preceding eleven (11) months, or
- 33% of the highest Off-Peak Demand of the current month, or
- The Demand minimum of the applicable Rate Schedule.

For the non-summer months, defined as the billing months of September 16 through May, will be the greater of:

- The highest On-Peak Demand occurring during the preceding June through September 15 time period, or
- 33% of the highest Off-Peak Demand of the current month or preceding 11 months, or
- The Demand minimum of the applicable Rate Schedule.

If the Demand is less than 85% of the Customer's highest 15-minute kilovolt ampere Demand, OPPD will increase the Demand under this Schedule by 50% of the difference between 85% of the kilovolt ampere Demand and the Demand as determined above.

ADMINISTRATIVE

Definitions

On-Peak Demand: The kilowatts of Demand as determined from OPPD's Meter for the 15-minute interval of the Customer's highest use during the billing period. The On-Peak Demand is set only between the hours of 12 Noon and 10:00 PM, Monday through Friday, from June to September, excluding Federal Holidays.

Option 469S -- On-Peak Demand: The kilowatts of Demand as determined from OPPD's Meter for the 15-minute interval of the Customer's highest use during the billing period. The On-Peak Demand is set only between the hours of 2:00 PM and 7:00 PM, Monday through Friday, from June to September, excluding Federal Holidays.

Off-Peak Demand: The kilowatts of Demand as determined from OPPD's Meter for the 15-minute interval of the Customer's highest use during the Off-Peak hours of the billing period. The Off-Peak hours are defined as all hours of the year not defined as on-peak hours.

Special Conditions

OPPD reserves the right to limit total participation and total On-Peak Demand on this Rate Schedule.

Customers taking service on this Rider Schedule are not eligible to be on OPPD's level payment plan.

For a Customer requesting to start on this Rider Schedule during an Off-Peak billing period, October to May, without a previously established On-Peak Demand, the Billing Demand will be determined by OPPD until such time that an actual On-Peak Demand is established. Once an actual On-Peak Demand has been established, the criteria defined in the determination of Billing Demand will apply.

Option 469S: Any Customer that exceeds an On-Peak Demand of 150 kilowatts or an Off-Peak Demand of 457 kilowatts during two billing periods within a twelve (12) month period will not be eligible for this Rider Schedule and will not be able to take service under this Rider Schedule again for a period of twelve (12) months. At the end of the twelve (12) months and OPPD's discretion, if OPPD's annual review of the historical Load indicates the Customer can maintain a maximum Billing Demand of no greater than 150 kilowatts, the Customer may be allowed take service under this Rider Schedule.

Service Regulations

Customers under this Rider Schedule must comply with all OPPD Service Regulations.

SCHEDULE NO. 470

General – Customer Service Charges

APPLICABILITY

This Rider Schedule is applicable to all Customers, Contractors, and Developers for miscellaneous service operations.

BILLING COMPONENTS

Rates:

| | |
|---|----------|
| (470A): Activation Fee | |
| Non-landlords | \$ 22.50 |
| Landlords | \$ 15.00 |
| (470B): Reconnect Service after e Delinquent B ill D isconnect | \$ 75.00 |
| (470C): Disconnect following U nauthorized r Reconnect -- e Each Q eoccurrence | \$115.00 |
| (470D): Field e Collection e Call -- r No d isconnect | \$ 30.00 |
| (470E): Returned P ayment f ee | \$ 30.00 |
| (470F): Line Extension (Residential)-C harges <u>(Residential)</u> | |

Underground service to new apartment complexes will be \$30.00 per dwelling unit. All conduit and pull boxes are to be installed by the Customer.

200 Amp, 120/240 volt, 3-wire underground service in overhead areas will be billed at \$1,050.00 each. The Customer is required to install a secondary conduit from the overhead service pole or pedestal to the Meter.

320 Amp, 120/240 volt, 3-wire underground service in overhead areas will be billed at \$1,050.00 each. The Customer is required to install a secondary conduit from the overhead service pole or pedestal to the Meter.

Costs for underground dips exceeding 320 Amperes will be based on actual costs, plus overheads.

There is no charge to extend underground service to the closest Point of Entrance in Residential developments. Extensions beyond that point will be billed at \$8.25 per foot.

Underground service to new subdivisions of normal configuration will be \$1,500.00 per lot, where such lot is less than one acre, non-refundable. The Customer is required to install a secondary conduit from OPPD’s service pedestal stub-out to the Meter. Effective, January 1, 2017, all underground services to new subdivision lots of normal configuration, where such lot is less than one acre and signed under an Underground Service Agreement before December 31, 2013, the Customer is required to install secondary conduit from OPPD service pedestal stub-out to the Meter.

The charge for temporary single-phase overhead service will be \$326.00, including the activation fee.

The charge for temporary single-phase underground service will be \$130.00, including the activation fee.

Rerouting an existing underground service to accommodate homeowner property changes will be charged at \$19.62 per foot, with a \$200 minimum charge.

- (470G): Farm ~~T~~ransfer ~~s~~witch ~~C~~harges to be ~~a~~Actual ~~C~~ost ~~p~~Plus
~~Q~~verhead (ACPO)
200 ~~A~~mp ~~T~~ransfer ~~s~~witch ~~--~~ _____ ACPO
400 ~~a~~Amp ~~T~~ransfer ~~S~~witch ~~--~~ _____ ACPO

- (470H): Line ~~e~~xtensions and ~~T~~emporary ~~S~~ervice ~~d~~isconnects (~~General Service~~) ~~C~~harges (~~General Service~~)

The underground service charge for new commercial or industrial developments for a primary backbone is \$4,060.00 per acre.

200 Amp ~~--~~ ~~a~~All standard voltages, commercial underground dip for single-phase service will be billed at \$1,975.00 each.

320 Amp ~~--~~ ~~a~~All standard voltages, commercial underground dip for single-phase service will be billed at \$1,975.00 each.

All ~~3~~three-phase underground commercial dips will be charged based on the estimated difference between underground costs vs. overhead costs.

The charge for temporary single-phase overhead service will be \$326.00, including the activation fee.

The charge for temporary single-phase underground service will be \$130.00, including the activation fee.

The charges for temporary service disconnects at the Customer's request will be as follows:

Guaranteed Start Time:

\$250 per hour on Saturdays.

\$375 per hour after 4:00 P.M. and before 9:00 A.M. on Monday through Friday.

\$500 per hour on Sundays and OPPD designated holidays: New Year's Day, Memorial Day, Independence Day, Labor Day, Thanksgiving Day and the day after Thanksgiving, Christmas Eve and Christmas Day or the days these holidays are observed by OPPD.

There is no charge during all remaining hours.

- (470I): ~~The Tenant Attachment Fee~~The tenant attachment fee

The annual tenant attachment fee for ~~the~~ joint use of OPPD's poles is \$~~13.70~~16.00 per attachment ~~per year~~.

- (470K): Miscellaneous Charges

Many of OPPD's Customer service charges are based on actual expenses incurred by OPPD. Examples of these charges include raising power lines for house moves, service

reroutes, temporary relocations of systems during construction, emergency repairs of Customer-~~Q~~owned equipment and, at OPPD's discretion, information requests that require extensive research. All of these charges will be billed at the utility's costs plus overhead.

(470L): Overhead Costs

All charges that are based on actual costs will include the current transmission and distribution overhead rate.

(470M): Special Meter Reading ~~d~~Due to ~~an~~Inaccessible Meter / Non-Automated Meter Read ~~(AMR)~~
Meters

The charge for ~~S~~special Meter reading outside of the normal, automated Meter reading route due to an inaccessible or non-AMR (per reading) is \$50.00

ADMINISTRATIVE

Service Regulations

Customers under this Rider Schedule must comply with all OPPD Service Regulations.

RIDER SCHEDULE NO. 480Residential Surge GuardAPPLICABILITY

~~This Rider Schedule is applicable to Residential Customers having a 200 Amp service and a Meter Socket attached to their Premises, excluding apartments, flats or multi-family units. This Rider Schedule provides Customers with protection against electrical surges at the Premises' wired entryways: OPPD Meter, phone box and cable box.~~

BILLING COMPONENTS

~~Monthly Service Charge: \$6.99 per month~~

~~Additional Line Charge:~~

| <u>Line Type</u> | <u>Amount</u> |
|------------------|-----------------|
| Phone | \$1.50 per line |
| Cable | \$1.50 per line |

~~Customers having equipment located outside of the Premises or needing additional special Arresters will be assessed additional fees based on actual costs and overhead.~~

~~Installation Charge:~~

| <u>Installation Type</u> | <u>Amount</u> |
|--------------------------|---------------|
| Standard | \$20.00 |

~~Additional charges may be assessed for installations requiring an electrician or other expenses.~~

ADMINISTRATIVE

Definitions

~~Arrester: Device to protect electrical equipment from over-voltage transients caused by external (e.g. lightning) or internal (e.g. switching) events.~~

~~Meter Socket: Housing for electrical watt-hour Meter in Residential and commercial buildings.~~

Service Provided

~~OPPD will install three items on the Customer's Premises:~~

- ~~● One Meter Socket Arrester~~
- ~~● One cable TV line Arrester~~
- ~~● One phone line Arrester~~

~~OPPD will provide up to \$500 in warranty coverage for a Customer's electronic equipment, in the Customer's Premises and down line from OPPD's Arresters, against damage caused by direct electrical surges that do not pass through OPPD's Arresters (e.g., due to a direct lightning strike) up to a maximum of \$500 per occurrence. The Customer must provide proof of surge damage in writing from the insurance carrier covering the Premises or from an electronics repair company designated by OPPD.~~

Service Regulations

~~The Customer under this Rider Schedule must comply with all OPPD Service Regulations.~~

~~RIDER SCHEDULE NO. 481~~

~~Commercial Surge Guard~~

APPLICABILITY

~~This Rider Schedule is applicable to all non-Residential Customers throughout OPPD's Service Area taking service under Rate Schedule Nos. 230, 231, and 232.~~

BILLING COMPONENTS

~~Monthly Rate:~~

| <u>Service</u> | <u>Apparent Power</u> | <u>Amount</u> |
|-------------------------|-----------------------|--------------------|
| Single-phase | 40-kVA | \$9.95 |
| Three-phase | 40-kVA | \$12.95 |
| Three-phase | 160-KVA | \$16.95 |

~~\$1.50 per line for any additional phone or cable lines for OPPD approved applications.~~

~~Customers having equipment located outside of the place of business or needing additional special arresters will be assessed additional fees based on actual costs plus overheads.~~

~~Installation Charge:~~

| | | |
|-------------------------|------------------|---------------------|
| Single-Phase | ————— | \$125.00 |
| Three-Phase | ————— | \$275.00 |

~~Additional charges may be assessed for installations requiring an electrician and/or other charges.~~

ADMINISTRATIVE

~~Schedule Period~~

~~The Schedule period is 2 Years. Termination of service within two years does not eliminate the monthly rate. The Customer may be responsible for unbilled charges.~~

~~Service Regulations~~

~~Customers under this Rider Schedule must comply with all OPPD Service Regulations.~~

RIDER SCHEDULE NO. 483

Net Metering Service

APPLICABILITY

This Rider Schedule is applicable to all Customers in OPPD’s Service Area with a Qualified Generator not taking service for the same Qualified Generator under Rider Schedule No. 355. This Rider Schedule is also not available to Customers taking service under Rate Schedule No. 357 – Municipal Service. Energy Storage systems capable of storing OPPD-supplied energy and exports that energy back to OPPD’s system do not qualify.

