

HELP PLAN OPPD'S ENERGY FUTURE

Every five years, OPPD turns to the public for input on ways to strengthen, expand and modernize the electrical grid that serves eastern Nebraska.

That feedback helps create a broad, high-level roadmap, known as an Integrated System Plan, to guide the utility's work over the next decade. The next ISP workshop will be in September. Check OPPDCommunityConnect.com/isp for exact information once it's available.

Traditionally, OPPD has crafted an Integrated Resource Plan that focused solely on how to generate electricity.

The U.S. Department of Energy requires OPPD to submit a plan every five years to qualify for federally generated hydropower from the Western Area Power Administration

that OPPD currently receives.

But as the electrical grid grows and demand rises, OPPD engineers decided to broaden their approach. The Integrated System Plan will consider generation sources along with

transmission and distribution infrastructure and “customer solutions” - everything from rooftop solar programs to customer incentives to reduce energy consumption and improve efficiency. **Learn more at OPPDCommunityConnect.com/isp.**

OPPD HELPS MEET GROWING COMMUNITY NEED

The crowd began gathering early - well before the doors opened - stretching down the sidewalk as families waited to attend a Community Resource Fair hosted by OPPD and M.U.D. in North Omaha.

When individuals and families face challenges meeting basic needs such as food, housing, utilities or medical care, having a central place to learn about available resources can make a big difference. The community resource fairs are designed with that purpose in mind.

More than 25 nonprofits and other community organizations set up stations at the event showcasing their programs and advocacy efforts. Attendees moved from table to table, taking in information on weatherization, customer assistance

programs, financial planning, public safety, education and billing and payment solutions.

The one-stop-shop layout makes it easier for families to learn about multiple resources and receive energy assistance in one visit.

These fairs serve as an important touchpoint, offering the community valuable information while helping OPPD and our partners to reach customers where they are. The next fair is scheduled for October in South Omaha.

NO JULY BOARD MEETINGS

AUGUST BOARD MEETINGS

All-committee meeting:
Tuesday, August 18, 10 a.m.

Regular board meeting:
Thursday, August 20, 5 p.m.

(See oppd.com/BoardMeeting for details.)

Hearing-impaired call 531-226-3515, 72 hours prior to request an interpreter. Agendas posted and meetings viewable on oppd.com/BoardMeeting.

NEW SOLAR PROJECT HELPS OPPD EXPAND, DIVERSIFY PORTFOLIO

OPPD is taking another step to expand its generation portfolio with a new utility-scale solar project in Nebraska.

The utility has entered into a power purchase agreement with Sandhills Energy for the Burt County Solar Project, a 250-megawatt (MW) solar facility in Burt County. Expected to be in service in 2029, the project will generate enough electricity to power approximately 50,000 homes.

The project strengthens OPPD's ability to deliver reliable power by expanding the mix of available resources. Incorporating more solar generation into a broad portfolio allows OPPD to respond more effectively to seasonal demand patterns, changing system conditions, and extreme weather events.

Sandhills Energy, a Nebraska-based renewable energy developer, has

experience advancing projects across the region and works closely with landowners and communities to align projects with local priorities.

The Burt County Solar Project builds on OPPD's broader efforts to add new solar and other generation resources across its system. The utility anticipates

the completion of the 420-MW Pierce County Energy Center in spring 2027, a solar facility developed in partnership with NextEra Energy Resources and Google.

For more information about Sandhills Energy, visit sandhillsenergy.com.

Storm season is here, and one big step you can take to prepare is to **sign up now for the MyOPPD app and subscribe to notifications.**

Enrolled customers can get up-to-date notifications about power outages without having to call OPPD's customer service center. This includes confirmations that OPPD is aware of their outage, estimated restoration times from the field and a notification when power is restored.

To get these notifications, customers should log in and click the "Account" menu, followed by "Notification Preferences." Then, enter your preferred contact method

(email, phone or text) and turn on the preference.

Similar notifications are available for bill updates, services, daily usage alerts and marketing preferences.

The new MyOPPD app replaces the previous app, OPPDConnect. If you used our previous app, just delete it and download the new MyOPPD app.

MyOPPD offers many other neat features for customers, including an outage map that lets you find and track specific outages, a streetlight outage map, and optional marketing information about OPPD products and services (energy assistance, rebates and so on).

REMINDER ABOUT NEW OPPD REMITTANCE PROCESS

Beginning July 1, 2026, all mailed payments must be sent to our new address: P.O. Box 6051, Omaha NE 68106.

Please update your payment settings to reflect P.O. Box 6051 before July 1. After June 30, mail sent to P.O. Box 3995 and 3065 will be forwarded, which may delay timely posting of your payment.

IN 2026, OUTLETS WILL PUBLISH ONCE EVERY OTHER MONTH.

The publication months are January, March, May, July, September and November.