DG Systems qualifying for Rider Schedule No. 483 shall not exceed 100kW in the aggregate system AC nameplate capacity, as determined by OPPD during the DG application and approval process.

BILLING COMPONENTS

Net Excess Generation Credit:

| <u>Excess Generation</u> | <u>Summer (June 1 – Sept. 30)</u> | <u>Non-Summer (Oct. 1 – May 31)</u> |
|--------------------------|-----------------------------------|-------------------------------------|
| Per kWh | 4.00 cents/kWh | 3.52 cents/kWh |

Determination of Customer Bill

The Customer can use Qualified Generator electrical output to supply all or a portion of the Customer’s Demand and deliver the surplus to OPPD. At the end of the billing period, the net flow of the energy between the Customer and OPPD will be calculated, and the Customer’s bill will be based on the net energy flow as follows:

- *Net flow from OPPD to the Customer:* The Customer will be billed for the net use at the monthly rate and based on the provisions included in the Customer’s applicable Rate Schedule.
- *Net flow from the Customer to OPPD:* The Customer will be billed for the non-energy charges based on the provisions included in the Customer’s applicable Rate Schedule and will receive a bill credit for the Net Excess Generation. If the bill credit is greater than the current month’s billing, the Customer will carry an account credit balance for use in future months. At the end of the calendar year, any excess bill credits associated with Net Excess Generation will be paid to the Customer.

ADMINISTRATIVE

Definitions

Net Excess Generation: Production of more electrical energy than is consumed by the Customer during a billing period.

Special Conditions

Customers are responsible for Qualified Generator equipment and services required for interconnection. If desired, Customers are responsible for metering to measure the energy produced by the Customer’s Qualified Generator. The Customer will maintain ownership of renewable energy credits associated with a Qualified Generator.

Customers taking service on this Rider Schedule are not eligible for OPPD's Level Payment Plan.

OPPD will provide, at no additional cost to the Customer, metering that is capable of measuring the flow of electricity in both directions. This equipment may be a single bidirectional Meter, smart Meter, two Meters, or another Meter configuration that provides the necessary information for service under this Rider Schedule.

Service Regulations

Customers under this Rider Schedule must comply with all OPPD Service Regulations.

RIDER SCHEDULE NO. 484

Supplemental Distribution Capacity

APPLICABILITY

This Rider Schedule is applicable to all Customers throughout OPPD's Service Area taking service under Rate Schedule Nos. 231, 232, 245, 250 or 357.

BILLING COMPONENTS

A monthly charge based on the style of switch required to serve the Customer's Load:

| <u>Switch Style Charge*</u> | <u>Amount</u> |
|----------------------------------|---------------|
| PMH style ATO | \$665.00 |
| Upright Gear Non-Split Bus | \$645.00 |
| Upright Gear Split Bus-2 Sources | \$1,885.00 |

**If applicable, this can be divided among multiple Customers. Please refer to Special Conditions for more information.*

Distribution System Capacity Charge of \$1.41 per kilowatt of Demand

Demand will be determined from the "Determination of Demand" section of the applicable Rate Schedule.

OPPD will adjust the Demand when OPPD is requested to provide an additional source(s) of distribution capacity for partial Customer Load.

Minimum Monthly Bill

The Minimum Bill from the regular Rate Schedule applicable to the service rendered, plus the charges for the ATO Switch Charge and the Distribution System Capacity Charge, as applicable.

ADMINISTRATIVE

Rider Schedule Period

This agreement remains in place five years, with automatic renewal for additional one-year periods, as long as OPPD continues to provide the service as requested by the Customer under this Rider Schedule.

Service Provided

The Customer may request OPPD to provide an additional source(s) of distribution capacity to serve all or part of the Customer's Load as a contingency service when the normal distribution capacity is unavailable. OPPD may provide a manual throw-over switch for this service, or OPPD will provide an automatic throw-over (ATO) switch if the Customer requests the ATO. The ATO Switch Charge will not apply if a manual throw-over switch is provided.

Such additional source(s) of distribution capacity will be provided at OPPD's sole discretion if practical and safe, as determined by OPPD. Such service will not be provided if it would create an unusual hazard or interfere with the service provided to other Customers.

Disconnect Charge

Termination of service by a Customer at any time within the initial period under this Rider Schedule will not suspend or eliminate the ATO Switch Charge or the Distribution System Capacity Charge, specified above, for the months for which this service is terminated and will be applied to the final bill.

Special Conditions

All ATO switches for Customers will be supplied, installed, and maintained by OPPD.

If an ATO switch serves more than one Customer that has requested such service, the ATO Switch Charge will be divided equally among the Customers based on the number of Customers receiving such service. This calculation will be adjusted monthly if existing Customers discontinue service or if new Customers initiate service through this ATO switch.

Any investment required to connect the switch to the alternative distribution capacity source will be charged in accordance with OPPD's internal policies, including investments for new connections or upgrades to existing connections.

Service Regulations

Customers under this Rider Schedule must comply with all OPPD Service Regulations.

~~RIDER SCHEDULE NO. 490~~

~~Economic Development (currently unavailable)~~

~~APPLICABILITY~~

~~Electric Service under this Economic Development Rider Schedule (ECD) is available to Customers who:~~

- ~~• Have agreed to locate new facilities or expand existing facilities in OPPD's Service Area,~~
- ~~• Are receiving economic development benefits under the Nebraska Advantage Act, and~~
- ~~• Meet the requirements specified in this Rider Schedule.~~

~~Service under this ECD Rider Schedule is available subject to the Nebraska Revised Statutes Section 70-655(2).~~

~~This Rider Schedule applies to a new Load associated with permanent service to new facilities or expanded Load related to the expansion of existing facilities. New or expanded Load at existing facilities must be demonstrated to serve new facilities and equipment and must be incremental to the facility's most recent historical Demand and energy at the time the Customer submits an application for service under this Rider Schedule.~~

~~This Rider Schedule does not apply to Loads associated with:~~

- ~~• New or expanded facilities that are under construction or otherwise committed to operation before the effective date of this Rider Schedule, or~~
- ~~• Which have been shifted from one existing Point of Delivery on OPPD's system to another Point of Delivery, or~~
- ~~• That existed before the Customer entering into an Economic Development Service Agreement (EGDSA) as outlined in this Rider Schedule with OPPD.~~

~~Qualifications~~

~~The Customer's new or expanded Load must:~~

- ~~• Qualify for and be delivered under Rate Schedules Nos. 232, 245, or 250, and~~
- ~~• Have 2,500 kilowatts of Demand or greater during each monthly billing period, and~~
- ~~• Have a minimum monthly billing period Load Factor of 60% for the new or expanded Load.~~

BILLING COMPONENTS

~~Economic Development Discount Calculation~~

~~OPPD will calculate an ECD discount percentage annually by February 1. This discount will be applied to all service agreements entered into after this date.~~

~~The discount percentage will be calculated for each applicable Rate Schedule for the discount period as follows:~~

- ~~• The lowest resulting Rate Schedule discount percentage will be applied to Customers served under this Rider Schedule, regardless of Rate Schedule. In the event the resulting ECD discount percentage on a levelized basis is less than 2%, OPPD will not enter into new ECDSAs.~~
- ~~• During the discount period, the minimum monthly Billing Demand will equal at least 75 percent of the maximum Demand specified in the ECDSA.~~
- ~~• Upon completion of the discount term, the Customer will be required to pay for a minimum monthly bill during the non-discounted period as outlined in the ECDSA. Minimum Billing Demand will be 100 percent of the Customer's average monthly Billing Demand occurring in the last twelve (12) months of the discount period.~~

~~Application of the ECD Discount~~

~~The ECD Discount will be applied as a percentage discount to the portion of the bill associated with the general rates for the Customer's new or expanded Load, up to the maximum Load specified in the ECDSA, and will not apply to the FPPA (Rate 461), other Rate Schedules, and/or optional service charges.~~

~~If, in any given monthly billing period, the Customer does not meet the minimum Load and energy requirements as outlined in the ECDSA, the Customer will be billed at the rates shown on the applicable general Rate Schedule and this Rider Schedule will not apply.~~

~~The discount will not apply to a Customer's Load exceeding the maximum monthly Load specified in the ECDSA. Monthly Billing Demands above the maximum Billing Demand specified in the ECDSA will be billed at the full Demand charge associated with the applicable Rate Schedule. The ratio of undiscounted Billing Demand to total Billing Demand in the associated monthly billing period will be applied to total energy taken by the Customer in that billing period to determine the amount of energy that will not be discounted.~~

~~Available Capacity and Discount Availability~~

~~The capacity available to Customers under this Rider Schedule is limited to surplus capacity that OPPD projects will be available. The available capacity will be updated annually before June 1 and will be recalculated throughout the following twelve (12) month period to reflect capacity committed to new ECD Customers under this Rider Schedule. If and when OPPD no longer has surplus capacity, service to new Customers under this Rider Schedule will not be available and OPPD will not enter into new ECDSAs.~~

~~Service under this Rider Schedule is based on the discount percentage, calculated annually under this Rider Schedule, equaling or exceeding 2%.~~

ADMINISTRATIVE

Definitions

~~Load Factor: The Customer's new or expanded energy use for the current billing period, divided by the quantity of the Customer's new or expanded Power Factor corrected Demand during the current billing period, multiplied by the number of days in the current billing period, multiplied by 24 hours.~~

Economic Development Application and Service Agreement

~~To be considered for service under this Rider Schedule, Customers must submit an ECD Application. Depending on OPPD's projected surplus capacity, and OPPD's then current discount calculation as provided for in this Rider Schedule, OPPD may accept all or a portion of the proposed Load for service under this Rider Schedule or may reject the Application.~~

~~If the Application is accepted, the Customer and OPPD must enter into an Economic Development Service Agreement (ECDSA) for service under this Rider Schedule. The ECDSA will include but not be limited to the following:~~

- ~~• Terms of the agreement,~~
- ~~• Maximum and minimum monthly Demand and energy requirements under this Rider Schedule,~~
- ~~• Discount percentage(s),~~
- ~~• Billing and metering requirements and procedures and~~
- ~~• Minimum bill requirements~~

Schedule Period

~~The term of service under this Rider Schedule will be a minimum of three (3) years and a maximum of five (5) years and is based on the Customer agreeing to take service at a non-discounted rate for an additional number of years equal to the term of discounted service under this Rider Schedule.~~

Ramp up provisions

~~Discounts under this Rider Schedule will begin no sooner than when the Customer's new or expanded Load reaches the minimum Demand and energy requirements as outlined in the ECDSA.~~

~~If the Customer fails to meet the minimum Demand and energy requirements within 18 months of the date of initiating permanent service:~~

- ~~• The term of the respective discount and non discount periods specified in the ECDSA will each be reduced by one month for each month between 18 and 24 months that the Customer's Load and energy requirements have not been met, and~~
- ~~• The ECD Discount for the remaining term of the ECDSA will be subject to change to the lower of the then current discount (for any new ECDSAs) or the discount included in the original ECDSA between the Customer and OPPD.~~

~~Termination~~

~~If the Customer's new or expanded Load has not reached the minimum Demand and energy requirements as outlined in the ECDSA within 24 months of the date of the signed agreement, the Customer will no longer be eligible for a discount under this Rider Schedule.~~

~~If, over the course of any 12 months, the Customer does not maintain the minimum annual average Demand and energy requirements as outlined in the ECDSA, the Customer will no longer be eligible for service under this Rider Schedule. For each of the remaining months of the ECDSA, the Customer's minimum monthly Billing Demand will equal 100 percent of the maximum Demand specified in the ECDSA.~~

~~Limitations~~

~~At any time during the discount period when, in OPPD's sole discretion, there has been a significant generation and/or market event that significantly impacts OPPD's production costs such that the ECD Discount included in the ECDSA is determined to no longer comply with the production cost provisions of the Nebraska Revised Statutes, OPPD reserves the right to recalculate the Economic Development Discount rate and reestablish the recalculated discount as the discount in the ECDSA. In this case, upon the Customer's request, the ECDSA may be revised to reflect a shortened term. In any case, the Customer will take and be required to pay for non-discounted service for the same amount of time the Customer took discounted service under this Rider Schedule.~~

~~If, in OPPD's opinion, the ECD discount will not significantly influence the Customer's decision to create or add Load in OPPD's Service Area, OPPD reserves the right to reject the ECD Application.~~

~~Special Conditions~~

~~This Rider Schedule is not available to a new Customer resulting from a change in Ownership of a new or existing facility. However, at OPPD's sole discretion, if a change in Ownership occurs after the Customer enters into an ECDSA for service to such facility, the successor Customer may have the option to fulfill the balance of the agreement as long as the subsequent Customer is receiving benefits under the Nebraska Advantage Act and has Load characteristics that are similar to the existing Customer's Load. In this case, the subsequent Customer will be obligated to fulfill both the remaining discount and non discount terms of the original ECDSA.~~

~~Service Regulations~~

~~Customers under this Rider Schedule must comply with all OPPD Service Regulations.~~

RIDER SCHEDULE NO. 499

Green Sponsorship—GSP

APPLICABILITY

~~This Rider Schedule is applicable to all Customers throughout OPPD's Service Area taking service under Rate Schedule Nos. 232, 245, or 250 and who adequately demonstrate that they will purchase a minimum 10,000,000 kilowatt hours of energy annually from OPPD.~~

~~Customers will be eligible to participate in the process to purchase Environmental Attributes (EAs) for amounts of not less than 10,000,000 kilowatt hours and not more than the Customer's annual energy usage.~~

~~This Rider Schedule applies to Customers who wish to achieve environmental sustainability goals by purchasing from OPPD exclusive EAs associated with renewable energy that is either from facilities owned by OPPD or procured by OPPD through a Purchased Power Agreement (PPA).~~

BILLING COMPONENTS

~~Green Sponsorship Charge (GSP Charge):~~

~~The monthly GSP Charge will be determined as follows: *Monthly*~~

~~$GSP\ Charge = (kWh * AWP) - (kWh * SPP\$)$ Where:~~

~~AWP = Gross EA price per kilowatt hour. The AWP will include all costs associated with the additional renewable resources. In addition to the cost of renewable generation, the AWP will include all new transmission costs needed to transmit the renewable energy to market, integration costs, and administration costs. The price will have escalation terms that will cover future variable cost escalation (e.g., increase in PPA costs or operating costs.)~~

~~kWh = The monthly kilowatt hour equivalent produced by generator for which the Customer has contracted.~~

~~$SPP\$$ = The average monthly net of all revenues and costs assessed by the Southwest Power Pool Integrated Market at the Contracted Renewable Facility settlement locations divided by the total kilowatt hours to determine average SPP\$ per kilowatt hour. All revenues and charges will be allocated by settlement date and will include but will not be limited to the day-ahead, real time, and distribution charges such as losses, revenue neutrality and make-whole payments.~~

~~Monthly GSP Charge may be a charge or credit depending on the monthly net of all revenues and costs assessed by the SPP Integrated Market.~~

~~Determination of the GSP Bills~~

~~The monthly GSP charges and credits are independent and will not affect the calculation of any bills received for services from OPPD.~~

ADMINISTRATIVE

~~Definitions~~

~~*Environmental Attributes (EAs): All current and future attributes of an environmental nature, including but not limited to allowances, certificates, emission credits and all other credits, offsets, green tags and all other tags, and all similar rights issued, recognized, created or otherwise resulting from the generation of energy using wind, sunlight, water, biological processes or geothermal heat sources. EA's include, but are not limited to, those attributes that are created or recognized by regulations, statutes, or other action by a governmental authority and include, but are not limited to, those attributes that can be used to:*~~

- ~~• Claim responsibility for the reduction of emissions and/or pollutants.~~
- ~~• Claim Ownership of emission and/or pollutant reduction rights.~~
- ~~• Claim reduction or avoidance of emissions or pollutants.~~
- ~~• Claim compliance with a renewable energy standard or renewable portfolio standard.~~

~~Special Conditions~~

~~The terms and conditions of the appropriate Rate Schedule apply to the service rendered.~~

~~Customers taking service under this Rider Schedule are purchasing EA's. Rights and/or claims to capacity, energy, and /or Production Tax Credits from renewable energy facilities are not being transferred or sold under this Rider Schedule.~~

~~OPPD reserves the right to maintain a renewable portfolio based on market conditions and its ability to integrate the renewable energy into its portfolio on an economic basis.~~

~~Any renewable energy facilities developed to meet the Customer's requests under this Rider Schedule will be located in Nebraska, unless OPPD and the Customer requesting EA's mutually agree to negotiate a power purchase agreement for a renewable energy facility in another state located within the SPP territory.~~

~~Available Renewable Energy Credits~~

~~OPPD will determine the need to acquire new resources to meet the obligation to serve retail Customers. The evaluation will include the determination of the amount of additional renewable resources required to meet its own portfolio needs and EA Customer sponsorship requests. Customer sponsorship requests will be determined by an application process for Customer interest in purchasing EAs.~~

~~In acquiring new resources, OPPD will determine the capacity to provide renewable resources to meet Customer requests beyond OPPD's renewable needs. OPPD would then seek applications from Customers to register for the purchase of EAs associated with such resources.~~

~~At that point, OPPD would negotiate with qualifying Customers that apply for the service to arrange a long term Green Sponsorship Sales Agreement (GSSA) with the Customer that is in the best interest of all parties and conforms with all current regulations required to purchase, build and/or contract for attributes in Nebraska and/or within the Southwest Power Pool (SPP). If, in the end, aggregate Demand for the EAs exceeds availability, the EAs will be apportioned on a fair and reasonable basis among parties meeting the requirements of this Rider Schedule.~~

~~EAs are not available for OPPD's existing renewable resources or those to which OPPD has previously contracted for renewable energy. OPPD does not guarantee the availability of renewable energy facilities or approval of any projects by OPPD's Board of Directors or any regulatory authority.~~

~~Service Regulations~~

~~A Customer under this Rider Schedule must comply with all OPPD Service Regulations.~~

RIDER SCHEDULE NO. 500

Community Solar

APPLICABILITY

This Rider Schedule is applicable to all Customers throughout OPPD's Service Area taking service under any Retail Rate Schedule.

BILLING COMPONENTS

Refundable Enrollment Deposit:

Residential Customers on Rate Schedules 110 and 115 will be charged a \$100 refundable enrollment deposit to begin participation under this rate Rider Schedule. All other Customer rates will be assessed a refundable enrollment deposit based on the greater of \$100 or a combination of the average usage of the rate class and the Community Solar subscription level as agreed upon in the Community Solar Service Agreement.

OPPD will refund this deposit if the Customer participates in this rate Rider Schedule for:

- Five (5) consecutive years for Rate Schedules 110 and 115
- Ten (10) consecutive years for Rate Schedules 226, 230, and 231
- Twenty (20) consecutive years for Rate Schedules 232, 245, 250 and 261M

If a Customer elects to end participation under this rate Rider Schedule before the above requirements, the refundable enrollment deposit will be forfeited.

Community Solar Charge:

Community Solar Charge = Market Based Value of Solar * Subscription Level

ADMINISTRATIVE

Definitions

Subscription Level: Quantity of Community Solar Share(s).

Community Solar Share: 100 kWh per month.

Market-Based Value of Solar: Calculated on a per-share cost and is defined as the interconnected cost of the community solar Purchased Power Agreement (PPA), less the actual hourly community solar production from the prior year valued at the corresponding Southwest Power Pool (SPP) day-ahead hourly prices, less the accredited capacity assigned by SPP to the community solar facility(s) valued at the annual levelized value of OPPD's next marginal generation capacity.

Special Conditions

Service under this Rider will be limited to the aggregate amount of generation available by all community solar PPAs.

The Community Solar Service Agreement may be revised periodically by OPPD.

The Community Solar kWh Charge will be updated annually, as stated in the Community Solar Service Agreement.

Service Regulations

Customers under this Rider Schedule must comply with all OPPD Service Regulations.

Pre-Committee Agenda

SYSTEM MANAGEMENT & NUCLEAR OVERSIGHT
PRE-COMMITTEE MEETING
WEBEX VIDEOCONFERENCE
November 6, 2024, 4:00 – 5:30 P.M.

1. Safety Briefing (Pohl – 2 min)
 - a. Objective: Promote awareness of current safety focus.
2. Prior Month Pre-Committee Action Items (Pohl – 1 min)
 - a. Objective: Review and confirm prior pre-committee action items have been completed.
3. **Acquisition of Property Rights for North Douglas County Transmission Project (Focht – 5 min)
 - a. Objective: Create committee awareness of request for Board Action.
4. **Advanced Metering Infrastructure (AMI) Program Update (Underwood – 5 min)
 - a. Objective: Provide key milestones and a progress update for the AMI program.
5. New Generation Project Updates (Underwood - 15 min)
 - a. Objective: Provide project updates for natural gas generation projects.
6. Nebraska City Station New Ash Landfill Project Update (Via – 10 min)
 - a. Objective: Provide project updates for the Nebraska City Station New Ash Landfill.
7. Major Projects Organization (Via – 30 min)
 - a. Objective: Provide an overview of the Major Projects Organization and associated program portfolio.
8. Master Facilities Program Update (Langel – 20 min)
 - a. Objective: Provide key milestones and progress updates for the Master Facilities Program and associated major projects.
9. Board Work Plan – Systems Committee Items (Focht – 1 min)
 - a. Objective: Review current board work plan.
10. Summary of Meeting (Pohl – 1 min)
 - a. Objective: Summary of committee action items.

** Indicates topic that will be included on all committee meeting agenda.

ITEM

North Douglas County Transmission Project

PURPOSE

Provide introduction and scope of work for the North Douglas County Transmission Project

FACTS

- a. Omaha Public Power District is constructing, expanding and rebuilding its transmission network in north Douglas County in three (3) segments.
- b. These transmission improvements will enable OPPD to serve increasing customer demand for electricity, provide additional capacity for economic development growth, support future electrical system enhancements and maintain reliability.
- c. Internal routing study was performed, local leaders meetings and public open houses were facilitated to inform and engage the community. Public involvement will continue throughout the project.
- d. Discussions with directly impacted landowners to begin November/December 2024.
- e. Construction commences Summer 2026 and completed by December 2027.

North Douglas County Transmission Project Update

All Committees Presentation

November 19, 2024

Agenda

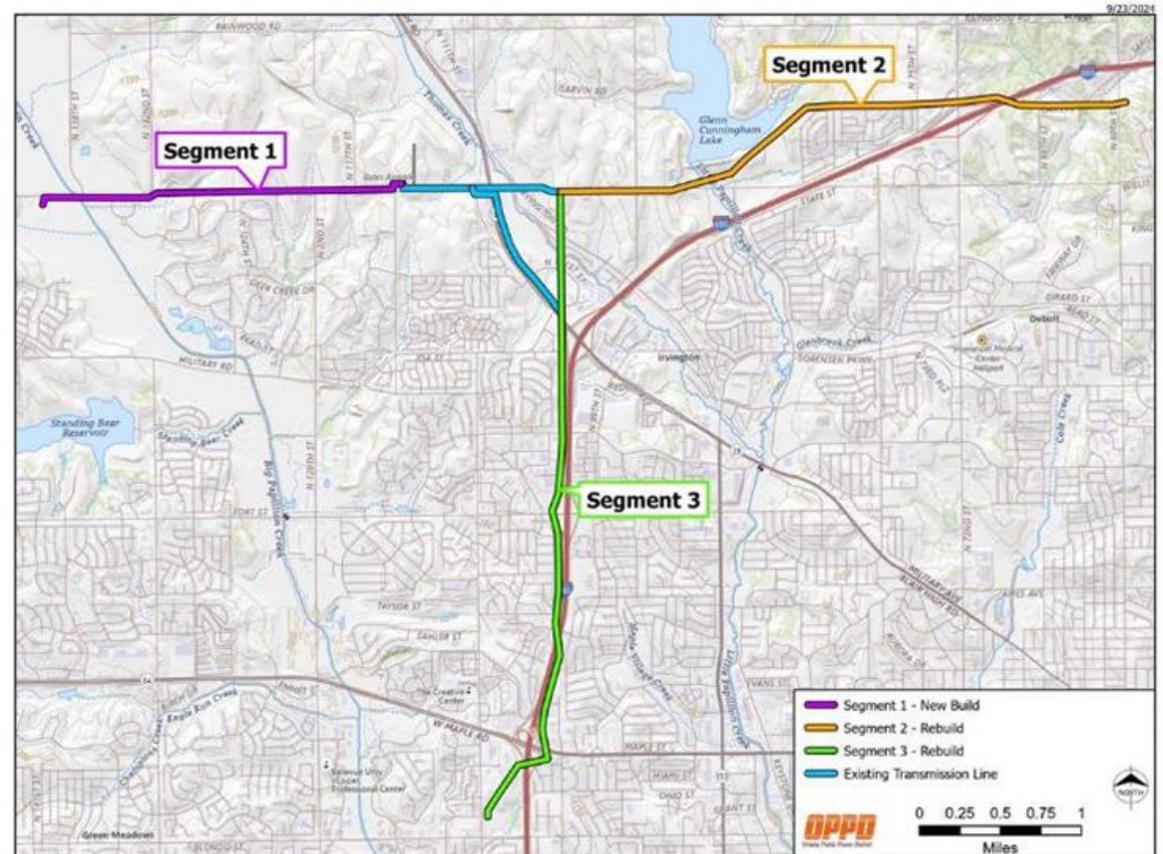

- About the Project
- Structure types
- Project Schedule
- Segments Review
- Easements and Right of Way
- Engagement
- Next Steps

Purpose and Need

North Douglas County Transmission Project

- Transmission Improvements are needed in north Douglas County to accommodate the growing demand for electricity across all customer categories.
- Transmission capacity increase to support additional sources of power generation, future enhancements and to maintain reliability.
- This project supports the long-range planning of OPPD's balanced portfolio of energy-generation resources.

North Douglas County Transmission Project

Structure Comparison

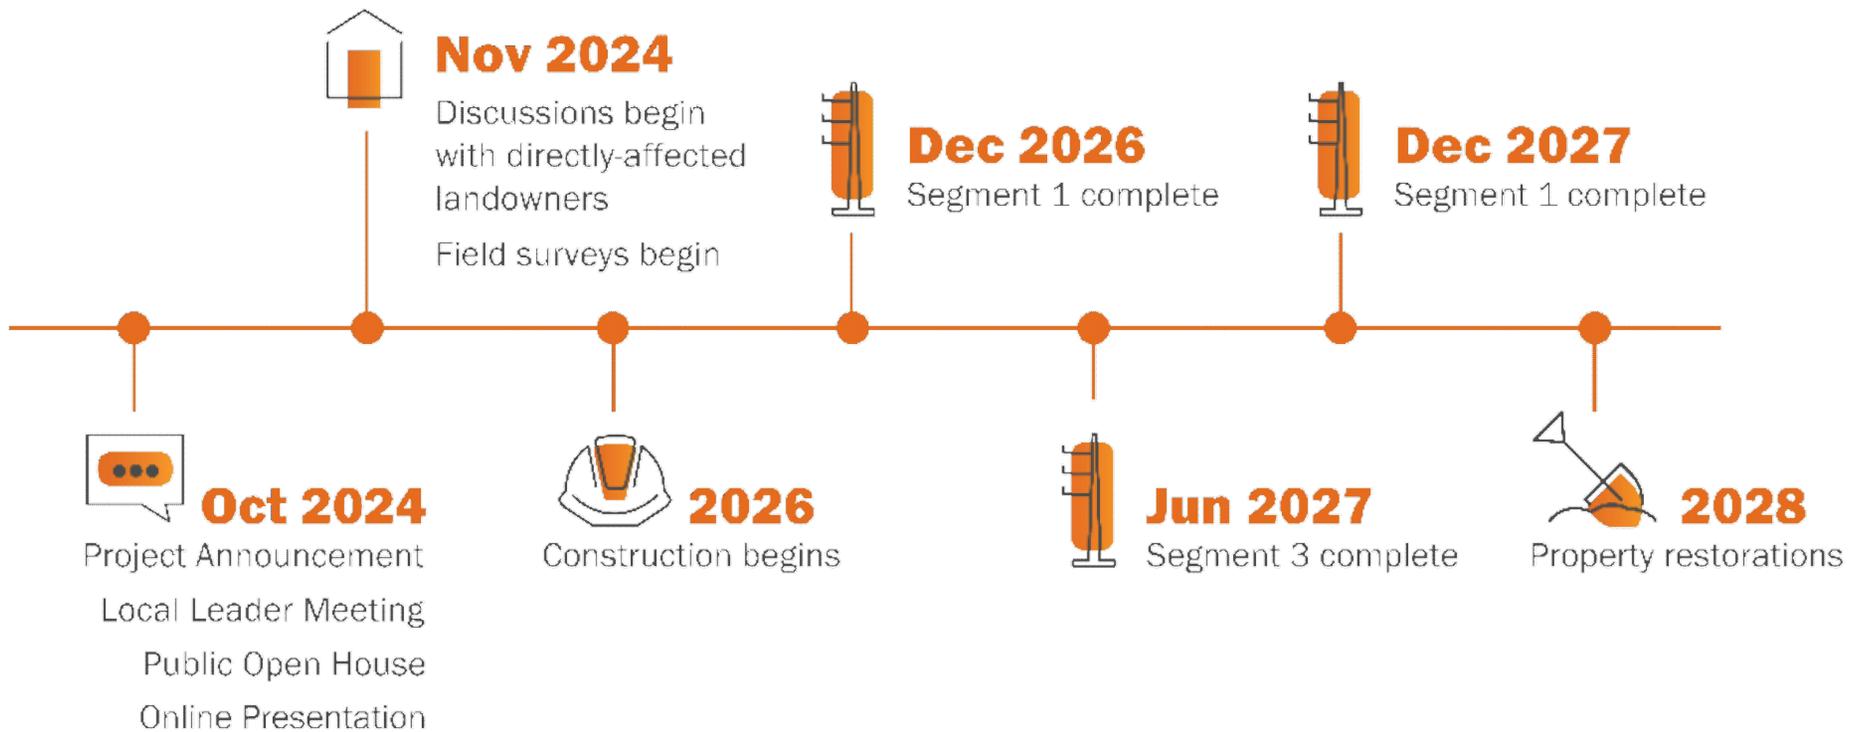

Lattice Tower

Monopole

Schedule

Segment 1 – New Transmission Line

- Build a new, 2.3-mile, double-circuit transmission line between 114th and 140th & State streets.
- OPPD has selected a final route to expand its transmission network west along State Street in north Douglas County.
- OPPD will work with property owners affected by this new infrastructure to finalize alignment and pole locations along the route.

Segment 2 – Rebuild

- Rebuild an existing, double-circuit transmission line between 101st & State and 60th & Garvin streets.
- Affected stakeholders and neighbors will be notified about OPPD's plans.
- OPPD remains committed to our promise to keep the public informed, listen and acknowledge concerns, and work toward resolving property issues.
- Transmission lines are generally expected to be rebuilt within existing easements.

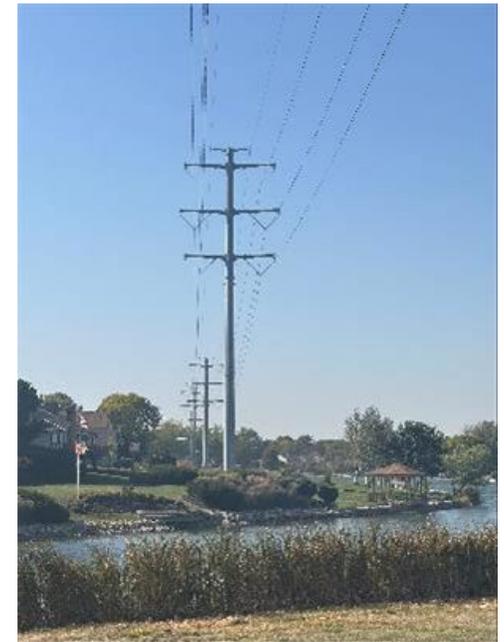

Segment 3 - Rebuild

- Rebuild an existing, double-circuit transmission line along Interstate 680 from 108th & Blondo to 101st & State streets.
- Affected stakeholders and neighbors will be notified about OPPD's plans.
- OPPD remains committed to our promise to keep the public informed, listen and acknowledge concerns, and work toward resolving property issues.
- Transmission lines are generally expected to be rebuilt within existing easements.

Easements

- Routing and siting review
- Rights and restrictions review
- OPPD will work with affected landowners to address easement questions and construction access
- Public power promise

Engaging Community

Inform / Consult level of Public Involvement from IAP2

Local Leader Meeting – October 17th

- 35 local leaders invited to attend a project briefing and Q&A
- 5 local leaders attended

Open House – October 24th

- 3362 residents received 2 mailer notifications (6724 total mailers)
- 46 people attended the open house
- 20 comment cards received

Online Public Meeting October 28th

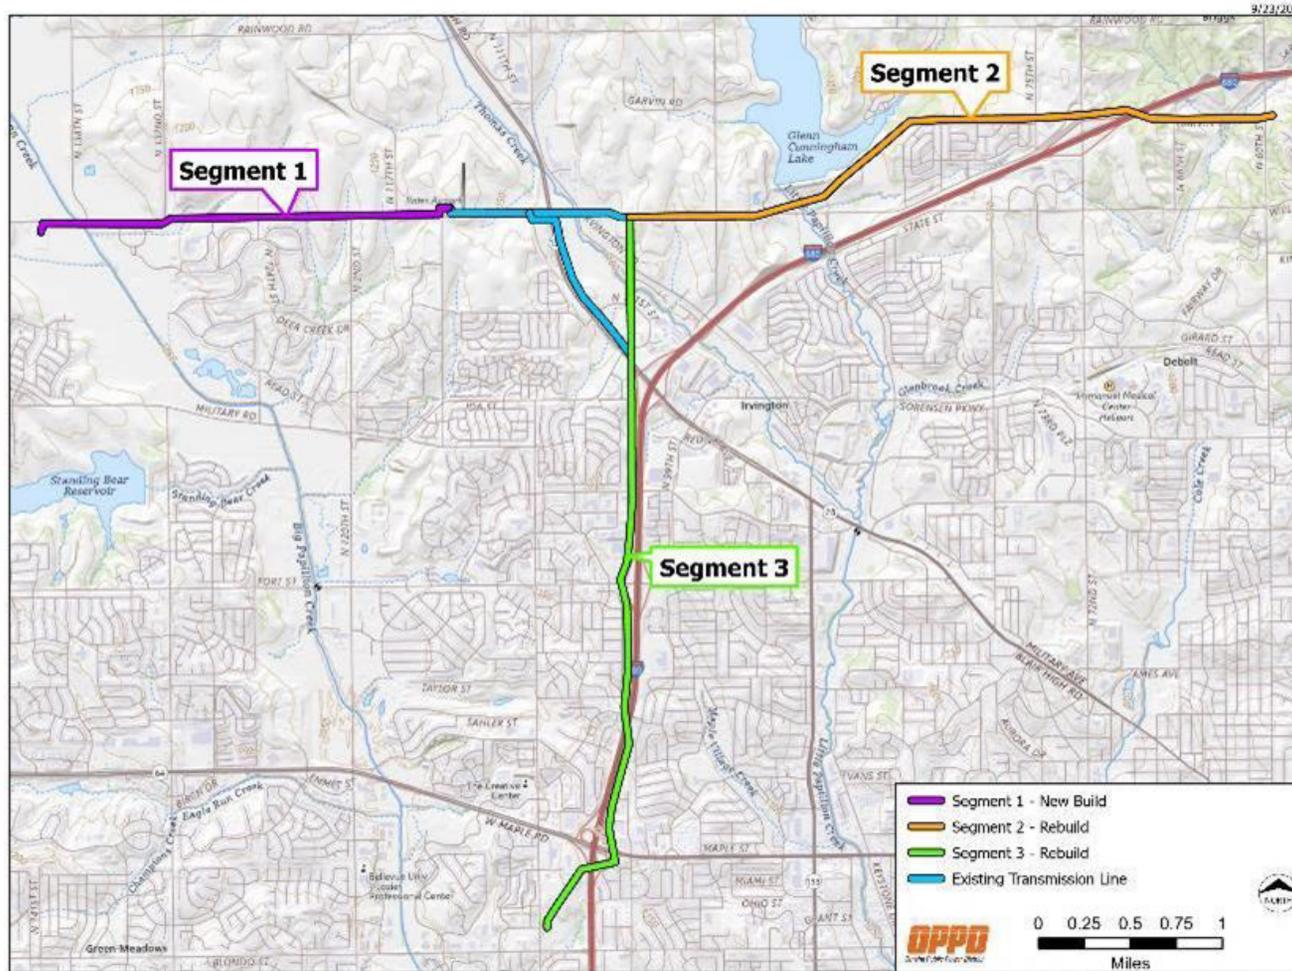

Residents and local leaders were also invited to attend an online public meeting if they could not attend the open house.

8 people attended the event

Project is currently on OPPDCommunityConnect.com

Q&A

North Douglas County Transmission Project

Action Item

BOARD OF DIRECTORS

November 19, 2024

ITEM

Acquisition of Property Rights for Utility Operations Infrastructure Projects

PURPOSE

Authorize use of eminent domain as necessary to acquire permanent and temporary easements for electric transmission facilities on approved projects for the North Douglas County Transmission Project (NDCTP) which include a new transmission line along State Street between 114th and 140th Streets (Segment 1), transmission line rebuild between 101st and State Streets and 60th and Garvin Streets (Segment 2), and a transmission line rebuild along Interstate 680 from 108th & Blondo to 101st and State Street (Segment 3). The transmission improvements will provide more reliable and resilient power to our service territory and will enhance the power grid's ability to withstand physical and weather-related threats. The project will support new infrastructure that is part of OPPD's long-range plan for a balanced generation portfolio.

FACTS

- a. This requested eminent domain authorization covers property rights that need to be acquired for Utility Operations infrastructure to connect substations to the transmission grid, enhance system resiliency and reliability, and support load growth.
- b. As part of Segment 1, Omaha Public Power District (OPPDP) is planning to build a new, approximately 2.3-mile, double-circuit (161/345-kilovolt) transmission line along State Street between 114th and 140th Streets.
- c. As part of Segment 2, Omaha Public Power District is planning to rebuild 3.7-miles of an existing double-circuit (161-kilovolt) transmission line into a new double-circuit (161/345-kilovolt) transmission line between 101st & State streets and 60th & Garvin streets.
- d. As part of Segment 3, Omaha Public Power District (OPPDP) is planning to rebuild approximately 4.1-miles of an existing double-circuit (161-kilovolt) transmission line into a new double-circuit (161/345-kilovolt) transmission line along Interstate 680 from 108th & Blondo to 101st and State Street.
- e. Permanent easements as needed are required for the construction, operation and maintenance of transmission facilities. Temporary easements may be required for pre-engineering survey access as well as temporary construction needs.
- f. There has been Public Involvement throughout routing and siting. Engagement will continue with landowners through the property rights acquisition process.
- g. OPPD will commence negotiations to voluntarily acquire the necessary property rights for the transmission facilities following appropriate notices being sent to landowners and after required public hearing(s).

- h. OPPD will undertake reasonable efforts to voluntarily acquire the necessary property rights through good faith negotiations. However, the use of eminent domain may be necessary if voluntary agreement cannot be achieved by the District and landowners.
- i. Management will report the filing of eminent domain actions to the Board.
- j. This requested authorization extends through the duration of the North Douglas County Transmission Project. Additional authorizations after that date for the covered projects will be requested, as needed.

ACTION

Authorization by the Board of Directors to commence eminent domain proceedings for permanent and temporary easements as needed on parcels not acquired voluntarily after all reasonable efforts have been made.

- Resolution

NORTH DOUGLAS COUNTY TRANSMISSION PROJECT ROUTE MAP

North Douglas County Transmission Project

OPPD is **constructing, expanding** and **rebuilding** its transmission network in north Douglas County in **three segments**.

SEGMENT

1 A new, 2.3-mile, double-circuit transmission line will be built along **State Street** between **114th** and **140th** streets.

SEGMENT

2 An existing double-circuit transmission line will be rebuilt between **101st & State** streets and **60th & Garvin** streets.

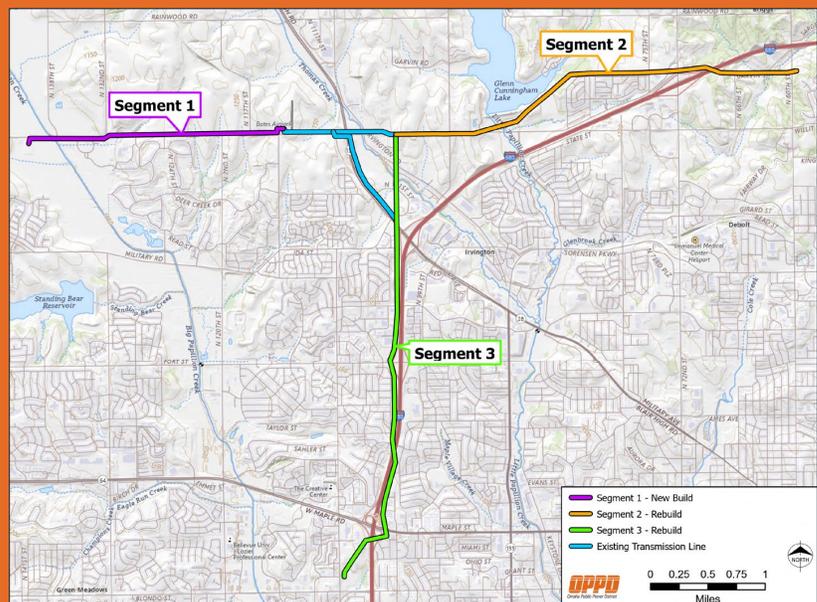

SEGMENT

3 An existing double-circuit transmission line along **Interstate 680** will be rebuilt from **108th & Blondo** streets to **101st & State** streets.

We promise to **keep you informed**, to **listen** and **acknowledge** your comments, and explain existing easements.

OPPD must improve its electric transmission network in north Douglas County to serve increasing customer demand for electricity across all customers, provide additional capacity for economic development, support future electrical system enhancements, and maintain reliability. Staying ahead of increasing customer demand is vital as society becomes more dependent on technology-driven energy consumption.

OPPD is experiencing unprecedented usage growth, estimated at an average of 100 megawatts a year for at least the next decade. Transmission improvements will provide more reliable and resilient power to our service territory and will enhance the power grid's ability to withstand physical and weather-related threats. The project will support new infrastructure that is part of OPPD's long-range plan for a balanced generation portfolio.

Scan the code using your smartphone or visit [OPPDCommunityConnect.com/north-douglas-county-transmission-project](https://oppdcommunityconnect.com/north-douglas-county-transmission-project) to get the latest project information and updates. This interactive site also provides a place for you to comment or ask questions of our project team.

A dedicated project information line is also available by calling **402-262-0643**.

Project Timeline

- STAGE 1** **October 2024**
Project Announced

- STAGE 2** **November 2024**
Discussions begin with directly affected landowners
Field surveys begin
- STAGE 3** **2026**
Construction begins
- STAGE 4** **December 2026**
Segment 1 complete
- STAGE 5** **June 2027**
Segment 3 complete
December 2027
Segment 2 complete

Replacing Lattice Towers with Monopoles

The improved transmission network will be carried mostly on steel monopoles, which can be between 160 feet and 190 feet tall and spaced about 800 feet apart. That's more than two-and-a-half football fields between poles. They will replace lattice towers along much of the existing segments, which range from about 100 feet to 140 feet tall and are spaced about 700 feet to 1,100 feet apart.

Replacing large lattice towers with monopoles will leave a smaller footprint on properties. However, new poles may be installed during this process in places that previously did not have a pole or tower.

Public Involvement

OPPD is experiencing a growing demand for electricity across all customers.

As part of our public power promise, OPPD is committed to informing, educating and engaging customers on projects and key business decisions.

Project Information Line
402-262-0643

Right of Way

Our team is working to minimize the right of way needed for construction, operation and maintenance of the transmission lines. Once a final alignment is determined, OPPD will work directly with impacted landowners to gather additional information used for the detailed design of the transmission lines and will explain the right-of-way process, including proposed or existing easements.

OPPD will meet with landowners along the route to discuss:

- Overview of the transmission line and project details
- Property characteristics and challenges
- Ownership rights
- Proposed or existing easements (and easement acquisition if necessary)
- Utility access needs for the new or rebuilt line
- Construction and restoration following completion, including construction-related damage reimbursement

An **easement** gives OPPD the right to use another's land for a specific, limited purpose. It does **not** grant full ownership of the land to the utility.

Moody/Focht

**ACQUISITION OF PROPERTY RIGHTS
FOR UTILITY OPERATIONS INFRASTRUCTURE PROJECTS**

DRAFT RESOLUTION NO. xxxx

WHEREAS, the District will need to acquire all necessary permanent and temporary easements as needed along the three line segments of the North Douglas County Transmission Project to support load growth and reliability in the northern Douglas County area; and

WHEREAS, the District is authorized by Nebraska law to acquire property and easements by eminent domain; and

WHEREAS, the use of eminent domain may become necessary to acquire the permanent or temporary easements that cannot be obtained voluntarily through negotiations by the District.

NOW, THEREFORE, BE IT RESOLVED by the Board of Directors of the Omaha Public Power District that Management and the District's General Counsel are authorized by the Board of Directors to commence eminent domain proceedings for all necessary permanent and temporary easements as needed on parcels not acquired voluntarily after all reasonable efforts have been made, with this authorization extending through the duration of the North Douglas County Transmission Project.

Action Item

BOARD OF DIRECTORS

November 19, 2024

ITEM

Dedication of real property to the Village of Dunbar, at the intersection of Indiana Street and Wheeler Street, Dunbar, Nebraska.

PURPOSE

Dedication of approximately 13,145 square feet of real property, as shown on Exhibit A, to the Village of Dunbar for roadway purposes at the intersection of Indiana Street and Wheeler Street.

FACTS

- a. OPPD's Board-Staff Linkage Policy, BL-10: Delegation to the President and Chief Executive Officer – Real and Personal Property, directs that "All sale or transfer of property ownership shall require Board approval."
- b. The proposed dedication of the identified real property will not adversely affect OPPD's operations on its adjacent property now or in the future.

ACTION

Authorization by the Board of Directors to Management to dedicate the identified real property to the Village of Dunbar.

DEDICATION OF REAL PROPERTY TO THE VILLAGE OF DUNBAR, AT THE INTERSECTION OF INDIANA STREET AND WHEELER STREET, DUNBAR, NEBRASKA

RESOLUTION NO. 6XXX

WHEREAS, the Omaha Public Power District (the "District") wishes to dedicate 13,145± square feet of land that is part of the District's railroad right of way located in the Village of Dunbar, Nebraska, for roadway purposes at the intersection of Indiana Street and Wheeler Street; and

WHEREAS, the dedication of the property designated to be dedicated will not adversely affect the District's operations on its adjacent property now or in the future.

NOW, THEREFORE, BE IT RESOLVED by the Board of Directors of the Omaha Public Power District that Management is authorized to dedicate to the Village of Dunbar certain real property consisting of 13,145± square feet of land located at the intersection of Indiana Street and Wheeler Street, as described on Exhibit A attached hereto.

Nuclear Oversight Committee Report

PURPOSE

The Nuclear Oversight Committee provides a regular oversight of items related to Fort Calhoun Station (FCS).

FACTS

In addition to safe and secure dry cask storage of fuel, the required Preventative Maintenance tasks and Surveillance Tests, the following major decommissioning activities were conducted:

- a. With removal of the large components from containment, which includes both steam generators, the pressurizer, and four reactor coolant pumps, the focus has shifted to removal of the remaining bulk equipment and structures. Most of these remaining structures have been demolished and are being actively shipped for disposal.
- b. The project team continues to perform radiological surveys throughout the site to ensure conditions will be met for eventual release of the site for unrestricted use. Independent surveys conducted by the Nuclear Regulatory Commission's contractor continue to be performed as part of the oversight process.
- c. The Decommissioning Oversight Committee met in October to review project progress and the plans to complete the project. The members provided positive comments and suggested additional opportunities to complete the project safely, effectively and efficiently.

Early August

Mid-September

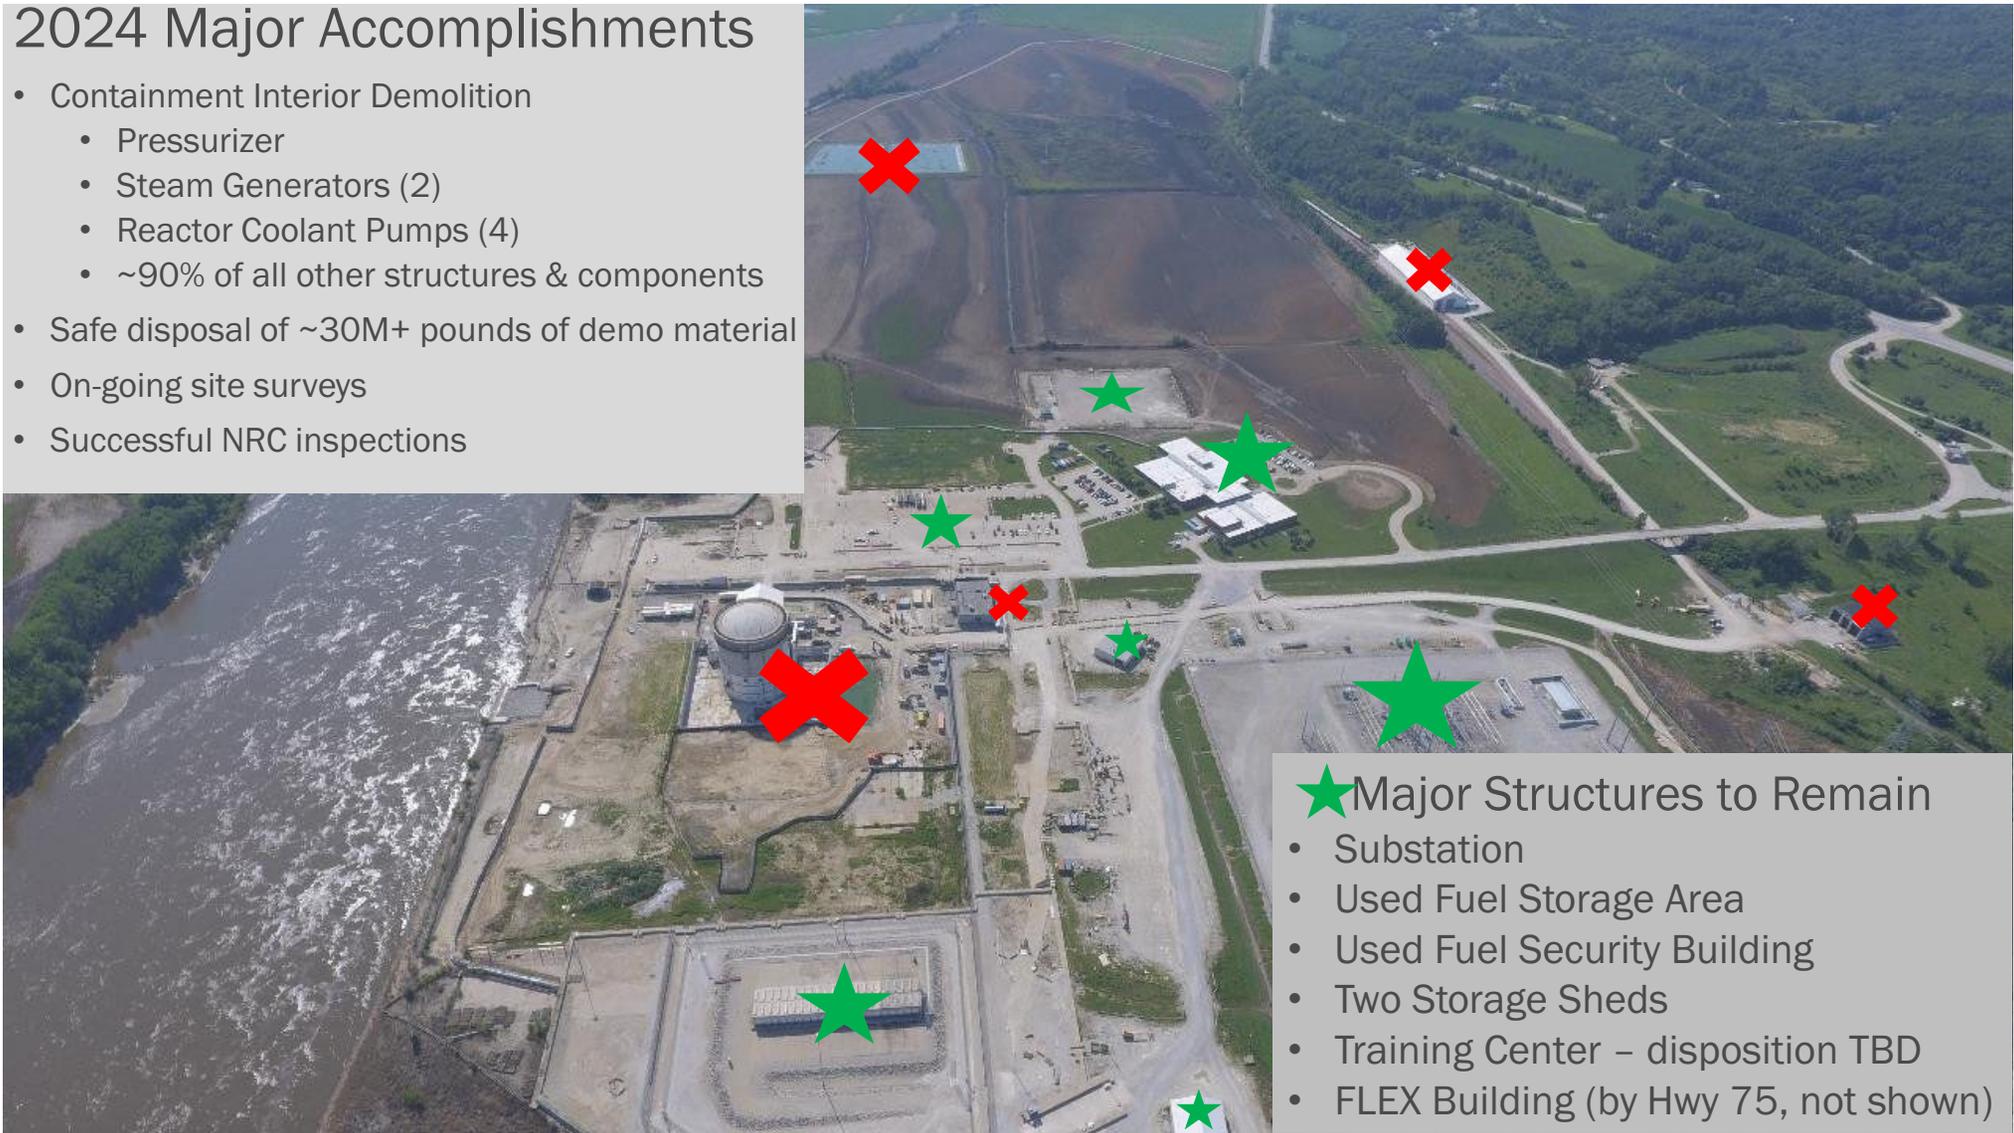

Containment Interior Demo Progress

Containment Interior Demo Progress

2024 Major Accomplishments

- Containment Interior Demolition
 - Pressurizer
 - Steam Generators (2)
 - Reactor Coolant Pumps (4)
 - ~90% of all other structures & components
- Safe disposal of ~30M+ pounds of demo material
- On-going site surveys
- Successful NRC inspections

- ★ Major Structures to Remain
 - Substation
 - Used Fuel Storage Area
 - Used Fuel Security Building
 - Two Storage Sheds
 - Training Center – disposition TBD
 - FLEX Building (by Hwy 75, not shown)

Looking Forward

2025

- Complete removal of components & structures within containment
- Remove remaining ancillary structures & backfill associated footprints
- Conduct demolition of the containment structure
- Continue site radiological surveys

2026

- Complete the last shipment of radiological waste* & remove shipping facility*
- Achieve **Substantial Completion** – completion of the physical work necessary to achieve the acceptable radioactivity levels mandated by the NRC
- Complete site radiological surveys*
- Submit the license termination package to the NRC for approval*

* Associated with projected staffing reductions (currently ~40 people total)

Advanced Metering Infrastructure (“AMI”) Program Update

PURPOSE

Provide the Board of Directors with an update on execution progress for the AMI ecosystem of technologies and to report key decisions made.

FACTS

- a. The AMI Ecosystem program will enable two-way communication between OPPD operators and each customer meter, provide detailed energy usage data to help customers make informed decisions, improve account access and self-service, enhance reliability through grid situational awareness, provide better outage information, and set the stage for future interactive, customized products and service options.
- b. OPPD is currently performing testing across the complex ecosystem of integrated technologies. OPPD will roll out the new supporting technology across three (3) releases in 2025 and early 2026. A new outage map will provide details on outage status and estimated time of restoration (ETR). The new Customer Platform will provide a multi-channel experience for customers to receive updates, as well as the ability to login to view account details and perform self-service activities through MyOPPD. The MyOPPD mobile app will provide ease of use for customers on the go.
- c. Development of the strategic approach for customer outreach and engagement is underway. A cross functional team and our strategic partner are building a holistic campaign including a comprehensive communication and engagement schedule that builds on our message that we’re providing new and better experiences for all our customers.

AspenTech/OSI OMS

Geographic Information System (GIS)
ESRI ArcGIS

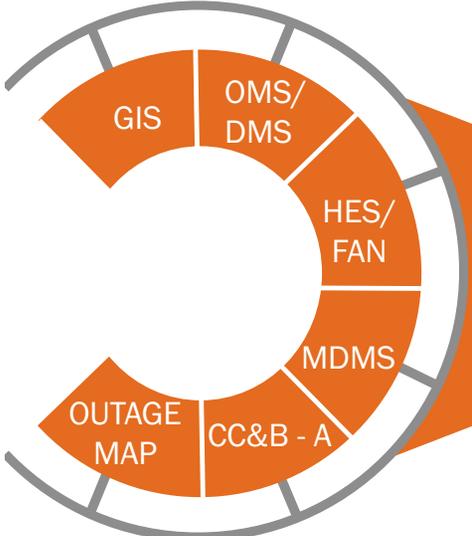

Field Service Management (FSM)
SEW Smart Mobile Workforce

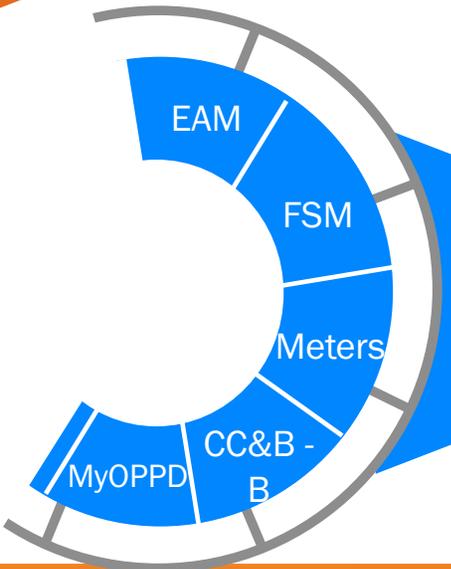

Testing complexity

Testing for 500+ scenarios with multiple use cases

Systems must talk to one another, deliver the right information and deliver a seamless experience that meets employee needs

Release 1A
June 2025

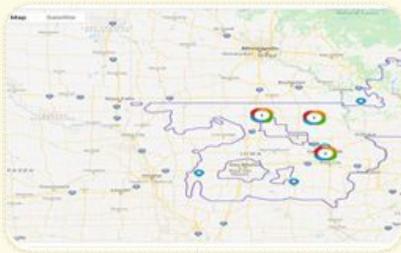

Highest Priorities:
Successful Operations
& Customer Experience

Release 1B
Oct 2025

System Integration Testing
End-to-End Testing
User Acceptance Testing
Performance Testing
Final Site Acceptance Testing

Release 1C
January 2026

Summary and Timing of Customer Capabilities

Release 1A June
2025
NEW Outage Map

- *Grouped by Outage Event*
- *Outage Status*
- *Estimated Time of Restoration (ETR) published to the map once determined*
- *Outage cause (if known)*

Release 1B Oct 2025
Customer Platform
Web Portal – “MyOPPD”

- *Customer Messaging*
- *Self Service*
- *Soft Launch meter deployment begins*
- *Detailed usage becomes available on MyOPPD for soft launch customers*

Release 1C Jan 2026
Customer Platform
Mobile App

- *Self Service via App*

Program Spotlight: Future Storm Response

The AMI Ecosystem will enhance OPPD's ability to respond to major events.

WHAT CAN WE EXPECT AT THE MVP GO-LIVE IN 2025?

• Today

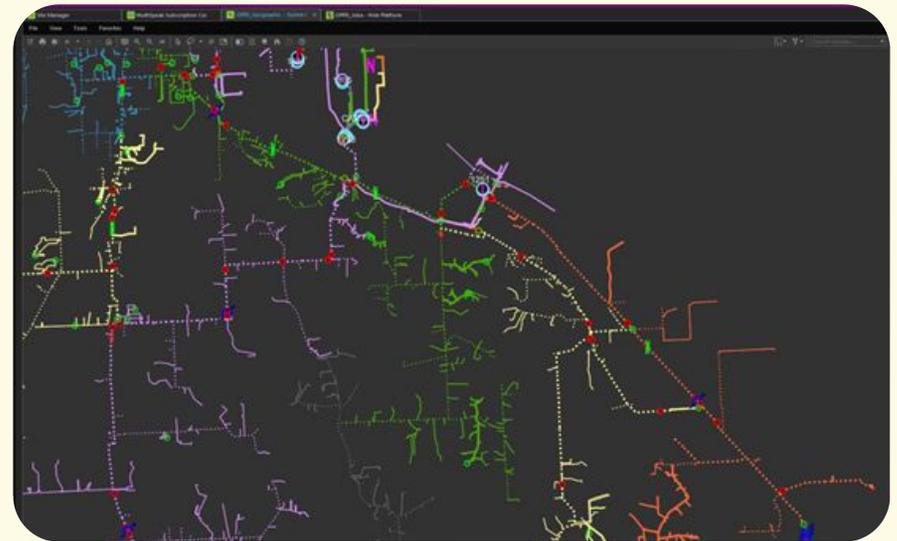

- We rely on customers to call in or submit an outage online to let us know they're out
- We're not able to proactively update customers with notifications and details specific to their outage

• After major releases in 2025 Customers will Experience:

- Customers will still need to call or submit an outage online
- Once OPPD is aware of the outage, customers who have signed up for alerts in the new customer portal will receive updates via text, email, or phone
- Outage status – via the new Outage Map and/or preferred notification channel when a crew is on their way and working on the system
- Ability to manage their outage impact through estimated time of restoration (ETR) updates (via map and messaging)
- Communication when power is restored and the ability to verify for us that power has been restored (via messaging)

• In the Future, after Full Meter Deployment (2026-2028):

- New AMI meters will allow OPPD to see every home and business that is out of power (when installed)
- Customers with legacy meters will still need to call in to report until they have a new meter

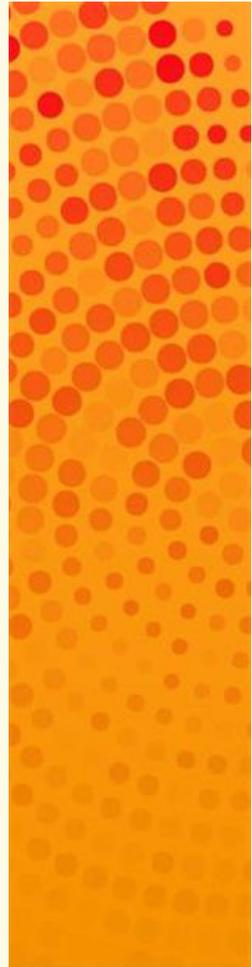

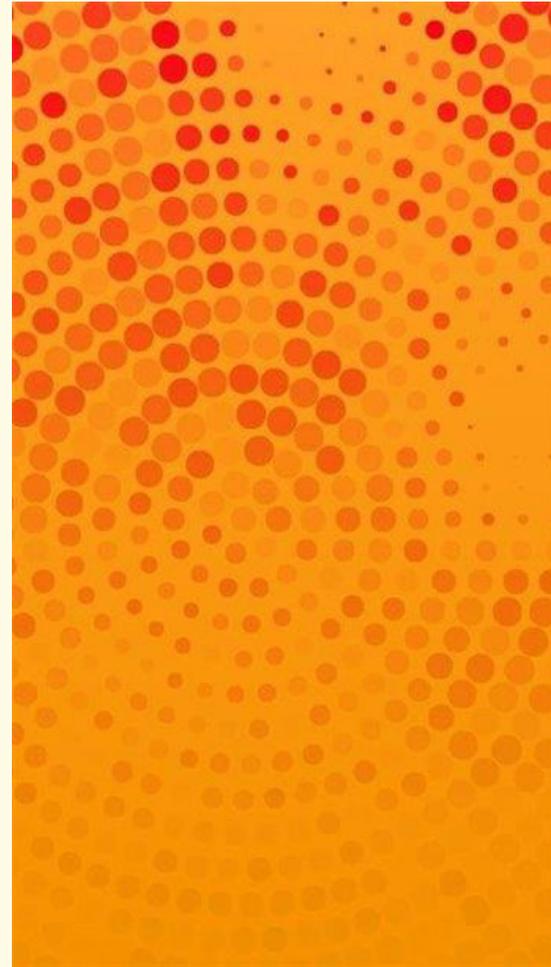

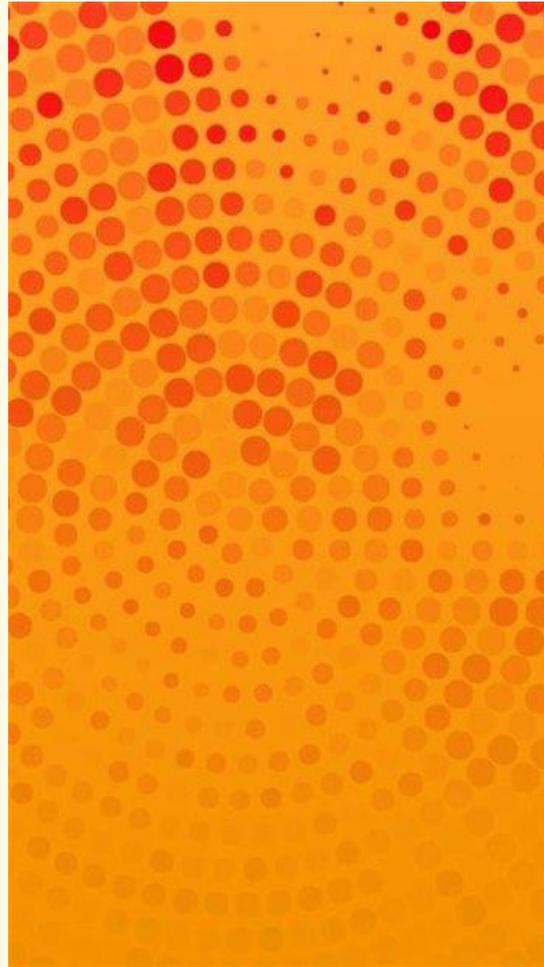

Marketing, communication & education

Approach

- Internal Team and Strategic Partner are designing our communication and outreach plans:
 - 1) Designing customer journeys
 - 2) Highlighting the capabilities and value of AMI and the new MyOPPD customer platform
 - 3) Providing awareness to when work is happening
 - 4) Educating key stakeholders and community leaders
 - 5) Continuing communication post-install
 - 6) Build on the message that we're delivering new and better experiences for all customers in 2025
- Our team is setting up a comprehensive communication and engagement schedule
 - 1) Building tools for aligning schedules, tracking progress and measuring effectiveness
 - 2) Cadence of messaging
 - 3) An overview of the plan will be presented at the February 2025 All-Committees Meeting

Q&A

Agenda

OPPDP BOARD OF DIRECTORS
REGULAR BOARD MEETING
Thursday, November 21, 2024 at 5:00 P.M.

*Conducted in person at the Omaha Douglas Civic Center, 1819 Farnam Street,
2nd Floor Legislative Chamber, Omaha, NE 68183*
